Mix the bran with the sifted flour dry ingredients. Make a well in the centre and add the egg and milk well beaten. Then add the flavour, melted shortening and lastly the Magic Baking Powder. Half fill greased muffin tins and bake in a hot oven, 400° F., 15 to 20 minutes. A few chopped raisins or dates added to some of the muffins is liked, may be added.

FREE COOK BOOK—When you bake at home, the new Magic Cook Book will be a great help. It contains 100 of the best recipes ever collected for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave., and Liberty St., Toronto, Ont.

Little Helps For This Week

"Speak unto the children of Israel, that they go forward."—Exodus 14: 15.

"No man having put his hand to the plough, and looking back is fit for the kingdom of God."—Luke 9:62.

Be trustful, be steadfast, whatever befalls you,
Only one thing do then ask of the Lord,
Grace to go forward wherever He guide thee,
Simply believing the truth of His word.—Adam.

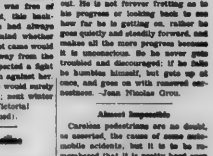
The soul ceases to worry itself with planning and forecasting, giving itself up to God's holy spirit within, and to the teaching of His providence without. He is not forever fretting as to his progress or looking back to see how far he is getting on, rather he goes quietly and steadily forward, and makes all the more progress because it is unconscious. He is never quite troubled and discouraged; if he has to be humbles himself, but gets up at once, and goes on with renewed earnestness. —Jean Nicolas Grou.

Almost Impossible

Careless pedestrians are no doubt, to be asserted, the cause of some automobile accidents, but it to be remembered that it is pretty hard even for a careful pedestrian to look four ways at once at a street intersection.

SIMPLY WORN OUT?

Take Lydia E. Pinkham's Vegetable Compound



Lydia E. Pinkham's Vegetable Compound is a medicine for women, and has been for more than 60 years. It is made from roots and herbs, and has a record of many years of splendid service. There are many of these women who have written voluntarily to tell what it has done for them.

Mrs. Ethel Hall, 1 Bellevue Ave., Brantford, Ont., writes: "I was simply worn out, and had no ambition. I had a bad pain in my side, and was very nervous. I took Lydia E. Pinkham's Vegetable Compound and it has done me a world of good. I am now strong and well, and can do my housework without any trouble. I recommend your medicine to my friends."

Buck Bus' Is Done At Inaugural Meeting of Town Council

The first meeting of the new council of the Town of Fort Saskatchewan was held in the Town Hall on Monday the 20th. Instead at 8 p.m.

Present Mayor Montgomery, Councillors, Lalonde, Fillmore, Magor, Watt, Graham and Neale. A return was submitted by the Secretary-Treasurer in his capacity of Returning Officer, showing results of the Municipal Election, and the Secretary advised His Worship the Mayor that—all new members of the Council had made and subscribed a declaration of Office as called for by the Town Act. His Worship extended a cordial welcome to the new Councillors.

The minutes of the last meeting held were read and adopted. Councillor Fillmore was elected Deputy Mayor for the next 3 months.

The following is the personal of the various committees:—

Finance

Councillors Lalonde, Chairman, with Councillors Fillmore and Watt.

Fire, Water and Light

Councillor Fillmore, Chairman, with Councillors Graham and Watt.

Public Works

Councillor Graham, Chairman, with Councillors Fillmore and Magor.

Health and Relief

Councillor Neale, Chairman with Councillors Lalonde and Magor.

License and Police

Councillor Magor, Chairman, with Councillors Neale and Graham.

Town Property

Councillor Watt, Chairman, with Councillors Neale and Lalonde.

Report of the Medical Health officer, Dr. Moore, for January, read and filed. 5 applications for relief were considered and approved, same to be sent to the Provincial authority.

One application for the old age pension was authorized by the Council. An application was received under the Preliminary Relief Settlement plan 1905-1906, but was not approved by the Council.

A bylaw was passed appointing Jos. Ritchie, the Sec.-Treas. to be assessor for the Town of Fort Saskatchewan, and for the School District No. 91, for the year 1933.

The question of insurance on the Memorial Hall was brought up, and the Secretary was authorized to renew the policies.

A resolution was passed that the Council meetings be held on the first and third Wednesdays of each month in future.

A motion was passed that the Town Council expend no money exceeding $900.00 in any one year, except general expenditure for the Town and School, without submitting the expenditure to the ratepayers above $900.00 in or for any one case. The meeting adjourned.

FINANCIAL STATEMENT OF THE SUN LIFE ASSURANCE CO.

In a year when business statements are, on the whole, far more cheering the published experience of life insurance makes heartening reading.

While other investments have too often proved disappointing, every policy held in our life insurance companies is still worth one hundred cents on the dollar,with substantial additions in accumulating dividends.

The report of the Sun Life, appearing in another part of this paper, refers to the fact that the total of its insurances in force—nearly three billion dollars—will be payable during the present generation. If to this huge sum be added the amount payable during the same period by other insurance companies the wholesome effect upon the economic and social situation in the coming years can scarcely be [illegible]

Motor traffic in to Alberta last season totalled more than 21, 000 cars, according to figures released at Ottawa. Of this number, nearly 1,000 registered in for a stay of as to 60 days.

Old Time Dance & Social To Be Given Tuesday Night

Tuesday, Feb. 28th, 1933 will be a Gala night in Fort Saskatchewan. The Business and Professional Men of the Town have issued invitations to the surrounding countryside to a real Old Time Dance and Social to be held in the Masonic and Memorial Halls simultaneously. Old Time Dances, Old Time Music, and that real Old Time Community feeling

The "Northern Rangers", well known radio artists, will be there in person, as will also "The Arcadians", another high class dance organization. For those who do not dance, cards and comfortable chairs will be provided.

Ladies are asked to kindly bring baskets, but hot tea and coffee, and iced lemonade will be provided.

In order that there may be no confusion, invitation cards have been issued definitely stating to which halls you have been invited. Guests for the Memorial Hall will please park their cars on Government Street south of the hall, facing the Glad grounds. This will leave the Public Highway clear of obstruction. Guests to Simmons Hall can park on Kaa Street on which street the hall is situated. Accommodation will be provided for teams.

The people of Fort Saskatchewan are cordially invited to be present, and to assist in the entertainment of their friends from the country.

No effort will be spared to make this a real Old Time Celebration, and it is hoped that as many as possible will avail themselves of their invitation.

Legislature News

The galleries of the Alberta Legislature were crowded to the doors last Monday to hear W. E. Hawson, the Liberal leader, open the debate on the speech from the Throne. Mr. Hawson backed up his statements by quoting the published records of the government and during the course of his address stated that if the government was to adopt the C.C.F. Platform of nationalization they should resign and appeal to the people for a new mandate.

In the absence of the Premier the Minister of Education took up the case for the government, and in his usual "merry mood" assured the House and country at large that all was well. He defended the expenses of every department. The doubling of the Provincial debt is justified, provided the other Provinces has made the same blunder. His speech was very entertaining, but consisted in a great measure of clippings from various newspapers. One pleasing feature of his address, however, was that if his department was costing too much it would be run for less. If the lumber service of [illegible] dollars was too high for the Edmonton Normal School, it could be reduced.

Mr. D. M. Duggan, leader of the Conservative Party, in one of the best speeches heard in the house this session condemned the financial policy of the Government, a combination of which he feared might lead to default. He stated the debt has now reached the staggering sum of $145,000,518. In other words $190.50 for every man, woman and child in Alberta. This, he said, when added to Federal and Municipal debts, was truly alarming.

Mr. Duggan was followed by Mr. Fred White, leader of the Labor Party who in his eulogy of the C.C.F. gave the impression that the U.F.A. and Labor had been swallowed up entirely by the former organization and were no longer distinct bodies. Had there been any doubts in the minds of any persons they were removed by Mr. Gibbie, member for Edmonton, who then spoken since confirming Mr. White's declaration.

Only two farmers have spoken so far, Mr. Bowen of Calgary on the Liberal side, and Mr. Claypool on the Government side. They were both well received and [illegible]

Thursday.

New School Board Held First Meeting Last Monday

The first meeting of the new School Board was held in the Town hall last Monday night at 7.30 There were present Mr. F. Atkinson, Mr. R. A. Brown, Dr. Grunert, Dr. Calhoun and Dr. Turner it was moved by Dr. Calhoun and adopted that Mr. F. Atkinson be elected Chairman for the coming year, and on the motion of Dr. Grunert, adopted Mr Ritchie was reappointed Sec Treas. at the same remuneration, $[illegible] per annum. The Chairman Mr. Atkinson extended a warm welcome to the new trustee, Dr Turner.

The Secretary reported that the newly elected members had signed th Declaration of Office as required by the School Ordinance. The minutes of the last meeting were read and approved on the motion of Dr. Calhoun.

On the motion of Mr Brown it was decided by the Board to continue holding its meetings on the first Monday of each month at 7:30 p.m.

The following accounts were passed for payment on the motion of Dr. Calhoun: A. M. Carscadden $6.00; R Gordon Fraser Bond $4.00; G. A. Simmons [illegible]

The Principal, Mr. Anderson, was present and discussed school matters with the Board.

The meeting adjourned on the motion of Mr. Brown

Josephburg News

A large number attended the Junior U.F.A. dance held in the school on Friday, February 17th.

At midnight refreshments were served by members of the U.F.A.

A novelty silhouette dance was the feature of the evening, with Miss Elsie Miller of Lamont and Mr. Walter Prior winning the prizes.

The Redskin orchestra supplied the music for dancing.

WOMEN'S INSTITUTE NEWS

In spite of the severe cold a good turnout of members of the Women's Institute attended the meeting on Feb. 9th, when Mr. Stanley Hambly gave an address on School Festivals. He told of their inception in the province and of their growing popularity. He outlined the procedure in organizing a School Festival and set out into the interesting details of the one in the Lamont Inspectorate. The 1934 Festival will be held in the Fort and Mr. Hambly bespoke the interested co-operation of the Institute towards making it an unprecedented success. The thanks of the Institute were tendered Mr. Hambly for his interesting and timely address by Mrs. F. H. Walton.

The Institute is arranging for an art exhibit and lecture to the School students by Professor James Adam, under the Carnegie Trust, to be followed by an illustrated lecture in the evening to which the public will be invited. Announcements concerning this will be made later.

HOCKEY

By winning at Bruderheim 4-1 on Monday night, the Fort hockey team won the Victoria Hockey league championship and the bye into the McQueen cup.

Lamont and Chipman are playing a home and home series to decide which team will face "the local boys" in the 3 out of 5 playoffs.

Watch the bulletin board on the corner for announcements of the first play-off game in the Fort.

"Tip" Collins manager of the Fort team deserves great credit for having piloted his squad into such a strategic position in the Victoria Hockey League.

The World Wheat Situation

The time is rapidly approaching when the farmers of Western Canada will once again be busily engaged in sowing their land. As they do so their thoughts naturally will speed forward and they will ponder on the possibilities of the harvest that will result from their sowing. But this year, probably to a greater extent than ever before, their thoughts will not dwell so much upon such aspects of the harvest as the number of bushels to the acre that may be threshed, or the grade that will be obtained, important as these always are. Just, rather, upon the price that it may be possible for them to receive; that is, whether in the long run, they will reap a profit above the costs of production for their season's hard work.

In volume of production, the wheat growers of Western Canada had a good crop last year, nor was there much to complain about in the average grade secured. True, some sections of this vast prairie country again suffered from drought, but the soon as affected was much smaller than in the preceding year. Nevertheless, disaster befell our wheat growers because the price obtainable for wheat reached the lowest point in hundreds of years, for last autumn saw the end of the long period of high prices for wheat. And as nothing true approaches, there has been practically no betterment in prices. The prevailing price is still less than it will cost the farmer to produce the wheat.

Like the weather, and many other factors, the price of wheat is something beyond the power of the farmer to control. He is forced to accept the prevailing world price. Even the so-called six cents a bushel preference in the British market means little or nothing to him because he still must sell in that market at the prevailing world price. The so-called preference will not add a fraction of a cent to that price.

Under these circumstances, farmers, and everybody else, are interested in the world wheat situation, because it is that situation which will be the price-fixing and controlling factor. We propose, therefore, to present for the information of readers of this column, certain facts and figures compiled by Donald H. Mavety, Economist, for the Royal Bank of Canada, which were made public on February 1.

First. World shipments of wheat since August 1, 1932, were the smallest in ten years. Shipments to the United States were small, but other countries took only moderate amounts, and shipments to Europe were very light, as the result of the record crop harvested in many European countries last year. Shipments from other countries required a heavy decline in overshipping more than one-half of all the wheat shipped from all wheat exporting countries.

Second. The reason why Europe took only moderate quantities of wheat during the last half of 1932 is accounted for by the fact that bumper crops were harvested there in 1932, and new high records in wheat production were established in Germany, Italy, Spain, Portugal, Greece, Hungary, Czechoslovakia and Czecho-Slovakia, while France produced 68,000,000 bushels more than in 1931. As a result Western Europe produced 180,000,000 bushels more than in the previous year. In order to dispose of their supplies, tariffs, quotas, and other restrictions on wheat imports were negotiated by America. On the other hand, Russia and the Danubian countries had smaller crops and practically no wheat to export.

Third. In 1932, owing to unfavorable conditions, wheat production in the United States dropped 175,000,000 bushels compared with 1931, and was 136,000,000 bushels below the five-year average. But, while the U.S. thus raised only about sufficient for its own use, it still had a large carry-over from previous years. The Australian crop showed an increase of about 16,000,000 bushels, and Argentine an increase of practically the same amount.

Fourth. Canada's big crop last year, added to its carry-over from previous years, gave us total wheat supplies for the period August 1, 1932, to July 31, 1933, of some 566 million bushels. Of this, 136 million bushels are required for domestic purposes, leaving 441 million bushels for export. Of this latter amount, 140 million bushels have already been shipped, thus leaving about 300 million bushels to ship before the end of July, or to be carried over Broomhall, the British export, estimates that another 180 million bushels will be exported by Canada, leaving a carry-over on August 1st next of around 120 million bushels, or from 15 to 20 million bushels less than a year ago

Now, as to present and future prospects. The condition of the winter wheat crop in the United States was, on December 1st last, officially reported as the lowest since 1845. Australia is selling much of her wheat in the Orient. Wheat importing countries will, however, require about 82 million bushels less in 1933-34 than was the case in 1931-32. European imports have been restricted in the first half of the present crop year, and it is probable that the disposal of the domestic supplies crushed by the bumper crops already referred to. It is to be expected that Europe's demands will be much heavier between now and July 31 next.

On the other hand, the total surplus of wheat available for export is more than ample to meet all requirements. Supplies in the Southern Hemisphere are about the same as last year. Heavy stocks are still held in Canada and the U.S. Russia and the Danubian countries are, however, not in a position to export in the same volume as in previous years. Winter wheat crops have suffered in Europe as well as in the U.S although it is too early to estimate the ultimate outturn.

More than 13,000,000 tons of peroxide were shipped from Argentine geographical formation resembling that in Texas.

Oil has been found in Austria, the

Pains Around Her Heart Went Out After Using Dodd's

Mrs. Henry Rauch, Muriel Lake, Alta., writes:—"Last fall I had bad pains around my heart, and each morning, after doing a little housework, I seemed to get dizzy and had to stand and rest.

Seeing that Milburn's Heart and Nerve Pills were good for these troubles I sent for a box, and after taking the Pills for a few days I felt a whole lot better. Since then I have had no return of the dizzy spells and pains around the heart."

Price 50c. per box, at all dealers and general stores, or sent direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Forecasts Revival Of The Timber Industry

B.C. Forester Believes Lost Year Marked Low Ebb

"Stocks of logs in the water and handled mills in mill yards are now smaller than they have been at any time during the last three years, and any improvement in business conditions will mean immediate activity in logging and milling to fill orders," said a statement on the timber industry of this district by A. E. Parkhurst, district forester, at the annual meeting of the Prince Rupert chamber of commerce.

"Yard stocks of poles which were large at the beginning of 1930 have been drawn on gradually for two years with little or no replenishment. Telephone, telegraph and power lines depreciate at the same rate, whether maintained in good order or not, and the time is near when extensive repairs and replacements will be necessary if the lines are to be maintained. Similarly, the railroads have on hand large stocks of ties on hand at the end of 1932, have purchased very few since then, and must soon place another large replacements to maintain their lines.

"From every angle there is reason to anticipate that 1933 marks the low ebb of the timber industry in this district and that 1933 should show at least a partial return to normal activity."

Indoor Gardening

Interest These Days In Centering On the Real Enjoyment

The season for indoor gardening is here! Now until the time when the spring actually arrives, continuous sunshine will spend hours after hour pouring over the brilliantly illustrated pages of the seed catalogues, hoping for an early thaw and tasting, mentally, of the delights which come to jaded appetites with the appearance of the first fresh vegetables of the year.

Then, there is the fun of planning the flower plot, an important first step and one which is best undertaken at this season of the year well in advance of the time when home gardeners can actually take to the yard with shovel, hoe, hoe and trowel at flower garden, well planned ahead of the planting time, recently present the most beautiful arrangement of colors, more orderly arrangement as to height of the various plants and an assortment of varieties which bloom in succession so that the garden is never without flowers.

The annual catalogues of A. E. McKenzie Company, Ltd., whose headquarters are Brandon, has just been received by customers throughout the prairie provinces. It contains all of the standard and reliable varieties which have been grown in Canada successfully in past seasons and, in addition, includes a large number of new varieties which, according to tests, are thoroughly adaptable to the Canadian soil and climate and will add further variety to garden crops.

Included is a Sweet Cherry, a juicy, ripe fruit, used for eating, jams and preserves. The small tree, or bush, on which it grows is hardy and has been specially bred for adaptability to Canadian conditions.

This is the second year McKenzie's catalogue has listed commercial offering of Crested Wheat Grass, which is said to be very large producers, the feed problem of western Canada, because of its hardiness and its resistance to drought.

Also of interest in the World's Grain Exhibition and Conference, which is scheduled for Regina, July 26 to August 5. The Conference announces in its catalogue two Competitions, one for a Prize Essay and will be awarded for letters raising to the Exhibition, for predictions of total attendance, and so on.

Device Artificial Heart

Remarkable Results Have Been Reported By Pioneer Doctors

It is reported from Moscow that two doctors of the Institute for Blood Transfusion, have devised an "artificial heart" with which very remarkable results have been obtained in operations on dogs. With its help they succeeded in restoring the symptoms of life to the apparently dead body of a dog. The surgeon then carried out a series of operations on the hearts of living dogs with the help of the "artificial heart," the real heart being put out of action for four and a half minutes. The success was such, it is reported, that it is now possible to hope that similar operations on the human heart for diseases now considered incurable may become possible.

The electric motors of modern bathships have the energy of a million men.

Library Tribute To Lady Nicotine

Poets and Prose Writers Express Absolutely Rapt In Good Tobacco

Since the day when Sir John Hawkins, Ralph Lane, Governor of Virginia; Sir Francis Drake and Sir Walter Raleigh introduced and popularized smoking tobacco in England, tobacco has formed the inspiration of literary men and artists.

King James I., it is said to have voiced early objection to smoking, refusing to permit his mouth to be used as a chimney," but despite his royal prejudices, smoking became popular in England and, indeed, throughout Europe. Poets, prose writers and philosophers from the sixteenth century on have extolled its beneficence and acknowledged the comforting solace of the "blessed weed."

In modern days among those who found a congenial theme in tobacco have been Sir James Barrie, the novelist and playwright, whose tender whimsicalities have made him a beloved figure in English letters wherever English is spoken and read. "My Lady Nicotine" still remain a classic of its kind.

Rudyard Kipling, the Poet of Empire, crusher of "Et'ja," and "Soldiers Three," devoted several famous verses to his cigar:

"Open the old cigar box,
Give me a Cuba stout,
"For ways are running crossways,
"And Maggie and I are out.
"A million surplus Maggies
"Are willing to bear the yoke;
"And a woman is only a woman,
"But a good cigar is a smoke."

One of the most enthusiastic of modern eulogies on cigars comes from the mouth of a character in Thomas Mann's novel, "The Magic Mountain."

"With a good cigar in his mouth a man is perfectly safe, both up can and down. Literally. It's just like lying on the beach. When you lie on the beach, why you lie on the beach, don't you. You don't require anything else in the line of work or amusement, either."

Egypt's One Paper Mill

Located In Alexandria Produces Cardboard For Cigarette Boxes

There is but a single paper mill in Egypt.It is located in Alexandria and produces a cardboard for making cigarette boxes, for which there is a substantial demand in that country. It uses wastepaper and rags obtained locally. Only forty-six tons of pulp for paper making were imported in 1931. There is a project on foot for the construction of a paper mill primarily intended to use raw local materials in the shape of certain kinds of vegetation, but for the production of the better grades of paper and newsprint is would appear necessary to use imported woodpulp.

Industrialization continues to lead in importance in South China.

Puzzle For Pawnbroker

Wedding Dress Pawned Forty Years Ago Awaits Owner

What is to become of a wedding dress which has been in pawn 40 years, during which period the interest was paid regularly, is being discussed by pawnbrokers of London.

Suddenly the payments have ceased, and pawnbrokers have been unable to trace the owner. The shop which took in dress once adjoined music hall, and the interest payments continued for many years ago, but the dress was transferred to another establishment and the interest payments continued. It is now held by Robertson's Ltd. The woman who pawned it never returned to see it. The dress, once height and fashionable with its trailing skirt of black, its green bodice stiffened with whale-bone, and its green leg-of-mutton sleeves, has grown old and faded, and now is unwanted.

NERVOUS WOMEN

Take Lydia E. Pinkham's Vegetable Compound

"I was so nervous I could not sleep at night. I had a pain in my side and was so weak I could hardly do my housework. I took Lydia E. Pinkham's Vegetable Compound and it has made me well and strong. I recommend it to my friends because it has done me so much good." — Mrs. Lena Hoffman, 1220 Ave. C, Fort Madison, Iowa. Mrs. Hoffman's Vegetable Compound helps to relieve such symptoms. Why don't you try it? If you want special advice write to Lydia E. Pinkham Medicine Co., Lynn, Mass. Your letter will be opened, read and answered by a woman.

No I'm For It

Lady of the House: "Why don't you go to work? Don't you know that a willing stone-picker no more?"

Tramp: "Madam, not to evade your question at all, but merely to obtain information, may I ask of what practical utility is mess to a man in my condition?"

Get Rid of That
SORE THROAT!

Any little soreness in the throat grows rapidly worse if neglected. Crush some tablets of Aspirin in some water, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel sure. For all soreness in head, neck or throat. There's usually a cold with the sore throat, so take two tablets to throw off your cold, headache, stiffness or other cold symptoms. Aspirin relieves neuralgia, neuritis, too. Use it freely; it does not hurt the heart.

ASPIRIN

TRADE MARK REG. IN CANADA

Population Of World Shows A Steady Increase According To The League Of Nations

The Statistical Department of the League of Nations has been counting noses, and gives the figure of the world's population, as at the end of 1931, at about two billion twelve million eight hundred thousand.

More than half of these people live in Asia. In fact, it is the most populous continent, having an excess of about 237 millions over all the other continents combined. Asia also has the most rapid increase in population in comparison with other parts of the world.

Europe, for the first time in history, has more than half a billion peoples On the first of January, 1932, the figure representing its population was greater than 500 millions The figure for the same date, 1931, was 490 millions.

The North and South American continents are followed by some 262 millions of persons at the end of 1931 an increase of four millions over the year previous.

The vast continent of Africa counts scarcely 142 millions of inhabitants. And interesting to note, the figure, for 1931, is two million less than for 1930 This is the only decrease recorded by any of the continents.

Australia, the remaining continent reported has ten millions of people at the end of 1931.

Some of the statistics given for the major countries of Europe are interesting. Russia, 177 millions, in 1931 against 174 millions in 1930; Germany, 64 millions, with no great advance in growth; Great Britain, 49 millions, no increase; France, 41 millions, an increase of 640,000 over 1930; Italy, 41 millions, a decrease of 660,000; Poland, 32 millions, an increase of a million; Spain, 24 millions, an increase of a million.

The world's population is increasing. That fact is one that has mainly ing implications, and if the growth continues at the present rate more than half a century it will be one of the most pressing problems then with been to be dealt with.

Fertilizing Pasture Lands

Heat Benefits Obtained When Combined Causing It Practised

Pasture land fertilized at the rate of 670 pounds per acre of a complete fertilizer made up to carry 3.13 animals to the acre when continuous grazing was practised. The same kind of land similarly fertilized but grazed rotationally was able to carry only 1.7 cows to the acre, and the same kind of land unfertilized and continuously grazed carried 1.63 cows to the acre. These results were obtained by the Dominion Department of Agriculture at the Experimental Farm, Shepherd, N.S. In getting the number of cows varied from week to week according to the condition of growth; and by careful management the best results were obtained. In addition to the pasture the cows received a grain ration at a rate consistent with the amount of milk produced. The land used in the experiment had been in use as pasture for most of the twenty-five years it had been under cultivation.

The results of this experiment go to show a saving of 1.1 pounds of meat per cow per day on the fertilized rotationally grazed area and 1.36 pounds on the fertilized continuously grazed area, as compared with the unfertilized land.

Greatest and Smallest Length

The greatest length normally measured by that term the earth is the river Nile, which, with its windings, is about 4,000 miles long. The smallest length is the diameter of a hydrogen atom, set down as a little more than one-million-billionth of an inch.

Canada's two largest lakes, wholly within Canadian territory are Great Bear Lake and Great Slave Lake, of which the first is the larger.

Glasgow, Scotland, plans to provide recreational and educational facilities for its unemployed.

Loss Of Ranch Flocks

Income Received Is Affected By Number Of Breeding Ewes

The number of breeding ewes per ranch is an outstanding factor affecting the income received by range sheepmen in Alberta and Saskatchewan, according to an economic survey of the range sheep industry conducted during the past three years by the Agricultural Economics Branch and Experimental Farms Branch of the Federal Department of Agriculture In analyzing the relation of size of business to one the records of 87 ranches were grouped according to the number of breeding ewes per ranch: 11 ranches had under 500 breeding ewes, 23 between 500 and 1,000, 18 between 1,000 and 1,499, 17 between 1,500 and 1,999, 5 between 2,000 and 2,499, 4 between 2,500 and 2,999 and 7 ranches had over 3,000 breeding ewes. Ranches which had less than 500 breeding ewes obtained an average ranch income of $441 whereas those which had between 1,500 and 1,999 breeding ewes secured $3,072. The income per ranch was found to increase with an increase in the number of breeding ewes until the group having 2,000 to 2,499 was reached and from this point declined indicating that these sheep ranchers who had between 1,500 and 2,000 breeding ewes had about the right balance between the number of ewes, amount of range, labor and equipment possessed.

Losing Their Manners

Conversation In Some Homes Impossible Since Radio Arrived

Has the radio developed a people with declining manners? It used to be considered the height of ill breeding, in the good old days, for anyone in the room to interrupt a conversation between guest and host, but these days are gone forever in radio homes, where it is very common for some one thoughtlessly or by design, to turn on the radio, and get a tooth-or-lunged announcer bellowing holiday, or a singer screaming the latest jass song to the utter disruption of conversation on any subject And in some homes the members of family of one made an observation on this utter lack of good manners

Cost Of Operating And Maintaining Port Of Churchill Will Always Be Very Moderate

No Lobbying Needed

Always a Door Mat At Number Ten Downing Street

However late the hour Premier Ramsay MacDonald and members of his family never have to worry about being locked out of their London home.

For No 10 Downing St. home of England's premiers and the most famous door in all London, is always open.

In the only private residence in the capital to which no one needs a latchkey.

Thanks to David Lloyd George, war-time premier, "10 Downing" has a door attendant night and day, and there is always a doorman on duty, and there is usually the Hon. and Right Honorable Miss Megan Lloyd George, M.P. to welcome her father home.

When Lloyd George came into power and took up residence at Downing St there was a little wooden hut hardly perceptible, on the door near the knocker, and by pulling the hank a string inside attached to it caused the bell and the outer entrance.

The simple village method did not appeal to Lloyd George, especially in war-time, and instructions were given for the door to be manned night and day

Up to the first year of the war it would have been possible for any stranger to have pulled the latch and entered the premier's residence, but nowadays every visitor is carefully scrutinized and asked his business before being permitted to enter even one of the ante-rooms

Life Of Wood Seals

Experiment Proves Some Carnivorous Strongly After Forty Years

An experiment to test the viability of wood seals has been reported by the Canadian Department of Agriculture Seeds of many kinds of woody were mixed with sand and placed in numerous pint bottles and buried from two to forty years before exhumation. The bottles were planted with the mouth downward to prevent the accumulation of water in the bottles.

The experiment has been carried on by the Michigan Agricultural College, and it has been found that after forty years buried in this way seeds of Black Medick, Peppergrass, Pigweed Ragweed, Wild Primrose, Common Mullein, Dandelion, and Curled Dock germinated vigorously.

These remarkable results led the Dominion Agrostologist to ask the question "Why farmers how long weed seeds will last?"

Do You Know?

Photograph, Canadian General Electric

WHAT although many years were spent in investigation it was not until 1930 that Bruce Sutherland established that the nesting place of the blue goose is in the Perry Island which lies north of the Hendson Straits and within the Arctic Circle? A photograph of the bird that led scientists to this discovery is shown above.

Owing to natural breakwaters the cost of operating and maintaining the port of Churchill will always be moderate whether the traffic be heavy or light, D W McLachlan, ex-mayor in charge of the Hudson Bay terminals told the Engineering Institute of Canada at the concluding session of its annual meeting at Ottawa.

Natural breakwaters or jetties at the entrance to Churchill harbor he explained, direct the tidal currents so that they perform a perpetual service by their scouring action in keeping the harbor from filling up. There are no cribs tidal fills or currents to deal with.

The expenditure to date chargeable to the Churchill development amounts to about $13,127,000, stated Mr. McLachlan. With work still to be done the cost on completion will be about $15,000,000 The net cost, according to Mr McLachlan would scale down to $12,000,000 If the dredging plant can be used for half its original cost and if allowance is made for an amount of $635,000 incurred through taking over plant formerly charged to the terminals at Port Nelson.

The further work required to complete the initial developments at Churchill Mr. McLachlan said consists of one elevator, dredging with one dredge, an additional concrete wharf in connection with covering the outer wharf now in place, a large amount of work connected with water supply intake, extension of elevator tracks; and certain dredging of the floor of the deep water dock

The water supply of Churchill was one of the unique features of the development, he explained. Water for locomotives, ships and camp in general was a difficult matter as there is no fresh water supply of any value. The plan adopted was to excavate a reservoir at Cressy Slough, three and a half miles from the docks, having a capacity of 17,000,000 gallons, a pumping station and intake were provided and a 30-inch pipe line connects the water reservoir with the docks. Another tank within the limits of Churchill.

Toy Bank Sales Increase

Those That Refuse To Open Were Among Best Sellers

The depression has stopped millions of coins out of the nest and into the Tom Thumb savings bank.

More than four and a half million toy coin banks were sold in all in the United States in 1932, a 70 per cent increase over 1931, according to a survey of the American toy industry.

Banks that refuse to release deposits until they or ten dollars accumulate, are in popular demand this year. The vogue for saving coin-red many new designs of banks that register the different kinds of coins and hold as much as $75. Fancy chromium plated banks gave a fashion note to thrift.

Banks with combinations like safes and banks that condensed cash registor attachments were favored by children for playing store. One slight complaint is more in credited with the popularity of banks that refuse to open

The manufacturers of toy banks estimate that nine out of ten are broken into after two years. But the industry counts on a large repeat demand has been in spite of life-time guarantees against all mishaps except forcible entry

Bible Should Be Read

While bound not to contradict until next harvest, in soldiers, policemen and bankers to schools and hospitals in Suomen, Ireland, they will receive bread and a kind of stiff for the needs of nature.

"You only married me because my aunt left me some money."

Stirring of the head. I'd have married you regardless of who had left it to you."

One liner carried 10,000 bags of Christmas mail from Britain to America in December.

WORLD HAPPENINGS BRIEFLY TOLD

No consideration has been given to the matter of establishment of a national wheat marketing board, Prime Minister R. B. Bennett stated in the House of Commons.

Conditions on United Kingdom apple markets are now on the whole good and sales encouraging, according to information received by the Dominion Department of Agriculture.

Canada will have no official Scout contingent at the 1933 world Boy Scouts at Godollo, Hungary, in August, it has been decided by Dominion Scout Headquarters.

Planning to establish a boat repair refitting plant, A. D. Blanchard, Amherstburg, Ontario, who is associated with one of the world's largest motor launches, has arrived in Winnipeg.

The Japanese imperial parliament approved by a standing vote, the largest budget in the history of the empire, totalling 2,230,000,000 yen (about $400,000,000).

The report of unclaimed bank balances tabled in the House of Commons by Hon. E. N. Rhodes, Minister of Finance, reveals that there is $1,-288,196.75 of unclaimed money in the banks throughout Canada.

According to a special London cable to the New York Times, the accidentally has announced its first contract for fuel oil extracted from British coal had been placed with a British firm.

Use of intravenous injections of the colloidal solution of metallic arsenic have proved successful in the treatment of bone abscess, one of the most terrible types of cancer, according to the Canadian Medical Association Journal.

A favorable report on the treaty with Canada for construction of the Lawrence Waterway power and power project has been voted by a United States Senate foreign relations committee.

Improvement In Indian Home Life

Western Indians Put Aspirations Modern Mode Of Living

The erection of comfortable and more commodious dwellings during the last few years has been a feature in the growth of civilized influences among the Indians of the Prairie Provinces of Canada according to the Department of Indian Affairs. These new homes provide many conveniences and the light and ventilation that are lacking in the old—a healthier environment for the children. The new condition has encouraged the owners to appreciate the value of additional comforts to augment their manner of livelihood such as the cultivation of gardens, the raising of chickens and in some instances pigs, and turning their attention to milking and even to the art of butter making.

Used Her Technique To Relieve Question

Missionary Made Removal Of Tumor From Brain Possible.

Operation on the brain for the removal of a tumor performed recently in London Hospital, has been pronounced a success, and the patient is recovering and his sight has been restored. It is considered one of the most difficult surgical feats ever performed. Discovery of a new technique made it possible.

The patient a school teacher, was going blind as a result of the tumor, which was in an almost inaccessible spot, and eventually would have spreads to other parts of the brain. Five doctors, headed by Dr. H. W. L. Caine, of the London Hospital, spent all day in the operation. By means of diathermia current the tissues of the brain were completely broken through to get to the tumor By the same means the current gradually went through the cells, breaking them, but healing them ago n as it passed on its way to the base of the frontal lobe.

Books Children Like.

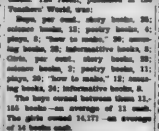
Books Published In Survey Considered By London Teachers

What books are most popular among children? Teachers employed by an education authority in Greater London invited 1,600 boys and a number of girls to indicate their favorites. The result, published in the Teachers' World, was:

Boys, per cent. story books, 38; science books, 12; poetry books, 6; plays, 5; "how to make," 20; annuals, 10; informative books, 9.

Girls, per cent., story books, 39; science books, 2; poetry books, 11; plays, 20; "how to make," 12; annuals books, 24; informative books, 8.

The boys owned between them 11,-165 books—an average of 11 each. The girls owned 14,777—an average of 14 books each.



IMPORTANT JACKIE BOOKS FOR SPRING FOR SPORTS AND SPECTATOR SPORTS

The spring season promises to be taking the leadership for sports and sports writing.

And it promises to be a real favorite for spring.

A variety of material suggest themselves for this attractive model for confirmation, and that means a rabbit's-hair embroidery, gay ribbons in checks, stripes or chevrons and a pretty bonnet.

It's exceedingly simple to make it and takes but 2½ yards of 35-inch material with 1¼ yards of ribbon lining for the 16-year size.

Style No. 827 is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

It's an opportunity! You'll find it the most useful thing in your wardrobe.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

FEBRUARY 26

JESUS'S MINISTRY THE POWER

Golden Text: "For I know Him whom I have believed, and I am persuaded that He is able to guard that which I have committed unto Him against that day." II Timothy 1:12.

Lesson: Mark 4:35—5:20.

Devotional Reading: Isaiah 12:1-6.

Explanations and Comments

A Great Storm and a Great Calm, 4:35-41—All day long Jesus had been preaching and there had been no time for rest. When night came He said to His disciples: "Let us go over unto the other side." On the other side of the lake where there were no habitations. Jesus was tired and laid Him with them in a boat even as He was." What an insight into the humanness of our little Lord! Even as He was—given up! The day long beside the multitudes—beyond His physical strength and he was utterly spent. Commanding by word alone, He sank back in the stern and fell into a sleep so deep that when the wind began to rise and the waves to dash into the disciples' cried out in their exasperation. He slept on.

"What glorious joy here is that He had learned to calm to use the language of today. He needed not to be told. He knew. He had learned to sleep, and in comfortable assurance that He was safe in His Father's hands people break down because they have never learned to do that. Their works—even they cannot rest. Their minds are still busy. If we are to learn to be full, we must learn to drop the poles swiftly and let the mind with wind and body. Jesus is an example in this case."—H. C. Colles.

Suddenly there arose a great wind storm, and the waves came into the boat so that it was filled. Jesus had been always been sublime and violent storms as it was in calm.

Experienced sailors though they were, the disciples were frantic with fear. They had been battling with the elements and losing, and they about to die. "Master, carest Thou not that we perish?" He arose and rebuked the wind, and said unto the sea, "Peace, be still." The Greek word for "rebuked" means literally "muzzled" He spoke to the sea as though to a raging animal. And the wind ceased, and there was a great calm.

"Strong Pilot who at midnight hour
Could calm the sea with gentle power,
Grant at the still to aid the hard
Of those who drift in storm and dark."

—Nancy Webb Farrington.

"Why are ye fearful?" only Jesus questioned, "have ye not yet faith?"—and the disciples feared exceedingly. My power exercised so many times?"

Many a follower of Christ thinks he has faith, but his faith fails him in times of storm and stress. Then he needed that the Master should rebuke "muzzled". He spoke to the sea as though to a raging animal. And the wind ceased, and there was a great calm.

CORRESPONDENCE.

STAMP OUT THE DEPRESSION

The Editor: May I have a little of your valuable space to put forward a plan which I developed about three months ago, a plan which if put into operating would, I feel sure, get business in western Canada out of the present depression and on to its feet again.

I would say all the outset that I am one who believes that our present economic system is antiquated and should have been replaced ere this with one more in keeping with the needs of modern society. What I am suggesting is put forward only as a prop to shore up our present business structure and save us from a total collapse until we have time to examine and repair the foundations of our present system of doing business.

There is no need to describe the present situation in western Canada, though we are frequently told that we are much better off than other places. Yet the fact remains that before farm produce prices are no low the farmer has no purchasing power, and therefore, most lines of business are shrivelling up like prunes in a sun. Almost any business man will agree that the farmer must have more money to spend before business can get into its stride again.

At the same time it is generally admitted that money will be forced down. We have abundance of everything we need, but we lack the medium needed to exchange our commodities with one another. If we can agree that the present situation is man made we should be able to agree that it must be set right. I propose that instead of quietly sinking out of sight in the quicksand of the present business depression we next, our farmers and business men link with them in a boat even as He was." What an insight into the humanness of our little Lord! Even as He was—given up! The day long beside the multitudes—beyond His physical strength and he was utterly spent. Commanding by word alone, He sank back in the stern and fell into a sleep so deep that when the wind began to rise and the waves to dash into the disciples' cried out in their exasperation. He slept on.

"What glorious joy here is that He had learned to calm to use the language of today. He needed not to be told. He knew. He had learned to sleep, and in comfortable assurance that He was safe in His Father's hands people break down because they have never learned to do that. Their works—even they cannot rest. Their minds are still busy. If we are to learn to be full, we must learn to drop the poles swiftly and let the mind with wind and body. Jesus is an example in this case."—H. C. Colles.

Turning Plague Into Profit

Research Workers Plan To Make Good Deep Pools Locusts

The world's worst pest, that of the locust, which in Asia and Africa alone regularly invades about 15,000,000 square miles, equal to about 20 per cent. of the land area of the globe, may yet prove a blessing in disguise.

For centuries millions of these locusts in turning waste into wealth comes from Africa, where it looks as if Tunisia will develop a new industry and what has previously been regarded as a costly plague will become a source of profit. French research workers have discovered that excellent soap can be made from locusts and it is announced that factories for making this by product may be established all along the new Trans-Saharan Railway, the project recently authorized by the French government.

The locusts are dried in the sun and then treated with carbon bisulphide or ethyl chloride, according to their degree of dryness. The oil thus obtained is then purified by steam and used for making soap. In addition, French fertilizing firms have been negotiating with the government for the purchase of dead locusts, which will be salted and dried for export.

Although the pest from the past is thousands of years old, up to the present locusts have defied every device of man to conquer them. The year a locust barrier of 10,000,000 feet of wire netting was stretched across Northern Central Argentina, and in the Sudan, where invasion is on hourly possibility, about 700 tons of poison are kept stored at strategic points.

France, Italy, and delegates from the British empire met long ago held a conference at Rome to consider schemes of international co-operation against the locusts. London is now recognized as the international research centre. Information on the movements of locusts is now being received from 16 empire and 26 foreign countries by the Imperial Institute of Entomology, and members there in turn time the origin of locust swarms, the routes of their invasions, and the probable cause of the outbreaks.—World-Wide News Service, Inc.

The Canadian Pests

Showing Of Trade Through Bermuda Ports Is Noted

"One of the outstanding accomplishments of Canada in 1922 was the diverting to a large extent of Canadian trade through Bermuda ports in keeping with the frequently announced policy of Hon. H. H. Stevens, Minister of Trade and Commerce," says the weekly review issued by that department. "This was most noticeable in the exports of wheat."

The review shows that of the 188,407,000 bushels of wheat cleared from the beginning of the crop year, August 1, to the end of January, nearly 100 per cent. cleared from Canadian ports as compared with 50 per cent of 32,878,000 bushels cleared in the corresponding period of 1921 producing crop year.

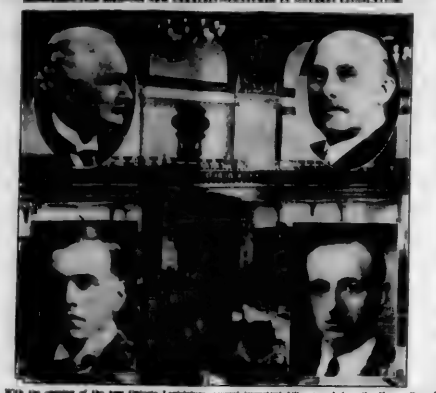
Clearances through Montreal showed an increase of 59 per cent. and through Prescott, Ont., port, an increase of nearly 61 per cent. The quantity of cereal cleared through maritime ports was nearly seven times greater than in the previous year.

Clearances through the new port of Churchill increased from 548,000 bushels to 2,730,000 bushels, while those through United States ports dropped from 16,741,000 bushels to 10,043,000 bushels.

A scientist declares that if he really is right in a certain process to come to him, that person always arrives. We couldn't mind looking in his window tried this little trick in our restaurant.

Stage Manager (discussing chorus girl who has been given a small singing part)—"Well, what do you think of her?"

Professor—"A peach—but no filling."



With the opening of the new Ontario Legislature, several important bills come before the House. One of the most prominent is the redistribution measure which will reduce the Ontario Parliament membership at least twenty-two members. The Prime Minister suggested that there would be no new taxation unless absolutely vital as a moderate deficit was more justified than higher levies. Above, top left, is Hon. Dr. Bruce, who opened the Legislature for the first time since taking over the office. Top right is the Hon. G. H. Gamey, Minister, Lands, Forests, Mines, Northern Development, while bottom, left and right, are W. E. N. S Sinclair and H. C. Nixon, leaders of the Opposition parties. The mace, the emblem of the Legislature lording towards the Speaker's Gallery. The members' seats are arranged in the shape of a horseshoe.

Secluded in Lepar Camp

Five Women and Four Men At Bathurst In New Brunswick

Bathurst, by the scourge most dreaded in the days of old, has descended in seclusion within the bounds of the Lazaretto at Tracadie, New Brunswick, and there are confined seven women and four men, from various points in Canada.

Most of the patients are above middle age. One a good war veteran, contracted the disease in France, but a diagnosis of his trouble was not made until three years later. Last summer a Chinese was discharged from the institution as cured and deported to his native country.

The Lazaretto at the village, overlooking the Gulf of St. Lawrence from the north shore of New Brunswick, is not a modern hospital, nor are the only two institutions of their type in Canada. They are maintained by the Dominion government.

Leprosy originated in New Brunswick in 1733, according to the most generally accepted theory. At that time the French vessel "Le Chameau," which had been in the Levant trade, docked at the mouth of the Miramichi river. The plague broke out shortly after the crew began unloading with the result that many members of the crew died from the disease, while others, panic-stricken, fled to points along the coast. Later, the plague appeared at Cocagne, Tracadie and Shediac. Finally, in 1844, all lepers were ordered by law to be taken to Tracadie's Island, at the mouth of the Tracadie river, and there confined under guard. Many lepers of the Acadian race died from the disease in this district, and it is estimated that the number of victims were interred in the present site at Tracadie.

For many years the lepers remained secluded for dead lived under revolting conditions. At last the Dominion Government took a hand in the matter, and in 1844 it built the first home of detached cases to Tracadie to divide their lives to the unfortunates.

The Lazaretto has been remodelled and renovated many times. It is a thoroughly modern institution, with well lighted and airy wards. At the present time there are 11 lepers under segregation here, between 1920 and 1922, 16 new patients were admitted and 11 died.

The treatment of a leper fresh from the country is one of the hardest duties a nurse has to perform. Many of the lepers possess that do the same thing.

"Our economics prof talks to himself. Does yours?"

"Yes, but he doesn't realize it — he thinks we're listening."

World Report Order

Turkeys Will Find Ready Market In London Next Year

Mr. W. A. Brown of the Dominion Live Stock Branch has returned from Great Britain where he was associated with the marketing of the Christmas turkeys, of about 90,000 fatted poultry. The shipments were sought out mostly of turkeys, went over in "cut-to" instead of the usual frozen condition, therefore came in direct competition with the home-killed poultry then imported stock. His report states that because of the quality and attractive presentation of the shipment, which was sold chiefly in London, the stock immediately attracted the attention of the consumers and were quickly sold at favourable prices. He was given the assurance of the trade that a similar shipment this early for the next Christmas would easily be doubled in quantity without overstocking the market.

Sudden Cave Dead

A huge lizard supposed to have been in a state of ice arrived at Hamburg on the steamer "Magdeburg." A gift of the Australian Government to the German navy. It is in recognition of the heroism of the crew of the famous cruiser "Emden" which was sunk by an Australian cruiser "Sydney," Nov. 9, 1914.

Must Be Good Grade

Farmers Can Expand On Fertilizers Sold In Canada

Of the almost innumerable brands of fertilizers offered to the public in the earlier days of the fertilizer business in Canada there were hundreds of brands which contained no little or no value. Many of these were practically worthless for the purpose for which they were purchased. This condition led to the inclusion of a clause in the Fertilizer Act, 1923, requiring that every fertilizer sold in Canada contain not less than 19 per cent. of available plant food as nitrogen, phosphoric acid and potash singly or combined. In 1922 this minimum of total plant food in any fertilizer was raised to 14 per cent., which is the requirement still in effect. During the first year of the operation of the 14 per cent. total plant food requirement hundreds of brands of so-called fertilizers were put out of the market.

This provision of the Act establishes of a reasonable basis of minimum plant food content and thereby gives to the manufacturer a material saving to farmers in the purchase of fertilizer and prevented many a disappointment in crop returns which would have resulted from the use of inferior and fraudulent materials.

Recent gains in coal production in Canada are greater than a year ago.

Gardening Notes

(By Gordon Lindsay Smith).

Days are growing longer, sunshine warmer, and on the hillsides sloping to the south the snow is gone and the ground begin to thaw. Soon the first crocuses and the new birds have arrived and old gardeners are beginning to plan before the fire. We should be satisfied at times these examples much more satisfactory results can be achieved in growing flowers and vegetables where one looks into the thing before work actually begins, while it is practically hopeless to attempt any comprehensive scheme without a good plan, well studied and roughly drawn to scale.

Flower Plans

There is a lot of fun in planning one lay-out now and of trying to get some novelty and variety in nature. We think of changes of adding a path or a trellis, perhaps of some new colors, of developing some other vista from the porch or living-room window, or of softening or screening some harsh lines that are too apparent in our present scheme like the fisherman. we have almost no much pleasure in making our preparations as we have when we actually get under way

It is a good thing to make out a rough plan on paper Notes must also be made, and lists of varieties and time of blooming Each garden will have its own peculiarities and it is well that we should be in the case as it allows us a splendid opportunity of developing individuality a most important factor in these days of standardized living. It would be bound to be certain dark corners where we have had trouble before, but when we realize that there is a number of grass especially adapted to growing in shady places and that there are certain flowers such as tuberous-rooted Begonias, Fuchsias, Cockatoo, Lobelia, Clarkia and Foxglove, which actually prefer to get away from the full sun, the job of solving such spots is simplified.

Then, there are hot, dry corners where nothing but weeds seem to thrive There are flowers for this position also, the Portulaca and Mesembrianthemum, for instance, asking nothing better A few Nicotine, Evening Stocks, Mignonette and climbing Nasturtium.

Sun Life Assurance Company of Canada

Incorporated 1865 — Head Office - Montreal

THE inherent strength of life assurance has been tested and proved during the past three years of general business depression, and the invaluable service it renders the public in times of emergency fully demonstrated.

THE Sun Life of Canada, during this period—probably the most trying in business experience—has maintained its record of progress, and has been of expanded service to its great body of policyholders throughout the world.

THE assurances in force have increased since 1929 by $445,000,000; assets by $43,000,000. Its policyholders now number nearly a million.

STATEMENT *for* 1932

TOTAL ASSURANCES IN FORCE, December 31, 1932	$1,020,952,000
NEW ASSURANCES PAID FOR	204,000,000
TOTAL INCOME	111,847,000
TOTAL DISBURSEMENTS	103,676,000
EXCESS OF INCOME OVER DISBURSEMENTS	13,361,000
PAYMENTS TO POLICYHOLDERS AND BENEFICIARIES:	
During the year 1932	100,577,000
Since Organization	702,712,000
ASSETS	421,436,000
Bonds, government, municipal, public utility and others, stocks pledged and owned, loans on mortgages and collateral, loans on Company policies, cash in banks, and other assets.	
LIABILITIES	387,541,000
Almost nine-tenths of the sum represents the funds necessary to the amount set aside to guarantee all policy payments in the future.	
PAID-UP CAPITAL ($2,000,000) and balance at credit of shareholders' account	$3,436,000
RESERVE for depreciations in mortgages and real estate	4,781,000
SURPLUS	5,998,000
	$34,795,000

The valuation of assets has been made on the basis prescribed for all companies by the Insurance Department of the Dominion of Canada.

Policy reserves have been valued by the full net level premium method, on bases more exacting than those required by the Insurance Department of Canada.

Applications for new assurances were received by the Company during 1932 at an average rate of more than $1,000,000 for every working day.

During 1932 the Company paid to policyholders and beneficiaries more than $280,000 for every working day.

Income from renewal premiums was the largest ever received by the Company in a single year.

Cash in repayment or reduction of policy loans exceeded in amount that of any previous year.

Renewals of lapsed policies were in excess of those of any previous year, with one exception.

The net amount of policy proceeds left with the Company at interest was substantially increased.

Sun Life Assurance Company of Canada

Among the most nourishing beverages, properly brewed beer ranks with the highest. Scrupulous care in brewing and the finest ingredients contribute to the superior quality of Alberta beers.

Tickets from the Files

19 Years Ago Today

Thursday, February 26th, 1914

Last Sunday morning at six o'clock the R.N.W.M.P., here lost what was known as the "nick stable" by fire. Fortunately no horses were in the building at the time. The cause of the fire is unknown, but is supposed to have been caused by the electric light wires. The loss is one stock saddle and three sets of harness.

On Wednesday evening in the Presbyterian Church the congregation and bible class met to honor Mr. and Mrs. Walton who are so soon to leave the Fort and may possibly not return.

A. Macdonald, engineer for the provincial government, and Mr. Blakley, government architect, were down yesterday laying out the grounds for the jail building which is to be proceeded with at once. Already Mr. Gillispie, who had charge of the construction of the parliament buildings in Edmonton, is here in order to take charge of the work.

"Mystery Island" presented last Friday evening in the Empress Theatre by the local C.G.I.T. Club, under the direction of Miss Anderson was very well attended.

Mrs. H. Savage of Clyde, Alberta, is visiting her daughter Mrs. F. W. Smith.

COMING EVENTS

The St. George's W. A. will meet on Thursday, March 2nd, at 2 p.m., at the home of Mrs. Mrs. Smith.

oooooo

The United Church Ladies Aid will hold their regular meeting at the home of Mrs. Geo. Barnett on Thursday, March 2nd, at 2:30 o'clock.

Old Time Dance Huge Success

The old time dance and social evening on Tuesday night, sponsored by the Ladies Aid and Professional men of Fort Saskatchewan, in honour of the people of the District and the Town, was declared to be a huge success.

Country folks in sleigh loads, automobiles, and all kinds of conveyances, braved one of the worst snow storms in many a day, and crowded the Simmons Hall, and Memorial Hall, to the doors. Old time dances with old time melodies played by the "Four Sheiks Rangers" and "Arendsee" orchestras from Edmonton were the outstanding features of the dance programme. An extra hour of dancing was indulged in, and the large gathering took full advantage of it.

The lemonade booths, where lemonade was served from a solid block of ice no a container, did a roaring business, and this was kept up until there was nothing left but the ice.

Many took advantage of the card tables set out in the Memorial Hall.

At midnight luncheon was served from the tasty lunch baskets brought by the ladies. Towards the end of the dance Mr. A. E. Meyer moved a vote of thanks to the Business and Professional men of the Town for the very happy entertainment, which was heartily seconded by all.

A special edition of the Fort Record was run off and a copy handed to everyone as they left for home. The following legend appeared on its front page:—

"We Wish You Good-Night
and a pleasant Journey Homeward.
We sincerely trust that you have spent a pleasant evening. We appreciate your attendance, and trust that the co-operation and goodwill that has existed between us during the last thirty years may continue in the future.
Fort Saskatchewan is your home Town and we are here to serve you."

This edition also contained a directory of the businesses in the town, and also a list of the professional men.

Red coated mounted police mingled with the dancers which lent a little colour to the affair.

Much credit is due to the committee in charge of the arrangements, and also to the ladies who worked so diligently and cheerfully.

COMING EVENTS

— "JIMMY, BE CAREFUL!" —
A Three-Act Comedy-Drama
will be presented by the
UNITED CHURCH BIBLE CLASS
on
FRIDAY, MARCH 3, 1933
at
ESTERBROOK THEATRE
Admission: Adults 35c; High School Pupils 25c; Public School 15c.

The Pleasant View Young People will hold a Dance on Friday, March 10th, in the Pleasant View Community Hall. Good Music. Refreshments. Admission 25c each.

oooooo

A meeting will be held in the First United Church, on Friday, March 3, at 3 p.m., to take part in the "World's day of Prayer". Mrs. Hodgins will be the leader, assisted by ladies from other denominations.

All ladies of the town and district are cordially invited to attend.

oooooo

The platform of the Co-operative Commonwealth Federation will be explained at a meeting to be held in the theatre, Fort Saskatchewan, on Tuesday evening next, the 7th of March, commencing at eight o'clock p.m. Speakers will be Messrs. Gibbs, M.L.A., E. E. Roper and H. Francis, Vice President of the U.F.A. Make every effort to be in attendance.

oooooo

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held in the Union Hall on Thursday, March 9th, at 3 p.m.

Mrs. J. Earl Graham will address the meeting on "The Modern Home". New members welcome.

Josephburg News

The Junior U. F. A. met at the home of Mr. and Mrs. J. Hessig on February 25th, 1933.

The minutes of the last meeting were read and adopted.

It was decided that the Secretary should ask Mr. Ottewell of the Alberta University to visit us with some motion pictures, to be shown at some future date.

A discussion of whether to get registered seed took place and it was decided that the boys should let the Secretary know if they wanted any.

It was proposed that the member, who was having the next meeting should be the supervisor of the program.

The business part of the meeting closed and short entertainment was given by the program committee.

Lunch was served by the hostesses and then everyone prepared to go home.

The next meeting is to be at the home of Mr. and Mrs. R. Krebs on March 10, and the Roll Call is to be answered by an adjective.

oooooo

The Ypres Valley Young People presented Land o' Lies in the Josephburg School on Friday, Feb. 24th, and it was highly enjoyed by all.

oooooo

Mr. Edward Mohr left last week for Rochester, Minn.

oooooo

A very enjoyable evening was spent by a large number at the home of Mr. and Mrs. Albert Mohr's last Wednesday. Dancing and card playing were indulged in until the small hours of morning. At midnight a dainty luncheon was served by the hostess.

oooooo

Mr. Wilfred Bochar spent a week with relatives in Edmonton.

HOCKEY

In a sudden death game played at Bruderheim on Monday night, to decide which team would get the bye into the play-offs for the McQueen Cup, Lamont defeated the Fort's by a score of 5-3. Lamont were worthy victors as they played fine hockey throughout the game whereas the Fort Boys seemed lag-weary and "hockey stale" as a result of the very strenuous week they put in last week, when they played 4 games in 6 days, 3 of which were away from home. Bearing this in mind it is little wonder that they were not up to scratch.

While Lamont deserved their win they have young Billy Briggs to thank as he scored all 3 goals and in each case his goal was a perfect master-piece. From a face-off at the side of the Fort goal, Lamont scraped the puck, it was snapped back to Bill and he picked the fan for corner of the net with a bullet shot from close range. Lane equalized for the Fort shortly after only to have Briggs stick handle through the entire Fort team, skate in fast on Fenech and with the latter pulled out of position, whip the rubber into the twine. This was the finest play of the evening and the crowd gave Billy hand after round of applause.

The second period was scoreless with both goalies playing "kitty bar the door" with hair-raising saves.

Going into the 3rd period one goal down and the locals sent every man up and Lamont playing round defensive hockey held them at bay.

Three of Lamont men then rushed and Scrabe shot from close in—his rebound was taken by Mydonsky who raised in a little closer and passed to Briggs and Billy made no mistake about finding the net. Bill Graf getting the puck at centre from Lamont circled his own net and skating at full speed down centre ice thundered a long shot over Hamm's shoulder and the game ended 3-3 in favour of Lamont.

PLAY-OFF GAME

Don't forget the play-off game to be played here on Saturday at 6 p.m. between Chipman and Fort.

Legislature News

The debate on the Speech from the throne was continued on Thursday afternoon, the 23rd. All parties and groups of the House took part. The general impression was that the government forces for some reason or other did not shine up very strong in the debate. The Premier, through illness, did not participate. It is generally felt that the forces of the government are not unanimous in their love or alignment with the C.C.F. movement. When the government is referred to as the C.C.F. Government it is taken as a compliment by the extreme radicals of the U.F.A., and resented by the conservative elements of the old U.F.A. movement.

Highlights During the Week

Hugh J. Montgomery of Wetaskiwin suggested the re-incarnation of the telephone system that it might be saved as an asset for the people of the province.

Dr. Atkinson described the C.C.F. movement as a "remedy" for the present economic conditions when speaking in the legislature on Tuesday.

Capt. H. E. Dahle on Tuesday on the floor of the legislature demanded a probe into the liquor control Board's handling of liquor supplies. He charges that the names of persons to whom liquor was given for sampling purposes were not kept by the Board. Why, he asked, is it necessary to sample famous brands well known for their quality? The free liquor samples given to the government are estimated to be about 14,000.

Joseph Dechene, member for Beaver River, regretted that the tendency of the C.C.F. movement was to deprive the youth of the nation of the right of private ownership of their homes.

Mr. Payne, member for Red Deer, took the Minister of Agriculture to task for permitting unnecessary waste by various men and officials attend the various fairs.

John Irwin, member for Calgary, urged the appointment of a fair banking board when making an attack upon "soulless corporations" during an address in the legislature on Friday.

The Liberal leader, W. R. Howson, was complimented by various speakers for his suggestion that there should be established by the government of the Dominion of Canada a Federal Bank under the Finance Act for the purpose of directing and controlling the issue of currency to assist the provinces and municipalities to finance at a minimum cost.

Co-operative marketing associations and pools have come in for a lot of healthy criticism. It appears that with all the money spent the Dairy Pool alone shows signs of making good. It is well to recall the words of Mr. Squire when he was here to assist in the organization of the Wheat Pool that governments and pools must be kept apart. This was the advice of a man who has made a life study of organizing co-operatives.

There is an old saying that while Rome burned Nero fiddled. The general impression seems to be growing around the Parliament Building that while the government is fiddling the people are losing their homes through the lack of initiative on the part of the government to submit a solution to the many problems that faze the people.

HOCKEY GAME

The Midget Maple Leafs defeated the Wild Cats in a fast game by a score of 5-2, on Tuesday afternoon at 4:30 on the local rink.

The score being one all, Milton Baker on solo rushes netted two beautiful goals, putting the Leafs to the front. In the third period, on a pass from Carp, Lamont again lassoed the final score 5-2.

Line-ups:— D. Grunert, R. Thorne, M. Baker, K. Baker, B. Smith, T. Carscadden, W. Carp, F. Dennis, and J. McLean.

Wild Cats— B. Butler, G. Williston, L. Williston, H. Watt, M. Leitchie, C. Anderson, E. Hurlbut, B. Copeland, and F. Adamson.

Taken from the Files

19 Years Ago Today

Thursday, March 9th, 1914

At Partridge Hill School last Tuesday, four children were awesome with coal gas fumes.

E. G. Ferguson has been appointed chief engineer and electrician for the town and John Graham is assistant engineer.

Henry Ayers was unfortunate enough to lose by fire his chicken coop and some of his thorough-bred chickens. A cook, for which Mr. Ayers paid four dollars just a day or so before the fire, was also lost.

A branch of the Standard Bank of Canada was opened here today in the building recently occupied by R. E. Staples. Mr. A. H. Rogers is the manager. This institution occupies a strong position amongst Canadian Banks and is prepared to provide the public with an adequate service.

MAKES LONG TRIP IN WINTER

Something of a record for winter motor travel was made recently by A. W. Field of Detroit, formerly an Alberta resident, who made the trip from Detroit, to Edmonton, in six days, a distance of about 2,400 miles. The average per day was about 400 miles.

Municipal District Hold General Meeting

The annual meeting of the ratepayers of the Municipal District of Clover Bar, No. 8127, was held on Saturday last, with about sixty ratepayers in attendance.

Mr. C. T. Montgomery was appointed chairman of the meeting.

After the reading of the minutes of the last annual meeting, the financial statement and auditors report was read and discussed.

A resolution, taking the responsibility if destroying noxious weeds on road allowances from the farmers and placing same in the hands of the Council, was put to a vote and declared lost.

Nominations for councillors were as follows:—

Division No. 1, Dave Cann and A Gillies. Messrs Keith and Peters, the retiring councillors for Divisions two and three were returned by acclamation. The voting for a councillor for Division No. 1 will take place on Saturday, Feb. 25th, in the Baker School House.

A vote of appreciation was tendered to the Council for the manner in which they had conducted the business of the District during the past year.

A vote of thanks was given to the Chairman for conducting the meeting, also to the Town Council for the use of the Hall.

A Scheme To Raise Prices.

The tremendous decline in prices of all primary products in Canada, in common with similar declines throughout the world; the huge accumulation of unsettled war and other debts; the unparalled restrictions imposed by nearly all nations upon imports from other nations; the break-down of the gold standard and the resultant upsetting of exchange rates between countries; the stupendous number of unemployed throughout the world, and the free or purchasing power by practically everybody as a result of these economic disasters and dissolutions, have led to making of all kinds of proposals designed to remedy, either temporary or permanently, the situation in which nothing is now functioning.

Many of the suggestions advanced are hopelessly impracticable; some utterly fantastic; and not a few of the so-called remedies would only serve to intensify the disease rather than ameliorate or cure it. Unfortunately, the distress suffered by the present world economic situation is so great, and people are so much at a loss in seeing any way out of their difficulties, or an early solution to their problems, that thousands of these are in a state of mind where they are prepared to grasp at any straw; and, the more alarming the pessimistic mode in support of any given scheme, the greater the danger of people "falling for" something which later on they would bitterly regret.

Included in the suggestions being advanced are numerous forms of "social welfare" or "social security" schemes. Some advocate the printing by the Government of tens, even hundreds, of millions of paper money without any reserve of any value held against them. Others demand that steps be taken to bring the Canadian dollar to a parity with the British pound sterling. In reverse of communication the issue of bond scrip is strongly supported as a means of putting more money into circulation, speeding up business and the payment of debts, and as a means of raising prices of primary products. Some extremists advocate the repudiation of existing debt.

Despite the difficulty of their present situation, we believe the overwhelming majority of the Canadian people do not look upon repudiation of debt with favour; rather that they are willing to bear their present load and are anxious to do so, and only want to be placed in a position where they can pay. They feel they can pay their debts in the future, as they did in the past, if they could obtain a fair price for their products above the cost of production, or steady work at a fair wage.

Because we are convinced such is the attitude of the average man, we are interested in the plan of Colin H. Hamer, President of the United Farmers of Alberta, as recently outlined by him in the press. Mr. Hamer proposes what he calls the Collective Produce Clearing Association, and, in brief, his plan is this:

A farmer producer brings, say a can of cream to a dairy for which he receives a cash ticket for 50 cents. Instead of cashing that ticket, he takes it to the Collective Produce Clearing Association and exchanges it for a Bond of $1.00. He buys a C.P.C.A. 4-cent stamp which he affixes to the Bond, endorses the name on the back, and then turns it in the same as a one dollar bill on any purchase he may make. The merchant to whom he pays it then adds another 4-cent C.P.C.A. stamp, endorses the Bond in turn, then pays it to someone else, who follows the same procedure, until the Bond has fourteen 4-cent stamps, or the equivalent of 56 cents on it, when the Bond will cash it and charge it against the account of the Collective Produce Clearing Association.

What has happened is this: The farmer producer received 50 cents, instead of 56 cents, for his can of cream. His purchasing power was merely doubled. Some of the other thirteen people who received the Bond only got a 4-cent stamp actually gave a 9 per cent. discount on the price of their goods or services. The C.P.C.A. got the original 50 cent cash ticket from the farmer and the 56 cents paid in in the stamps, or $1.06, consequently on the account at the bank was good for $1.06 when the Bond was finally presented for payment.

Unquestionably, this is a form of inflation, but there was 50 per cent. cash back of every Bond issued. The 4 cents paid by each handler of the Bond some may argue was in the nature of a sales tax. May it not be even more fairly be called a 4 per cent. discount? And who in these days would not willingly grant a 4 per cent. discount if the volume of business would be instantly doubled? As fast as these Produce Bonds were turned over for fourteen times, and then cashed, one dollar of money would be placed in general circulation instead of only fifty cents had the farmer cashed his original cream check.

As Mr Burnell points out, farm produce would flow to market as usual without interfering with prices which are set on an export basis. It would, he further adds, still allow of feeding the unemployed in cities, but many of those would be absorbed by the greater volume of business which would result.

One seeming weakness does suggest itself, but it is a detail and does not affect the principle of the scheme. That is, whether the margin of six cents on the dollar, which is all the profit the C.P.C.A. would receive, would be sufficient to cover the costs of operation, including printing of Bonds, stamps, distribution of same to all centres, and the handling of an agent of the C.P.C.A in each country town which it is proposed should be done. However, if a 4-cent stamp on each turnover of a $1.00 Bond would not suffice for the purpose, a 5-cent stamp, or a 5 per cent discount instead of four, would no doubt prove more than sufficient.

Mr Burnell's plan is certainly deserving of further consideration and study by farmers, merchants, and, in fact, everybody because one and all are anxious to find some relief, even of a temporary character, from the hopeless fate which all have been brought and from which all are seeking a way of escape.

Colloidal Fuel is Now

Canadian Coal Can Be Used For It Says Ontario Engineer

Of great importance to the Canadian coal producers is the announcement of William Burnip, prominent Ottawa engineer, that Canadian coal can be used as the basis of a newly invented coal colloidal fuel. A friend of Mr. Burnip, Stephen L. Wyndham, is the inventor, and Mr. Burnip, who now resides in Central Wales, has sent the invention to Canada.

It has been a dream for years to invent a fuel by mixing coal with oil and getting a fluid mixture in which the coal would not settle down in the bottom. Mr. Burnip announced the invention has succeeded in producing samples of colloidal fuel a combination of coal and oil in stable mixtures varying from 50 per cent. coal and 50 per cent. oil to 80 per cent coal and 20 per cent. oil. In his announcement Mr. Burnip says the intriguing feature to Canada is that the fuel will be cheaper than oil and can be produced in Canada from coal. Even the oil used in the mixture, he says, can be replaced by coal tar and other products of the distillation of coal. He predicts its use in power plants requiring intense heat, with flexibility of oil fuel.

"The value to the Canadian coal industry should be very marked," he says in stating the fuel could be used for oil-burning furnaces in the home.

In reporting the result of the various tests he witnessed recently before the South Wales Institute of Engineers, of which he is a member, he adds: "No one was prepared to withstand the intense white glare given off by the burning colloidal fuel against which the flame from the best quality fuel oil appeared yellow and smoky, but turned under exactly the same conditions."

Precious experiments have failed because the coal has sunk to the bottom of the mixture. Wyndham has added what is called a "stabilizer." During the process of mixing, both oil and coal, ground to a particle, become coated with a film of stabilizer, which adheres to it even at high temperatures. The result is a mixture of fluid form permanently in the mixture and the product looks like ordinary oil and flows like oil and burns like oil. Dr. Wyndham has used the fuel in one of his steamships on a voyage with distinct success. Something attempted in the way of a liquid fuel, using present coal field products, has caused interest for years.

Dictionary Completed

In First Of Its Kind and Contains 1,000 Pages

After 16 years of work, Major Kenji Matsumoto of the Japanese War Office has completed a Mongolian-Japanese dictionary, the first of its kind, which will be published shortly by the army. It is a book of 1,000 pages.

The army long has given close attention to the study of foreign languages and has in its language school experts on nearly all tongues. Major Matsumoto has specialized Mongolian, which is spoken by the Mongolian Tatars. He had to design special type to reproduce the intricate Mongol characters appearing in his dictionary.

"Fruit" Shortly Right

The St. Thomas (Ont.) Journal describes Canadian-made cod liver oil as "one of the fruits of the Imperial Conference." This Colyum can only say that anyone who thinks cod liver oil a fruit should have to take it as a punishment says the Toronto Star.

The output of gold from the placer deposits of the Yukon territory in 1932 had a value of $993,000. In 1936, the first complete year of the Klondyke gold production, the output was valued at over $21,000,000.

If going bankrupt doesn't affect the mind, as experts say, it just calls attention to it.

The Instinct Of Birds

Is Just Acute Sense Of Sight and Hearing

The mystery of how migrating birds find their way unerringly to their destination will probably be decided by further field observations, it is predicted

Repeated observations of the behaviour of migrating birds have convinced Prof Patten of Sheffield University, that they are not guided by "instinct" but by their keen eyes, which find their way by watching their surroundings and by profiting from experience.

Birds possess an "eye-brain," he says. "Their sense of vision is extraordinarily acute and by no means indiscriminating. It seems unreasonable to brush aside the idea that migrants may obtain guidance by taking short of landmarks. Furthermore, the sense of hearing can play a part. The wash of the waves is a reminder to hug the coast the gurgle-line of primary migrants. The voices of ground rivers are followed by overland migrants.

Birds band together for the trip thus giving the untravelled young an opportunity to be guided over the route by adults who have already been over the ground.

"In thick weather migrating birds often go astray, and, arriving at unexpected localities are classified as rare and accidental vagrants. When the gloom deepens the voyagers become sorely handicapped, while a dense and protracted fog will put the brakes effectually on migration."

Fewer Sea Fish Caught

Fishermen Curtailed Efforts Last Year Because Market Was Poor

Excellent reasons for asking Canadian fish are that fish are nourishing and health-building foods, and that Canadian fish are unexcelled in quality. We call attention to these facts in the hope that people will eat more fish and, in that way, assist the fishermen to make a better living.

The Fisheries News Bulletin, issued by the Department of Fisheries, Ottawa, states that exclusive of the catches from one or two minor fisheries, the landings from Canada's sea fishing operations in 1935, as shown by unrevised statistics, totalled approximately 7,120,000 hundredweights. This total was smaller than the two fisheries total for 1931 because with economic unsettlement continuing throughout the world during 1935 the fishermen curtailed their fishing effort. The reduction in landings reflects market disturbances. Plenty more fish could have been taken from the Dominion sea fisheries resources if the market situation had warranted greater catching efforts. Toronto Mail and Empire.

Saskatchewan Power

Corporation Shows a Deficit Of $89,979 For Year 1935

Despite an operating profit of $183,317 for the year 1935, the balance sheet of the Saskatchewan power commission showed a deficit of $89,979 when provision was made for depreciation charges, according to the annual report tabled in the legislature by Hon. J. R. Merkley, Minister in charge.

The report indicated that no new undertakings nor extensions had been embarked upon by the commission in 1935, the second year in which the activities of the commission have been confined almost solely to operation of existing systems.

By this time, father has tired of playing with the electric train Junior got for Christmas.

Lend us your ears! Ogden's Fine Cut cigarette tobacco is just right to "roll your own." It measures up in every way to a man's notion of what a cigarette tobacco should be!

Easier to roll for one thing. And a fine, better cigarette when the rolling's done and you light it up. Yes, sir. You'll like Ogden's Fine Cut. It gives you the combination you're looking for in cigarette tobacco . . . a fragrance . . . sweetness . . . absolute satisfaction. That's worth a cheer any day!

Ban Is Lifted

Freight May Now Be Shipped To Churchill Without Permit

Further relaxation of the opening of Churchill to the public this year is seen in the recent ruling on the Hudson Bay railway to the effect that freight may now be shipped to Churchill without a permit.

A similar ruling applies to passenger traffic. Since the road reached Churchill in March, 1929, it has been necessary to have a permit to enter the port or ship goods to the east. This ruling was the result of much criticism, among traders and others who had business in the far north. Last year the road was open to the public as far as Gillam Mile 227. Permits were required from that point to on.

The new ruling lifting the permit has come without publicity or advertising. Railroaders say that it was the desire not to encourage a trek in the direction of the new port while the townsite lacked facilities for handling transient traffic.

One Of Queerest Homicide

Pole Shot Many, By Stockade In New South Wales

By the side of the road which winds up from Canmara in the back blocks of New South Wales, hangs the entangled of memorials it is an odd little bed.

Time-worn and tattered, and covered with moss, it has been there for thirty years. The farmers going down the road in the early days never gave it a second look and to a stranger it still says little it is all that is left of poor Frank Burke.

Burke was driving a cart along the cutting by the precipitous bank when some unknown cause frightened the horse. It bolted and Burke and driver went over the side. The cart was smashed to splinters far below. The horse, strangely enough, was found half-way down the bank unhurt. But the driver was killed.

They found his body after a search and some men in the party took the sad work in lay beside him and hung it on the branch of a tree. There it remains, and nobody touches it or ever thinks of moving it

Chinese Woman Barrister

Now Practicing Law In Hong Kong With 1 enamel success

Young China's rapid march toward modernism which has made amazing many other reforms, the elevation of the status of women in business and the professions, is richly revealed in the advent at Hong Kong of China's first woman barrister. The first of her sex to don wig and gown in China is Mrs. Lo Soon Kau Tse, whose admission to practice in Hong Kong was sanctioned by Chief Justice Sir Joseph Kemp. She belongs to a well-known Hong Kong family, and came to Hong Kong from Singapore where she practiced law.

Mrs. Soon, Hong Kong residents report, came into prominence when she successfully defended a Chinese at the Singapore Assizes who was charged with murder. Her conduct of the case was masterly and dramatic to a high degree Educated in England, she studied law at the Inner Temple for three years before her admission to the Bar in London, in June, 1923.

Tourist Traffic Lower

Number Of Canadians Cars Travelling Abroad Has Also Been Less Last Year

The tourist traffic showed a falling off for 1932 compared to 1931, according to returns by the Department of National Revenue. Automobiles entering last year for less than 24 hours totalled 3,967,367 and the year before 4,139,402 For periods not exceeding 60 days, 1,622,681 entered last year and 1,649,763 the year before. For longer periods however, there was an increase, those staying up to six months totalled 3,698 last year and only 744 the year before.

Canadian motorists returning abroad was also reduced last year, totalling 376,584 and the year before 438,853.

The figures for western provinces of last year's entry of tourist automobiles for 24 hours, 60 days and over 60 days, respectively, follow: Manitoba, 28,990, 11,598, 12; Saskatchewan, 18,098, 4,632, 6, Alberta, 17,788, 3,564, 11; British Columbia, 39,468, 94,360, 45.

First Man Wounded in War

Victim Of Frontier Clash Has Just Died in France

M. Lalbe, the first Frenchman to be wounded in the World War, has died near Belfort, France M. Lalbe, who was a Customs officer in 1914, was on duty at Suisse on the Sunday before the war had been declared and the first frontier clash occurred. A German Uhlan detachment crossed into French territory, requisitioned horses, carts, and cattle, and took several inhabitants of Suisse with them as hostages. M. Lalbe was with a frontier patrol, comprised of Customs officers which came up at that moment. The Uhlans fired on the small party, wounding M. Lalbe, and then fled, abandoning their booty.

MARCH 6

JESUS GIVING LIFE AND HEALTH

Golden Text [illegible] from these great things for us whereof we are glad." Psalm 126 3.

Lesson Mark 5 21-43.

Devotional Reading Psalm 116 1 9

Explanations and Comments

The Triumph Of Love Over Pride, verses 22 23 When the people of Gergesa brought Jesus to leave their borders (our last lesson), He returned to the western side of the lake and was there welcomed by a great multitude. Then there came a ruler of the synagogue a man who had oversight of the arrangements for worship. Jairus by name, and fell at the feet of Jesus in an agony of supplication. His little daughter was dying, and he brought Jesus to return with him and lay his hands upon her that she might live There was no doubt of the courage the proud Pharisee would surrender if only his daughter's life might be spared Pride and love both tugged at the heart of Jairus that day pride in his position and love for his child Pride whispered that he demean yourself Think what your friends will say Love whispered Your little daughter is at the point of death. It was a battle between these two mighty forces in the human soul pride and love. Love triumphed and, throwing pride to the winds, this man, this personage in Capernaum, made his way into the midst of the crowd of common people, of publicans and sinners with whom Christ, and before the eyes of them all flung himself at the feet of Christ, sobbing out his agony. In the Greek you can almost hear the sobs as he begs Jesus to come, his little daughter is in extremity that Thou come and lay Thy hands on her that she may be saved, and live" (W. J. Deane.

The Triumph Of Faith Over Fear, verses, 24-34. Jesus assented to the request, then and was on His way with him to his home, followed by a great crowd of people, when an interruption came. There was a woman in the throng who had been afflicted for twelve years with a distressful malady. She had spent all her money on physicians, under whose treatment she had suffered much, but had not been helped. In the Mishna it is affirmed that the best physicians is worthy of Gehenna, an account of this "materia medica" in use at that time explains the observation. The poor woman had heard of Jesus, her hope, and her desperation drove her to Jesus. She pushed herself forward, and, despite the fact that the commanding how held her touch to be a defilement, she touched the hem of Jesus' robe, or one of the tassels at the corners of the upper garment.

"If I touch but His garments, I shall be made whole."

Greece Barters With Canada

System Instituted By Regime Government Now In Effect

First official system of barter receiving sanction in modern times from a recognized government came into effect February 15, when the Republic of Greece permitted importation of a selected list of commodities from Canada in exchange for products, it was learned from officials of the Bank of Canada.

Products which must henceforth be exported to Greece on the barter plan include fresh fish, fresh fruit, shoes and other leather products, furs, furniture, iron products including iron pipes and tubes, perfumes, toys and pencils.

The barter plan is of great interest to industrialists the world over, particularly in the United Kingdom and France, but what effect the Hellenic experiment will have on Canadian export business is not known here.

For Cadet Training

House Of Commons Passes Vote For $200,000 For This Purpose

The House of Commons passed a vote of $200,000 for cadet training, defeating an amendment by Miss Agnes MacPhail (Prog., South-East Grey), to decrease it by $90,000.

The question of cadet training in Canadian schools came up for discussion again when the national defence estimates were under consideration. When this item, amounting to $2,000,000, was being considered it met with considerable opposition.

A motion was before the committee, moved by Miss Macphail, that the vote be decreased by $90,000, an amount equal to the objective of the United Churches of Ottawa for its work in the interests of needy children.

March Winds Hurt The Complexion

The best for you and Baby too

On Verge Of Starvation

Hokinson At Chesterfield Inlet Reported To Be Short Of Food

A poor run of white fox and silver in the Chesterfield inlet country, six miles north of Churchill, have left the Eskimos on the verge of starvation this winter, according to the Rev. Father Emmanuel Dupuis, Roman Catholic missionary at Churchill who has arrived from the north

The missionary says that the natives will be able to get through the winter, but supplies are low. Last summer Father Dupuis took supplies to the hospital-mission at Chesterfield with the motorship Therese It was his intention to make several trips, but gasoline trouble and bad weather prevented him from making scheduled trips and he was unable to take more than a few tons of supplies in the boat.

Before making the final dash south to Churchill, Father Dupuis and a crew landed walrus near Walrus Island, south of the inlet. They got 18 walrus, averaging 1,000 to 1,500 pounds. These were taken back to the island given to the natives.

Two Eskimo dog drivers arrived at Churchill minutes in January with mail from the hospital at Chesterfield They brought word that the Polar year party of Canadian scientists who are studying conditions and phenomenon are all well and studying natural phenomena according to schedule

Administering Indian Reserves

One Hundred and Sixteen Agencies Are Scattered Throughout the

The local administration on the reserves and settlements throughout the Dominion is conducted through the Department of Indian Affairs agencies, of which there were 116 in 1931-32. The number of bands included in an agency varies from one to more than thirty. The staff of an agency usually includes an Indian officers in addition to the agent such as the medical officer, clerk, farm instructor, constable, interpreter, constable, stockman, and so on, according to the special requirements of the agency in question. At many of the smaller agencies in the older provinces where the Indians are more advanced, the work is comparatively simple, and the agent himself executes all the duties of the agency. The work of the agencies is supervised by the Department's inspectors.

Small Wonder

A press despatch from Galt Ontario, states that seventy guests at a Burns banquet were made ill by lemonade served there. Lemonade at a Burns banquet! Shades of the immortal poet! No wonder the guests were ill.

The Doctor's Trade Mark

Doctors in Berlin may now carry an extra lamp on their cars. This shows a red cross on a green background, and is for use only on occasions of urgency, when the policemen will get them through traffic as quickly as possible.

GIN PILLS

CAMPBELL SETS A NEW WORLD SPEED MARK

Daytona Beach, Fla. Great Britain's dominance in the realm of speed was objectified to new height, by Sir Malcolm Campbell in a daring race against time along the ocean speedway.

In two blustering runs over the hard packed beach, the 46-year-old driver stroked to a new world automobile speed mark of 272.108 miles an hour over a measured mile under the Union's quarter of a century of record-shattering achievements.

He also established a new record of 272.463 miles an hour over one kilometre on the same trials and 257.200 over a three kilometre run.

Driving a long, streamlined Blue Bird car, equipped with a 2,500-horsepower aeroplane motor, Sir Malcolm clipped 94 of a second off his own previous record of 253.968 for the mile and 2 seconds off the mark by 18 1-10 miles an hour

On his first run the British driver attained the astounding speed of 272.536 miles an hour as he roared over the beach, paralleled on one side by a pounding surf and on the other by high, irregular sand dunes from which thousands of spectators looked on. His time for the mile on that run was 13.16 seconds. His second trial, made in the opposite direction, was clocked at 13.20 seconds for a speed of 270.676 miles an hour.

Returning to the roadstand after his trials to be greeted by cheering spectators, Sir Malcolm characterized his race as "the worst ride I ever had in my life." He was forced to steer the bounding car over the course with only one hand, as he had injured the other a week ago in making repairs to the machine.

Sir Malcolm covered the kilometre, which is approximately five-eighths of a mile, in 8.15 seconds for a speed of 273.463 miles an hour on his first run. On his second run over that distance he was clocked at 8.34 seconds for a speed of 271.473 miles an hour. The kilometre was marked off inside the measured official mile.

In setting up a new record for five kilometres, Sir Malcolm attained a two-way average speed of 267.286. His previous record for that distance, established here last year was 247.941.

Following his special race, Sir Malcolm indicated he would not make another attempt to boost his newly-established records.

He said he could not race again as long as his sprained arm was paining him, and he expressed a desire to go to New York as soon as possible to call for England.

Sir Malcom said he was satisfied with the performance of his car under such adverse conditions. He was confident that, given a better beach and good visibility, he could place the record much higher.

Japs Press Forward

Railway Line In Manchuria Has Been Seized

Chinchow, Manchuria. The entire Chinchow-Pulpiao railway was in the hands of the Japanese army, and in the Pulpiao terminus they were provided with an excellent railhead jumping-off place for their drive to clear the Chinese forces out of the province of Jehol.

When General Yoshimichi Suzuki's troops marched into Pulpiao they found the city deserted. The railroad tunnel from Nanling, a few miles to the east, had been damaged by the Chinese, who also attempted to blow up a bridge to check the Japanese advance.

From Pulpiao the Japanese will move across the province to the city of Jehol. Thus far, according to army sources, the operations have been merely preliminary to the major offensive.

Aviation Problems

Subject For Debate Before Interested Audience In London

Four days after the 67th anniversary of the foundation the Royal Aeronautical Society, which is the oldest organization devoted to aerial matters in the world, held the first debate in its history. A crowded audience in a London lecture hall listened for two hours to some of the leading men in British aviation as they spoke on various aspects of official control of flying centred around the motion before the assembly that "aerial aviation differs from military aviation and should be treated accordingly."

C. R. Fairey, president of the society, opened the innovation on the grounds the motion touched on matters of vital import to the future of British flying. General J. F. H. Seely now chairman of the Air League, answered emphatically those who believed the air weapon was of all means of warfare the most cruel. He cited the terrible effects of blockade as exercised against the central powers in the last great war as part of his proof that the air arm, properly employed, was more humane than some other means of forcing an enemy to sue for peace.

Members of the House of Commons, among them Capt. H. N. Baldwin, deplored the ignorance of aviation that marked the "mother of parliaments" in the present day and the entire absence of interest displayed by the majority of politicians in one of the most significant happenings of the 20th century. Sir Hardley Page, pioneer aircraft constructor and airline operator, had much to say about the extraordinary workings in the Europe of the present system of air transport subsidies. He urged the post-war company system, unsupported by under the guise of commercial ventures in some European nations could only be countered by drastic revision of subsidy arrangements and by placing all air transport on a really business footing.

He showed that 14 countries in Europe expended more than £4,000,000 annually in direct subsidy to air transport lines. Only one of these, the Dutch Holland shows with Great Britain the possession of air lines which are approaching real commercial and economic operation.

Mr. Handley Page made the assumption that the passengers Air-berth on the continental airlines in a year weighed approximately 15,000 tons (at 13 persons to a ton) and on this basis he arrived at the astounding conclusion that the carriage of every airline passenger costs about £6 in direct subsidy. This was explained to showwhere that tariff of the present routes were operated for political and military, rather than commercial, reasons by accepting into the economic business line are engaged with an eye to possible military eventualities.

England and Holland were showing the way to real commercial exploitation of the aeroplane. The country of all the world's air lines now run on a similar basis, the better for aviation, he declared.

Canadian Airways

Have Flown a Million Miles Flown By Planes In 1929

Nearly 1,000 passengers were carried by the Canadian Airways in 1929, according to operating statistics released recently.

Passengers carried on mail lines numbered 997, on other lines of the company, 9,852.

The record during the year amounted to 200,000 pounds. Freight and express carried by Canadian Airways, however, totalled 1,870,126 pounds.

More than a million miles were flown by Canadian Airways machines in 1929. Of this total 367,373 were flown on mail lines and 1,502,627 were flown on the company's other lines.

Mail Good Training

Canada (to new mail)—You're great! You may have come to the line, dodge, inside your mail were flown through your opponents is simply marvellous.

New Player (modestly)—I guess it all comes from my early training, sir. You see my brothers used to take me dropping with her on carpets when...

BALDWIN OPENS A WONDER LABORATORY AT CAMBRIDGE

A wonder laboratory for research work was opened by the Right Hon. Stanley Baldwin at Cambridge the month which contains apparatus which will split the atom on a scale unknown before. The building is the new Lad ory Mond Laboratory, where the famous scientist, Professor Kapitza (right), will carry on his ultra-cold research. The photo on the left shows part of the laboratory in which can be seen a hydrogen liquefier for making liquid temperature minus 253 centigrade.

Public Misunderstandings

Safe Attitude Is the Way Of War Debt Settlement

The need for an attitude by the layman in somewhat similar to that of the layman in preventive science was stated in the way of a settlement of the debt question. "We are going to face in the matter of debt settlement," he said, "a period of great bitterness in attitude on the part of the United States which will jeopardize the general financial and economic settlement. That postponement owing to American policy and attitude is not due to the fact that Americans are more avaricious than anyone else.

"I believe sincerely that their attitude is just genuine to that of ours on reparations 15 years ago Broadly, the situation is that you have on one side in the United States all the economists, all the experts, and all the business standing either for cancellation or ruthless scaling down of the debts. On the other side of the fence you have the great multitudes, the electorates, and the politicians pandering for payment to the last dot. The terror of the politicians in the presence of popular misunderstanding is intense." Manchester Guardian.

Prepare For 1933 Crop

To Be No Deliberate Cut In Acreage On Western Farms

While some members of agronomic bodies in the three prairie provinces favor curtailment of wheat production in the spring, there will be no deliberate policy of acreage reduction, Premier Bracken declared.

At annual conventions the farm organizations have gone on record as favoring an international conference of other wheat growing countries with a view to working out some common policy of decreased production. Premier Bracken declared there were no fall in line, they declared, Canada could not afford to take such a step alone. Reduction of wheat acreage in the Dominion might mean loss of export business.

Find Pipe In Silo

The Pied Piper of Hamelin has taken to the air. Swarms of rats and mice made a sudden appearance in the Hawk Crossroads area in Russia, and have done so destructive, opposite for long years made. A squadron of five aeroplanes was dispatched to the district and by use of poison bombs from the air succeeded in destroying them.

Coffee grown in Kenya, the last season about 107,000 bushels.

Cleopatra was the last queen of Egypt.

Ancient Egyptian Brewers

Pagget Shows Life As It Was 2,000 Years Ago

Even as United States legislators of the present and those of Canada in the not too distant past, governments had their problems in regulating the beer business back in 324 B.C.

From ancient Papyri, some of them filled with worm holes, research workers at Columbia university are evoking a picture of life as it was 2,-000 years ago.

One group of the documents shows that in ancient Egypt brewing was under government regulation. The state furnished a given amount of barley each day to the brewers and demanded a certain amount of beer in return. A letter written by Apolonius, Ptolemy's treasurer, on May 21, 324 B.C., raises a brewer over the coals for complaining the government beer from only 11 bushels of barley instead of the 12 bushels he had contracted to make into beer.

More Radio Licenses

Increasing Number Of People Shown To Be Using Radios

People are buying radios and taking out licenses for them in increasing degree, says the monthly statement of the radio branch of the department of marine. For the 10 months of the fiscal year ending January, over 100,000 more licenses were issued than in the whole of the previous year. The 10 months' total was 736,-381, as compared with 636,358 in the three year ended in 1932.

"Smith wants me to lend him $5. Do you advise me to do so?"

"You would be doing me a personal favor."

"How is that?"

"If he does not get the money from you he will come to me."

Garden Notes

Developing the Vegetable Garden To Its Full Possibility

(By Gordon Lindsay Smith)

In the fold Country a vegetable calendar like the one hung on the wall includes every month in the year; in other words the main notion the Atlantic ripples a continual supply from his vegetable patch. How different is the case here where the average man is content if he can have new potatoes ready by early July, and corn and tomatoes by the middle of August. There is nothing much expected before the end of June, nor after mid-September, that is if we except some potatoes and, possibly a pumpkin or two put away for winter use.

But while we are not favoured with a very long growing season, it is true, we have compensation in better summertime and longer hours of daylight which permit us to grow many things that Britain, for instance must import, and if we take full advantage of the long lists of vegetables we can grow, our calendar might be extended almost the year round. In the winter besides enjoying our own cabbage carrots, potatoes, turnips and similar handy things from the cellar we may have fresh rhubarb and mushrooms growing in the same place.

If we possess a hot bed or bit of a greenhouse we may have lettuce, cress and radish ready for the table in March. Asparagus, rhubarb, perennial onions and parsnips come along the first thing in the spring and these are followed by lettuce, radish, spinach and similar things which are ready for use from three to six weeks after planting. Fifty days after sowing the late parsnips and peas may be used by using an early, medium and late pea, or successional plantings. we may continue using them for weeks. The first thinning of beets make excellent greens and are taken out at the same time. By making several sowings and using early, as well as late, varieties we spread the supply of vegetables over the entire growing season. Late white corn will remain in perfect condition for several weeks after it is ripe if we cut stalks and all and store, and tomatoes will continue to ripen until Christmas if vines are pulled and hung up in the cellar. By handling the well-known vegetables in this fashion, and by gradually extending our list of new things until we have tried everything offered in the seed catalogue, we can develop our vegetable garden to its full possibility.

Gosweel Laycock: Though we exercise our ingenuity or architectural skill in constructing a home for the investment, a house without growing things about it is but half complete. Something is needed to soften the harsh lines and fill the whole with life and love to Mother Earth. To do this the gardener uses a variety of material, grass, flower beds, vines, shrubbery and trees. The general theory is the same in all cases, but the effects are individual. If the property is our own we will use permanent things in the way of creepers and shrubbery, but if we simply are a tenant and expect to move in the near future, we may depend upon annuals entirely and make a fairly good job of it, because under this handing we have vines which will grow from ten to fifteen feet in a single season and tall plants, such as Cosmos, Mexican Sunflower and Castor Beans, that will serve excellently in place of perennial shrubs. Even in the case of a property owner, it is a good thing to work in plenty of annuals during the first few years, while the other plants are getting established.

Aerial formality became only the most expert can handle straight lines with any chance of success, and often he makes a mess of it. Irregular shapes of flower borders, with clumps of one variety and color, and the small stuff generally in front, is the simplest and most effective way of handing the flowers. Against the house one can use any of the clinging vines, while semi-clinging things like the Rambling Rose, Dutchman's Pipe and narrow California Cedars close to the walls are effective.

Kwangsi Province in China is constructing a model cement plant.

SWEET ROLLS
made with Royal Yeast Cakes
(overnight dough method)

In the morning dissolve 1 cake Royal Yeast Cake in ¼ c. of tepid water. Scald and cool 3 c. milk, add 2 tbsp. butter and 2 tbsp. lard, 2 tbsp. sugar and 1 tsp. salt. Add the dissolved yeast and 3 c. flour. This makes a Sponge Dough. Let rise overnight.

In the morning cream ½ c. sugar and ½ c. shortening, add 2 eggs, 6 tbsp. sugar, 1 tsp. cinnamon together and beat into the sponge. Add 6 c. flour to make a smooth dough. Knead thoroughly. Let rise till double in bulk. Form into Parker House Rolls or any other shape. Let rise till light. Bake about 20 min. in moderate oven, 375° F.

FOR over 50 years Royal Yeast Cakes have been the standard of quality wherever dry yeast is used for home baking. Order a supply today. Sealed in air-tight waxed paper, they stay fresh for months. Keep them handy in your kitchen. And be sure to get the ROYAL YEAST CAKE BOOK, to use when you bake at home . . . 25 tested recipes for a variety of delicious breads. Address Standard Brands Limited, Dept. C, 1420 to 1450 Aikens.

Buy Made-In-Canada Goods

Use Free booklet, "The Royal Road to Better Baking," for imperial and metric recipes, and temperature guides for 0475 to 1050 ovens.

CHAPTER VI.—Continued.

"To buy it." You making a trip? Do Alma's take it and use it, Alma."

"But I'm not bringing it back. I'm leaving this country in it. How much?"

Drummond was all tangled in Alma's swift words. "That canoe isn't worth a bit. . . . . You're leaving this country. . . . . The canoe cost me a hundred but it's three years old. . . . . You're not bringing it back?

I guess fifty dollars, Alma. But what is the name of she—?"

Alma gave him the fifty and strode into the store.

Down the terrace at the steamer landing, Joyce was waiting for him, so he had asked her. Laying his pack a Drummond's canoe and untying the painter, Alma started holding it, hat in hand, for a few last words with Joyce.

He said sternly, lengthening these last moments with her: "Joyce, I'm going away. I'm going after those six men. Bill will tell you about it. I am charged with him to visit you whenever he can, and old Dad Fence is going back to the Alcooks to be company for you."

Though she asked no questions about his trip, her dark eyes were big with wonder. Alma was tempted to tell her all. He could depend on her not to breathe one word of it. A score of times she had confided pains secrets to her and she had given him invaluable information gleaned from Indians and breeds.

But his trip was a desperate gamble, and Joyce would surely recognize it as such. She might lose faith in his endeavor if she knew. And he thought: "I'll be entirely out of the country, out of it for weeks and weeks. She doesn't know that; she'd feel too terribly alone; she might even come to believe I've deserted her, as I did last winter. But if she thinks I'm still here on the Waterways, perhaps not working secretly, it'll help her keep up hope."

"Joyce," he instructed her, "I'd like for you, there at the trading post, to question these Indians and mets when they bring in poultry. You might pick up some information about these six men."

"I'll do it, Alan. And if there's anything else, to help you—"

"There isn't except to keep your courage up and be careful of yourself. Joyce, if you'll promise to take care of yourself there'll be Alcooks. I'll go away feeling a mighty lot happier. I'll be worrying about you."

"I'll get along, Alan," she said simply.

As she gave him her hand, wishing him good fortune on his venture, Alan had a vision of the lonely, four-days' weeks ahead of Joyce. He was all sympathy and tenderness for her—so brave a girl, so loyal to her dad, so spirited and pretty.

He was shaken with the temptation to tell Joyce of the secret and powerful circumstances that had torn him away from her and made inevitable his engagement to Elizabeth. He had done that once, when he had made a confession and an explanation of his motive. But there were reasons that kept him silent. He had fought that fight in his own conscience, and had acted deliberately. To tell Joyce of it now would avail nothing. He felt that a resurrection of their intimacy would be painful to them both.

With a handclasp, a final word of

Alma! her father he stepped into the motor canoe, started the engine, headed the boat out from the shore. Looking back, he watched Joyce's slender figure grown more and more wraith-like in the mist until his eye no longer could see her.

* * * * * * *

Over at the Hinchliffe trading post Joyce was awaiting a visit from Bill Murdoch. A young Loucheux John Tabannah had brought a note from Bill saying he would be along some time late this evening.

This last week had been a feverishly busy one for her. With no hesitation she was sacrificing the entire trading stock. Word of her good bargains had gone out by more than telegraph, and the pottry was rolling in beyond all her expectations. Her days were from twenty to twenty-four hours long. Ninety meals for herself and old Dad Fence. Sleep in broken bits when she could snatch an hour or so. Hunting and grubbing furs as expertly as any man. It was work for any two men, and she was doing it alone handed earning the fur dollars to fight her dad's battle.

Faithfully carrying out Alan's instructions she had done a bit of detective work on her own account. But she failed to glean the slightest hint of information.

The mystery of the bandits sudden appearance engrossed her, as it had Alan, and with good reason. It made her keenly uneasy. Those men were hiding in the Thai-Azzan not many hours distant. Nothing in her heart that she believed that they had put that fateful pack of furs in the shed because of some animosity against her. Their hostility might extend to her as daughter, and they might take some alarming action. Against her. The times, when she thought of those vicious [illegible] no matter that she wanted to flee back to the safety of the post and the mothering of Mrs. [illegible].

Before she left Endurance, Bill had told her that Alan had fought out and had severed relations with the Force for good and all. That fine. His news which Joyce had been brooding about Elizabeth had not made him forget out of service. He was out now. Elizabeth had wanted him to take that Victoria job. He probably would take it now Elizabeth had had her way with him. The thing which had held her and Alan apart no longer existed.

For more than a year Joyce had seen Alan Baker slipping away from her. Slim by little. She had fought for her secret hopes as one will fight in the face of death. She wanted Alan's love more than a penniless cry for him. He was the meaning and purpose of life to her, and she could no longer bear up under her aching doubt. She, too, had come to the parting of the ways, and must take some irrevocable step.

In the twilight she heard the drone of Bill's motor canoe down the river to her. When the craft swung around a bend, she stood up and waved. Catching sight of her at the jutting rock, Bill glided in alongside.

He held a warm place in her heart. He had a man's stubborn will power, but he was honest and open as daylight, he was loyal clean through. Joyce knew that Bill loved her, in a dogged helpless way. And she could never bring them to do favors for her and he always dependable when she needed them one. She was sorry for him, sorrier that he loved her. For his sake she had several times refused him: but it hurt Bill so visibly that she had stopped.

She invited him: "Bill, let's go up to the post. You're tired. And I'll get you a bite to eat."

SOURED ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and "down" in the dumps, have no organic disease, but merely constipated bowels, headache mostly of bile. Dr. Miles Laxative Liver Pills are made to relieve this condition. Purely vegetable. Mild but sure. Ask your druggist for Dr. Miles Laxative Liver Pills. 25c.

STOP Coughing and Sneezing

The town council will meet in future on the first and third Wednesday of every month, and being a member of the same, the editor would appreciate it very much if advertisers and those who send news in would kindly hand their copy in during the first two days of the week. By doing this it will allow the editor to attend the meeting without having to work all hours after the meeting to get the paper in the mail that thing Thursday morning.

How Canada Gets and Spends

A study showing the comparison between the cost of Government in Canada and the farm value of all field crops has been prepared by W. Sanford Evans and released by the National Committee on economy in public finance by the Canadian Chamber of Commerce. The study, as illustrated by the chart, indicates that in 1913 the total sum expended by governments for ordinary purposes was equal to 50 per cent. of the farm value of all field crops in Canada. In 1921 Governments expended a sum equal to 216 per cent. of the value of all field crops.

An prizes were exceptionally low and yield not high in 1921, another comparison is added. The average value of all field crops for the 5 years, 1907-1911, included and released for the National Committee on economy in public finance by the Canadian Chamber of Commerce. The study, as illustrated by the chart, indicates that in 1913 the total sum expended by governments for ordinary purposes was equal to 50 per cent. of the farm value of all field crops in Canada. In 1921 Governments expended a sum equal to 216 per cent. of the value of all field crops.

Mackintosh, who was proud of the fact that he was descended from a chief of the clan, was having a dispute over the fare he owed a taxi driver. The man with the meter talked loud and harshly, and it angered the Highlander.

"Do you know who I am?" he demanded, drawing himself up to his full height. "I'm a Mackintosh."

"I don't care if you're an umbrella," the taxi driver snorted. "I'll have my rights."

"I hear you are a collector of antiques."

"Yes. I have a very rare typewriter which was owned by Napoleon."

"That that's impossible. Typewriters hadn't been invented in Napoleon's time."

"I know it. That's what makes it so rare."

WHAT ADVERTISING MEANS TO US!!!

On Tuesday, Feb. 21st, the Calgary Herald carried a front page article to the effect that the Provincial Government was going to take over the distribution of beer in the province. This was promptly denied by the Attorney General. There is, however, a strong belief in certain circles that the same measure will be introduced by certain private members during the present session. It is rumoured also that the same measure will contain a clause prohibiting all advertising of liquor in the province.

Looking at this possibility purely from an economic standpoint, there is no difficulty whatsoever in finding several objectives to such particularity in these like these.

While we do not in anyway wish to impress the good faith of those who disagree with us on this question and who we certainly do not hold a brief against Prohibition, we do regard the advisability of such an attempt to extend the sphere of government activities in this direction as another step in the direction of greater centralization.

The money which under the present system is widely distributed in private enterprise, in advertising as well as in the actual process of distribution would in the event of such a change be withdrawn for government revenue the inevitable effect of this would be putting hundreds of families on relief.

Now since an attempt to operate such business from Government control cannot possibly result in that efficiency and economy possible under private management, we fear not only that the revenue will be lost to the private enterprise, but that the amount accruing to the government will be considerably below expectations.

Lastly, we the editors of the smaller weekly newspapers in Alberta, who are engaged in a struggle for very life, feel that the passing of any measure outlawing liquor advertising would be the death knell of many, the death-knell of many hopes of carrying on in our service to the community, since we are partly sustained by generous assistance by our share to the money spent for this kind of advertising.

In this connection we might point to the fact that never have local newspapers been so necessary for the diffusion and full discussion of new ideas as they are now in this time of stress and changes.

We are therefore appealing to thinking people of all classes and particularly to those in public life to use their influence in the right direction if the occasion should arise.

Never Did Advertising Have Such a Story to Tell as Today.

In judging the relative class standing of high school students there has long been felt a need for a classification fairer than that based solely on the average mark i.e. the average of the units studied by any particular student whether he takes two or eight units.

That given above is based on the assumption that the one who consistently gets a pass mark (50 per cent) in the greater number of units, irrespective of the number taken, is the stronger student.

His relative standing, within the group which pass an equal number of units, is, of course, determined by his average percentages. The number of units studied by each student is also given that parents, and others interested may have a chance to judge whether he is taking the right number of units for the greatest number of passes.

Ladies Church Bible Class Play Well Received

A Three act drama, "Jimmy to Cure-All", was presented, in the Empress theatre last Friday evening by the United Church Bible Class.

A large number of people braved one of the worst storms of the season to attend the play, but it was well worth it. The manners of the organization are certainly to be commended for their fine performances, especially in view of the fact that the play was unusually hard, and required much dramatic ability. The play centered around Jimmy buying a seemingly worthless strip of land, on which at last he finds oil, eventually making every one happy. The following players comprised the cast:—

Dorothy Mann as Tillie, the maid.
Arnold Mann as Peter; her Admirer.
Elizabeth Jones as Emilie Blake the Youngar daughter.
Arthur Christmas as Jimmie Fisher her fiance.
Elleen Truby as Mr. Blake, Emilie's Mother.
Jewelle Butler as Aunt Ellen Mann
Ma Blake's Sister.
Ada Truby as Verna Blake, Mr. Blake's spoiled elder daughter.
Warren Kingsley as Willie Blake, Ma's only son.
John Gibson as Chris Means, Aunt Ellen's Butler Maid.
Alfred Fry as Herb, Dangling on Verna's String.

During the first intermission Minnie McPherson sang two solos "The Flower Song", and "In an Old Shanty Town", and in the second intermission the Misses Anderson played a pianoforte duet, all of which were well received by the large audince. The Poppy Pals orchestra played many fine selections in their usual happy and efficient style during the evening.

A special item which was not on the programme was the excellent singing of "Irish Engineers" by the young Irish in the front rows, accompanied by the orchestra, when the lights went out.

The Rev. Mr. Ramsay in his usual kindly manner thanked the orchestra and all those who took part in the evening's entertainment.

LARGE NUMBER HEAR SPEAKING ON C.C.F.

Members of the Co-operative Commonwealth Federation movement in the persons of C. L. Gibbs, M.L.A., Elmer E. Roper, both of Edmonton, and H. F. Priestley of Calgary, addressed a large number of townspeople in the Empress Theatre here on Tuesday evening. Due to unfavorable roads, few farmers attended the meeting.

Mr. A. E. Roper took the chair and opened the meeting by calling on Mr. R. Hennig, M.L.A., who gave a brief word of welcome. Mr. Elmer Roper was the next speaker. In opening his address Elmer Roper referred to the statements of opponents of the C.C.F., that there was nothing in common between the industrial workers and the farmers. He contended that the same conditions and laws were responsible for the plight the farmers and industrial workers found themselves in today.

Norman Priestley was called on, and briefly reviewed the development of the movement and the aims of the C.C.F.

Last but not least, Mr. C. L. Gibbs took the floor and in his usual fiery manner told of the C.C.F. aims in longdom.

Questions were invited and a number took advantage of the opportunity to get certain information about the Federation. A hearty vote of thanks was tendered the speakers upon the motion of Mr. C. Ashton, and the meeting was brought to a close by singing of the National Anthem.

The visiting speakers together with those who were responsible for bringing them here and for making the necessary arrangements for the meeting, adjourned to the Fort Confectionery where a light lunch was served.

Fort Loses Series to Chipman

Playing before a small yet enthusiastic crowd of ardent hockey fans here on Saturday night the Fort Hockey team held Chipman to a 1-1 tie game. The local team should have won by at least 3 goals on the night's play but they did'nt get a single break. Goalie Acteampabach for Chipman was in excellent form and though he played a brilliant game in goal yet many of his saves were of the horseshoe type—in fact, we believe the majority of them been carrying a horseshoe in his hip pocket and a rabbit's foot besides.

Playing on a sheet of soft ice covered with water for 2 periods and fighting the elements as well in the 3rd period is tough going. Such was the case on Monday night at Chipman. The one end of the rink was in very bad shape and unfortunately the locals lost the toss and had to take this end. The area around the goal was all water and the ice so soft that the goalie's duties out right were limited making it very hard to move quickly.

The score at the end of the 1st. period was 1-0 in favor of the locals. 2nd, it was 1-1 in favour of Chipman. As the 3rd. period commenced a blinding snow-storm swept right into the faces of the Fort boys, making it practically impossible for them to see ahead, whereas with the wind at their backs the Chipman men had the advantage. The locals fought furiously to tie the score and next every man up, but it was impossible to make any headway. With the Fort team all up Chipman broke away and netted 2 more goals. The Fort then scored again and to have this completed by another Chipman counter. The game ended with the score 3-2 for Chipman and they will now play Lamont for the Medicine Cup.

The Fort Hockey Team wish to thank the following men who have so kindly donated the use of their cars for the transportation of players this year.

Mr. J. R. Cecil; Mr. F M Baker; Mr. J. T. Lalonde; Mr. F. A. Morel; Mr. Joe Lalour; Mr. Arthur Lamoureux; Mr. W. T. Lane; Mr. J. P. Wiebe; Mr. A. H. Wooton and Mr. E. Flatoff.

They also wish to extend their thanks to those who have helped the club in other ways and to the hockey fans of the district who have helped support the team through these trying times.

North Clover Bar School District organized. The boundaries of the above school district were favorably voted on yesterday at a meeting held in the house of John Moore, section 36, township 53, range 23, west 4th. Present were Chs. Simmons, Frank Ritchie, John Moore, A. Hyler, W. Hyler, A. Clark, Mr. Trussman, Chas. Lamb and G. J. Dawson.

The [illegible] at the

Last Monday, when the Hon. A. J. McLean, provincial secretary and assistant commissioner Calsbert of the R.N.W.M.P., visited the barracks and concluded the final arrangements for the transfer of the barracks and grounds to the province, one of the old land marks passed away.

A meeting of the farmers of the district was held in the Josephburg school to discuss the feasibility of a co-operative elevator. It is understood that enough shares were subscribed to make a start at the undertaking.

F. S. Truby is building a new residence.

Dr. Berry purchased a Ford car from Jas. Graham, local agent, this week.

Cultivate a personal interest in the sale—for that will be an important step of safeguarding your purse from the "fish hook" that some through service buying.

Much Business Done At Town Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Town Hall on Wednesday the 1st of March at eight o'clock. Present: Mayor Mentgomery, Councillors Lunde, Hager, Fillmore, Watt, Graham and Neale.

The minutes of the meeting held on the 15th February were read and adopted.

One application for relief was approved by the Council and referred to the Department. Accounts for relief were passed as follows:—Jones, Graham & O'Brien $30.30; J. T. Lalonde $3.00.

The Council agreed to make certain repairs to the workshop occupied by Albert Graham, which is owned by the Town, and also agreed to reduce the rent of the building to $10.00 per month.

The Secretary was instructed regarding the collection of unpaid business taxes and to report results at next council meeting.

Fort School Board Held Light Session

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Secretary's office on Monday 6th, March 1922, at 7:30 p.m.

Present:—Mr. F. Atkinson, Chairman, Trustees:—Mr. E. A. Brown, Dr. Grunert, and Dr. Turner.

The minutes of the last meeting held were called for and read. Moved by Mr. Brown and adopted that—the minutes of the meeting held on Feb. 20th, be adopted as read.

The following accounts were passed for payment on the motion of Mr. Brown:—F. W. Smith $14.90; Geo. Cranston $20.75.

The meeting adjourned on the motion of Dr. Grunert.

Never Did Advertising Have Such a Story to Tell as Today.

School Notes

WF Downs and Sons

Thanks to the Executive of the Fort Saskatchewan Curling Club, the High School was unable to have a carnival on Saturday, February 25th.

Eleven rinks took part, lead by the following skips: Mr. Anderson, Mr. Hambly, E. Lane, R. Roberts, M. Stevenson, J. Gibson, [illegible] Ramsay, W. Kingsley, T. Davis, D. McLellan, and T. Berry.

Play began at nine o'clock and lasted throughout the day. R. Lane and R. Roberts piloted their rinks through to victory and met in the finals. This was a pretty match enough. R. Lane finally nosed R. Roberts out by the small score of 6 to 5.

"Congratulations Earl! We'll be laying for you next time.

A Below Zero Romance

Late one cold evening in January, a touching dramatic incident took place near "Ye Olde School House". A certain young swain in our high School was conveying the fair damsel, dearest to his heart, safely home after darkling perils. Passing in close formation past our edifice of learning, they lingered to admire a night flow from moonphines. Being however, interrupted in this most pleasant pastime by the guardian spirit of the edifice, they sought asylum in one of the little recesses open to the perils of our venerable institution. The genius of that place, however zealously felt that any attempt to enter the halls of learning at this untimely hour should not be allowed it's perish in darkness, and so lighted up a touching scene where a bold warrior took his stand in front of his frail comrade. Many lost the brave deserven the—the—oh, well "fish" is close enough.

P. S.—We understand, since the above was written, that the editorial staff have had several offers to "tell all about it".

Ode to Ada

Oh! Margaret please lend me your Locks
For I'm going to meet my doom.
And Jean I'll take your Arithmetic
Till tomorrow afternoon

And Ed, do lend me your pencil
For I haven't any lead.
I'd like to go to a show tonight
But I have to work instead.
That's Right—Keep Him Guessing Some—The Cooking Book.
Time—Faintly late Friday Evening.
Speaker—A popular young man about town who is evidently looking for a word to delay committing sins for the rest of the evening.
He speaks:—"Get a move on, you guys, I've a puzzle to solve after this".

Now here is a puzzle for you to solve: "Why do you think I'll have a hard time getting this in print?"
"Now Madame Editor, have a heart".

Welcome Announcements.

The recent statement by Premier Bennett in the House of Commons in which he outlined the attitude of himself and his Government on the subject of reciprocal trade relations with the United States, and in which he declared that the United States was Canada's natural market, constitutes, not only an announcement of great interest and importance, but it has the effect of removing, at least so far as the principle involved is concerned, this particular phase of the tariff question from the realm of partisan politics. Differences of opinion as to details of any such trade arrangement may exist or develop between the two great political parties in this country, but, so far as the question of the desirability of such an arrangement, it has now been quite plain that there is no difference of opinion.

To all those who feel that the important question of the tariff should, as far as possible, be removed from the arena of partisan political controversy, this unanimity of view will be most gratifying, as well as a most hopeful sign that all the distant date is marked improvement in the trade relations of these two great countries, having so many things in common, and divided only by an imaginary boundary line, will be effected.

Premier Bennett made his momentous announcement when speaking to a resolution moved by a Liberal member, and which was worded as follows:

That, in the opinion of this House, it is expedient that the Government of Canada re-open negotiations with the Government of the United States of America with a view of bringing about a satisfactory reciprocal trade agreement between Canada and the United States whereby the natural products of Canada, that is the products of the sea, the farm, the mines, and the forest, and including fish, lumber, wheat, cattle, etc., should have free entry into the United States in exchange for the admission of certain goods from the United States of America, which in the interests of both countries may be admitted into Canada, free from customs duties.

Aside from its importance to Premier Bennett's statement, in the announcement contained in press despatches that the new Administration at Washington, under the guidance of President Roosevelt, proposes to give overtures to the Canadian Government looking to the negotiation of such a trade agreement or treaty, if, indeed, such overtures have not already been tentatively made.

Canada assuredly will welcome these new developments, and members will they be received with greater goodwill, and with oneness hope that success will attend such negotiations than in the province of Western Canada, unequivocably the continent of North America in one economic unit, however it may be divided politically and nationally. Nature made it so geographically and climatically.

The United States can supply Canada with many things we do not, and cannot, produce for ourselves, cotton, tropical and semi-tropical fruits, anthracite coal, many articles of manufacture, to mention only a few items. On the other hand, the United States stands in need of enormous quantities of other natural products which Canada can supply in abundance. Why, then, should both countries erect barriers against the natural exchange of such commodities to the disadvantage of both?

Here in Western Canada we can raise tens of thousands of head of range cattle, but we are handicapped in finishing them for market, including the British market, and are at a distinct disadvantage in competing with the Argentine. But the United States raises enormous quantities of corn for feeding purposes. What is more natural than that Western Canada should ship thousands upon thousands of stocker cattle to the corn states to the south to be fattened for market? Both countries would profit thereby.

Why should the Maritime Provinces be forced to look for markets long distances inland in Ontario and Quebec, even in the West, with the rich markets of the great cities along the U.S. Atlantic seaboard right at hand and easily and cheaply reached by water transportation? Why should Ontario, lacking coal supplies of its own, be forced to pay the freight rates to the great coalfields immediately to the south but in the United States? Why should either country cripple the natural flow of trade north and south, fighting geography in an uneconomical fashion, while striving for markets thousands of miles away?

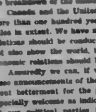
In it now admitted, almost universally, that the troubles which today beset the world are almost entirely of our own making, the result of our own blundering and stupidity, and not the fault of an all-wise Providence nor the breakdown of the immutable laws of Nature?

Canada and the United States have not the world an object lesson for more than one hundred years of an unfortified boundary line, thousands of miles in extent. We have shown the nations of the world how international relations should be conducted so as to avoid all physical warfare. Can we not also show the world, in its present time of distress, how international economic relations should be governed so as to avoid economic warfare?

Assuredly we can, if we will. And it is because we should do so that these announcements of the past few weeks are so welcome, so promising of great betterment for the peoples of both countries. And to us in Canada especially welcome as indicating a unity of desire and policy on the part of all our political parties in the advancement of the common good and economic welfare of this Dominion.

A three-day cosmos shows 4,000 homeless men, women and children in Cleveland.

Great Britain has the highest taxation; France comes second and Germany third.



Tonsilene and Hazy Spells Nerves in Bad Condition

Mr. Hal Crawford, Hamilton, Ont., writes:—"My nerves were in such bad condition I found it almost impossible to get a good night's sleep. I was also bothered with backache and dizzy spells.

I tried many different remedies, but they did not seem to give me much relief, but after I had taken Dr. Hamilton's Heart and Nerve Pills I could hardly believe the change they had made in my condition."

Rich Gold Strike

New South African Field Opens Up Great Possibilities

Another great gold strike possibly equal to past records which helped and former depression was described to the American Institute of mining and metallurgical engineers.

One-eighth of the world's present gold production to the estimate, though not yet proven, capacity of this new field, the Consolidated Goldfields, South Africa. This damning estimate was reported by F. W. Lee, supervising geologist and geophysical engineer, geophysical section, United States Bureau of Mines, Washington.

It caps several weeks of reports in inside circles of New York engineers that the new South African field might prove enough gold to start the ball rolling toward world prosperity.

Lee told the story of how the new scientific "diving rod," the magnetometer, located the ore.

"The greatest outstanding achievement of the year," said Mr. Lee, "was made by the engineers in the Consolidated goldfields. Here the subsurface of the ore deposits was traced from Middelvlei through properties of the Geduld ownership, a distance of from 20 to 40 miles.

Art Competition

Manitoba and Quebec Student Architects Win Awards

Manitoba and Quebec student architects were the winners in the Royal Architectural Institute of Canada competitions, result of which were announced recently.

Lemuel Desjardins, Ecole Des Beaux-Arts, Quebec, won first prize in the class "A" project, in which 53 designs were submitted, and Eric Thrift, University of Manitoba, was awarded first prize in class "B" project. Fortynine designs were submitted for the latter.

Maurice Germain, Ecole Des Beaux-Arts, Montreal, won second in class "A" project; G. R. Wilson, University of Toronto, was second, and William Sheets, University of Manitoba, received honorable mention.

In class "B" Lowell Wallace, University of Manitoba, was second, and I. E. Sanders, University of Toronto, third. The University of Alberta had one design entered in the class "A" project and eight in class "B" but won no prize.

The jury of award consisted of H. L. Fairbrother, Winnipeg, Montreal, Ivesor Morris, Montreal, Wilfrid Lacroix, Quebec, John M. Lyle, Toronto, and H. J. Burden, Toronto.

Another Use For Radio

Fever Machine Is Newest Treatment For Certain Diseases

A "fever machine" which treats disease by the power of radio waves to raise the temperature of the body was described before the American College of Physicians at Montreal.

It is a new application of radio, treating disease instead of sending messages, and was reported by Dr. Walter M. Simpson of Dayton, Ohio. The machine is used in treating diseases that are now generally paresis, a form of paralysis that attacks many insane persons, some forms of arthritis, a disease of the joints, and chronic diseases of the lymphatic system—arms and legs, foot and hands.

The fever machine is a short-wave electric transmitting set, identical to 30-meter radio waves through the patient from large metal plates.

Grind Buying Wheat

Shipments From Canada This Season Total 1,084,621 Bushels

Steadily increasing demand in the Orient for wheat is instanced by the fact that Canada has shipped 8,814,011 bushels to China and Japan so far this season. This is 677,413 bushels greater than consignments at this time last year, and it is believed final figures will exceed last year's mark by more than a million bushels.

Shipings up to the end of March for the Orient are 980,580 bushels. Only the lower grades are wanted, said Australia, now at hand, has been putting the lion's share of the business.

EDWARDSBURG

THE CANADA STARCH CO. LIMITED, MONTREAL

Robe Proved Good Mascot

Gift Of Moose Chief Treasured By Retired Admiral

Sir Rosse Mackenzie, Chief Controller and treasurer to the Prince of Wales, told the Authors' Club at London, England, of a New Zealand "robe" robe which he wore whenever he fought in action during the Great War.

The garment, a kind of kilt made of flax, was given to him by a Maori chief when he was in command of the battle cruiser "New Zealand" when the "New Zealand" went on a cruise to the dominion. One chief, after being shown over the ship, gave him the "skirt" robe and asked him to promise that whenever he took the ship into action he would wear it. He told him that if he kept the promise his fortunes in war, but that it would never be required in that country again.

On August 30, 1914, when the action of Heligoland was fought, Sir Lionel said he wore the robe in the conning tower, and that the ship the "New Zealand" never received a scratch during the fighting.

After this the garment was hoisted on a mast on Oa Jan. 24, 1915, the "New Zealand" fought the German ship "Blucher," which was sunk. Again he wore the "skirt" with the same result, the "New Zealand" receiving no damage whatever.

In May, 1918, he left the "New Zealand" to Captain, later Admiral Sir John Green. He handed over the "skirt" to his successor and in the Battle of Jutland Captain Green wore it when he took the ship into action. Two ships in his own line were blown up and sunk, but the "New Zealand" received practically no damage whatever. After the war Sir Lionel added, the garment was returned to him and it was one of his most treasured possessions.

Long Gas Line

Proposed To Build Gas Line From Alberta To Ste. Claire

The findings of the Alberta conservation commission is expected to have a bearing upon the plans of a syndicate that proposes a pipe line through to the coast to supply the cities of Vancouver in British Columbia, and of Spokane, Seattle and Tacoma in the state of Washington, with natural gas, it was stated by William C. Fisher, of Calgary.

"This is not a visionary project," said Mr. Fisher. "The findings of the conservation commission will determine the extent of the gas pressure in the Turner Valley area.

"If it is proved that the field can guarantee a 30-year supply, there should be nothing to hinder the proposed gas pipeline to the coast for the supply of cheap industrial gas."

Cataloguing Human Diseases

Return Of Eye Affected By Any Abnormal Condition

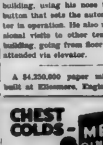
Practically every disease common to man, says Dr. Clarence R. Ellis, of the Ohio State University applied optics department, can be diagnosed by an examination of the retina of the eye.

Any abnormal condition, he explained, affects the retina immediately—particularly such diseases as brain tumors, heart trouble, cancer and inflammation of the liver.

The chief cause of eye trouble, he added, is the use of too powerful light bulbs in reading lamps.

A protest for a unclad compound is obtained only in rare instances in the United States.

Ninety per cent of the world's clothing is made of cotton.



CHEST COLDS — MECCA MENTHOL MUSTARD POULTICE

Relieves Congestion — Does Not Blister

Electric Eye Records Activity Of Housewife

Information Obtained By U.S. Bureau Of Home Economics

Each member of her family, the average housewife makes 18 trips a day to the kitchen sink, according to a February issue of the American Journal of Home Economics.

Bush these she goes to the sink, each article shown, she spends, on an average, one minute.

Thus, the homemaker in a family of five will average 90 trips daily to the sink and will work there for an hour and a half.

A photo-electric eye was used to record every trip made, together with the time spent at the sink. The U.S. Bureau of Home Economics was asked to make this study by the chairman of the committee on kitchen of the president's conference on home building and home ownership, and it received outside co-operation.

An analysis of the study shows that the Washington, D.C., housewives in modern kitchens the photo-electric eye was placed spent from 36 to 158 minutes at the sink each day, while the number of trips varied from 33 to 217. The reasons for such variations according to the article, can be determined only by more detailed studies. The outside factual data hitherto unavailable in such studies should make possible more definite conclusions. To help increase the efficiency of different types of kitchen arrangement, Dr Stanley says.

Dog Suits Mistress

"Bal," a German police dog, has mastered the mysteries of skyrocket operation. He visits his owner, Robert Muller, daily in a Denver office building, using his nose to push the button that sets the automatic elevator in operation. He also makes occasional visits to other tenants in the building, going from floor to floor unattended via elevator.

A $4,250,000 paper mill is being built at Ellesmere, England.

World Trade Of Britain Continues To Expand, Despite Existing Conditions

Undeterred by adverse world conditions and by the prolonged period of difficulty through which it has passed, industrial Britain goes steadily ahead receiving and filling orders for foreign account, often in the face of severe competition from other countries, and thus continuing to build up Britain's reputation as a centre for the production of high-class manufactured articles in widespread demand.

Of decided interest to Canadians is the announcement made by representatives of the Welsh tinplate trade of a recent order from the American Can Company, operating works in Montreal and Vancouver, for a million bonnes of tinplate valued at $700,000. The firm receiving this order controls 20 tinplate works in South Wales, in addition to its iron and steel plants, and already the effects of the contract are being reflected in increased activity in local industrial circles.

A Manchester plant has recently completed a contract for eight heavy enamel-lined locomotives for service on the Chinese Government Railways and the locomotives, fully erected, have been shipped in a vessel specially equipped for the purpose. Locomotives of this description have been supplied to China by United States firms in the past.

Four oil-electric locomotives, the largest yet produced in Europe, are about to be shipped from the Armstrong, Whitworth works near Newcastle-on-Tyne to South America for use on the Buenos Aires Great Southern Railway.

Two engineering firms are reported to have jointly secured a contract for gasoline storage tanks which are to be erected at Port Talbot, for the Irish Petroleum Company. The contract, Industrial Britain reports, is worth £100,000, and is significative of efficiency of different types of kitchen arrangement, Dr Stanley says.

In May 1923, he left the "New Zealand" to Captain, later Admiral Sir John Green. He handed over the "skirt" to his successor and in the Battle of Jutland Captain Green wore it when he took the ship into action. Two ships in his own line were blown up and sunk, but the "New Zealand" received practically no damage whatever. After the war Sir Lionel added, the garment was returned to him and it was one of his most treasured possessions.

Head Paid Hunters

To Protect Game In Northern Manitoba From Timber Wolves

With timber wolves increasing in numbers and few pelts being brought into the Pas for bounties, northern Manitobans say that the only way to save the game in the Moose Lake country, will be by means of at least two paid hunters. It is learned at the Pas, Manitoba, that only 84 timber wolf pelts were brought there for bounty last year. This does not represent the total number killed, of course, as some pelts go right through to the cities. But the number of wolves killed was small in proportion to the wolf population.

Tom Lamb, Moose Lake trader, has found a number of deer not down by wolves, but by fear. On a recent trip, he found a beautiful animal that had been killed by wolves. It had been chased nightly at the throat. Lamb marked the spot intending to bring the deer to The Pas, where he intended to place it on exhibition. On returning a couple of days later, he found the passing Indians had taken part of it for dog food.

Bring Low Prices

Portraits Of Earl Of Egmont's Family Are Auctioned In London, England

Nearly 50 of the Alberta rancher Earl of Egmont's family portraits were sold recently at Christie's famous auction partners in London, England.

Two years ago when some of the old masters belonging to the estate were sold, a Reynolds portrait sketch of Lady Egmont realized $15,000 at par. Today 50 portraits realized a total of little more than a tenth of that sum.

Works of such half-forgotten painters as Lely, Kneller, Hudson, Hoblard and Joseph were put up in one lot, bringing about a pound each. Four portraits by Hoare, including one of Spencer Percival, the murdered prime minister, sold 12 guineas. Others followed at an average price of 12 guineas a dozen.

Great Purpose Have Changed

New Planning Necessary Opinion Of President Of British Architects

London bears a novel analysis of modern street traffic problems by Sir Raymond Unwin. The president of the Royal Institute of British Architects says street purposes have entirely changed. We run what are practically locomotives at locomotive speed on highways meant for horses and pedestrians. A complete new planning must come. It will expedite traffic through streets on which we use shops, and will assure safety of adults and children on foot. The pedestrians will move leisurely in parallel streets which will have shops but no motor traffic. Christian Science Monitor.

Rapid Growth Of Insanity

Psychology Professor Claims Canada and U.S. Lead World

Canada and the United States is equal per capita, are handing the world in numbers of insane according to Very Rev Canon Charles Vorhies, professor of psychology and psychiatry at the State University of Amsterdam Holland who visited from Saint John after completing an independent study of psychiatry clinics in North America, during which he was attached to the Church of Our Lady of Victory in Rochester for two months.

The rapid growth of insanity is due to a large extent from the depression with its resultant financial worries and the like said the eminent alienist. "The fast life of this country and the United States is also one of the main causes. Young girls are not heeding the demands of health They stay up late at night Get little sleep and rush off to the office heedless of breakfast it just can't be done."

Two years ago when some of the old masters belonging to the estate were sold, a Reynolds portrait sketch of Lady Egmont realized $15,000 at par. Today 50 portraits realized a total of little more than a tenth of that sum.

Winning Sweeper Union

457

A TAILORED JUMPER OF STRIPED GINGHAM PIQUE WITH A RUSSIAN FRENCH BLAZER DENIM BLOUSETTE

Dresses it all sound charming? The blouse is finished with a tie, and the full with green plaid edge. The tiny ruffling appears again on the cuffs of the jacket and the front edges of the blouse.

The blouse can also be made with short sleeves as in small back view. For frankly but washable fabrics the sleeves can be omitted from the pattern. You will note the cape collar of the jacket is detachable which gives a very pretty effect.

Blouse prints, linen, seersucker and dimity are also mentioned.

Besides cottons, wool crepe and wool jersey can be used for the jumper with a tailorable gabinge.

Style No. 457 is designed for sizes 6, 8 and 8 years.

Size 6 requires 1¾ yards 35-inch, with 1 yard 35-inch for blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Celestial Phenomena Will Present Many Points Of Interest To Star Gazers This Year

A Wesley Letter

Grand Preacher Gave Counsel On the Subject Of Marriage

A letter from John Wesley to a correspondent who had apparently asked the great preacher for counsel on the subject of marriage was sold at Sotheby's in London, England, for $125.

The letter is addressed to "Mr. Peter Garforth, at Bingley-in-Craven, Yorkshire" and its contents are as follows:

Mr dear brother A person with all the qualifications you mention is not every day to be met with. I do not recollect such a one at present. If I meet with or think of one I will send you word. I advise you not by any means to entangle yourself with a predetermination. A handful of contented persons, fearing God though not much awakened, is far preferable. Waiting you may have right from God to find and all things. I am, your affectionate brother, J Wesley

Rice Growers Face Ruin

Empire Agreements Have Destroyed Trade For British Guiana

About 150 000 of the inhabitants of British Guiana are faced with ruin as a result of the Empire trade agreements recently reached at Ottawa, according to advices received at Port of Spain, Trinidad, giving the views of the Colonial Rice Marketing Board. Guianas formerly had a preference for its rice in the British market, but under the Ottawa agreements India and the same rates and has been driving out Guiana rice An appeal has been made to London for protection of the former market, but the authorities have been informed that no discrimination can be made. About 150,000 inhabitants of Guiana is dependent on rice growing.

Austrain Ruling Own Currency

A train of ten cars loaded with English silver coins from all parts of South Africa will be sent to the mint in Pretoria within a few weeks. The shipment will be the result of the decision of the Union of South Africa to use its own currency The total to be withdrawn is estimated to be the equivalent of $6,300,000, but the intrinsic value of the silver is less than $2,000,000. The total number of coins to be withdrawn is between 15 -

BEAT the Long Eared Owl. Since as he looks, is one of the farmers' best friends! He has a great liking for field mice and devours thousands of them during the year. So the picture shows, his is quite a serious thing with the Long Eared Owl and that when he is out for business he is usually among th.

The sky schedule for 1933 will be of great interest to star gazers, according to the American Nature Association.

Six periodic comets are due for return engagements. Two eclipses of the sun are on the schedule also.

Then too, Mars will make a possibly of more popular interest than any other planet because of the possibilities as an abode of life and its fascinating and varied surface markings which indicate seasonal changes, came to perihelion on March 1.

Perihelion is that point of the orbit of a planet or comet which is nearest to the sun. This is one of the most favorable opportunities since the planet is 63,700 000 miles distant from the earth at nearest approach on that date

Nevertheless astronomers interested in the physical ph nomena of the planets are keeping the little neighbor under careful scrutiny for many weeks, and we may expect to hear more than usual about the ruddy planet Mars within' too many months.

The comets returning are Brorsen, Pons-Winnecke, De Vico-Swift, Giacobini, Finlay and Neujmin. The first was last seen in 1879 and is due to come to perihelion again in November.

The Pons-Winnecke comet has a period of nearly six years and was discovered in 1819 It is due to return again in May

Giacobini's comet was discovered by that astronomer at Nice in 1900. It is due at perihelion on June 7. Finlay's comet is also due in June Neujmin' comet was discovered in 1892 It is due in August.

There will be two eclipses of the sun, both annular An annular eclipse is one in which the relative positions of sun and moon are such that the latter falls completely to cover the solar disk and there is a thin annulus or ring of light surrounding the dark lunar disk. At least that would correspond to mid totality of a solar eclipse.

The next eclipse occured on Feb. 24. The partial phase was visible in the southern and central part of South America, all of Africa, except the extreme northern part, the western part of the Mediterranean, Greece Asia Minor, Persia and Arabia.

The next eclipse will occur on Aug 31. The partial phase will be visible in central and eastern Europe and northeastern Asia, except India, later in the morning, or near mid-day, in Siberia, central and southern Asia, and in the afternoon in the Philippines and East Indies.

Status Of the Metis

Government Spokesman Says Half-Breeds Not Wards Of Dominion

Half-breeds are not wards of the Dominion Government, Hon. T. G. Murphy, head of the Department of Indian Affairs. Half-breeds were citizens of the provinces in which they lived, he said, with the same rights and responsibilities as the whites. Their care was a provincial matter.

In the Alberta Motor it was stated that half-breeds in that province were impoverished Premier J. E. Brownlee said it had been decided whether the Dominion or provincial administration was responsible for the care of the half-breeds. It might be necessary for the courts to decide.

The pure-bred Indians are wards of the Dominion Government. The have not the rights of the white citizens. The Dominion Government is responsible for them, but they do not vote.

Auto Exports Increase

Increased sale of Canadian automobiles abroad is the brightest spot noted in the February business summary issued by the Bank of Montreal. Greater sales were attained also throughout the whole of 1933 a Country's figures reveal expansion in the foreign market is continuing.

Avoid Grippy Colds
SCOTT'S EMULSION

WORLD HAPPENINGS BRIEFLY TOLD

Possibility of using surplus farm crops of the United States for the production of alcohol as an aid to agriculture is being studied at the request of President-Elect Roosevelt.

George Bernard Shaw viewed the great wall of China from an aeroplane at a height of 6,000 feet, but had nothing to say regarding his experience.

Hon. Vincent Massey, former Canadian Minister to the United States, will be given the honorary degree of Doctor of Laws by McGill University, Montreal, at Convocation on May 25.

So many automobiles have been painted in Paris, where the municipality rules the purchase, that a new garage to accommodate 2,000 cars is being built.

Alberta government does not favor appointing a commissioner to survey taxation. Premier John Brownlee informed a delegation from the Alberta Branch of the Canadian Chamber of Commerce.

After many years' public controversy over the divorce question, the Chief Justice of Trinidad has granted the first divorce in the island's history. The hearing is to only forty-five minutes.

John Robert King of Vancouver, prominent figure in the mining, fishing and lumbering industries of the Pacific Coast in pioneer days, is dead aged 80. He was born in Maine, Out., and came to British Columbia in 1876.

Prof August Piccard, explorer of spaces 10 miles above the earth, is convinced he can build an aeroplane capable of flying through the stratosphere at 300 miles an hour, if he were furnished $800,000 for the purpose.

The Japanese Government through the embassy at Washington, issued a 6,000 word statement in defence of their military activities in Manchuria and her actions at Geneva in the face of condemnations on the part of the League of Nations.

A Featherweight Airplane

Glider Soaring Machine Is Remarkably Easy To Handle.

Britain now remarkable results achieved with a slow-moving, feather-weight airplane. This new type, which may indicate the coming of "flying for all," is designed by C. H. Lowe-Wylde. A woman beginner recently made a flight after half an hour's instruction, the instructor giving his orders from the ground. After the short hours in the air the pupil was able to obtain the brevet for her "A" certificate. The plane carries only a 6 horsepower motorcycle engine. Its top speed is 50 miles. But the big factor is that it lands at the "standstill" speed of 18 miles an hour.

TIRED AND IRRITABLE?
Take Lydia E. Pinkham's Vegetable Compound
It quiets the nerves and helps to build you up. You will eat better . . . sleep better . . . look better. Lots will soon vouch from experience. Remember that 15 out of 16 women say, "Try it." Why don't you? Let it help you too. Liquid or tablets. Same, on you prefer.
W. N. U. 1936

Tired Of Depression Talk

Winona Mining Recorder Returns North Where People Do Not Grumble

Tired of talk of depression which he has continuously encountered in the cities, Mrs. F. Missender, British Columbia lady mining recorder, relinquished the return to Squaw Creek being the boundary of the Yukon and Alaska. "At Squaw Creek," she says, "things were never exactly prosperous, but folks take things as they are and spend no time talking. While they don't even know there's a depression. Things go on just the same."

Mrs. Missender took in a team of sleigh dogs and supplies and she plans to make the trail to Squaw Creek before the ice thaws. Her goal is reached by way of Haines on the United States side and Pleasant Valley, a former Mounted Police outpost.

"As a matter of fact, conditions are better at Squaw Creek now than ever before," says Mrs. Missender. "Most of the people are trappers, with almost no white men to live business. There's gold waiting for them these days, but gold was discovered up there not long ago and the miners are making from $6 to $15 a day in placer mines, which absolutely no place to spend their money."

BOUND YOKE CONSTRICTED YOUTHFUL LINE TO THIS SMART WOOL CREPE

It's the sporting type that will be beloved by youth and youthful women types.

To be certain its carrot-red, a Paris favourite. A wide black suede belt marks the waistline.

It's very simple to make it. Just a few major points to be careful of. You'll be amazed at the short time it will take you, and of the small expenditure.

Style No. 927 is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 2¼ yards of 39-inch material.

Plain and printed crinkly crepe silk are very smart for this model.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Recipes For This Week

(By Betty Barclay)

SOUTH BASKET PINWHEELS

1 cup flour
2 teaspoons baking powder.
2 tablespoons sugar.
½ teaspoon salt.
½ cup milk
2 tablespoons sugar
½ tablespoon orange juice
Grated orange rind

Mix and sift flour, baking powder and salt, rub in one tablespoon butter, or other shortening, and moisten to a dough with milk. Roll thin; spread with remaining butter, sprinkle with sugar, mixed with orange juice and rind. Roll up like a jelly-roll. Cut in slices and place, cut side up, in buttered muffin-pans. Sprinkle with remaining sugar and bake in a hot oven.

RAW WHEELS

1 cup cooked ba... chopped fine.
2 tablespoons butter.
½ cup stale bread crumbs.
½ cup milk.
1 egg.
1 teaspoon sugar.
Salt and pepper.

Melt butter. Add bread crumbs and milk. Cook five minutes, stirring constantly. Add ham, egg slightly beaten, and seasonings. Pour into buttered custard cups. Set cups in pan of hot water. Bake in a moderate oven until firm. Serve with a white sauce

Fish Cargo By Air

Former Two-Day Trip Now Taken Only An Hour

...ere caught in the lakes of northern Manitoba they are delivered to a Winnipeg fish dealer by the Winnipeg Air Railway, 35 miles away, for transit from this point by rail to cities in Canada and the United States where they are in demand. Formerly the 35-mile journey by horse cutter and trudeau took two days over rough trails.

The inland fisheries of Canada are among the country's most valuable assets. The fish caught in large quantities for the commercial market in Manitoba come from Lake Winnipeg, Lake Winnipegosis, Lake Manitoba and the smaller lakes. White fish and pickerel are the chief fish caught, but pike, sulthee, gold-eye and several other varieties are plentiful.

Bottled Many Years

A bottle containing a card of the hydrographic department of Japan was found on the beach a mile south of Tillamook Bay by C. L. Bartow, Oregon. The bottle was sealed with wax and contained a card indicating it had been set afloat June 6, 1911.

TAKE FRUIT-A-TIVES FRUIT SALT

SUNDAY SCHOOL LESSON

MARCH 17
JESUS MINISTERING TO THE MULTITUDE

Golden Text: The Son of Man came not to be ministered unto, but to minister and to give His life a ransom for many. Matthew 20:28.

Lesson Mark 6:1-56
Devotional Reading: Isaiah 35:1, 2 3-10.

Explanations and Comments

A Prophet Not Without Honor Save In His Own Country, verses 1-6. You remember how, in his Holy Way John Bunyan sketches one old Mr. Prejudice, with fifty dogs' men to his back. Mr. Prejudice, of course, that particular gate into the citadel of Mansoul against the assaults of Prince Emmanuel. Well, it was Mr. Prejudice who stopped the ears and hardened the hearts of these Nazarenes against the appeals of Jesus (and day!—T. D. Jones).

The Gospel Befriended, verses 17-29. The death of John the Baptist was a turning point in the life of Jesus. The enemies of Jesus now felt assured that they could complete his death without opposition, since no protest came from the people at this dastardly deed.

The Return Of the Twelve, verses 30-32. We might consider the preceding topic, verses 14-29, as an interruption of the narrative, for verse 30 continues the story left at verse 13. The word apostle means literally one who is sent forth, a messenger. The Twelve had been sent forth on their mission, and now on their return Mark calls them apostles, for the first and only time (Luke 9:10 various towns and villages to which they had been sent, two by two, they were eager to report to their Master what they had done and taught, what success and what failure. Jesus had been there in their appointed work. It might be called:

"He sent men out to preach the living Word.
Absence with all the ardour of His fire;
They spoke the truth, wherever they were heard;
But back to Him they brought their heart's desire;

They turned to Him through all the heightening days
With each perplexity of life or creed,
His deep reward, not that they spoke His praise,
But that they brought to Him their human need."

—Hildegarde Hoyt Swift.

Jesus noted the disciples' need of rest as well as of opportunity for uninterrupted talk with him—for there were many coming and going and they had no leisure so much as to eat. And He counselled their going over to the quiet uplands on the other side of the lake. This they did.

Artists Very Seldom Have Beautiful Hands

Painters Rather Than Sitters Strong and Capable But Not Beautiful

The idea that hands exhibit more character than faces, and that artistic hands are invariably soft, slender and graceful, is exploded by Sir Frederick Wedmore, Mrs. Alma Reed says.

Mrs. Reed opened an exhibition in New York of more than 150 photographs of hands of famous men and women, statesmen, priestesses, writers, painters, politicians and housewives.

"The hands of famous actresses," she said, "are almost universally beautiful. Long, slender fingers, meticulously cared for nails and smooth contours are characteristic. Their hands are decorative, so they should be. But when it comes to musicians, writers, sculptors, male or female, the rule does not hold.

"Their hands are apt to be strong—capable, yes, but not necessarily beautiful.

Pulp and Paper Industry

Operated On Sound Economic Lines It Would Surpass Present Plans

When prosperity returns, it should be the task of both Government authorities and those who direct the destinies of the pulp and paper industry to work for an effective control of development, in order that the evil of overproduction may be avoided and the industry allowed to expand in response to normal demand, not to artificial stimulus.

If it is thoroughly rehabilitated and operated on sound economic lines, there is no reason why it should not regain its former place, but the danger from the American embargo is written plain.—Montreal Star.

Things don't seem half so expensive when you can charge them.

Offers Good Possibilities

Diesel Engine Travels Quickly With Small Amount Of Fuel

Flashing over the rails at 65 miles an hour, the first Diesel electric train ever used on an English main line had a non-stop run of 188 miles and ... from London to Birmingham.

Five minutes ahead, puffing clouds of smoke and steam, sped the regular London-Birmingham flier, but the Diesel train travelled just as fast and purred along smoothly and almost noiselessly. It required only 20 gallons of fuel, costing a total of seven shillings (about $1.20 at current exchange) for the journey.

The trip opened startling possibilities for the hard-pressed British railway companies, which have been keeping to steam for a century because of the cheapness of British coal. Recently the Southern Railway tried a new departure, electrifying the main line from London to Brighton, but at a heavy initial cost and after three years' work.

Not only in the coal industry worried by the success of the Diesel train but the advocates of electrification are beginning to wonder whether the Diesel storage battery system is not cheaper and better fitted to British conditions.

World's Brains Still Busy

Someone Is Always Thinking Of New Things For Invention

In 1848, a current magazine article reveals, an official of the United States patent office resigned because "Everything possible had been invented."

Since this gentleman left his post in the smug belief that the world was finished and perfect, the world's brains have invented the sewing machine, the typewriter, the electric locomotive, the air brake, wireless telegraphy, internal combustion motors, airplanes, cash registers, incandescent lamps, motion pictures and almost a million and a half other devices which we now consider commonplace.

Hopes To Better Record

Speaking of a testimonial dinner given in his honor, Sir Malcolm Campbell, who established a land world automobile speed record of 273 miles an hour, said he was hopeful of returning to Daytona Beach, Florida, this year from England to try for a 300-mile-an-hour mark.

RAILWAYS WILL MAKE USE OF AUTO TRUCKS

Montreal, Que. An important development in freight services on the Canadian National Railways is foreshadowed by the ... ...ric Railways which will provide door-to-door pickup and delivery of freight shipments without extra cost to either shipper or consignee, was announced jointly by George Stephen vice president in charge of traffic of the Canadian Pacific Railway and Alistair Fraser, M.C. acting vice president in charge of traffic of the Canadian National Railways.

The two railways, the announcement stated, had completed contracts with approximately 45 trucking firms at cities and towns served by their lines in western Ontario, between Toronto and Windsor and Toronto and Barrie, whereby pickup and delivery service will be provided for shippers at no extra cost. Now the ... ...ing the features will become effective this week.

The railways state emphasized, are not entering the trucking business. At some of the points affected by the new tariffs, they already have contracts with cartage firms for pickup and delivery of freight.

Under the present plan, however, this service is extended, by arrangement with local trucking contractors, to points where pickup and delivery service did not previously exist.

The new door-to-door consignment system will improve the service offered at such points and will make use, under contract, of existing cartage services instead of involving the organization of new facilities for that ...

New Motor Law

Bill Introduced In Saskatchewan on Legislature For Protection Of the Public

Regina, Sask. Motorists responsible for an accident will have their licenses taken away until they pay any judgments rendered between $100 and $1,000 for property loss, $5,000 for the death of one person or $10,000 for two or more persons, according to a bill brought into the legislature by Hon. A. C. Stewart, minister of highways.

The proposed act also provides proof of financial responsibility before an auto license is issued to any person under 21 or over 65 years of age, or anyone held responsible for a motor accident.

Saskatchewan's proposed law on financial responsibility of motor owners and drivers is modelled after Ontario's law.

The proposed act does not deny the plaintiff in any motor accident cases from proceeding for remedy under any other section of the law.

Price Remains the Same

Radio License Will Be Five Dollars For Another Year

Ottawa, Ont. Radio licenses will remain at the $2 figure for another year, Hon. Alfred Duranleau announced in the House of Commons. At the same time he expressed the hope the Canadian radio commission would limit programs to advertising produced in Canada—goods or to Canadian non-advertising programs.

The House "went on the air" discussing radio estimates of the Department of Marine and taking in a wide range of topics. No decision had been made, the minister said, on the system of collecting receiving licenses this year although the object was to force every owner to pay his fee.

Mr. Duranleau said the department this year would be paid for 160,000 more radio licenses at $2 less the 50 cents commission, under the house to house canvass system.

Predicts U.S.-Jap War

Richmond, Va. Asserting that the United States and Japan inevitably will meet in a future war, General William Mitchell, former chief of America's army air service, recommended the mobilization of air power in Alaska.

Studying Income Tax Law

Government Seeks Workable System To Cover Heavy Bonds

... Government is ... ... bonds ... ...

... proposal to apply a flat rate of ... per cent on all interest coupons presented to the banks for payment has met but ground heavily in the past few days. It is claimed that it would such a policy would be to invite wealthy citizens with liquid assets to invest these ... government bonds and reduce their income tax rate to four per cent.

As other opposition has now been put forward which, it is understood, is meeting with a more favorable reception by the cabinet. This plan is to compel all persons cashing interest coupons to make out a certificate of ownership. The certificate would be given to them by the banks, when the coupons were presented for payment. ... declaring ... ...

Predicts Many Earthquakes

Famous Seismologist Forecasts Disturbances For This Year

A "rather agitated year" in the way of earthquakes, with especially great tremblors in Alaska and the Greater Antilles, is the forecast for 1933 of Dr Redfield Sundial, the famous seismologist.

Known as "the wonder man of France," Dr Sundial, head of the Geodynamic Observatory of Fecamp, is noted for the amazing accuracy of his seismic and volcanic predictions. He forecast, for example, a quake in eastern America for early in March, 1925. On March 7 of that year New Yorkers noted prolonged earth shocks.

Although several important quakes are foreseen for this year, in widely separated regions of the earth, Dr Sundial says that the movements in the earth's surface will avoid thickly populated regions, thus preventing a repetition of the Messina and Tokyo destruction.

"In February in Alaska and the Greater Antilles, there will be an outbreak that will reach the proportions of an appalling manifestation," Dr Sundial told International News Service.

"Throughout the southern chain of the Andes mountains in South America in March there will be sudden threatening upheavings of dormant telluric energy.

"In April the earth will tremble in far-away China.

"In May there will be bad news from Mexico."

After that, he said, there will be scenes terrible of seismic quietness, when Vulcan will once more visit one of his most famous stamping grounds, Near Bandaisan.

"The Balkan peninsula will shake in September," went on Dr. Sundial. "Finally there will be a few other quakes in Turkestan and India before the end of the year."

Remembered His Friends

Hospital Left By Toledo Artist Provided Annual Birthday Party

Requests to be given to fifty-nine friends annually on their birthdays were provided for in an unusual will filed for probate at Toledo, Ohio.

The late Frank J. Meal, art connoisseur, manufacturer and member of the old Toledo family who died Jan. 30, named seven friends as beneficiaries who are to receive $300 a year on their birthdays so long as they live. The will also provided for gifts of $100 each to fifty-two other friends to be distributed each year on their birthdays as they live. It was stipulated that the $400 bequests were to be increased to $500 a year as soon as the estate would carry them.

All of the beneficiaries live in Toledo except Beatrice Craigor of Hartsdale, N.Y., who is noted among those who are to receive $400 annually.

Age Determined By Skin

Scientist Claims It Has Considerable Bearing Like Trees

A method by which it is claimed to be possible to determine the age of a person by examination of a single hair was demonstrated before the convention of the International Association of Identification by Calvin Goddard, of the scientific criminal detection laboratory of North Western University at New Orleans.

The method depends upon the discovery that when powerfully magnified, the hair reveals a system of concentric rins something like the familiar rings of trees. This is the newest method of scientific detection.

All In the Same Boat

The farmers' interest could never in reality be divided from that of the towns. Both are now threatened with a common ruin, and the only hope of the one is the hope of the other. This is in the increased demand which betterment trade; and the improvement in trade, to be effective, must be world-wide.—London Observer.

Chemistry

May Rewrite Canadian History

Mendenhall Records Make It Necessary, Opinion Of Toronto Professor

Historians will have to rewrite Canadian history, according to the records of the Mendenhall Court Meeting, and said Canadian histories would have to be re-written after his collection of records was complete.

There is no adequate history of the west as it existed after 1867, Prof. Wadsworth told the writer. "Canada's early struggles, particularly the rebellion of 1837, prejudice and entered. Early white Canadian historians pay inadequate attention to the facts and do not concern themselves as to who was right and who was wrong until we get a good accurate history of the period."

The best publisher of roadside history in Canada is Prof. Wadsworth, says Robert Glasgow.

Houses For Poultry

Building 30 By 70 Feet Correct Size For One Hundred Laying Hens

A poultry house 30 by 70 feet is regarded as about the correct size for one hundred laying hens. A house of this size used at the Federal Experimental Station, Harrow, Ont., is proving satisfactory. Birds in a smaller house, 16 by 16 feet, appeared to be more uncomfortable during the winter months. This conclusion, advanced by the superintendent, was borne out by the behaviour of the birds in the smaller house for they would cuck shelter from the draught and huddle in corners. An outbreak of colds and roup confirmed this conclusion, as no trouble of this nature was experienced in the larger house.

A curtain record of the variation in temperature of the two houses also added conspicuously little difference. This uncomfortable condition was believed to be due to draughts cracked in the narrower house.

Has Not Changed Course

Survey Proves Idea About Gulf Stream Is Wrong

It has been bruited about often in recent years that the Gulf Stream, by melting its course, has managed to change the climate of the eastern part of the North American continent, bringing milder winters than our grandfathers or great-grandfathers experienced. Weaver waiters have been said, generally speaking, though persons not yet ancients can remember the rigors of the winter of 1917-1918, 1916 winters or severe ones, the Gulf Stream cannot be charged with responsibility. A survey carried out by the officers of the British destroyer "Saguenay" in the course of that vessel's passage to the West Indian station to the attention of the Gulf Stream as that channel existed in the 1911 charts. Americans, the New York Sun points out, have previously had frequent occasion to doubt their own surveys that the Gulf Stream had not changed was not changing, would not change.

Indomitable believers in the permanence of the Gulf Stream note meanly all and why, received advance information of the intended survey and went back to the haunts of 1911 further to explain a harassed and bewildered world. To some that may seem plausible; that famous ocean current has been invested with so many wonderful qualities that it only stands credibly a little more to think of the Gulf Stream as capable of spanning unbridgeable gulfs of the deep.—St. Thomas Times-Journal.

Archeological Discovery

The series of wall sculptures uncovered by Dr. Ernest Herzfeld under 26 feet of rubbish and masonry of Persepolis, ancient Persian city, is considered the greatest discovery in the history of archeological research, says Time. The series of wall sculptures, if set together, would form a panel of five or six feet in height and almost 1,000 feet in length.

Modern girls have something in common with their grandmothers, they love spinning wheels.

Clever At Embroidery Work

Prince Of Wales Not Only Man To Take It Up

Men may now undertake their overwhelming desire to embroider. The Prince of Wales has done it, and no one need be afraid to follow in his tracks. The Prince started in that when he was a small boy and lately he has learned the intricacies of petit point and cross stitch. One of his first pieces of work in this medium is an attractive backgammon board, which was on view at a recent exhibition in London. It has a color scheme of red, blue and fawn. Silk and wool have been used for the half-diamond design in petit point and half-stitch.

Many men may embroider on the sly. Lord Clarendon does it quite openly. On the voyage to South Africa two years ago he often took a hand at the embroidery frame on which the map of Africa was growing. Lord Hyde, too, could be seen stitching busily in the hottest parts of the day. The princess royal's husband, Lord Harewood, is another skilled embroiderer.

May Take Action

Government May Consider Amendment To the Judges Act

The Federal Government is understood to be considering an amendment to the Judges Act proving for the automatic retirement of king's bench and appeal court judges at the age of 75 years.

Such an amendment, in principle, has been approved twice by parliament and there is no doubt that action of some kind will be taken sooner or later, but whether the government will introduce the amendment this session is not yet decided. Judges of other courts retire by law when 75 years old.

Many Friends Insane

The Bankers Magazine says in 1933 the U.S. Government loaned eleven thousand more patients than in 1931 —all for mechanical contraptions, and not one, apparently, for detecting the nature of mental man to fit him to use them wisely and for the benefit of the entire race.

Garden Notes

(By Gordon Lindsay Smith)

It's not be tested by the tales you hear about all seed coming from the same source. There is a wide variation in this, prices running from a few cents an ounce for some to several dollars and all of the same name. Some seedsmen specialize and so may grow wonderful results in England or the Southern States they may be a failure here. Reputable seedsmen must, however select their seed from those districts which turn out stock specially recommended to Canadian conditions. Naturally, if they didn't, they would not remain reputable very long. You may have perfect soil and take all your exercise with a hoe and rake, but without good seed you haven't a chance. Remember too, that good seed is grown by experts who specialize on one or two lines and have space sufficient to prevent bees and other insects mixing pollen and, therefore strains and varieties indiscriminate by.

When spring really arrives Canada enjoys the finest climate in the world for most vegetables and flowers. To get the most out of this period we should start some of these vegetables and flowers from seed indoors and by this method get results to the season without going to the considerable expense of purchasing young plants. A bed is the best thing though good results are obtained by using flat boxes or a sunny window. Hot beds are made in early March. Get a supply of fresh horse manure which has been turned frequently to prevent burning. Dig a hole as big as the window sash you are to use, or build above the ground by a wooden frame and boards. From twelve to eighteen inches of manure will prove plenty—a mound, and on top of the pit two inches of fine garden soil. Cover with glass, the corners of red, blue and fawn. Rain and wet have been used for the half-diamond design in petit point and half-stitch.

Many men may embroider on the sly. Lord Clarendon does it quite openly. On the voyage to South Africa two years ago he often took a hand at the embroidery frame on which the map of Africa was growing. Lord Hyde, too, could be seen stitching busily in the hottest parts of the day. The princess royal's husband, Lord Harewood, is another skilled embroiderer.

An Animal Mystery

New Taidings Calls Out To Isle Of Man It Roads

One of the minor mysteries of animal migration is how the lemur came to be found in Madagascar, and why one of which is being sent to the Prince of Wales' farm in Notting-hamshire, is not found in any other country and in China. But how the tailless cats got across the world to the Isle of Man is a puzzle.—London Answers.

Working On Perfect Mirror

Science is on a step nearer to the perfect mirror, one which will reflect every bit of the light, with a new metal surface announced in the Physical Review by Hiram W. Beckham of the University of California. These mirrors, he says, should be of considerable value in various optical instruments where front surfaces of high reflecting power are desirable.

SHE WAS GETTING FATTER

Now Down To Normal

"I was putting on flesh very rapidly," writes a married woman. "And also suffering from constipation, and was very liverish. Three months ago a friend advised me to take a teaspoonful of Kruschen Salts in hot water every morning. I have kept this up regularly ever since, although I have been down to my normal weight (126 lbs.) for several weeks. I never felt better in my life, and I intend to carry on with Kruschen always. Several of my friends have remarked how ill I was getting and how well I was looking. After my having told them how it was done, they are doing the same."—Mrs. D H

Overweight arises frequently because the system is loaded with unexpelled waste, like a furnace choked with ashes and soot. Allowed to accumulate, this waste matter is turned into layer after layer of fat. The old habit of Kruschen keeps the internal organs to throw off each day the wastage that poisons and overburdens the system. Then, little by little, that ugly fat disappears, leaving you healthy as you feel wonderfully healthy and energetic inside as that ever before in your life.

FREE TRIAL OFFER

If you have never tried Kruschen, try it now and prove for yourself what a difference one month can make. Get a bottle of Kruschen from any chemist in the world. Take a half teaspoonful in a cup of hot water first thing every morning before breakfast. Then note the result. Within a few days you will feel better than you have felt for years. Within a month you will feel and actually look a new person. What could be better? Kruschen costs but a few cents per day. Obtainable from all chemists throughout the world. Sold in Canada by The Kruschen Salts Co., Ltd., Toronto.

HEART OF THE NORTH

CHAPTER VI.—Continued.

A question came from Joyce:

"He and Elizabeth have decided definitely, then, Bill?"

"Yes. She's waiting for him to come for her or send for her. They've made plans to be married in Edmonton and have their honeyme in the Selkirks and then go on over to Victoria."

Joyce asked one last question. She asked it calmly without faltering or even pausing on the precipice edge.

"Did Elizabeth say that, or did Alan?"

"Alan said it. I overheard them. that night he left. They planned it together there in his cabin. . . . "

. . . . .

Joyce was aroused by old Dad Pence calling for her. Raising her head from her arms, she looked around. Grotesquely she realized that she had there dozed in waiting and numbed with cold with a cold that was more than physical.

Dawn had come. The dark hours had passed. It took her moments to realize. Time had stood still for her since she told Bill good-by.

Before going up the river bank she had the presence of mind to go down to the water edge and bathe her face and hands and smooth back her hair.

She went back in the trading store with old Pence, and prepared breakfast for him. Over his birch-mart pipe old Pence began whittling again at the "story-stick" he was carving these days. The stick was a long-standing ambition of his, for with his rare-knife, six-bladed knife, he was carving the story of his life. And he was going about it in earnest, carving steadily every day. It was as though he had some dim fore-knowledge of the black wings hovering—a warning to hurry.

Noticing Joyces exceeding paleness and her exhaustion, he bade her:

"Now you get to go an' rest, gal. I'll tend to th' fires this mornin', if anybody comes."

Joyce went into her room. It seemed so cold, she could not get warm; the cold seemed to have pierced her through and through. She kindled a fire in her small sheet-iron stove and put in wood, and then lay down on the bed.

From the dresser Alan's picture was looking down at her. She did not glance away, but looked at it steadily, as she lay there so motionless and still.

The exhaustion that had drained her had left her very quiet of mind. She could think clearly, in thoughts precise and rational. . . . .

You fought this battle once, Joyce, and you won it, and then you handed the sword back to your enemy and gave him power over you again. When Bill first told you last fall of Alan's engagement to the girl waiting in heartbreak of three weeks, Joyce? You finally rose above it, you conquered. But then you permitted yourself to hope again. When Alan merely came past here on a patrol, after staying away from you all winter, you went wild with hope.

Last night Bill came to you once again, and after he left, you collapsed there on that rock. Joyce, don't let yourself open to agony such as that. You must forget Alan Bakker. You must, you must! You cannot turn this day or that, however, you must wish that pain. You must never again look back! You have been given a chance for looking back, and punishment has been terrible. In self-preservation you must forget Alan Bakker. . . . .

An hour or more gazing up at Alan's picture and seeing her course so clearly, it seemed to Joyce that if she could destroy his image there on the dresser, it would be well. And the only way to do that, it would be a symbol of destroying his image in her heart.

After a little while she got up from the bed; and going over to the dresser, began taking out of it all of Alan's letters to her. They dated back across a few years, addressed to her here, at her college, at Ottawa and at times when Alan was overseas. Part by part they went into the stove.

There was good augury for Joyce in the fires and unhesitant way she set about burning them.

He had given her more than a few presents; a costly old-fashioned bracelet which had been his mother's; a miniature hope chest of India-silk kerchiefs which had been the envy of her college friends; a gold and jewel-hunting knife; a wrist watch for graduation present, and a dozen less expensive gifts. Joyce laid aside the bracelet and the watch and burned all the other gifts she destroyed by fire.

She took his picture from the dresser, turned it.

Afterwards she sat by the table writing a long letter to her bosom chief in Ottawa, telling him frankly about her father, her hope to see her father vindicated and then to bring him over to Ottawa with her; and asking him if his former promise of a position whenever she wished to return was still good.

"Dear old boy days of incessant travel, he fell asleep at last, and dreamed of that his cabin it had been Joyce, not Elizabeth, whose arm had been around him and who was waiting for him when this long adventure should be ended.

At Fort Smith the heavy rains had rendered the sixteen-mile portage impossible to tenane and to the motor trucks which plied that stretch. Alan dared not wait; his days were too precious. He decided to go on, his young Chipewyan friend stuck with him. Shouldering their craft, they started cautiously down that slippery, by turns, spalling each other at the motor. Raising a blanket sail to a northward wind, they scudded across the island-dotted lake from Resolution, and whipped up the Quatre Fourches delta toward Fort Smith.

Walking the dim trail that stars above him, Alan hooked steadily at the two girls who had loomed so big in his life and then faded. He had made a cataclysm had happened in his life, breaking into the old order, blasting the even routine of work and play in the north. It had burned into his protege had bought out and departed the Force? . . . . "Your commission wasn't forthcoming, so you quit! Your loyalty! Is one week your down there! Is this to give a quitter was worse than a gross incompetent.

Passing by, ten feet away, Williamson merely nodded slightly and said, "Good luck, Baker."

Alan understood. He thought: "In the Force I'm dead—far away from Ennerdale. . . . He thinks I'm on some detective detail. Good Lord, when he finds I'm out, bought out.—I'—

Williamson's reticence was a precious thing to Alan, as precious as a father's. An impulse swept him to talk with the superintendent and tell him the whole sorry story. But there was the matter of that signed affidavit. Alan refused to go back on that; and even if he did he would literally be [illegible] himself's liar. What did his personal feud with Haskell matter now? He was out of the Service. And the superintendent would try to stop his venture if he heard, for it was beyond the law

He allowed Williamson to go past. Setting their boat to water, he and the young Chipewyan hurried on to the great delta-mouth of the Peace, where they caught up with a steamer going on to McMurray. The young Indian wanted to turn west to the Rockies and see the Land of Low Mountains Giving him the water canoe and the outfit, Alan shook hands, said Khahowyn, and went [illegible]

(To Be Continued).

Weather Prevailing

"Dearest Annabella," wrote Cowald, who was hopelessly in love, "I would swim the mighty ocean for one glance from your dear eyes. I would walk through a wall of flames for one touch of your little hands. I would leap the widest crevasse for a word from your lovely lips As always Your Oswald

P.S.—I'll be over on Saturday night if it doesn't rain."

Get Rid of That SORE THROAT!

Any little soreness in the throat grows rapidly worse if neglected. Crush some tablets of Aspirin in some water, and gargle at once. This gives you instant relief, and reduces danger from infection. Use good gargle and you can feel safe. If all soreness is not gone promptly, repeat. There's usually a cold with the sore throat, so take two tablets to break up your cold, headache, stiffness or other cold symptoms. Aspirin relieves neuralgia, neuritis, too. Use it freely; it does not hurt the heart.

ASPIRIN

NO MORE EXCUSES FOR STOPPED-UP DRAINS

Gillett's Lye dissolves clogging grease . . .

JUST sprinkle Gillett's Pure Flake Lye down your drains and toilet bowls each week. Use it full strength—this powerful cleaner cannot harm enamel or plumbing.

Grease and dirt dissolve like magic . . . germs are killed . . . odors banished. Your drains run free and clear.

And Gillett's Lye in solution has many uses in your kitchen. One teaspoonful dissolved in a quart of cold water makes short work of grease pots, cracked-up floors and other tiresome cleaning tasks.

Use *Gillett's Pure Flake Lye* for all your household cleaning. It saves hours of hard work. Ask for it by name . . . at your grocer's.

GILLETT'S LYE

* Never dissolve lye in hot water. The coldness of the lye itself heats the water.

LETTER TO EDITOR

Dear Sir:—

May I be permitted through the medium of your valuable paper to say a word on behalf of our hockey team.

All of us are proud of our team and are anxious to see them bring home the honors. Well Sir, what are we doing to help them? They ask us to give them our support and encouragement by being present at least at the home games. Here however comes the pawer. What inducement beyond seeing our team in action have we to go. Our rink is the worst in the league and a worthable diagram to our tears and the lads who have so far done so well.

To begin with there is no penalty box. Substitutes and delinquents have to leave the ice in an overheated atmosphere and simply shiver it off until they go on again. The "fence" boards are old and dirty and players find it next to impossible to carry on when the puck hits the fence, simply because they are unable to see it. The lighting plant is miserable, lights are much too low, are poorly spaced, and not being stayed swing and cause shadows. It is a fine concrete ball park but has been badly neglected long ago.

The dressing room, (so called), reminds one of the homesteaders rough and ready pig-pen of 30 years ago, and is about as well heated.

To say we squander here also a high—usually after paying the small entrance fee to a game, we rush to the fence—why? Simply because the accommodation for us is so poor we have to hang on the fence to enable us to keep the upright attitude. A few lucky ones do it in true may secure the odd plank, but whether the rink management supplies these or not I am not aware. Oftener than not we instead of five.

have one foot in a crevice and the other on an ice pinnacle and have the progress of a game under such conditions.

During intervals we crowd into the curling rink or the other dressing room, (also so called), vainly trying to thaw out our frozen extremities.

I understand the Curling Club gets 40 per cent of gate receipts and that they say they contribute nothing expenses on the hockey and of this I would suggest to the Curling Club to erect shating accomodation and foot boards so that onlookers might be able to wrap up a little, and believe that they would then get something for nothing instead of trying, as at present, to get something for nothing

I hope you will see your way to publish this Sir, and help our boys have better conditions at our local rink and onlookers better accomodations.

Yours truly,
A Spectator.

Municipal District Holds Busy Council Meeting

The statutory meeting of the Council of the Municipal District of Clover Bar, No. 917, was held on the 7th inst.

The Returning Officer's report showed that Messrs. Gillies, Keith and Peters had been returned to the office of Councillor for Division 1, 2, and 3.

After the newly elected councillors had taken the Oath of Office the election of a Reeve was then proceeded with. Mr. Gillies was unanimously elected Reeve for the ensuing twelve months.

The minutes of the last meeting were read and adopted.

Mr. Peters was then unanimously elected Deputy Reeve for the ensuing six months.

Dr. T. W. E. Henry was appointed Medical Health Officer for the District, who with the members of the Council will comprise the local Board of Health for the District, with the Secretary-Treasurer as Secretary to the Board.

All members of the Council were appointed on the Relief Committee.

The regular monthly meetings will be held in the Municipal Office on the second Saturday in each month.

One application for direct relief was received and same recommended.

In view of the proposed amendments to the Local Arrears Tax Consolidation Act a resolution was passed requesting the Provincial Government to extend the date of registering tax notifications under the provisions of the Tax Reserves Act until the 30th June.

Temporary appropriations for public works were made to cover outstanding accounts and any work of an emergency nature that may be required.

Correspondence was read, relating chiefly to hospital matters, was read and discussed.

On account of technical irregularities in conducting the election for councillor in Division No. 1, and in order to avoid the expense of conducting a case to upset the results of the election, Mr. Gillies at this time handed in his resignation as councillor.

Mr. H. S. Peters was unanimously elected as Reeve to fill the vacancy caused by Mr. Gillies' resignation. Mr. Keith was then elected as Deputy Reeve.

Mr. Mark Latam was appointed Returning Officer to conduct the special election in Division No. 1, who will receive nomination papers for the office of councillor at Baker School House on Saturday, 25th March, 1933, between the hours of three and four o'clock p.m.

In the event of more than one nomination being received, the polling will take place in Baker School House on Saturday, the 25th April, 1933, between the hours of nine o'clock a.m. and five o'clock p.m.

LIEUT.-COL. FIELD HEAD OF MILITIA DISTRICT TO RETIRE

Lieut.- Col. R. Field, assistant commissioner of the Royal Canadian Mounted Police, with headquarters in Winnipeg, Monday confirmed a report from Winnipeg that he will retire from the service on April 1.

Confirming the report, the assistant commissioner said: "With one and half years' service more than is necessary for retirement, I have asked to be relieved. I expect to leave the service April 1, and will move to Brit'sh Columbia to live there, but have not yet definitely decided just where my home will be."

Lieut.-Col. R. Field, was well known to many old timers in this district, having at one time lived here.

The number of single unemployed registered with the provincial relief commission since November totals 7000, according to a report of the commission. Of this number nearly 1,500 have been placed on farms under the plan recently announced.

V. Gauf Marks 81st Birthday

Grandchildren and Great Grand-Children Join in Celebration

Mr. and Mrs. Henry Gauf, of Fort Saskatchewan, entertained at a birthday party on Monday evening on the occasion of Mr. Valentine Gauf's, Mrs. Mohr's father, 81st birthday. It was a family reunion and 63 children, grandchildren and great grandchildren were gathered for the occasion. A birthday cake with 81 candles was cut. Mr. Gauf has nine children, 34 grandchildren and 18 great grandchildren.

Those coming home for the celebration were: Mrs. Alfred Brenken, Meadow Lake, Sask.; Mrs. Edward Mans, Mansville; Mrs. Earle Graham, Namao; Mrs. N. McAdie and Mrs M Breckenridge, Mr. Jack Gauf and Mr. Harry Gauf, all of Fort Saskatchewan. Others present were Mr. and Mrs. Val Berg, Miss M. Berg, Edmonton; Mr. and Mrs. Graham, Miss Doris Graham, Namao; Mr. and Mrs. Hall Tomlinson, Bremner; Mr. W. Mohr, Mrs. Jack Gauf, Mr. Theodore and Mr. Bobby Gauf, Mrs. Harry Gauf, Miss Marjorie and Mr. Edward Gauf, Mr. and Mrs. Albert Mohr, Miss Velma Mohr, Mr. Reed Rexburgh, Miss Lillian Berg, Miss Mildred Breckenridge, Mr. Frederick Berg, Mr. Raymond Berg, Mrs. Edward Mohr, Mr. and Mrs. Frank Becker, Jr., Mr. S. Mohr, Mr. Walter Mohr, Mrs. Marvin Westover, Clyde, Mr. Gauf's grand-daughter, whose birthday is the same day, was also present at the celebration.

WOMEN'S INSTITUTE NEWS

The regular monthly meeting of the Fort Saskatchewan Women's Institute was well attended. Tentative plans were made for a Bridge Party to be held shortly after Lent in aid of the Institute Funds. The care of the Cemetery will again be the chief interest of the season and funds are needed to carry on.

Mrs. J. Earl Graham was the speaker of the afternoon. In her address on "the Modern Novel" she showed how confusion, pessimism and disillusionment in modern prose fiction, combined with complete abandonde, the cheerful aims and definite plots of the Victorian novels. The reasons given for this difference of spirit were; the development of psychology; the breakdown of the conventions and restraints of the Victorian era; the influence of the French realistic novels; the weakening of old religious beliefs; the consciousness of social problems, poverty and unemployment; the war and its aftermath with all the attendant misery, waste and cruelty.

The Nobel prizes in literature were explained and the life and works of the more recent winners were touched upon, including Galsworthy, Sinclair Lewis, Thomas Mann and Sigrid Undset. A short description of the influence of the works of Aldous Huxley and the late D. H. Lawrence on modern fiction followed.

Twelve out-standing novels of the past two years are Magnolia Street by Louis Gabling; The Fountain by Charles Morgan; The Good Earth (Pulitzer Prize Novel) by Pearl S. Buck and "Gone" by the same author; Shadows on the Rock by Willa Cather; Angel Pavement by J. B. Priestly; Flowering Wilderness by John Galsworthy; The Senator's Lady by Matilda Kiker; The Fortune by Hugh Walpole; I, James Lewis by Gilbert W. Gabriel; The Lesson of the House by Radclyffe Hall; The Magnificent Obsession by Lloyd Douglas and Pelican Plank by Ann Bridge, this being an Atlantic prize novel.

This address required an immense amount of reading as Mrs. Graham quoted freely from the opinions of recognized critics and reviewers. Mrs. Wicks expressed the thanks and appreciation of the meeting and her vote of thanks to Mrs. Graham was enthusiastically applauded.

Mrs. Stanley Dennis and Mrs. H. Butler were hostesses for the tea hour.

LAMONT TO TRY VILLAGE HEALTH PLAN

At a general meeting held last Tuesday evening, called for the purpose of discussing the question, ratepayers adopted the proposed contract by a vote of 34 to 1.

The contract is to date from April 1 to Dec. 31st. for the present year at a total cost of $900, service to include all classes of medical and surgical work.

The proposed contract is between the Village of Lamont and the Medical staff of the Lamont Public Hospital. This agreement will increase the mill rate by four mills on the tax rate of this year.

MEDICAL SERVICES

That adequate medical services for all the people of Alberta can be secured only through the operation of a contributory health insurance scheme is stated in the progress report of the legislative committee on health services tabled in the legislature by Hon. George Hoadley, minister of health. The committee's report, dealing with ultimate provision of an ideal scheme for medical services, says any plan of a more "local" nature should be readily adaptable to a more general system if such should become dominion or provincial-wide in its application. Enabling legislation by which municipal districts or parts thereof may organize for provision of medical and allied services also should be utilized says the report. Information on hand as yet does not enable it to make a final report, which is regretted by the committee. The committee was made up of Hon. George Hoadley, chairman; C. S. Cruickshank, Hillcrest; R. Hennig, Fort Saskatchewan; W. C. Farquharson, Provost; D. Atkinson, Edmonton; Hon. Mrs. Parlby, Alix and C. Pattinson, Bluss.

Taken from the Files
19 Years Ago Today
Thursday, March 19th, 1914

On Saturday last Inspector and Mrs. Swantepple left for an extended visit to Toronto, and other points of interest. It is not probable that these old timers of the Fort will return home, as, at the expiration of Inspectors Swantepple's leave of absence, he will be transferred to his new post.

Rev. Edmonds and W. Corbett, have returned from their holiday trip to the old country.

Thirty Years Ago, Thursday, May 31, 1903

Fort Saskatchewan N. W. T.

Mr. W. J. Hunter editor of the Reporter from which these items were taking from. Mr. Hunter had just started publication in town.

The opening of the Presbyterian Church at Partridge Hill was a decided success. The service was conducted by the Rev. A. Forbes, the minister of the congregation.

Superintendent Mc. Constantine were "At Home" on Monday evening; and a goodly company availed themselves of the invitation to attend.

A large raft of 60,000 feet of lumber arrived for Cushing Bros.

Mr. Sid Pearce of Partridge Hills returned from his trip to England on Tuesday.

J. Kennedy carrying the mail to Saddle Lake last week, got stuck twice, broke the tongue of his wagon and lamed one of his horses in a mud hole.

Talk of presenting a chorse factory in town is very strong at this time.

Having seen these two little items published in the Edmonton Bulletin of Saturday, January 23rd, 1897, some fort-six years ago we thought our readers would like to read them.

A ball was given at Mellins' hotel, Fort Saskatchewan on Friday night last. The company present numbered nearly one hundred. Supper was provided by H. Schultz. Dancing was kept up until 7 o'clock Saturday morning. The ball was a grand success and passed off with the best of feeling.

A meeting is Rose' store, Fort Saskatchewan, on the evening of the 14th. for the purpose of taking preliminary steps toward the formation of a school district. Messrs. W. G. Ross, S. D. [illegible] and [illegible] Henderson were appointed a committee to prepare the petition and take other necessary steps. The proposed district will lie on the south side of the river, extending along this for about five miles.

Total Live Stock in Alberta was valued at $52,945,000 in 1932, according to the dominion bureau of statistics, recent report. In 1931 the value was estimated at $66,113,000.

"Fresh from the Gardens"

Primary Cause Of Depression.

A recent address by Professor Gilbert E. Jackson, of the Department of Economics of the University of Toronto, delivered before the Empire Club of Toronto, has attracted wide attention throughout Canada, and deservedly so. It has been quoted on the floor of Parliament, and has been made the text of countless newspaper articles. Yet it dealt with a very simple subject, a subject as old as the human race,—economics.

Thousands of sermons have been preached on this subject, books and dramas without number have been written with selfishness as the central theme, the bar courts have been filled with cases arising out of selfishness, sorrow and misery the result of all kinds have sprung through the ages. Nevertheless, Professor Jackson's address commands an immediate and large audience today because he deals with the all-prevailing world depression as having its basic cause in just this one thing selfishness. And with it there is no why and say he is wrong?

Professor Jackson is an economist. He deals with cold facts and still colder figures. He is concerned with the actualities of life, with things material to our human well being. But when he has analyzed all the factors, and sifted all the facts, and studied all the evidence pro and con relative to this world economic depression, he is forced to the conclusion that the basic trouble is, after all, not some man-made institution or system like banking or tariffs, that it is not overproduction or under-production, but a condition of mind and heart of the average individual, his selfishness, avarice and greed, of which all these other things are but the natural and inevitable outcome.

So, professor Jackson stressed the point that economic betterment must come primarily from a change of heart in the individual rather than merely by tricks of economic readjustment. From pulpit and platform we long into his heart of mine and begin with his own conscience. "Looking back on the past few years I wonder," he said, "that the restlessness of these things has not brought forth a new religious movement."

It is not a new religious movement that is called for or necessary, but action based upon acceptance of the fundamentals of Christian religion. The Sermon on the Mount contains the whole and complete formula for the cure of the present depression, and the prevention of any depression in the future. It is not the formula of Capitalism, nor Socialism, nor Communism. It is the formula of the Golden Rule, acceptance and application of the principle of doing unto others as we would that others should do unto us.

What are these lurid barbarisms reveled by all nations but an outward expression of the meanest sentimentals of individuals, and narrow nationalism is the outcome of the selfishness and greed of individuals. Tariffs are erected for the openly avowed purpose of selfishly promoting our own individual and national interests at the expense of loss and suffering by other individuals and nations. Selfishness and greed is the mainspring of such actions.

And what is true of tariffs as an instrument of economic warfare between nations, applies with equal truth and force to scores of other man-devised and man-made methods, schemes and systems, conceived in selfishness, first of the individual, and through the individual of the community, the nation, and the world. And the selfishness and greed of the individual is merely more openly expressed and multiplied when it takes the form of the selfishness of classes, communities and nations.

At the present time it is considered the popular thing to denounce the so-called "vested interests" as the embodiment of all the selfishness and greed in the world, and to declare because one class sets from these undesirable and evil motives, other classes should unite in order to do exactly the same motives. Two wrongs do not and never did make a right, and the saving of the pendulum from one wrong to another wrong will remedy nothing, but only provide still more trouble, further greed, a greater growth of selfishness.

Those who today control finance and industry under the prevailing system have much to account for. They have been grossly and selfishly. They must and will be made to mend their ways, even if their hearts and desires remain unchanged. But the remedial method to be employed to that end is not to meet greed with greed, to oppose selfishness with more selfishness, to organize and set interests to wage war on another set opposing and of interests.

All greed and selfishness does not arise from greed for wealth or property. There is the greed for position, for power, for domination, for honors, for social distinction, for something, almost anything, the other fellow has and we have not. And how few individuals striving for these things are animated solely by a desire to possess and use them unselfishly for the benefit of others?

Professor Jackson is right, unjust unduly so, when he declares that economic betterment must come primarily from a change of heart in the individual, and that word "individual" is all inclusive; it means the banker, the mortgage and loan executive, the railway head, the politician, the manufacturer, the merchant, the farmer, all of these, but it also includes the clerk, the artisan, the farm hand, the laborer. Mankind is in one lifeboat in the storm of this depression. They must pull together on the oars in unison, not all cross purposes. It is a case of one for all and all for one.

To change the metaphor, this is a time for honesty, not tasting down. It is a time to stak all selfishness for the common good. The man in debt must receive generous treatment and ample assistance at the hands of his creditors; equally so the creditor is entitled to and must receive proper recognition of his rights by the man who is indebted to him. The employer must make sacrifices in the interests of his employees; the employees must do likewise to help their employer.

Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Hughes, Smith Corners, Sask., writes:—"I was bothered with palpitation of the heart, and my nerves were bad. I could not sleep.

I was getting desperate and doubted my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

Price 50c. a box, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Supplies From Britain

Imports Of Most Products From the United Kingdom

Outstanding characteristic of the imports into Canada from the United Kingdom during the first nine months of the present fiscal year was the increase in many new products that are to be finished in this country or to play some part in manufacture, said Hon. H. H. Stevens in a statement to-day regarding trade with the United Kingdom.

"It is encouraging," said the minister of trade and commerce, "to note the diversity of these increasing demands for supplies from Great Britain."

Fewer Sweepstakes

Under Of British Columbia Municipalities Will Not Participate

Initiating a more conservative Dominion-wide agreement of public opinion on the question of legalizing sweepstakes for hospitals, the Union of British Columbia Municipalities at its convention in Victoria, decided to petition the government of British Columbia to refer the question to the subject in that province.

In addition, all municipal unions in Canada will be asked to take similar action, as will an the Canadian Union of Municipalities.

"The prettiest rag rugs I ever saw"

"I feel I should share with you a wonderful compliment I had on my wonderful rugs," writes an appreciative Three Rivers woman. "A wealthy lady from the City of Quebec was visiting here and saw the rug I had just finished. She was so enthusiastic—and she had never seen such artistic ones, with such rich, lovely colors—and so I said I bought new materials to get such beautiful color effects. When I told her I had dyed my own scraps with Diamond Dyes, she simply couldn't believe it! She cried for very proud of my rugs. Besides being beautiful colors, they are fast and washable."

In the popular new art of rag making women are finding again the rich values of Diamond Dyes for permanent dark colors by boiling. No other dyes make old materials look so new and rich in color, because no other dyes are guaranteed fast in boiling suds. Buy Diamond Dyes. For light dainty shades for Fancy Work for lingerie, summer blouses and dresses, use the wonderful new Diamond Tints. All drug stores have both Diamond Dyes and Diamond Tints.

Made Study Of Criminals

Japanese Prison Official Says Worst Type Are Generally Bold

The worst type of habitual criminal is generally bold, according to Dr. Kisuo Ihara, of the Fukuoka Prison, Japan, who has just completed an exhaustive study of 1,821 criminals occupying 10 years. In the course of that work he found nine Japanese habitual criminals had been sentenced from 50 to 70 criminal convictions, and had spent from 30 to 50 years in prison. They were all bold.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

No Calomel needed

When you feel blah, depressed, sour as the dickens, that's your liver! It ought to pour two pints of liquid bile into your bowels. Digestion and elimination are being slowed up, and a stagnating and disagreeing mass of waste is making you feel wretched.

Then bowel action! Bile acts, all relieved and you feel like a million dollars. Don't stay sick and miserable. Don't take calomel. Get a 25c package from your druggist and take it as directed. Carter's Little Liver Pills is the best known Purely vegetable. Ask for them by name. Refuse substitutes. 25c at all druggists.

No Argument

The Court was trying a case which had arisen out of a car accident.

"You say you were half scared to death," said counsel for the defence.

"I know very well I was," said the witness with warmth.

"Then," said counsel coldly, "how do you know it was a motor car, or something resembling a motor car, that hit you?"

The victim looked square at him.

"It rumbled one all right," he replied. "I was forcibly struck by the resemblance."

Cannot Issue Special Coins

Government Has Refused Request By City Of Toronto

In these days of discussion regarding stamp bills, fiat money and other methods of raising funds to take a share of the depression, it is interesting to note that the issue of money in any form for special purposes is contrary to all British practice. None but the King may benefit by the issue of coinage.

Some time ago it was suggested to Ottawa that the Canadian government authorize a special issue of 50-cent pieces in order that Toronto might facilitate the financing of the 1934 centennial celebration. It was estimated that a substantial profit might be realized in selling these at a premium over the counter to souvenir hunters and coin collectors. Mayor Stewart asked, of course for a reply on the sale for the city of Toronto.

However, His Majesty's government, through Ottawa, has ruled that important as the occasion may be, such a precedent cannot be established in the case of Toronto, according to a report made to the centennial

Pedestrians To the Left

Motors On Maine Highways Must Face the Coming Cars

The State of Maine is giving official recognition to the rights of the pedestrian to a limited use of its highways. That is a concession Australia the pedestrian has the right-of-way over the cars, but the cars have the momentum. But the hikers in Maine are going to have a legislative enactment requiring pedestrians to walk on the left side of the highway. Such a walker would face oncoming cars and be in greater safety than if on the other side. Motorists would be no less relieved from a hazard that increases concentration persons as they drive. Brandon Sun.

The registrar at the Maryland Institute Art School answered the telephone. A feminine voice enquired: Will you please give me some information about your class of whistlers?" "Whistlers?" exclaimed Small. "Why, yes," said the gentle voice. "I read of your exhibition of Whistler's work and I think I should like to join your class."

Throws One-and Half Tea Shell Over Eleven Miles

Just to add spice to the dimensions of the universe, it is announced that France has built the largest gun in the world. It is a 52-centimetre howitzer. That is a 20.4-inch calibre and is larger than the 18-inch naval piece which was built by Britain during the war and mounted on H.M.S. Furious and the monitor Lord Clive. Britain had discussed building a gun of 20-inch calibre, but it was never manufactured.

The new howitzer of the French can throw a shell weighing 2,400 pounds a distance of 11½ miles. When you think of projecting a chunk of metal weighing more than 1½ tons through the air to drop on a building or some other target, the imagination is stretched to contemplate the possible damage from the explosion. The gun is carried on a railway mounting 96 feet long and weighing 265 tons.

High Commissioner's Office In London Sends a Warning Note About Cattle Export Trade

The month importance cannot be placed upon the suggestions made in the following paragraphs from a report based on a thorough investigation by the High Commissioner's office of the situation in respect to our export cattle trade. A note of warning which we cannot afford to ignore in quite apparent in these paragraphs, which should be placed before every person interested in avoiding any action which might tend to jeopardize the development of our export cattle trade in Great Britain.

"It is now generally recognized that there has been an improved appreciation of cleanliness in the shipment of cattle during the past few years, and their popularity here has spread accordingly. Dealers and buyers are particularly sensitive to disappointment when the standard of excellence drops in any one shipment. The burden of returning a reasonably good price for common cattle at Deptford tempts a difficult tax on salesmanship, and consignees appreciate the adverse effect on business of unfavorable price returns. Consistently they are telling the shippers what the trade wants and urging them, diplomatically, to choose export cattle carefully for type, weight, age and conformation. But the shipments trade, being rather more diversified, lends itself more readily to increasing experience than does the trade in steers.

"Our healthy heifers and cows have been talked of and written about frequently. There has been created an atmosphere of hopeful supervisory. The value of purebred is selling these at a premium over the counter to souvenir hunters and coin collectors. Mayor Stewart asked, of course for a reply on the sale for the city of Toronto.

However, His Majesty's government, through Ottawa, has ruled that important as the occasion may be, such a precedent cannot be established in the case of Toronto, according to a report made to the centennial

Lack Of Phosphorous Causes Tooth Decay

According To Results Of Experiments By Dr. Agnew

Tooth decay is primarily due to lack of phosphorous and Vitamin "D" in the diet, according to the results of research made by Dr. R. Gordon Agnew of the West China Union University Working with hundreds of laboratory animals, Dr. Agnew was able to produce tooth decay in practically all the cases by depriving them of these two food elements.

Eating sugar candy and other sweets, it was further indicated by these test diets has not effect in itself in causing tooth decay except that by satisfying the appetite too quickly it tends to keep down the intake of the foods which contain the elements which do make for sound tooth structure.

Dr. Agnew says that among the Tibetan tribes in particular, where tooth decay is especially infrequent while their diet is highly restricted, the eating of whole corn as import nut article of their daily food, supplies them with adequate phosphorous, on while their out of door life in the sunshine assures them of plenty of Vitamin "D."

Value Of Life Insurance

Interesting Statement Made By Hon. Charles A Dunning

Hon Charles A Dunning former Canadian finance minister made an interesting statement with respect to life insurance in his annual address as president of the Ontario Equitable Life when he said: Life insurance as an institution is at once the greatest debtor and the greatest creditor in Canada; the greatest Canadian debtor or because its contracts to pay are larger in volume than any other in our national structure. the greatest Canadian creditor because it has accumulated in small amounts with respect to the two million lives insured over two and one-quarter billion dollars. Because it has loaned to governments, municipalities, school districts, railways, utilities, industries, its own policyholders, and still has a mortgage." Toronto Star Weekly.

Local Hunting Being Studied

Now it is the story of Dick Whittington that is being mangled by the "Debunkers." It appears Dick did not own a wonderful cat; that he was quite well off, was not obliged to leave home, and that consequently he never heard the call to turn back and be Lord Mayor of London. If this sorry business continues, some of the picturesque figures of an earlier day will be left. Toronto Globe.

Learning To Fly

Mexican Tree Frog Can Stay Nearly Seven Great Heights

A Mexican tree frog that appears to be learning to fly is described by Dr Remington Kellogg, of the United States National Museum. This frog, he says, has elongated hand legs well adapted to jumping, and has been known to leap and alight without injury a height of 100 feet. Dr. Kellogg has considered a number of experiments to test the powers of flight. When he dropped one from a high timber he said it immediately opened out its limbs and sailed down slowly at an angle, landing unharmed about ninety feet away from the base of the tower. There appeared to be no further acceleration after the frog had fallen almost twelve feet, he said. In other tests, Dr. Kellogg has been throwing these frogs into the air. Much time he did so, he said, they always managed by violent struggling to get into a balanced position and glide to the ground uninjured.

A WELL DESIGNED APRON TYPE

Simple and comfy to slip into.

It is the simple type that needs no introduction. It hugs the figure, being pane-lled at the front to create a slender line It also has deep inset pockets either side of the front, so useful to the busy housewife.

You'll note it has deep open armholes. And this for two good reasons. One is that coolness will be a desirable quality. Another is that it will not rush the sleeves of the frock.

You can make it of a big saving in cost. You can almost run it up before breakfast on the sewing machine. It's so easily put together.

Style No. 821 is designed for sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 2 yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Baked Cold Claim

Wasn't Prospector Beef 100-Tone Mine, Says Cariboo Cowboy

Some of the old-time prospectors in the Cariboo gold country are being cut to newcomers in stabbing claims this winter, but not Mrs. Gertrude Murphy.

Mrs. Murphy has been prospecting in the Cariboo off and on for many years. Usually she spends the winter in California, but she heard of the early rush to the Cariboo this summer and hurried north. She hiked in over the frozen wilderness on snowshoes and staked several promising claims on the headwaters of Lightning Creek several days before the vanguard of the newcomers arrived.

The grizzled old man who have habitually staked claims every spring in the Cariboo have not fared so well. By the time they got out on the trail they were too late.

In addition to Williams Creek, where gold was first discovered more than 60 years ago to start one of the most colorful stampedes in the mining history of the continent, several other creeks have now been thoroughly staked, including Lightning, Antler and Lover's Leap below Wingdam. All through the old town of Barkerville men have filed their claims.

Shah Of Persia May Sell Gorgeous Banquet Throne

The Peacock Throne, the most glorious piece of furniture ever built, studded with jewels and worth altogether $30,000,000, may be sold by the Shah of Persia. There are more than 140,000 gems in the outspread tails of the two peacocks which form a canopy over the throne. The throne was built in India in the seventeenth century, but was carried into Persia by the Nadir Shah in 1739. Very few people have seen it.

SUNDAY SCHOOL LESSON

MARCH 19

THE EFFECTS OF ALCOHOLIC DRINK

Golden Text: "At the last it biteth like a serpent, and stingeth like an adder."Proverbs 23:32.

Lesson Proverbs 23:29-32. Isaiah 28:1-8. Hosea 2:1-5.

Devotional Reading Galatians 5: 16-24.

Explanations and Comments

A Picture Of a Drunkard. Proverbs 23:29-35 is a vivid picture. Probably the writer of these verses gives us a vivid picture of a drunkard. "Who hath Oh! Who hath Alas!" the Hebrew literally reads, for the words translated "woe" and "sorrow" are interjections, not nouns. Woe and sorrow come to every one except, of course, but the drunkard; reades them for himself. "Who hath contentions? Who hath complaining?" Drunkenness probably leads to quarrels and strife. "Who hath wounds without cause?" Drunken men come to blows over nothing, without knowing why or wherefore. "Who hath redness of eyes?" Bleared eyes are one of the conspicuous signs of the drunkard.

The speaker then answers his own questions: "They that tarry long at the wine; they that go to seek out mixed wine." By mixed wine they meant wine mixed with spices or with opium. There is a touch of sarcasm in this statement. Let those elsewhere used of diligent search after knowledge is here used, as if ironically, of the investigations of connoisseurs in wine, meeting to test its qualities."—Dr. Plumptre.

The poem closes with a soliloquy of a drunkard in his post reformation, he "will seek it yet again."

Ah, that men should put an enemy in their mouths to steal away their brains! That a cup of sociality, pop, pleasure, revel, and applause, transform ourselves into beasts!"—Shakespeare.

The Appearance and the Effect Of Wine, Proverbs 23:31, 32. The writer now counsels everyone to keep away from temptation. Look not upon the wine when it is red." "Critics judge of wine, among other indications, by the color of it; doubtless the wise man looks so well that it even says, 'Come not within the sight of it.'"—Matthew Henry.

"When it sparkleth in the cup." Literally, "When it gives its gleam, or eye, to the cup." That is, when it is full of fire. Toy. Nor when it "moveth itself aright"; not the kind of ascension. T 9. The wine which fascinates. Such a serpent is also no poisonous as a serpent. "At the last it biteth like a serpent, and stingeth like an adder."

"Not only the sting of the serpent, but the subtlety of the serpent is in wine. The deception lies in the fact that the habit of drinking will become confirmed before you know that it is enslaving you. Every glass of wine brings on the power of another glass."

"The head of the bull, for fear of the hook."

One Word Would Do

Complaint is made against the proposed slogan, "Buy American," that it would include articles produced anywhere between the southern Canada and the Argentine. As the suggestion is made that the slogan read, "Buy United States." But the ultimate achievement is developing which seems to bet that all the good purposes will be served if the slogan be misconstrued to a single word, "Buy"—Cleveland Plain Dealer.

CORRESPONDENCE.

MORE ABOUT THE BURNELL PLAN

To the Editor: I have received a number of requests to precisely explain my views in respect to the Burnell Plan, which I have been studying for some months. I am of the opinion that this plan can revive business activity in Western Canada, without government aid and simply, speedily and immediately.

It is universally admitted by economists and realized by business men that there can be no revival of business activity unless and until our agricultural income is revived. A greater purchasing power among farmers is the supreme need of this hour.

The Burnell Plan, a strictly controlled inflationary device, offers a means of putting a greatly increased purchasing power to work immediately. It points out a simple and practical way for business people and farmers to join forces for their mutual benefit.

The plan has received the hearty endorsement of a number of leading economists, banking officials, and business executives in Winnipeg and other western cities. It is being closely studied by boards of trade, service clubs, retail merchants' associations, and other bodies directly interested in the revival of business. Interest in the plan centres chiefly around the fact that it indicates an immediate speeding up of business activity by increasing the velocity of retail and wholesale commodity turnover and avoids most of the other items to other inflationary schemes. The sponsors of the plan are leading professional and business men to study and explain the details of the plan before it is introduced to the general public and the farming community.

In brief the plan is as follows: A Security Producer Clearing Association is formed, having for its Board of Directors a group of men who are outstanding in the business world and whose names automatically inspire public confidence. Any farmer may become a member of the association upon payment of a fee of one dollar. The association is represented in each district by a country point. Negotiations are in progress with a view to having the branches of the chartered banks act as agents. The agents the association will issue "Produce Bonds" or vouchers and specific stamps valued at multiples of four cents.

When a farmer sells produce say a load of oats worth $5.00) he receives a cheque for the cash ticket from the buyer. Ordinarily he would deposit the $5.00 worth of business with this document. Under the Burnell Plan he endorses his cash ticket or cheque to the association, and receives from it produce vouchers with a face value of the same amount, namely $10.00. He affixes a 40 cent stamp, which he has purchased from the association, and tenders the voucher to a local merchant for $10.00 worth of goods. The merchant affixes a 40 cent stamp which he has purchased from the association, and passes the document on for $10.00 worth of goods or services.

The voucher passes through fourteen hands in this manner, each holder adding a 40 cent stamp to the holder subsequent to the farmer given for $10.00 worth of goods or services. After contributing his 40 cents, receives $10.00 in value. Thus every dollar in value given for the voucher is now instead of $5.00 worth, and has a face value of $10.00 at the time of its opportunity.

When the fourteenth holder has added his stamp he takes the voucher to the nearest association agent and redeems it for its face value of $10.00 cash. To redeem the voucher the association has on hand the original $5.00 deposited by the farmer at the outset, plus $5.60 which has been paid by the purchasers of stamps which were affixed to the voucher. There is on hand $10.60 to pay to the 14th holder and a surplus of 60 cents to cover operating expenses and to build up a reserve. As soon as the voucher is redeemed it is cancelled and retired from circulation.

Certain natural objections to the plan are evident. For instance, it is said that the whole plan is based upon a sales-tax and that business cannot stand it. The answer to this assessment is easy. Admitting that the 4 per cent. discount accepted by each holder of the voucher is in the nature of a sales-tax, it is readily seen that this is the only tax in existence which has the direct effect of stimulating business activity. Whereas an ordinary sales-tax represents a slice of your profit taken by the Government because you have done a stroke of business, the tax involved here is a portion of your profit which you voluntarily contribute directly to your own community for the purpose of speeding up business. Business men realize that taxation is the order of the day. It is inevitable. By assuming the voluntary taxation involved in the Burnell Plan we avoid most compulsory burdens of a more unpleasant type.

Another objection to the plan is summed up in the words, "I don't like such methods." Here, again, it is a matter of facing what is almost inevitable. Whether you like it or not, scrip is rapidly working its way into the commercial life of western Canada, and will probably be adopted in many communities during the coming year. Some scrip schemes have more objectionable features than others. General advantage will mean if instead of encouraging the issuance and circulation of scores of unrelated scrip issues, we firmly establish one plan which is economically sound and applicable to the whole West.

Some critics have suggested that an universal design of the Burnell Plan lies in the possibility of vouchers getting "cash happy" and not completing the full round of 14 transactions. The likelihood of this occurring is slight as to be practically negligible. As each voucher travels from the farmer to the ultimate holder there is actual cash behind it. The cash backing is never less than 54 per cent. and it is constantly growing as people use the vouchers. Value is cease with use, and every voucher is 100 per cent redeemable in cash on the 14th holder. No wide business boom will refuse to accept the vouchers if the integrity of the issuing organization is firmly established. If he refuses to accept the vouchers he public confidence. Any farmer who become a member of the association upon payment of a fee of one dollar. The association is represented in each district by a country point. Negotiations are in progress with a view to having the branches of the chartered banks act as agents. The agents the association will issue "Produce Bonds" or vouchers and specific stamps valued at multiples of four cents.

When a farmer sells produce (say a load of oats worth $5.00) he receives a cheque for the cash ticket from the buyer. Ordinarily he would deposit the $5.00 worth of business with this document. Under the Burnell Plan he endorses his cash ticket or cheque to the association, and receives from it produce vouchers with a face value of the same amount, namely $10.00. He affixes a 40 cent stamp, which he has purchased from the association, and tenders the voucher to a local merchant for $10.00 worth of goods or services. The merchant affixes a 40 cent stamp which he has purchased from the association, and passes the document on for $10.00 worth of goods or services.

The voucher passes through fourteen hands in this manner, each holder adding a 40 cent stamp to the holder subsequent to the farmer given for $10.00 worth of goods or services. After contributing his 40 cents, receives $10.00 in value. Thus every dollar in value given for the voucher is now instead of $5.00 worth, and has a face value of $10.00 at the time of its opportunity.

When the fourteenth holder has added his stamp he takes the voucher to the nearest association agent and redeems it for its face value of $10.00 cash. MINARD'S KING OF PAIN LINIMENT

A MEASURE TO REPEAL THE BAN ON SWEEPSTAKES

Ottawa, Ont. Sweepstakes for hospital and charitable purposes would be legalized in Canada if a bill introduced in the senate by Senator A. D. MacRae of Vancouver, becomes law. It is the Vancouver senator's second attempt to repeal Canada's ban on this type of large scale gambling he introduced a similar bill last year, but failed to get it through.

Public feeling was now in favor of regularized sweepstakes, Senator MacRae said. In Vancouver 75 per cent of the voters at a plebiscite had approved government controlled sweepstakes. The British Columbia Hospital Association had voted in favor of them and the Union of British Columbia Municipalities had endorsed the plan.

The object of the bill is to authorize the provinces to permit the conduct of sweepstakes in their territories, not by any group of citizens, but only by a committee authorized by the attorney-general, who would direct the scheme. The money immediately turned over to the welfare of the sick, the destitute and the maimed.

The new bill strictly forbids the advertising of a sweepstake outside the province in which it is being conducted, and the appointment of agents for the sale of tickets outside the province.

Senator MacRae said in 1931, the Irish Sweepstakes received from the three sweepstakes, more than £2,000,000. In 1932, according to a cable he received recently from Ireland three sweepstakes had netted the sum of £11,000,000. They gave away in prizes £7,500,000 and the expenses were £1,000,000.

As to the moral question involved, the churches in Ireland had voiced no disapproval, and the feeling of most people, after all church houses were the same thing on a small scale.

Senator MacRae outlined the social situation in the hospitals and other charitable institutions in Canada. The Vancouver hospital for instance, owed $270,000 to the banks and had no money to pay it. Other institutions were in like predicament. He closed with an urgent plea for the passage of the bill.

Report Not Confirmed

Ex-Kaiser May Make Abandoned Claim To German Throne

London, Eng. Ex-Kaiser Wilhelm is reported to be making preparations to regain the throne of Imperial Germany as a result of recent events in that country, it was learned in London through the Reuters' agency, on Monday night.

If the London Daily Mail's correspondent in Holland is correct, Wilhelm, who has been abroad since the war, will abandon his claims to the throne were repeated on several occasions in the House of Commons during the early part of last year, but failed to get it through.

Public feeling was now in favor of regularized sweepstakes, Senator MacRae said. In Vancouver 75 per cent of the voters at a plebiscite had approved government controlled sweepstakes. The British Columbia Hospital Association had voted in favor of them and the Union of British Columbia Municipalities had endorsed the plan.

The object of the bill is to authorize the provinces to permit the conduct of sweepstakes in their territories, not by any group of citizens, but only by a committee authorized by the attorney-general, who would direct the scheme. Approves Financial Move

London Daily Mail Thinks Canada's Decision Is "Wise Step"

London, Eng. The Daily Mail, Conservative organ, described the allegel intents of the Canadian government to ask parliament to issue extraordinary powers in the matters of finance as a "very wise and timely step."

"There are many factors, it continued, "which must operate strongly in favor of the banking system in free from most of the weaknesses which brought difficulties elsewhere. She has not a multitude of small banks competitive banks in close co-operation between 11 large banks under the Bankers' Association.

The Daily Mail refers to the report the government would ask parliament to invest it with all the powers conveyed under the "power order and good government" clause of war-time legislation. This clause would give the government the right to initiate practically any measure thought necessary to the welfare and stability of the dominion.

Cut Hollywood Salaries

Motion Picture Producers Feel Financial Pinch

Hollywood, Cal.—Institution of all activities at all motion picture studios in Hollywood was ordered early today by the Association of Motion Picture Producers unless drastic cuts in salaries and wages for an eight-week period, due to the banking situation, were taken by all employees and artists.

For salaries more than $50 weekly, a cut of 50 per cent. for the eight-week period would be made with a minimum salary of $37.50 established. Those earning less than $50 weekly would receive a 20 per cent. cut with a minimum of $18 a week. The cuts would be retroactive starting March 4.

Break Up Parade

Vancouver, B.C.—A parade of several hundred unemployed men who planned a demonstration in front of the city hall, was broken up and the parte pants dispersed by police and the R.C.M.P. cars, it was stated by Mail's Ottawa correspondent reported.

Wilhelm also was said by the reporter to be cautiously watching fluctuations of the Dutch florin, a fall in which would make him comparatively poor.

To Help British Farmers

London, Eng. Major Walter Elliott, Minister of Agriculture, introduced in the House of Commons a bill designed to re-organize British agriculture and bring prices of British farm products to a remunerative level. It would empower the government to protect organized markets by regulation of imports through quotas or other means from any flood of overseas imports.

FIRST MATE RESIGNS B.C.

The King, through his government here in Mr. Mackenzie King, has sent congratulations to Mr. Lewis Gordon, the King-Byng battler. London said the claims to the throne were repudiated by a kind of constituency council, and it is constantly growing as people use the vouchers. Value is cease with use, and every voucher is 100 per cent redeemable in cash on the 14th holder. No wide business boom will refuse to accept the vouchers if the integrity of the issuing organization is firmly established. If he refuses to accept the vouchers he public confidence. Any farmer who become a member of the association upon payment of a fee of one dollar. The association is represented in each district by a country point. Negotiations are in progress with a view to having the branches of the chartered banks act as agents. The agents the association will issue "Produce Bonds" or vouchers and specific stamps valued at multiples of four cents.

When a farmer sells produce (say a load of oats worth $5.00) he receives a cheque for the cash ticket from the buyer. Ordinarily he would deposit the $5.00 worth of business with this document. Under the Burnell Plan he endorses his cash ticket or cheque to the association, and receives from it produce vouchers with a face value of the same amount, namely $10.00. He affixes a 40 cent stamp, which he has purchased from the association, and tenders the voucher to a local merchant for $10.00 worth of goods or services. The merchant affixes a 40 cent stamp which he has purchased from the association, and passes the document on for $10.00 worth of goods or services.

The voucher passes through fourteen hands in this manner, each holder adding a 40 cent stamp to the holder subsequent to the farmer given for $10.00 worth of goods or services. After contributing his 40 cents, receives $10.00 in value. Thus every dollar in value given for the voucher is now instead of $5.00 worth, and has a face value of $10.00 at the time of its opportunity.

When the fourteenth holder has added his stamp he takes the voucher to the nearest association agent and redeems it for its face value of $10.00 cash. To redeem the voucher the association has on hand the original $5.00 deposited by the farmer at the outset, plus $5.60 which has been paid by the purchasers of stamps which were affixed to the voucher. There is on hand $10.60 to pay to the 14th holder and a surplus of 60 cents to cover operating expenses and to build up a reserve. As soon as the voucher is redeemed it is cancelled and retired from circulation.

Certain natural objections to the plan are evident. For instance, it is said that the whole plan is based upon a sales-tax and that business cannot stand it. The answer to this assessment is easy. Admitting that the 4 per cent. discount accepted by each holder of the voucher is in the nature of a sales-tax, it is readily seen that this is the only tax in existence which has the direct effect of stimulating business activity. Whereas an ordinary sales-tax represents a slice of your profit taken by the Government because you have done a stroke of business, the tax involved here is a portion of your profit which you voluntarily contribute directly to your own community for the purpose of speeding up business. Business men realize that taxation is the order of the day. It is inevitable. By assuming the voluntary taxation involved in the Burnell Plan we avoid most compulsory burdens of a more unpleasant type.

Another objection to the plan is summed up in the words, "I don't like such methods." Here, again, it is a matter of facing what is almost inevitable. Whether you like it or not,

Tribute To Cermak

Chicago Citizens Pay Respects To Slain Mayor

Chicago. The body of Mayor Anton J. Cermak lay in the darkened parlor of his home on Chicago's west about their officers at a shower lamps after according an impressive tribute to the man who rose from immigrant to mayor.

But one floral piece adorned the casket a spray of lilies sent by President and Mrs. Franklin D. Roosevelt. The president, for whom the bullet that brought death to Cermak's chief executive was intended, was represented by a military aide-Lieut.-Col. Campbell B. Hodges.

From the time the limousine bearing the funeral carriage arrived until the casket disappeared behind the portals of the Cermak home, the citizens hurried in a mute rain. The motorcade of official automobiles that followed the hearse through the Loop district, past Mayor Cermak's workshop, the city hall and to his home on the northwest side, numbered almost 1400.

Vote Against Fighting

Victoria College Students Oppose Taking Up Arms For Country

Victoria, Oct. 31.—Men and women students at Victoria College by a majority of six, voted that they would not, under any conditions, fight for its king and country.

About one-tenth of the 1,634 students registered at the college attended the debate. About half of these present were women. There were several unusual scenes. A white feather presented by a girl student was enthusiastically accepted by young men attending. The League of Nations was termed "half-baked idealism" and a "ghastly failure". Pacifism was called a damnable sin" by a co-ed.

MARSHAL CHANG RESIGNS HIS POST AS COMMANDER

Peiping, China. Thirty-five-year-old Marshal Chang Hsueh-Liang, who resigned as commander-in-chief of the Chinese armies operating against the Japanese in the north, explained to the government he considered himself unfit to command.

His resignation climaxed a long period of criticism of his administration of the Chinese defense forces which, since September, 1931, have been almost steadily withdrawing before the Japanese in a subgroup to the Nanking government the young marshal said.

After the loss of the three eastern provinces (comprising Manchuria), I tried my best to remedy my fault but the fall of Jehol compelled me I am unfit to keep command."

Chang succeeded his father, the late Marshal Chang Tso-Lin, as war lord of Manchuria in 1928.

Peiping China. The arrest and execution by the Chinese of General Tung Yu-Lin, who governed the province of Jehol until that territory was taken over by the Japanese, was reported here today.

A reliable source said General Tang had been seized at Hsif-Ringhow, a pass through the Great Wall.

Asia's Rural Population

Shrinking Reduced By Effects Of Sub-Continent's Growing Unrest

New Dr. Simon Kuznets wrote the following in a recent article in the New Outlook: In China and India alone four hundred millions of people—one half of them married and between and grey—that is, anywhere from seventy to eighty-five per cent. of China's population is rural. Africa, of course, is predominantly rural. It is, however, now rapidly seen. In regard there are some ten thousand such villages with over five and one-half million of them. Burma is almost entirely per cent. of the total population. Only in Japan, Java and parts in rural Germany, the ratio of the rural of the non-farming growth of the most of city size in Japan during the last half century India is primarily a land of villages and tiny hamlets. According to the census of 1931 the total population of India, including all the Indian States and Burma, was a little over 316,000,000. Of this 316,000,000 of them live in rural communities. In each of the countries the hamlets changed not materially short of tragical, and are steadily growing worse. In this conviction all competent investigators are as one. The fibers of the soil throughout Asia, perhaps beyond all others in the world, are receiving successively smaller returns from their labor, and being taxed inordinately and are crushed almost beyond endurance under the growing weight of individuals. For hundreds of millions the condition is little better than serfdom.

History Of English Race

Winston Churchill Accepts $500,000 From Publishers For Copyright

Winston Churchill, literary stylist as well as statesman, has signed an agreement with Cassells in Paris a $500,000-word history of English-speaking people. It will take five years, his most ambitious literary undertaking to date. The publishers are paying $100,000 for the copyright.

This is not the largest fee, including royalties, received by an author, but as a single payment in purchase of a work outright it ranks among the highest. Lord Macaulay, for example, received a like sum for volume one of his history of England.

Making Paper From Straw

Success Is Reported From Experiments Being Made At Calgary

In the near future straw will be used to make paper in place of pulp and rags, according to Arthur West, Calgary manufacturer. Only one ingredient for the manufacture of paper from straw is lacking, Mr. West says, but he believes the solution will be found through experiments now being made.

Straw stacks on the prairies will be in demand by paper manufacturers, Mr. West believes. Warning against waste in lumber yards, Mr. West urges a country-wide plan of reforestation planting two trees where one is cut down.

Standing Canada's Italian Words

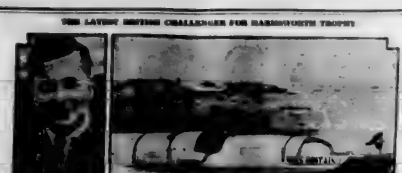
The Department of Immigration Affairs reports that during the year 1931-32 there were 99 residential schools and 370 day schools in operation, a total of 469 centres of Indian educational activity in the Dominion. In the management of the residential schools, the Roman Catholic, Church of England, United and Presbyterian churches co-operate with the Department.

Status Heads Clearing

The grimy Nelson station in Trafalgar Square, London, badly needs a bath. But the British Admiralty has no money for such luxuries. The station has not been cleaned since 1916. The problem affects 22,000 tons of coating of London grime in hundreds each year, and cleaning-jobs contract by will have to cost him 40 cents each.

Galway, Ireland, has dropped its fight against non-Irish games.

THE LATEST BRITISH CHALLENGER FOR HARMSWORTH TROPHY



In another attempt to wrest speedboat supremacy from Gar Wood, the Royal Motor Yacht Club of England recently commissioned Robert Steel-Payne, well-known British boat designer and builder, as his entrant in the international race for the Harmsworth Trophy this year. The trophy, emblematic of the world's speedboat championship, is now held by Gar Wood, veteran racer of the United States. Above, Steel-Payne is shown in a close-up at left, and driving one of his power boats at right. The British challenger will use a specially-designed boat, Miss British III, in the Harmsworth race, which will be held in September.

Red Cloths In Skyscrapers

Leaders Vowed Never At Night Made Of Spend

If you drop a thread envelope containing one sheet of ordinary letter paper in the opening of the mail chute on the eighty-first floor of the Empire State Building, New York, it will drop downward one hundred feet per second, or nine miles per hour, arriving in the mailbox at the bottom of the chute in one minute and thirty-seven seconds. If you drop a large envelope containing five contract forms and one sheet of letter paper will do approximately forty-three miles an hour. Outing's law, that the speed of falling bodies increases with the distance travelled, does not apply to mail descending in a mail chute. "There is no danger of a letter sputtering or getting singed in a hot spot, as some irresponsible writer once wrote. The reason is that the mail-chute is surrounded by a natural updraft like that of a chimney, in their caution to slow down falling mail. Thus the letters go down rather leisurely and don't catch fire. At the bottom, they strike a smooth, curved bronze plate which slows them down greatly and deflects them against a leather cushion hanging vertically. From this, they drop gently into the mailbox proper, ushered.

Some Curious Cargoes

Strange Things Arrive In Time Or London's Dockland

Seen during a tour of London's dockland:

Kangaroo tails from Australia and reindeer tongues from Canada—they are used for soup.

A man's horn full of colored flowers, the glands of Arabian cats. It is a rare import, priced at about $30 an ounce.

Fifty tons of sea water brought in a tank in a barge from the sea off the coast of France. It is for the London Zoo, and contains aquatic particularly pleasing to tropical fish.

Twenty boxes of wheat bran like city locations. There were yeasts—"brewers" from Bavaria—from Wood Advice.

Gum benzoin from Sumatra for lung troubles, dried rhubarb roots from China, dandelion roots from Yokohama, manufactured all from Londonderry.

A Modern Fable

A schoolboy has just discovered that planes grow better at the day to prepared with artificial light. Further investigation proves that the planes which produce most are the ones that point to the double-light plane says London Punch.

Gardening Notes

By Gordon Lindsay Mundell

The first thing to go in and the first to be ready for the table are those of which the leaves are eaten spinach, lettuce cress and such things. Peas and beans make the readiest and earliest crops. To the gardener who has a small garden, peas and beans are the most important crops, for upon them, more than upon any other crop, depends the success or failure of his garden. Moreover, peas and beans are wonderful crops for new gardens. For some reason or other we do not get anything to harvest the first of July, but we can have better returns than by sowing a little of something every week from the time the soil first crumbles if spooned in the hand until the end of July. Then the last sowing of corn, turnips, potatoes, beets, carrots and fall raised material, the first week in July. Make several sowings, cultivate frequently, water if possible when the drought is severe, apply one or two doses of good commercial fertilizer, carefully and according to directions, and the few cents you put into seed will come back in a continuous stream of good things.

For your convenience, the following list of vegetable varieties is recommended: Campus Mary Washington, Bonac Pencil Pod Black Wax, Kidney Wax, Refugee, Longfellow Green Pod, with Kimberley Wonder and Kimberley Green Pod as pole sorts. Beets Early Wonder, Pine Egyptian and Detroit Dark Red, Cabbage Copenhagen Market as a round-ball first early, followed by Copenhagen Market and Blakhopper. Celery as mid season Chatsworth Smooth and earliest Dwarf Erfurt. Carrots Chantenay, Danvers and Amsterdam Corrosive Cors for earliest use plant Golden Gem or Early Market, then Golden Bantam, a standard sweet corn and Shoepeg's Evergreen, a later high quality white. Cucumbers Improved White Spine and Davis Perfect. Lettuce Grand Rapids is one of the most popular leaf sorts with New York or Iceberg, where a head type is wanted. Onions—Ohio Yellow Globe, Cross Golden Champion or Bermuda Early Knight. Onions Yellow Globe Danvers, Red Weathersfield, white for early green use Prizetaker. Peas Laxton's Progress, Thomas Laxton and Laxtonian are the best of the wrinkled sorts, more to be desirable though not necessary to provide trellis support. Early blue sorts are Peter Pan or Blue Bantam, Hundred-Fold and American Wonder among the dwarfs; Radish Scarlet Turnip White Tip, Saxa, an all-red. French Breakfast and Scarlet Globe for early use, and Icicle for summer. Spinach of the Spinach is gathered by the fact that of that reason it does were other billed, died of sickness or wounded. It was 73a decentiums for bravery, including two V.C.'s, and over 4,000 men obtained commissions.

St. Thomas Times-Journal.

Government Aids Coal Industry

The government has paid approximately $1,674,000 from 1931 up to the end of 1932 in connection with the movement of 2,063,195 tons of domestic coal from mines to markets in Canada.

Mayon production in Italy last year was nearly equal to that of 1931.

Oldest Regiment In World

Honorable Artillery Company Was Founded In 1537

Following the death of the Earl of Denbigh who commanded the Honorable Artillery Company of London, England, for forty years, Lord Galway, an ex-officer of the Life Guards, has been named his successor. A proud honor it is because the H.A.C., as it is known to Londoners, is the oldest regiment in the world.

It was founded in 1537 when Henry the Eighth granted a charter to the Guild of St. George to encourage the science of artillery But artillery at that time simply meant bows and arrows and "handgonnes," whatever the hand guns of 1537 were like Since 1641 the armories of the H.A.C. have stood in Finsbury Fields within the City of London, near the cemetery in which John Bunyan is buried. The then Prince of Wales, afterwards Charles the Second, joined it as an officer, and since then either the reigning King or Prince of Wales has been an officer in command of a company.

Although an artillery regiment it has also an infantry battalion, and numerously regretted that the present to "mechanize in the city." Many wealthy men serve as privates. During the World War it had a noble record. Altogether 12,847 men served in the H.A.C. How much it was in the blood of the fighting is gathered by the fact that of that number 1,261 were either killed, died of sickness or wounded. It won 73a decentiums for bravery, including two V.C.'s, and over 4,000 men obtained commissions.

St. Thomas Times-Journal.

Government Aids Coal Industry

The government has paid approximately $1,674,000 from 1931 up to the end of 1932 in connection with the movement of 2,063,195 tons of domestic coal from mines to markets in Canada.

Canadian Red Clover

Superiority Of Seed Has Been Proved In British Markets

Canadian Red Clover seed is well received in the British Market, where it has demonstrated its superiority to grown from other countries. A leading Scottish seed firm which pays particular attention to the securing and distribution of the best strains of clover crops describes Canadian Red Clover, which is offered as an early strain of Broad-leaved Red, as extremely handy and invariably giving the best results in trials at the West of Scotland College. In the firm's catalogue is a striking illustration showing plots of various strains of clover grown for comparison. In this the growth and hardiness of the Canadian type is decidedly better than that of the English and remarkably superior to the Polish and Chilian varieties.

An Economy Measure

Alberta Government To Close Seven Normal Schools In June

As an economy measure, the Alberta government will close the 2000-000 Normal school in Edmonton and the agricultural school at Vermilion at the end of June, according to an official announcement by Premier John Brownlee.

Normal school estimates introduced in the legislature provide $50,435 to assist teachers' courses until the end of June.

Present conditions, Mr. Brownlee said, make this step necessary. If there is any improvement shown when June arrives, the government may consider its decision.

British railways handled 168,000,000 parcel post packages last year.

CHAPTER VII. Continued

In his cabin, with the steamer throbbing on toward Steel-End, Alan wondered what Joyce's reaction would be if he should go to her and frankly tell her about that tragic incident in his life which had brought about his engagement to Elizabeth. Joyce would understand his motive. She would no longer think he'd acted of his own free will. Perhaps if she knew this truth, she might allow him to resume their old intimacy. . . .

Pat Elizabeth, what of her? She was waiting, waiting there at Endurance, for him to marry her. In honor he could not go to seed readily, and Dunnard's kindly al flying. It was a queer mansion contraption, this monoplane of his—an ungainliness of plane wire, canvas, spruce and iron, held together by luck and Dunnard's kindly al flying. It had originally been a White Speedsix with Jimmy engine but he had redesigned the fuselage and put in a second-hand Wintwind and equipped it with its re-hauled under-gear of the Buick-wheel type, and overhauled it generally till little of the original machine remained. Only his warm friendship with the aviation engineer kept it from being junked. But somehow and this is the rock-bottom test of any flying machine it had never yet cost its owners before Dunnard scanned it to. And it did have speed, anything lacking speed would never have satisfied him. Such as it was it was his very own; and no resident was ever prouder of a crumpled smudge-footed child than Dunnard was of his White Speedsix.

His was, however, ambitious to get a leg over Du Maurlaand, so that he could safely take up a girl down in Kamloops and carry her along with him on his airy path of life. But with no advertising or big company behind him, Dunnard had found that free lance work to be tough sledding indeed. . . . Still difficulty keeping up repairs on the old machine, and now getting a new one. Upon were about accidents. Except for the faint possibility of murdering some unsuspecting hoppers over near High Hat, the work he was finishing this noon was the last thing in sight.

As he leaned overboard the last of the E-Z Kleen Soap and petrified matter, and headed back for the landing field, he yawned and grinned. "The devil with this peace-time stuff. Oh, Lord, I wish they'd bring on another unpleasantness."

By the time he was clear of mind, he had headed and crawled out of the cockpit, that he saw a tall lanky individual, in long boots, khaki trousers and grey hat, get out of a waiting taxi and saunter toward him.

The stranger, as he came up, looked at the machine with that peculiar regretful gaze of a person who has never flown in one.

Dunnard thought, "If that fellow asks me to take him for a joy ride, I'll murder him with a monkey-wrench!" A moment later, as he got out of the cockpit, he had surprised a face, he decided: "No, he's not that kind. Looks like some timber duke. Maybe wants me to fly him out to his last, Thirty-dollar job Good-will!"

The stranger came on. "Hello."

Dunnard answered tartly. "Hello yourself."

The stranger paid no attention to the brusque reply. Instead he reached out his hand. It was a good-looking hand, big, calloused, fingers had been burnt.

"Name's Baker," he introduced himself "Alan Baker."

Dunnard partly thawed. This fellow Baker looked to be somebody. His slow smile was mighty fetching; his clear intelligent eyes were kindly, warm, friendly.

"Glad to know you, Baker. Miss Featherof James Arbuthnot Featherof."

"Good gracious! All that ? But what do people call you?"

They both grinned. "They call me Hammerd.' Wear red shirts; never flop my wings."

"Hammerd that's more like. I saw you sailing around up there when I got off the train. Made inquiries and hustled out here to the field. Was on my way down to Winnipeg. Expected I'd fails to go down there, or maybe to Calgary, to find a machine and a pilot."

"Uh-uh."

Baker jerked his thumb at the plane. "Whose is that?"

"Looking at you. Belongs to me and myself. Unlimited. Bought it with cigarette coupons."

Baker's face brightened a little, and now Dunnard noticed that this hardbitten man was deeply worried but was hiding his trouble and talking with a jest on his lips.

"So the machine belongs to you. Glad to hear that. Working on your own hook, I suppose? That's still better. Say, Featherof, how long are you hooked up ahead?"

Dunnard had found it good policy to lie. If he made out there was a crushing demand for his services, it impressed people and got him jobs—sometimes.

"Oh, about two months," he said carelessly. "All depends on how much flying weather I get."

Baker pinched a blade of grass and chewed it meditatively. Finally he asked. "Say, Featherof, you couldn't shake free for a couple or three weeks, could you? Get, sick, or have to get married, or something like that?"

Dunnard took thought as he batted an eye. A couple or three weeks. . . . Must be a good-sized job. . . . . It might pay well. . . . . Oh d—n the pay! Always thinking of pay! Getting commercial. . . . .

"I might," he answered. "Depends. What kind of flying do you want me to do? What for a job is it?"

"That would take me some time to explain. I wouldn't want any man to tackle it without him understanding the whole thing, or then he might feel I'd dragged him into trouble."

Something in Baker's tone made Dunnard look at him sharply. "Nothing big—crook—out of the ordinary, is it?"

"It's all three, and then some."

Dunnard bit his cigarette. "And then some! My eyes! Where you declaring war on?"

"I just want to know why I am. I was in the Mounted. The O.C. here at Edmonton can tell you about me, and I can give you other references."

"You were in the Mounted?" Dunnard frowned thoughtfully. "Baker . . . Baker . . . Say, wasn't there a Baker, I heard or read somewhere . . . . Are you that Sergeant Baker down north near the Arctic?"

Alan nodded.

"My eyes! I've read about some of your doings. You're on a detective job, aren't you? Some kind of a big case?"

With expert judgment Alan had been sizing up his new acquaintance, from his brick-red bobbed, brown hair to his old-coloured jumpers, to his "ride-rails" shoes. He read the dare-devilry in this Featherof. He wasn't a man either afraid of a rough job. And he had a modicum of his own! If only he'd go, it would save precious days looking for a "plane and flier.

Alan said: "My story is a long one. You look as hungry as I feel. . . . "

"I am, Baker. Let's go eat and talk."

Alan helped him pull a canvas over the machine. Together they stepped over to the taxi. As they swung into it, Dunnard they swapped war yarns, discovered several mutual acquaintances and came down to "Alan" and "Bunnard."

At the Chateau MacDonald Alan sent a telegram to Colonel Steele in Victoria. He wrote it swiftly, not daring to think twice of the fatal step.

"Am out of Mounted accepting your fine offer will you write me five hundred as salary advance would be mighty grateful letter following with details.

"ALAN BAKER."

He and Bunnard ate dinner; and then for a solid hour Alan talked. His tale of the Mackenzie Fur robbery, of the chase, flight, escape, of Dave MacMillan's trouble; of his resolve to help Joyce; of Joyce going bravely back to the lonely trading station; of his run-in with Haskell, his getting buried, his buying out of Haskell, his thousand-mile trip to Edmonton.

"But just where do the old crabs and me come in at?" Bunnard asked.

To Be Continued.)

FOR ANY PAIN

Have you ever found any quicker relief than this?

Anyone can take Aspirin, for doctors have declared those tablets perfectly safe.

And there is no quicker form of relief for any pain.

It is well to remember these things when anyone tries to persuade you to try anything in place of these tablets.

Aspirin may be taken as often as there is any need of its comfort: to stop a headache, throw off a cold, drive away the pains from neuralgia, neuritis, rheumatism, lumbago, etc.

Whenever you take Aspirin you know you are going to get immediate results — and you know there will be no ill effects.

You know what you are taking.

Why take chances on some form of relief which may and be no swift—may not be as safe? The new reduced price on bottles of 100 tablets has removed the last reason for ever experimenting with any

Aspirin is a trade-mark registered in Canada

FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen try it now at our expense. We have arranged a free trial offer of our special "GIANT" package which costs it very little to pass your claims for yourself. Ask your druggist for the new "GIANT" 75c. package.

Kruschen is composed of six salts, together with a mineral tonic basic—without for about one week. Then the trial bottle first, put it to the test. Then if you are entirely convinced that Kruschen does everything we claim it to do, the results will be so thrilling that you will buy again. Your druggist is authorized to refund your 75c. immediately and without question, if you have tried Kruschen and are not entirely satisfied. Get your free trial bottle today. Manufactured by A. J. White, Limited, Manchester, England. Sole Agents for Canada: The Imperial Laboratories, Limited, Montreal.

Oliver Cromwell's Recipe for Cozy Quiet

½ cup butter
1 cup sugar
2 eggs
½ cup milk
2 cups flour
2 teaspoons Magic Baking Powder
½ teaspoon salt
Flavoring

Cream butter and sugar together until creamy; add eggs and beat well. Sift flour with baking powder and salt, and add alternately with milk to first mixture. Flavor and bake in greased pan in moderate oven (350° F.) about 30 minutes. Cover with boiled icing and put together with jam.

"Cup Cakes are delicious when made with Magic Baking Powder,"

says Miss Helen Campbell, Director of The Chatelaine Institute

"Good baking goes hand in hand with good materials," Miss Campbell will tell you.

That's why Magic Baking Powder is used and recommended by The Chatelaine Institute. Magic meets all the Institute's rigid requirements of fine quality —expressed tests have proved it absolutely pure, uniform and dependable.

The majority of dietitians and teachers of cookery throughout Canada plan their recipes for Magic. They use it *exclusively* because they know it gives consistently better results.

And 3 out of 4 Canadian housewives say Magic is their favorite. It outsells all other baking powders combined.

Remember—substitutes are never as good. Do as the experts do. Use Magic Baking Powder.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Limited, Fraser Avenue and Liberty Street, Toronto, Ontario.

Here and There

Coal from Alberta mines for 1922 totalled 2,870,030 tons, an increase of 200,000 tons over 1921.

A cod with a silver spoon engraved "C. P. R." in its stomach was caught a few days ago in the Gut. Fort Alberni, B.C. The spoon probably fell overboard from one of the company's coastal liners.

A trip that formerly took two days over rough trails is now done in 20 minutes by airplane which from Northern Manitoba lakes are transported to rail head for distribution all over Canada and the United States.

One of the largest sailings of the cruise season was reported recently when the Empress of Australia sailed from New York on a Mediterranean cruise with a list of 600 passengers. Many assumed Canadians were on board.

The National Sea Plan Hockey Club's tour of Europe overcame all hitches and sailed recently from Halifax by Canadian Pacific liner Montcalm. They are the Allan Cup holders and will play in London, Paris, Berlin and Prague.

Twenty-six year old veteran of the northern Alberta, Mackenzie and Alaska route, the old Prince Rupert, the pride of the Canadian Pacific's B.C. Coast Steamships fleet, has been laid out of the service to the inland Tug and Barge Company.

Edmonton's resources of Carleton's Farmers. The Edmonton triple victory in the indoor hockey series, and speculation as to possible by possession of 16 to 1 score, the outstanding features of the Banff Winter Carnival recently concluded. Miss Violet Davis, of Edmonton, was crowned the 1924 Queen.

Canada's fifth largest coal mining and loading port, now the million railways of the Gulf Bay Victoria Golf Links for the B. W. Beatty Trophy, started February 21 with an entry list of 74 men and 61 women. They came from England, Scotland, Ireland, Wales, British Columbia and the Prairie Provinces.

Caught in the sea fisheries last year totalled 1923 totalled 712,217,000 pounds valued at over $11,000,000. Of the total catch British Columbia accounted for 227,631,000 pounds; Nova Scotia, 194,781,000 pounds; New Brunswick, 85,434,000 pounds; Quebec, 67,344,200 pounds and Prince Edward Island, 21,738,000 pounds.

The Place Viger Hotel, Montreal, owned by the Canadian Pacific of the French-Canadian people for legal and social life of the Province of Quebec, has been given a further lease of life under the same Pacific direction until October 1. It was to have closed its doors permanently January 31, but many and powerful protests sometimes induced the respite.

A record-breaking run through the Rockies on their transcontinental clipped four hours from the regular transcontinental train schedule in what is believed to be the fastest run ever made for the 326 miles from Vancouver to Field recently. The run made for the Canadian Pacific Express, piloted "Ten Tree to be Good," started four hours after the regular train had left Vancouver and caught up with it at Field.

FORT SASKATCHEWAN RECORD

Published Every Wednesday

C. Neale, Editor and Publisher

WEDNESDAY, MARCH 19th, 1923

More than a million and a half pounds of buffalo meat have been marketed during the past few months, product of the buffalo park at Wainwright, according to figures issued by the Canadian National Railways.

TO THE CITIZENS OF THE TOWN OF FORT SASKATCHEWAN

Friends:—

The Editor of this paper has Kindly consented to publish the following petition for your sympathetic consideration, copies of which will be available for your signature at all offices of businesses in Town.

If signatures to the petition indicate that a substantial majority of the residents are in favor of the intended project, a public meeting will be called to discuss all details.

Your active interest in supporting the petition, which is of vital interest particularly to the youth of the District, is earnestly solicited.

Yours sincerely,

On behalf of those interested.

TO THE TRUSTEES OF THE FORT SASKATCHEWAN AND DISTRICT HOSPITAL FUND

WHEREAS, in 1922 a sum of money was raised by the proceeds of an Athletic Sports Day and by subscription for the purpose of building a non-denominational Hospital on the Townsite of Fort Saskatchewan, and sum of money amounting to approximately two thousand dollars;

AND WHEREAS, said sum of money with accrued interest now amounts to approximately five thousand dollars.

AND WHEREAS, owing to changed local conditions, means of travel, our proximity to four Edmonton Hospitals and other considerations it is not considered a feasible project to build a hospital in this Town.

AND WHEREAS, the present practice of using the river and adjacent creeks for bathing purpose is prejudicial to the health and safety of those who use same, particularly that of juveniles.

AND WHEREAS, the construction of a swimming pool will eliminate this dangerous practice and provide a source of controlled healthful recreation, which is closely allied to the purpose for which the fund was originally intended;

NOW THEREFORE, your petitioners who are residents of the Town of Fort Saskatchewan and District, in duty bound, humbly pray,

That the Trustees of the above fund take legal steps to enable the accrued proceeds of the Fund to be applied on the cost of erecting a Community Swimming Pool in the Town of Fort Saskatchewan, always providing that the said sum shall remain in your trusteeship until such time as a properly organized committee of the Town and District of Fort Saskatchewan shall have been formed, and which committee shall have duly accredited and authorized to proceed with construction of the said pool.

Vol. 11 No. 46 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, MAR. 22, 1923 $1.50 PER YEAR IN ADVANCE

Jolly Players Enjoy Fine Banquet at E. Flintoff's Farm

Last Wednesday evening the Fort Saskatchewan Hockey team were the guests of Mr. and Mrs. E. T. Flintoff at a most enjoyable supper-banquet.

Mr. and Mrs. Flintoff both of whom are ardent hockey fans were very anxious that the boys have some sort of a banquet and get-together before packing away their hockey outfits and breaking up for the year and they certainly showed the boys a wonderful time on that evening.

The boys sat down to supper at 7:15 and they were real hungry after their long ride in the sleigh, still that was no excuse for the way they ate—for one glance at the long banquet table packed with choice fowl, vegetables, salads etc., would tempt the most ardent dietician to forsake his menu and sit in with the boys. The way the boys kept becoming their baths every little while to make more room is sufficient "proof of the pudding", thereof as it were.

Supper over the boys called first on Mr. Jack Gauf, President of the Fort Hockey Club for a speech and Jack responded with a timely address which ended with a vote of thanks for Mr. and Mrs. Flintoff and other who had made this banquet such a success.

Following Mr. Gauf's address the jovial manager of the hockey team, "Tip" Collins was called upon to say a few words. Colly complained of having eaten too much to make a speech but his remarks about the supper and his vote of thanks to those responsible for it certainly conveyed the correct feeling of all present.

Some of the boys with Two Henry, "clothing the invisible", engaged in a sing-song (at least they called it that), while others played cards and talked until finally someone said it was time to go home and the party came to an end.

The Fort Hockey Club wish through the medium of the press to convey their many thanks to Mr. and Mrs. Flintoff and family for the lovely banquet and social evening. They also wish to take this opportunity to thank Mrs. W. T. Lane, Mrs. H. Cottle and Mrs. R. Dennis who assisted Mrs. Flintoff with the preparation of the table.

ALBERTA NOW HAS CATTLE TRADE MARK

For the first time in the history of Canada live cattle will this spring go to market with a registered trade mark stamped on each animal.

The trade mark will be "R. L." in a six-inch circle in red paint, and will stand for Red Label, The Red Label Beef Association of Southern Alberta after long effort, and with the help of Hon. George Headley, Alberta minister of Agriculture, has secured a federal permit to brand cattle for Red Label beef animals. A certain standard is being set before the trade mark may be placed on any of the animals, and only those animals in any lot which come up to "R. L." standard will get the mark.

"The Red Label Association is the only organization in Canada which is in a position to breed, feed and market the kind of cattle Old Country consumers want," said W. R. Brown, of Brown Ahstiotz Co., Manchester, England, cattle importer, a recent visitor in Alberta.

EXCHANGE WHEAT FOR SEED

More than 60,000 bushels of registered seed grain, most of it wheat have been distributed among farmers in the province under the seed grain exchange policy inaugurated by Hon. George Headley, minister of agriculture. Under this plan it has been possible for farmers to exchange commercial grain from their farms for seed grain on the basis of a premium of 5½ cents a bushel for the seed over the current market price.

This grain instead of cash is taken from the farmers for the seed.

Much Business Done At Town Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Secretary's Office at 8 o'clock last Wednesday night, President Mayor G. T. Montgomery, Councillors Lalonde, Fillmore, Mayer, Watt, Graham and Neale. The minutes of the last meeting held on the 1st of March were read and adopted.

The following accounts were passed for payment:—

J. Spadin $14.00 for gravel, 12.50; F. Buchanan, gravel $20.25; F. Chambers, gravel, $21.25; F. Etherton, gravel, $12.50; Calgary Power Co., $123.62; Alberta Govt. Telephones $7.50; Beaver Lumber Co., 3 rolls of victor roofing for memorial hall; J. Lane, $47.50.

A By-law was passed providing for the Business Tax for the current year.

A motion was passed that—a new list of persons liable for the Educational tax of $4.00 per annum be prepared and tax collected. In connection with this tax the Town Act requires that every male resident of the district, of the full age of 21 years, who has resided therein for a period of three months or over, and has not been assessed on the assessment roll, shall pay an annual tax of $4.00 for school purposes.

The Council decided to continue E. Dosby, Chartered Accountant of Edmonton, as Auditor for the current year.

YPRES VALLEY

COMING EVENTS

Ypres Valley Ladies Aid will hold an April Fools social on Friday night, March 31st., at 8 o'clock in Ypres Valley Hall. Admission 25 cents & 10 cents. Good program. Good lunch. Good time.

LETTER TO EDITOR

March 16th, 1923

To the Editor:—

Fort Sask. Record.

Dear Sir:

In regard to a Petition published in your last edition re swimming pool. This is a plausible project, and it would be very nice to have one, especially for the young people.

But I think it would be possible to put this sum of approximately $5000. towards the building of a swimming pool, it should also be possible to put it towards the expense of another and somewhat similar, but very much more useful and necessary project, namely a system of waterworks and drainage for our town.

Water would then be available afterwards for a swimming pool.

It seems to me nothing short of a disgrace that a town of the size of Fort Saskatchewan, one of the oldest and not the oldest town in the west, situated on the bank of a main river has not waterworks and drainage. Not to speak of the benefits to health from want of same and the use of "home made" local systems that some residents have with the danger and discomfort and annoyance of septic tanks, freezing in the winter etc.

I feel confident that at least two-thirds of interested people within a reasonable radius would sign a petition for the water and drainage system.

I have paid heavy taxes in this town for nearly 40 years and personally would not care if my taxes were doubled, if we got a little comfort in our old age.

I am afraid if nothing is done this summer about water and drainage that many people will move to Edmonton and I think if we had these conveniences that many people would move into Fort Saskatchewan.

Yours Sincerely

Fred. R. Redd

"Coal output of Alberta mines for the month of January totalled 477,- 326 tons, a decrease of 55, 977 tons from January of 1922 and of and of 75,775 tons from December of 1922.

Large Audience Attends St. Patrick's Concert

A St. Patrick's Concert was given in the Empress Theatre last Friday evening, by the members of the Catholic Church, assisted by others of the town.

An interesting play entitled "Allie Bill", directed by Miss A. West, was very well received by an audience that packed the hall.

Members taking part in the play were: Louis Lamoureux, Eugene Rocque, Gwenneth Roberts, Mrs. W. Wilms, Herbert Roberts, Wilfred Lamoureux, Anna Bonnevier, Ted Davis, Les Gagnon and Peggy Mahaffy.

The Pioneers View Orchestra supplied music during the evening.

The Misses Dosser Moret and Sinnie Baker, dressed in costumes for the occasion, gave a delightful dance number. Miss Wanda Kotterbaun in a St. Patrick costume gave a splendid tap dance number during the intermission. Mr. Jos. Latour gave a vocal solo.

Rev. Father Clement in a few words thanked Miss A. West for directing the play and all others that helped in making the evening a decided success.

Taken from the Files

19 Years Ago Today

Thursday, March 20th, 1914

Good progress is being made of the provincial coal under Mr. Gillespie's direction.

This is the 25th Anniversary of the Battle of Duck Lake, during the Rebellion of 1885.

A well attended meeting of the St. George's tennis club was held last Friday evening when the following officers were elected for the ensuing season.

Hon. President Rev. T. M. Melrose, President D. Harper, Hon. Secretary C. H. Taylor, Committee, Messrs. F. W. Moss, E. G. Fraser, and A. Chard.

The local news of this week must have been mighty scarce.

SELECTING JUDGING TEAMS

Selection of the judging teams in seed grain with which will represent Alberta in the competitions at the world grain congress in Regina next July, is being made at final elimination contests this week at several points in the province. Two teams are to be selected, one a junior judging team from the junior grain clubs of the province, and the other an intermediate team from ex-students and students of the schools of agriculture.

School Notes

The regular meeting of the Fort High School Literary Society was held in Miss Weed's room on Tuesday, March 14, at three-thirty p.m. After the business had been dispensed with, a very enjoyable programme was held as follows:—

Piano solo—Muriel Peters.

Vocal Duet—Margaret Glover and Sarahe Oxley.

A brief Comedy Sketch "The Mixters Mistake", with the following cast followed, Olga Mann, Frances Herbert, Vee Henry, and the meeting was concluded by singing the National Anthem.

Christine Anderson, our budding chemist, while mixing Nitric Acid and Glycerine, figures out a chemical definition for men.

Symbol—A member of the human family.

Occurrence—Can be found wherever woman exists. Seldom occurs in the free or native state.

Quality—Depends on the state in which it is found.

Physical Properties—All sizes and colors. Often appears in disguised conditions. Surface of face seldom unprotected, usually covered by a coating of several days growth of whiskers. Boils at nothing and may freeze at any moment.

Chemical Properties—Extremely active. Possesses a great affinity for power, cigarettes, and chewing gum. Violent reaction when left alone by woman Great ability to dispose of all kinds of expensive tobacco at all times. Some turn green when placed next to better appearing samples. Ages rapidly. Fresh variety has magnetic properties. Highly explosive and likely to be dangerous in large- [illegible]

Who's Who in Fort High

Miss Gertie Mann.

Born—Yes, and it wasn't yesterday.

Educated Occasionally.

Occupation: Who knows?

Hobby: Tossing poor Fred.

Recreation: Reading love stories.

Ambition: Too high!

Mr. Jack Rogers.

Name: Unfinished.

Educated: Slowly but surely.

Occupation: General nuisance.

Hobby: Asking questions.

Recreation: Chewing gum.

Ambition: To pass French and Latin.

Miss Peggy Brown.

Born: Feb. 24, 19?

Educated: Not yet.

Occupation: Getting away with as much as possible.

Hobby: Bridge (mention).

Recreation: Mild flirtations.

Ambition: ?

—34 Boys' V neck Wool Sweaters. In sizes 5 to 12 years. Special while they last. **79c**

Buy Rubbers Now

—A full line of Rubber Footwear is carried in Stock. Get a pair of rubbers and avoid wet feet.

Jones, Graham & O'Brien's

A Financial Jig Saw Puzzle.

The fact has been noted in this column on previous occasions that during the past two or three years everybody has been discussing the monetary situation prevailing in the world today, and expressing opinions and offering solutions in regard thereto even though they lacked the most elementary knowledge of the subject. People informed and uninformed, from the most outstanding economists and bankers on the one hand, to the most indifferent student or casual newspaper reader, have discussed banking, currency, credits, the gold standard, inflation, deflation, international exchange, and a host of allied subjects, with the same freedom and frequently with the same assurance with which they are in the habit of discussing the weather.

This, of course, people have a right to do, but the net result has been the disseminating of a vast amount of misinformation and utterly unsound theories, the outcome of which is that large numbers of people are not thinking straight on this important subject, while the majority of the population are hopelessly bewildered and confused, and do not know whom or what opinion to accept as sound and a safe guide to act on.

Nor is this to be wondered at, because even some of the most generally accepted theories, theories advanced by world famous economists, have been proved in error when put to the test of actual experience. This was demonstrated in most startling fashion in the United States in the last few days of February and the first days of March. Events across the line moved with great rapidity, and the outcome was to upset previously held views in some important particulars.

Great Britain went off the gold standard in order to check the draining away of its gold reserves and to stop the export of gold from the country. It frankly and officially announced it had gone off the gold standard. The United States had accumulated more than a third of the world's gold in the world, yet it, too, reached the point where it was necessary to stop all gold exports, just as Canada had stopped it. But, unlike Great Britain, both Canada and the United States insisted they were still on the gold standard. So, people are asking, what is a gold standard? Just what does it mean?

But, the most surprising development of all came in the United States. The Government authorized the issue of over $3,000,000,000 of new paper money which was not backed by gold at all, yet the Government insisted the country was still on the gold standard. The issue of this new currency was out-and-out inflation, nevertheless the Government announced it was "sound money," and with standing that it had no gold backing, because it was supported by real assets.

Now, according to formerly generally accepted financial opinion, the issue of such new currency unbacked by gold would be the most dangerous thing, the ruin of the country's currency. That is, the United States dollar would drop in value in relation to the currencies of other countries. The amazing thing that happened was, instead of the United States dollar being worth less in terms of Canadian dollars or British pounds, it actually increased in value and was worth more. The discount on the Canadian dollar in the United States was increased, and the premium on the United States dollar in Canada became larger.

This process was exactly the reverse of what every financial authority and ballot-native economist in Canada had been telling the people of this Dominion would be the effect of inflating our currency by the issue of new paper money which was not supported by a gold backing. Such inflation, we were told, would be the abandonment of "sound money," would result in a further depreciation of our money on the world's money markets, and would seriously impair our credit. But the United States printed 3 billion dollars worth of bills of dollars, the Government declares it is "sound money," and instead of United States dollars depreciating in foreign exchange markets, they actually increase in value.

If this is the effect in the United States, why should an exactly opposite effect be the result in Canada if a similar policy was indulged in? It will be interesting to hear the explanations of our Canadian financiers and economists.

It has been widely contended that inflation should be indulged in by Canada to an extent sufficient to bring the Canad an dollar to a parity with the British pound and thereby promote a larger exchange of trade between the two countries and secure to the primary producer in Canada a better price in Canadian dollars for the products he sold in Great Britain. But, it was likewise argued, another effect would be to increase the already heavy premium Canada is now obliged to pay on all its commitments in the United States.

But, as already noted, inflation in the United States has not worked this way, but in exactly the opposite way. It has not brought the United States dollar near the British pound, but further away from it. It has not decreased the premium which Canada has to pay in New York, but increased it. It is inflation worked the same way in Canada it would not prove an advantage to the primary producers, who have been urging inflation, but impose a further loss upon them; it would not add to the burden of our governments and municipalities interests having large commitments to meet in New York, and who have therefore opposed inflation, but it would assist them.

It is all far more complicated and confusing than a jig-saw puzzle because the pieces do not fit together at all, while in the popular puzzles of today the pieces can be made to fit.

Empire As Security

The British Empire was put up as security for a loan of $5,000 in the United States money to pay off the 500 sailors of the British cruiser "Norfolk" in New Orleans, on a cruise by cash. The ship's payroll data fell efficiency and wages are being routed, due with all banks closed and the sailors faced above leave without spending money.

Sun Will Shine Again

The sun will shine again. One does not require an easy and fortunate optimism to know that this is true. The world is being readjusted after an extraordinary economic strain, in the meantime of the Royal Family have been "talkie" fans for a long time.

Work Of Flying Squad

The famous flying squad of Scotland Yard made over 600 arrests last year four hundred and fifty of these cases involved violent prisoners and one hundred and fifty of them carried arms. The Flying Squad has less than forty members.

Fruit Trees In Canada

There are 278,472 acres planted to fruit trees in Canada, according to information obtained from the decennial census taken in 1931. On this acreage there are 10,540,918 apple trees; 1,015,695 peach trees; 661,262 pear trees; 833,875 plum trees, and 697,705 cherry trees.

Queen Prefers Comedies

Nothing Else On Talkie Program Chosen By Queen Mary

The Queen's preference in moving pictures is for comedies, it is public learned when it visited the theatre where the Queen saw her first talking picture. The program chosen by Queen ary was composed entirely of comedies, headed by a popular British film. Proceeds were devoted to the Richmond Hospital. The younger members of the Royal Family have

Wheat In Perfect Condition

Inspection Shows Wheat Stored In Churchill Elevators In Good Shape

The 2,500,000 bushels of wheat in the Church.2 terminal elevators are in perfect condition, according to T. O. Cliff, general superintendent of the plant, who arrived at The Pas, Man., aboard the last passenger train from the north. Mr. Cliff and a staff of experts, as well as representatives for the board of grain commissioners, Winnipeg, spent two weeks inspecting the grain in storage in the port.

Trees were made concerning temperatures in a number of bins. The point spread was also put into operation, and was said to have functioned well.

This was the first mid-winter test of the elevator, so to speak, as it was the first elevator operating crew will move into port about the middle of May.

Passenger from Churchill stated that the shore ice at the mouth of the Harbor extended about three miles into the bay. One man versed in harbor work under low temperatures stated that ice-breakers could open Churchill harbor for shipping now, so far as the port was concerned.

Returned To Land

Over Three Thousand Families Assisted By C.N.R. Last Year

Not since the war has Canada experienced such a landward movement from urban communities as that which has taken place during the past year, according to a report issued by Dr. W. J. Black, director of colonization for Canadian National Railways.

The department has assisted 3,469 families during the past year in finding new farm homes, involving a total of half a million acres of land. The department also co-operated in the settlement of 1,413 unemployed families under the relief projects plan, financed on a tri-partite basis by the Dominion and Provincial Governments and the municipalities in which the families had lived.

Lakes Failed In Ice Yield

Nova Scotia Faces Ice Famine Due To Mild Winter

Nova Scotia is facing an ice famine and no matter how much the prices of other commodities may drop, the price of ice is due for a sharp rise next summer. The thousand lakes which have hitherto provided an annual harvest to the ice men have failed in their yield and instead of the customary sixteen to twenty inches have shown only three to six inches.

Truro is probably the only town in Nova Scotia where the cutters were able to sink their blades into the usual depth. Truro ice men are preparing to stock an extra supply to meet demands from the outside market.

Winter passed through Truro and particularly Halifax very lightly in 1932-33. Following the warmest December in 39 years, recently and February were unusually mild. The thermometer did not once touch the zero mark and while terrific storms swept the coast these were mostly rain and wind.

Caribou and Fish Plentiful

Trader Says Depression Means Little In Ima-Arctic

Depression means little in the north country where there is abundance of fish and large herds of caribou, according to James Darwish, fur trader of Fort Rae, on Great Slave Lake. It was the trader's first trip out of the "Territories" in 20 years.

Modern conveniences, such as the radio and aeroplane, have greatly changed life in the sub-Arctic, Mr. Darwish said. The 700 mile journey from the end of steel to Fort Rae, formerly a month's trek by dog team, today is covered by plane in six or seven hours.

Mails are delivered monthly in place of the old half-yearly service, and a fur trader now can move his furs "outside" and sell them shortly after they are trapped.

Scotland Yard Used Movies

Film Showing Men Must Shown In English Theatres

Scotland Yard is now employing motion pictures to trace criminals.

One of the most interesting manhunts ever instigated by Scotland Yard was recently carried on in Great Britain and motion pictures were said to have been playing an important part.

Films showing a police description and pictures of a man wanted for murder were currently shown in practically all of the theatres in England with an appeal to the public to assist in the search.

Conserving Heifer Foal

Following the increased use of horses everywhere, word now comes from Greece that the days of the motorcar are numbered. As a food conservation measure, those being over-numbered Horse plates can be operated only on Monday, Wednesday and Friday, and those with odd numbered plates on Tuesday, Thursday and Saturday.

Fortune In Antiques

Furniture Discovered By Collector Makes Hotel Owner Rich

A hotel owner in New York has learned he has a gold mine in the form of his hotel's antique furniture bronzes and works of art valued conservatively at more than $200,000. The treasures had been there 16 years, and were regarded as just so many ornamental additions to the hotel's standard equipment.

An antique collector, passing through the lobby, fell on his knees in front of a $3,000 Louis XV. parquetry desk, searching for the maker's name on it. On being used as a common writing desk in the ladies' writing room. Nearby was a $10,000 English grandfather's clock, an Elizabethan table of carved oak, some rare marble and bronze statuettes and huge chairs, recently sold for more than $50 each. The collector sought out the owner, and offered to buy certain articles at prices which made the hotelman immediately consult a dealer.

The owner said the things had been collected by his father-in-law, now dead, who was former owner of the hotel. They had been placed there after his death because the heirs had no other place to put them.

Placing the Fame

Scots Poet Caused Recent Radio Disturbance Says Professor

Was your radio full of rumbles, roars, squawks and squeaks during a recent week? If it was, blame the sun, says Professor John Cold, director of the Bucksell University Observatory.

Through a telescope, he said he spied a spot on the sun, with an estimated diameter of 5,000 miles. This spot was at the minimum of its cycle, unusual at this stage Professor Gold said similar but much larger spots upset telegraph and telephone systems November 17, 1882.

"Poetry should be written on one side of the paper only, shouldn't it?" asked the young versifier.

"That depends on the poetry," replied the editor, wearily. "Lots of it shouldn't be written on either side."

Sure Signs

of kidney troubles are pain in the back, difficult or frequent passing in urine. Gin Pills relieve kidney troubles by gently soothing and healing the inflamed tissues. 50c a box at all druggists.

Spectacular Scenic Route For Prairie Motorists Through Rockies To The Pacific Coast

One of the most spectacular routes available to the motoring public of North America passes through the very heart of the Canadian Rockies, traversing the great mountain playgrounds of Banff and Yoho National Parks. Providing access to such well known beauty spots as Lake Louise, Moraine Lake, and the valley of the Ten Peaks, Emerald Lake and the Yoho Valley, the western half of this highway is continuous but for the uncompleted section across the Selkirk Range. This last named section, which is known as the Big Bend Highway, is being jointly constructed by the National Parks Service of the Department of the Interior and the Government of British Columbia.

Pending the completion of the last link in this trans-mountain road now under construction along the good northern bend of the Columbia River, motor tourists may bridge the Selkirks by shipping their automobiles via Canadian Pacific Railway from Revelstoke, B.C., to Golden, B.C., or vice versa. With the exception of these 91 miles which must be made by rail, an uninterrupted trip may be enjoyed from the Coast to the Prairies.

A special service providing for the carriage of automobiles between Revelstoke and Golden will be inaugurated on June 15, and extending to September 15, semi-weekly in each direction in passenger train service. Automobile baggage cars will be attached to regular passenger train No. 2, eastbound from Revelstoke on Saturdays and Tuesdays, and to train No. 3, westbound from Golden on Sundays and Wednesdays. This arrangement will provide motorists with a direct train to or from the Pacific Coast through the Canadian Rockies.

The train journey between Golden and Revelstoke will be made by daylight, and there will be no delay or unnecessary expense to motorists as their automobiles will be carried on the same train and made available for immediate delivery on arrival at Golden or Revelstoke.

The rates for carriage of automobiles between the points mentioned will be according to wheelbase, as follows: wheelbase up to 115 inches, $12.50; wheelbase over 115 to 135 inches, $15; wheelbase over 135 inches, $17.50.

Each automobile must be accompanied on the same train by at least one passenger holding regular first-class ticket, which costs $3.65. All other occupants of the automobile travelling by train must hold valid railway transportation. Automobiles should be delivered to the Company's agent at shipping point at least one hour and thirty minutes prior to departure of train, or approximately before 11:35 a.m. at Revelstoke, and 12:45 p.m. at Golden.

The advantages of this service in providing tourists travelling either east or west with an all-Canadian route are obvious as formalities with immigration or customs officials are made unnecessary.

Experience Is Required

To Determine Best Time For Turkey Egg-Laying

Just as soon as the spring weather comes, turkeys should be fed for egg production, and laying should commence about the middle of April in Eastern Canada and somewhat sooner in Western Canada, with its earlier spring opening—especially in British Columbia, says Mr. A. G. Taylor, Poultry Husbandman, Dominion Department of Agriculture. Much depends on the weather becoming really springlike as to the time for forcing for laying, as eggs laid too early would have to be held too long before setting. This important question must be practically left to the discretion of the attendants. To get turkeys laying just at the proper season requires experience, and beginners should be cautious in this regard. Turkeys should be wintered where they are expected to lay in the spring.

Official Bird For B.C.

Naturalists Recommend Towhee, But Many People Prefer Robin.

Naturalists are urging British Columbia to adopt the towhee as the official bird of the province. The chief objection to the choice is that practically no one knows what a towhee looks like. In fact, a majority of British Columbians probably never heard of the bird until the present agitation arose.

The towhee of British Columbia is a little grey-breasted bird with a black head, having two white primary wing feathers of a distinguishing character. It is loyal to B.C., although it is known in the neighboring state of Washington.

The chief rival of the towhee as the official bird is the robin. Supporters say it is a more colourful bird and it stays in this province the year round.

The towhee is a member of the sparrow family and is able to exist on next to nothing, so far is food is concerned. It is of the genera pipilo, and oreospiza, but those who object to the towhee say that these names are not in its favor.

Syrup From Sugar Beets

Method Simple and Easily Carried Out in Home

Owing to the many inquiries being received from farmers who wish to make an edible table syrup from sugar beets the Division of Chemistry at the Experimental Farm, Ottawa, has been making further experiments to ascertain the possibilities of making a palatable wholesome and good spreading syrup for home use.

The method is quite simple and can easily be carried out in the home, and is as follows:

The beets are first washed and the crowns cut off at the lowest leaf scar, no lower, and the beets peeled, crowns and peelings being rejected. The beet is then sliced longitudinally, lengthwise of the root, and put through a meat chopper. This ground pulp is put at once before oxidation takes place, into a piece of cheese cloth which has been tied over the top of a fairly large pot containing water. The pulp is then suspended in the cheese cloth over the water but not touching it. An inch or so of water in the pot should be sufficient. To start with the heat is light, but and boil for half an hour vigorously. After half hour's boiling, wash pulp with warm water allowing this wash water to run into the pot, using as little as possible. Fill the cheese cloth bag with pulp two or three times using the same solution in the pot for steaming the second and third batches. Filter this weak sugar syrup through a good cotton cloth and evaporate it to less than half its volume. Allow this to stand overnight so any solid matter that has come down during the evaporation may settle out. In the morning pour this clear syrup off the solids and boil down to consistency of maple syrup taking care that it does not scorch on the top and being careful not to scorch or burn. Bottle or put in jars while hot and seal by the Canning Preservation Notes. Experimental Farm Notes.

Entry Records On Trade

Hubert Gale Paine, British champion of Cue Wood for the Phenomworth trophy, has announced through Lee Hartwell, secretary of the Cue Cup committee that he will not enter a craft in the race this fall unless experiments this summer prove to his satisfaction that he has a worthy challenger of Wood's bent.

Experiments Are Successful

The man who built a one-car gar ago in 1928 was foresighted after all. He keeps the car on one side and lives in the other.

THAT a porcupine cannot shoot his quills though many people believe that he can? The outer ends of porcupine quills are sharp and barbed and they fasten on to any foreign body with which they come in contact. They are fastened to the body of the animal in a sort of sheath from which they pull easily. The porcupine's favorite method of fighting is to turn his back on his enemy and swish his tail and was hands enough to rush at to some close enough for it to hit him. The porcupine can be killed by a blow on the nose and as his most sudden palatable meat he has saved the life of many a man lost in the woods. Except in self-defence no woodsman will kill a porcupine, which because of his fast temper and his quills, leads probably the most unmolested life of any creature in the wilds. Between the porcupine slipping life from a stump in Algonquin Park, northern Ontario, Canada.

The Interesting History Of The Development Of Instruments For The Aid Of Navigation

New Type Of Sun

Canada Endeavours To Evolve Mind To Conform To New Specifications

The department of agriculture is looking for a new type of sun. The hearty Plymouth Rock which combines great egg laying qualities with a plump and substantial body and has long been considered the popular dual-purpose bird, will not do Neither will the classic Leghorn, a small bird but an abundant producer of big eggs. The Rhode Island Reds and the varieties of Wyandottes also fail to make the specifications.

When Canada went after a share of the poultry business of the United Kingdom it was found Canadian chickens were too big. The British housewife wants a chicken that weighs 2½ to 3½ pounds.

Chicken raisers in Nova Scotia and British Columbia are seeking to develop such a strain by cross-breeding. The competition will probably spread all over Canada.

What is wanted is a pullet that will weigh 2½ pounds before it is killed, that is plump and compact, and will lay two-ounce eggs and plenty of them. These are specifications which the poultry division are confident such a hen can be developed.

Aiding the Blind

Braille Magazines Have Been Published In Many Languages

Approximately 50,000,000 pages of braille literature in the form of books, magazines and music have been published since the habit by the American Braille Press for War and Civilian Blind during the 10-year period of service just ended, according to William Hartley Davidson, president and founder of the organization.

Reading matter and music published by the American Press have been distributed in more than 40 countries, Cromwell said, in addition to the six monthly braille magazines in English periodicals are published in French, Italian, Polish, Roumanian, Serbian, Spanish and Flemish.

An elastic glass has been invented in Germany which neither breaks nor splinters.

Another important event that occurred during the early part of the Eighteenth Century and which deserves more than passing notice was the perfecting of the chronometer, by the brothers Harrison, then existing machines to find their longitude with an enormous hitherto impossible. Latitude, the distance north or south of the Equator, was fixed in the eighteenth century by observation with the quadrant, which was a sufficiently reliable instrument. But longitude the distance east or west had baffled both navigators and scientists alike from the beginning of history. Philip III. of Spain offered a prize of 1,000 crowns to anyone who could discover a satisfactory way of finding longitude, and then the States of Holland announced that they would reward 10,000 florins to the successful solver of the problem.

Nothing, however, came of these offers, and inability to determine their longitude resulted in a number of frequent disaster to sailors on badly charted coasts. Wrecks were of common occurrence, and lighthouses were few. Indeed, as we know them now they did not exist. Apart from the remains of the Roman pharos at Dover and at the Isle of Wight, the few coast lights were pale beacon fires placed on some of the more prominent headlands of the European coasts.

The tragic loss of Sir Cloudesley Shovel's fleet in October, 1707, on the Bellicle Rocks, off the Scilly Islands Government to offer a prize of 20,000 pounds for the discovery of a method of finding longitude with reasonable accuracy. After many years of the most patient work and experimenting John and William Harrison, in 1765 constructed a reliable chronometer, and the prize, after much delay, was paid in full. Thus the chronometer did for longitude what the mariner's compass had done for latitude. T. Ridge in The Twentieth Century.

London's Lord Mayor

Spends Half His Time Dressing For Functions

Sir Henry Greenaway, Lord Mayor of London, is a martyr to dress. His job is one of the hardest in the world. Hardly a minute of his day is not taken up with some formality or function.

If that were all it might not be so bad. But Sir Henry must pass approximately half his time dressing for each of these affairs—struggling out of heavy robes and decorating himself with the costly ceremonial trappings required of London's Lord Mayor.

The Lord Mayor has a year must face the bill for about $50,000 worth of baggage and accessories, not to mention the expensive Lord Mayor's Show and other ceremonial wardrobe.

For everyday he wears a scarlet robe decorated with gold embroidery gold chains and other impressive impediments.

For evening wear the Lord Mayor dons a black damask robe trimmed with gold, somewhat like the splendid outfit of the Lord Chancellor.

Reminded In Time

A traveller who was recommended for his last [illegible] visit to an [illegible] in his [illegible] began to get [illegible].

Quite early in the morning breakfast-ed off

"That reminds me," he said to the manager, "of a farm or estate we had a rose garden over 10 miles long and—he felt a kick and [illegible] as wide."

Flexible Window Glass

An inventor in London has produced a synthetic window glass, warm to the touch, and somewhat flexible. The process developed for the new "glass" is a closely held trade secret, but it is understood that a chemically treated wood product is an important material used.

Pretty girls are becoming somewhat smugglers in Europe.

can't sleep?

And at once! There's no need to be badly sleepy by waking. You need Eno every morning. Sold at all druggists.

For Greater Safety

Ontario Government Doing Away With Bottleneck Along Coast Highways

On some of the highways the Ontario government has already taken steps to do away with bottlenecks and make provision for the safety of motorists. It may be impressed to carry on much of this work as a large sum of the proceeds of the unemployment relief bonds will be used for improving roads. The unemployment problem, however, and the necessity to do a genuine relief work, the money there should be no further hesitation in this matter—the Government should go ahead, do away with the ditches, build highway paths, and afford pedestrians the accommodation they are entitled to.

DRAPERIES MADE NEW

"When we renamed house-keeping a month ago I found my draperies had become terribly soiled. I thought I'd have them cut on the line, hoping to remove the creases. Then I forgot about them when they became badly faded and sun-spotted.

"I was heartsick until the happy thought struck me to dye them.

"I used Diamond Dyes (any kind, as I used Diamond Dyes they look gorgeous) and now I have new draperies dyed to suit them. Diamond Dyes. They give the most beautiful colors, wash and wear like iron, and dyeing and never take the life out of cloth as other dyes do."

Mrs. J.W.T., Montreal.

Diamond Dyes

Fadeless

Sending Art On Tour

World Famous People To See Works Of Famous Artists

Sir Philip Sassoon is chairman of the National Gallery Committee, and it is interesting to learn that he has expressed himself in favour of sending collections of famous paintings to other parts of the world, particularly the British Empire. Little enough is known in Canada about British art, ancient or modern, and it would be a splendid thing if a touring collection were sent here. Everybody knows about Sir John Fisher "The Doctor," which hangs in almost every doctor's office, but beyond a few of the most popular works British artists are more unseen. The National Gallery contains many masterpieces by Frank, Flemish, Italian and other painters, and presumably any travelling exhibit would also include some of them.

Parliament would have to pass a special Act, as once a picture is hung in the National Gallery it is not supposed to be moved in the present state of what Rt. Hon. Chamberlain called "blushing hesitancy" there should be little opposition to such a proposal, even although the insurance would have to be enormous.

Any peripatetic exhibition should undoubtedly include, if it can be arranged, a selection from the Tate Gallery which is exclusively composed of the works of British painters who are, or were living, at the time their works were selected. It is there that "The Doctor" hangs, and some of the more splendid canvasses which British people throughout the world would be thrilled to see.

Having regard to the fact that foreign countries have sent art exhibits of fabulous value to London in recent years the British government should not be slow to act.—St. Thomas Times-Journal.

Rural Population Small

Canada Has Only 30.7 Per Cent Living On Farms

Of the 10,382,823 persons who form the population of Canada, exclusive of the Yukon and the Northwest Territories only 3,189,907 or 31.7 per cent. live on farms. The rural population of Canada at the last census numbered 4,792,138 of which 3,189,-907 or 67.2 per cent. lived on farms and were presumably engaged in farming. The remainder 1,567,628 or 32.8 per cent. represented the rural population which did not live on farms, mainly in small hamlets or other unincorporated villages.

Unbreakable Milk Bottles

Mellon Institute researchers have announced discovery of a way to make unbreakable milk bottles, celluloid from the dairyman's trade. Specialists from a Buffalo concern collaborated with Mare Darrin, a research student, to discover a process for impregnating cellulose with a wax-like substance and moulding it into the familiar milk bottle form.

Tell one of the parables that Jesus did.

Canada Commemorates

First Airplane Flight

Plans Used For Machine Were Drawn In Canada

The first airplane flight in Canada on February 23, 1909, exactly 24 years ago was recently commemorated by the International Ice Society releasing a special cachet featuring a Maple Leaf, with the seven provinces, Quebec, Nova Scotia, inscribed. The name of the airplane "Silver Dart," which was piloted by J. A. D. McCurdy, who now is president of the Montreal Aircraft Industries, is printed in large type. The distance then flown was one-half a mile with no mishaps reported in landing.

Associated with Mr. McCurdy in the construction of the gasoline motored airplane "Silver Dart" were Dr. Alexander Graham Bell, F. W. Baldwin, grandson of Hon. Robert Baldwin, Premier of Canada before Confederation; Glen H. Curtis, Ian C. Morgan, president, International Aircraft Society, said in his review of the circumstances under which the flight was undertaken. Mr. McCurdy is a graduate in engineering of the University of Toronto in 1906.

Added interest to the event was the fact that Mr. McCurdy, a Baddeck man, had drawn the plans, so that the machine which made the first flight in Canada primarily was a Canadian product. In honor of the occasion, the Baddeck Town Council presented an engraved testimonial of esteem to Dr. Bell and Mr. McCurdy, including those in their historical records.

Preparing For Trip

Commander Byrd Going To South Polar Regions In September

An antarctic expedition led by Commander Richard E. Byrd is to go into the South Polar regions in September. Preparations have already started at Dunedin, New Zealand, to collect supplies for the trip. Among the items are 500 tons of coal, one or two aeroplanes with accessories, approximately 15,000 gallons of gasoline, and about forty tons of food, from thirty to fifty tons of dog food and about fifty tons of other supplies.

More Men Employed

More professionals in the British Civil Service, of which statistics have just been issued. Of at total of 317,-960 in the Service, 288,960 are men and 29,000 are women. These figures also include 107,794 ex-service men, of whom 47,626 are classified as disabled.

If Common Sense Were Commoner

Come to think of it, man, this thing we call common sense isn't so very common. If it were, every pipe smoker would apply common sense to the selection of his pipe tobacco.

That would mean Ogden's Cut Plug of course. For if ever a tobacco was made for pipes it's Ogden's. And your pipe will prove it. It will talk to you in Ogden language. With Ogden's Cut Plug in the bowl you'll forget there ever were such words as "bite" or "burn" in tobacco talk.

U. S. WILL SEEK WAY TO REDUCE WHEAT OUTPUT

Washington.—The United States administration reversed itself recently by an abrupt about-face and announced with other nations bowing to mass action against agricultural surpluses and tariff barriers.

As proof of the sincerity in this move for economic betterment, the Roosevelt government will seek from congress broad powers to control farm production and has made clear it stands ready to penalize what it perceives as existing high tariffs in other countries will follow suit.

It was disclosed that already the project of limiting wheat production to the level of world consumption by agreement among the great grain-producing nations, Canada among them, has been allowed headway with representatives of other governments.

This is believed to have entered the recent discussion President Franklin D. Roosevelt had at New York with Hon. William D. Herridge, the Canadian minister.

The president expects that in response to a special farm relief message he will send to congress soon, the present special session of congress will give the executive power to reduce the output of agricultural products in which burdensome surpluses have been holding down the price. The broad authority to be asked is expected to include means for the government to pay a bonus to the farmer a part of his acreage to take it out of actual production.

With a firm hand thus regulating the flow of America's exportable farm products, it is felt the president would be able to take a leading part in getting principal nations to agree upon a pro rata apportionment estimated to meet the needs of the world and not to pile up surpluses.

The unofficial discussions engaged in thus far have involved a single product, wheat, but it was understood to have taken place with the Canadian Government.

Through diplomatic channels, further other countries are to be held with the major wheat-producing nations, including Australia and Argentina, with a likelihood the matter will be definitely decided at the international [illegible] in London some time this summer.

In the past, as recently as a year ago last summer, unavailing efforts have been made to reach just such an agreement on international control of wheat production. A factor preventing definite results was the inability of the American government to control the domestic output.

All producing countries agreed cooperative action to limit production would end the era of subnormal prices.

Through the same diplomatic channels in advance of the economic conference, high officials of the state department said the United States will seek the reciprocal agreements for lower tariffs.

This strongly worded statement on which the official declined to be directly quoted, gave plain indication of the emphatic attitude of the administration toward the question of tariff barriers.

The administration's stand was emphasized by Secretary Roper, of the Commerce Department, in an address asserting the American people are "tired of a policy that has antagonized every other nation in the world."

Empire Materials

Ottawa.—Unit Empire materials are to be used on government contracts in future. This applies, not only to contracts let by the departments of government but also to the Canadian National Railways and government boards and commissions.

Elected Warns France

Paris, France.—Former Premier Edouard Herriot has frankly warned France that it is to her "essential interest" to pay her three months overdue debt to United States as soon as possible in view of changed conditions in central Europe.

Disastrous Fire in Eddy Match Factory

Five Girls Dead and Many Others Seriously Injured

Hull, Que.—Five girls were burned to death here when fire gutted the Eddy Match factory, following an explosion.

Firemen poked through the smoking ruins searching for the others missing. Twenty-one people in all, in hospital beds, sad and charred bodies were found.

Rushing up from a match-tank the explosion sent the girls in the vicinity with staggering suddenness. Little chance for escape was offered. Fire followed immediately on the explosion and in a few minutes the building was a mass of flames. So quick was the whole thing happened, that little could be done. Such injured as could be rescued were taken to the hospital.

The factory was located north of Hull a block from that section of the Chelsea road known as Eddy Boulevard. No buildings were located near it. The fire started near the main entrance of the factory which is of brick with concrete and with many windows. The only explanation why so many lives were lost was that the doors apparently carried the fire in all parts of the structure, and cut off the entrances.

The factory employed about 25 people and in normal times double that number would have been at work.

All the girls were residents of the immediate locality and in their teens or early 20's. The bodies taken from the ruins were in the main so badly charred that it was impossible to identify them.

It was felt that at least three more employees were unaccounted for, and some estimates placed the figure as high as eight. The injured were rushed to hospitals by private motor cars and ambulances and an accurate check on their number or the extent of their injuries could not be made immediately.

Registration Of Voters

Compulsory Voting Law For Canada May Be Introduced

Ottawa.—Indications were seen in the senate debate that recommended the issue from the house chamber for a system of compulsory registration of voters and compulsory voting, for the electors of Canada, with severe penalties involving imprisonment for impersonation at the polls. Right Hon. Arthur Meighen (Conservative) leader; Gen. A. D. McRae, Vancouver; Hon. W. A. Buchanan, Lethbridge; and Hon. C. C. Ballantyne, Montreal, took part in the discussion of the question.

Senator Meighen observed that in all the speeches that have been made on the subject, since it was introduced a week ago by Senator W. E. Foster, there had been agreement that election costs were too high, and that some change should be made, preferably a system of compulsory registration and voting. He believed a committee of the senate might do some valuable work along this line.

Market Recovery

Prices Of Securities Advance On New York Stock Exchange

New York.—One of the most brilliant recoveries in security prices in the history of the New York Stock Exchange attended the restoration of financial confidence which has swept the United States with the reopening of thousands of sound banks.

Shares surged up $7 to $16 in a wave of frenetic buying. The advance in bonds was just as striking. Many issues were swept up $10 to more than $30 per bond to $1,000 par value.

It was in the decisive measures taken in Washington, rather than in news from business and industry that financial quarters found new encouragement.

Bridge Made Safe

Calgary, Alberta.—Twelve men with picks and shovels removed the ice and spread gravel on the approach to the Arrowwood Creek Bridge, 30 miles east of High River, Alberta, where three men in 46 hours had their lives in automobile accidents.

ENVOY TO BRITAIN

Hon. Ernest Lapointe, K.C., Minister of Justice, has been appointed by the Canadian Government as Canada's envoy to Great Britain to represent the Dominion at the coronation of King George VI.

A Voluntary Exile

Prof. Einstein Will Not Return To Germany Under Present Conditions

New York Professor Albert Einstein announced himself as a voluntary exile for the present from Germany, when he arrived here from California. How long he will remain out of Germany, Einstein said he does not know. But he will not set foot on German soil as long as conditions are as at present.

He is sailing for Antwerp to do his future work.

"I am no Nationalist," he said at a dinner in his honor attended by some of the foremost American scientists and leaders in finance, education, art and letters.

Without mentioning Germany by name, he referred to the prevailing "delusion of exaggerated nationalism," and said:

"This nationalism is a grave danger for the entire western civilization, which at one time had its origin in Greece. Behind it are powers inimical to life. To combat it is therefore the duty of every well-intentioned and perceiving being of our time."

He spoke of Jewish persecution in "Eastern Europe," and said "it is not easy to say where the western boundaries of this eastern Europe are to be sought."

Senate Endorses Bill

Favors Re-enactment For Clarity Of Any Provisions Beaten Thom

Ottawa.—Unanimously the senate endorsed the principle of sweep-taken for charity purposes if any province desires them, when it granted the second reading of Senator A. D. McCrae's bill by a vote of 27 to 20.

It was then sent to the senate committee on private bills. The impression is that with the substantial majority it received on the second reading, the bill will complete its course in the senate and be sent on to the commons, where an interesting battle may be expected.

A bill has been placed before committee providing that informers seeking money won by sweepstakes winners must first obtain consent of provincial attorney-general before taking action.

London.—Out Unanimous votes were recorded in favor of sweepstakes by eight of 10 Canadian legion branches in the London district, it was stated at legion headquarters here. Three other two branches had not filed a report.

Unemployment Insurance

Saskatchewan Legislature In Favor Of Federal System

Regina, Sask.—Unanimously, the Saskatchewan legislature went on record as in favor of the early creation of a national system of unemployment insurance.

Conservative (Lib.-Maple Creek) was the mover of a resolution calling in general terms for provincial support to any efforts of the federal government to establish unemployment insurance.

Hon. J. F. Bryant, Minister of Public Works, moved an amendment, mentioning specifically a national system of unemployment insurance, the creation of a national commission to devise it and urging that the government of Saskatchewan code all constitutional rights in the matter to the federal government.

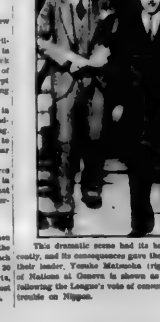
Mr Bryant's amendment was accepted by Mr Spence in preference to his original motion, and the House passed it without division.

United States Seeks Britain

Washington.—The United States has disclosed its intention to support Great Britain in a move looking towards international action against nations waging war—undeclared or otherwise—by enforcing against them an embargo on arms shipments.

Cost Of Commissions

Ottawa, Ont.—The Duff commission cost Canada $62,258, according to an answer given in the House of Commons to a question asked by Hon. Ian Mackenzie (Liberal, Vancouver Centre).



AS JAPAN "WALKED OUT" OF THE LEAGUE

This dramatic scene had its brief moment in the world spotlight recently, and its consequences gave the war-weary nations a bad scare. Led by their leader, Yosuke Matsuoka (right), Japan's delegation to the League of Nations at Geneva is shown as it "walked out" on that august body following the League's vote of censure, laying the blame for the Far Eastern trouble on Nippon.

NO FURTHER BURDENS ON THE B. C. TAXPAYERS

Victoria, B.C.—Not one dollar of new taxation will be imposed on the average taxpayer of British Columbia, said Hon. J. W. Jones Minister of Finance, in his budget speech in the legislature, but on personal incomes over $5,000 a year, the government will levy a new graduated surtax progressing from one per cent. on the first $2,500 to 15 per cent. on incomes in excess of $50,000. This will be additional to all personal levies and is estimated to raise $250,000.

Succession duties will be raised 25 per cent., which, with further doubtful adjustments will bring a new revenue of $315,000. The school tax on lands outside school districts is reduced from five to two mills.

The government will spend $32,-720,886 in the next fiscal year as against $34,836,671 in the year now ending. A reduction of $2,115,974, or a total cut in departmental expenditures in the last two years of 7,430,514.

Government revenues on estimates "pared to the bone" with "padding" removed, are fixed at $30,497,501. But the expenditure total contains a provision for $2,317,385 to be set aside in sinking funds. Thus, while the total revenue and expenditure estimates show a deficit of $2,317,385, the actual fact there should be no deficit at all. Mr Jones said The sinking fund provisions may not be made in full during the last year, but the province will collect more money than it spends, the minister said.

Would Maintain Neutrality

Winston Churchill Urges Britain To Avoid European Alliances

London, Eng.—Winston Churchill, Conservative member of parliament for the Exchequer, urged before the House of Commons that Britain keep herself free from European entanglements.

Mr. Churchill, who was speaking on debate on the air estimates, said that to keep out of international wars on the continent the United Kingdom must be strong enough to maintain her neutrality and must, therefore, carry out her full programme of air defence.

Sir Philip Sassoon, under-secretary for air, presenting the estimates, told the House the Royal Air Force had effected economies with some anxiety as ten regular squadrons which were required to complete the "modest" programme approved as far back as 1923. In terms of first line strength, he added, the Royal Air Force was today fifth in the list of air powers, while at the end of the Great War it claimed first place.

Victim Of Dread Disease

Devoted Wife Accompanies Husband To Leper Colony

Toronto, Ont.—Unflinching, a devoted wife will bravely face isolation of the New Brunswick leper colony on Tracadie Island in company with her diseased husband, it was revealed here. Accompanied by his wife and a nurse, the leper is travelling to the colony aboard a special cabin-car placed between locomotive and baggage car.

Victim of the dread disease apparently contracted some years ago in South America, the unfortunate man has been identified as a former well known Toronto athlete and graduate of the University of Toronto. He and his wife learned the nature of his malady about Christmas time. The victim is of latter middle age and his wife about 50.

Gifford Was In Danger

Winnipeg, Man.—"I was afraid the crows would not leave his office alive if he refused to sign his resignation," Constable Allsuck, of the Royal Canadian Mounted Police, testified before Mr. Justice A. K. Dysart, at the trial of 14 men of the Arborg, Man., district on charges of rioting and unlawful assembly in connection with a disturbance last November 29.

The Nature Of Wealth

Capital Needed To Keep the Wheels Of Commerce Moving

The amount are taught to believe that there is an abundance of wealth for everybody, and that were it not intercepted by the rich, it might be divided like manna, equally and distributed.

Wealth, which is an ignominiously despised nuisance so zealously coveted, in what does it consist? When the ragged army of the French Revolution entered Holland their thoughts were centred upon the Bank of Amsterdam, reputed to be the wealthiest in the world; but when its coffers were broken open they were found to contain only a vast array of bonds and title-deeds, no longer of any value because unsupported by any law.

So it is with money, it cannot live save in the conditions in which it is used. Today it represents much; tomorrow it might represent nothing. Money, indeed, is not wealth, but merely the wheels which give it currency. Wealth itself is something persons and responsibilities, so much a power as a material, like steam or electricity, driving by its million shafts and bellings the intricate machinery of civilization.

It is invested in all the industries and trades of the nation, partly fixed and partly floating; it cannot be drawn out without loss and must constantly be renewed, partly it is held in reserve against the day of renewal, partly it is imprisoned by the past, and partly it is connected to the future, partly it is buried underground and partly it is mortgaged to the vast supplies of food and raw material by which industry is kept at work and the nation in life.

It is in form and use infinitely various, and in every form and use requires expert handling. Labor is only one of the many elements and of which it is created. The mind of one man may make more wealth, as when Shakespeare invented the locomotive, than forty million pairs of hands. Moreover, it must be stored in large amounts for great services.

Without it life would be "nasty, brutish and short," since it makes the difference between barbarism and civilization. The Russians, who destroyed their capital in the attempt to divide it, have stood over since, like starving beggars, at the door of the "capitalist system" begging for the capital of other nations.

To direct this element out of trade and industry in order to divide it among the population is impossible, and were it possible would be suicidal.

The immediate result is the individual would be no small as to add anything to his wealth; the ultimate result would be the ruin of the system by which he lives. London Morning Post.

Jed L. Tomkins Old

City Of London Remembrancer Dies Both To Ellenborough Days

The Corporation of London has appointed L. C. Blackmore remembrancer aged 84. The honorary office of City Remembrancer, which carries a salary of £1,000 a year.

This appointment has entered since Ellenborough days. The City remembrancer is charged with the conduct of many ceremonial duties which devolve upon the Lord Mayor and Corporation of London. The Remembrancer in fact, is the medium of communication between the rulers of the city and the sovereign of the realm.

Lords Like a Shrimp

At the opening of the civil war an hour-glass was rejected by the examining board as too frail for military service. As he remarked his 100th birthday anniversary in California recently, he had almost reached the conclusion that the board had been mistaken.

Has Good Start

An Edmonton barber is reported to have accepted a dog, two canaries and a statue of Mozart in exchange for haircuts, shaves and shampoos. How all he needs is a bobtail, a pack-age of bird seed and a grand piano.

W. N. U. 1986

TERRIFIC EARTHQUAKES SPREAD DEATH AND HAVOC IN CALIFORNIA

Our map shows that part of Southern California where more than 200 communities were wrecked by a series of violent earthquakes. A mighty upheaval in the ocean, southwest of Long Beach, was believed to have been the centre of the disturbance. The trail of death and destruction reached from Santa Anna to Hermosa Beach.

Dalhousie Placed In Conservative Legislature

Sir John MacDonald and Mr. Lafontaine Lead Legislative Assembly

The Hon James P. Bryant, K.C., Minister of Public Works, has placed in the Dalhousie Legislative Library Assembly the statesmen of Sir John A. Macdonald and Sir Louis Lafontaine, on pedestals on either side of the Speaker's chair. Before the Ottawa fire Day was presented with Mr. Bryant stood up in the House and said:

Mr. Speaker: I desire to call the attention of the hon. members of this House to the fact that this year, present, I have caused to be placed on the Speaker's desk, this day, portrait statuettes of Sir John A. MacDonald, and Sir Louis Lafontaine, two great Canadians, executed by the famous French Canadian sculptor, Philippe Hebert.

Mr. Hebert was noted for his statuettes of great Canadians. He is turning to Canada after harnessing his studios in Paris, he was first first prize in a competition instituted by the Federal Government, for a statue of Sir George E. Cartier, for the Parliament Square, Ottawa. Among his other works are the statue of the late Sir Wilfrid Laurier, and the statue of Sir A. MacDonald at Ottawa, Maisonneuve and Laval monuments at Montreal, the Champlain monument at Quebec, and Joseph Howe statue at Halifax and the monument of the Fathers of Confederation at the Provincial Government of Quebec. Many of his numerous works of art were inspired by his appreciation of the French regime in Canada.

The late Legislative Library is a wall plaque of the bust of Lieutenant-Governor Forget by Hebert, Lieutenant-Governor Forget by Hebert, Lieutenant-Governor Forget by Hebert, the late Judge Street of Ontario, were unveiled in the early days of the Province. Territorian in an inquiry into the administration of Justice, following the death of Judge Street. His daughter recently gave the photos of the statuettes for the archives of the Province.

The two statuettes were presented to the government of the Province of Saskatchewan by the Province of Alberta, Government Houses or the Old Legislative Building. The statuette of Lafontaine was presented in 1913. The that of MacDonald in 1914. Three works of art were thrown into the discard. Last week, I found the bronze and chipped statuette of Macdonald in the legislative vault where it had huddled under the bottom shelf for many years. I located in a corner under a table in the point shop the statuette of Lafontaine and on inquiry found that it had been brought over from the old Legislative Building and just in the old Power House. On examination, I found the signature of Hebert and the year on which they were created, on the statuettes. I have had them repaired by the Government painter and believe that they are worthy of a place in the Legislature of Saskatchewan.

Sir John A. MacDonald was formerly a Conservative Prime Minister of Canada and had his history for most of you are familiar Sir Louis Lafontaine was one of the greatest French Canadians and was the leader of the Reform Party and the Attorney-General of Lower Canada. He joined with Mr Baldwin, leader of the Reform Party, and Attorney-General of Upper Canada. In 1841, at the age of thirty-four he formed the Lafontaine-Baldwin ministry, the last Canadian cabinet in which the principle of Colonial Self-Government was embodied.

He did not take part with Papineau in the rebellion of 1837, but left for England and France. Returning later to Canada, he was honored by the Reform Party, and although a resident of Lower Canada, was selected by Mr Baldwin the nomination in the English constituency of the Province of Canada, Upper Canada, where he was elected.

Professor Longeuil of McGill in the "makers of Canada" says of Lafontaine:

"Lafontaine was a man of striking possession of more than ordinary stature and robust proportions. Frank, His manner some and regular features, his magnificent cast of the head and his fine head of the man, offered a striking contrast to Baldwin in the face of the Emperor Napoleon. On his visiting the Invalides in Paris, Lafontaine was impressed by the veterans of Napoleon's guard, who were said to have turned with emotion to recognize from them the walking image of the dead Emperor."

Retiring from political life at the age of forty-four, Lafontaine was later appointed Chief Justice of Lower Canada, and had a very distinguished career. When he retired from public life in 1851, in his farewell speech, after referring to the different kind of government they had formerly enjoyed, Lafontaine said: "I leave political life. Lafontaine said:

"We had a government in which the parliament had no influence on the government of all British Colonies under this government. In which the crown had power, save only the power of refusing its assent.

"We commenced therefore our struggle to enfranchise these colonies, to establish in them the principle that it is our right to have, and which we have today, true representative English Government."

On the loss of the statuette is believed: "Even lost to pioneer days, when a pewter mug was considered a treasure, was not the power. An one of the Fathers of Confederation possessed the statuette of Lafontaine might well adorn any legislature in the Dominion.

The Province of Quebec has done much to encourage art among their people of that province and the legislature has also made small grants in aid for that purpose, I think in the neighborhood of $100,000. While we have not do so in Saskatchewan under present conditions, yet I feel that something substantial should be done yearly when normal conditions return. For example, George Maldrum, a young man from Regina is now studying art in London. Recently he is a very gifted sculptor and last year had the honor of his work displayed in the Royal Academy There are also two young men in the Province of Saskatchewan who are studying painting to be filled. If Meldrum were retained at a moderate salary for a year or two and a carload of Italian marble purchased some marvellous result might be obtained.

Saskatchewan has a number of young artists who, with a little encouragement, might win a place in the National Art Gallery. They have the aesthetic urge which craves for an opportunity for expression. The satisfaction to the government might give them in the way of encouragement, and appreciation might apply the necessary impulse, and the prize what Kipling has described as

"The little gift by the doorway,
And the praise in girl can buy."

Invaluable Aid To Pilots

"Carved Smile Beam" Will Assist In Fog Landings

Military, mail and private pilots observed recently at Newark Airport the first public demonstration of the "carved smile beam," a new automatically signalled beam five miles from the airport. A radio beam is sent out and a dial guided the pilot to a point above the runway and a vertical arm showed him the proper angle of descent. Intensity of the beam was calibrated to record distance from the airport, and a shrill, sharp signal warned the pilot on his plane crossed the boundary of the field.

The new equipment required by the plane weighs only 15 pounds.

Because the one ground set installed was contrary to the usual, final, according to members from rural districts, is also being used to a considerable extent as a rebellion for radio.

Gardening Notes

By Gordon Lindsay Smith

Most pruning is carried out in March although where only a little work is to be done it is better left until growth is farther advanced. There is one exception to the latter statement however and that applies to grapes. To avoid excessive bleeding vines of this fruit must be pruned while absolutely dormant and this means before the middle of March. In pruning grapes the best plan is to remove all but a sure selection on the fruit in borne on new growth each year in the commercial fruit districts all but the thumb and two internals each way are left when the vines are through with the knife and clipper.

In pruning fruit trees, the main thing is to open up the branches to admit plenty of light and air and to prevent the growth of branches at a wide angle from the main structure as each would be liable to break off when loaded with fruit. Branches which cross and rub against each other, of course, should be removed. In the smaller garden it is important to keep all fruit trees dwarfed, for convenience in picking. Where natural and systematically and where there is not too much shade it is quite possible to have cherries, plums, peaches, pears and apples growing on bushes within a foot of the ground. In fact, in the older countries and also on the prairies, most fruit trees are trained so that they branch out close to the bottom of the trunk. Except for a little training it is not necessary to do much pruning until the fruit tree comes into bearing. If it is necessary to remove large limbs, the wounds should be painted over or coated with grafting wax to prevent rot setting in and to encourage rapid healing.

Flowering shrubs also benefit from a light thinning each year, after they have reached maturity. Those that flower in the spring or early summer should not be pruned until after the flowers have run their course and the old growth and as many of the dead wood as possible should be taken out. Late bloomers are pruned first thing in the spring. Ordinary rose bushes are severely pruned back each spring, while with the climbers it is customary to take out a good deal of the old wood any time after the flowers die.

With raspberries, take out all the year-old canes following fruiting as well as any crop will be borne on the canes produced this summer. Thinning out surplus bushes from the row to thick or the main stems

Perennials

Often there is far too much reliance to snow perennial flowers. Not only do most of these things require to be divided every third or fourth year, but the constant digging and development of new beds constitutes one of the best joys of gardening. There are two portions when moving is most successfully carried out, in the early spring and late September. At both times growth is actively on and filling the soil with moisture or a portion of it, dividing with a sharp spade and replanting at once forth can be carried out with little harm.

There are few exceptions to the general rule. Oriental poppies for instance, rather difficult to handle at any time, should be moved or set out in August, while late bloomers like the Delphinium are best planted in October.

In all work of this kind one should bear in mind that the secret of successful transplanting is speed in getting the roots into the ground and plenty of water. The soil must be pressed down firmly all around the roots. Care must be taken that the flower is set to the same depth as before, with particular attention paid to iris and Peonies. Here covering the roots only to the depth of the farmer, while an inch on top of the crown will do for the Peony. Both the Iris and the Peony are fond of or reserving a piece of old sun, dig it deeply and thoroughly work up the soil as finely as possible.

Pulse Your Party Well

The pulse-your party of Canadian scientists studying cancers and cattle ailments in Canada's north-Arctic are enjoying the best of health and are accomplishing their work on schedule. Letters from the party arrived at Churchill with the last mail sent out from Chesterfield Inlet by Eskimo dog driver.

New Process Is Quick

It requires only three minutes to transfer dissolved cellulose into finished yarn by means of improved machinery. The new process eliminates the use of refrigeration equipment, special mechanical apparatus, packed textiles, etc.

Mabel — "Won't worrying you David?"

David—"I was just wonderin' if Dad would see to the milkin' while we're on our honeymoon, suppose you said 'yes' if I asked you."

EXCESS FAT RUINING HER HEALTH

Better After Losing 14 lbs.

There are a number of bodily ailments that are apt to arise in overweight men and women, and if excess fat is reduced in the right way, very often improved health follows. So it did with this woman:

"I used to have a great deal of fat that seemed to nearly stop my breathing especially when I knelt down to do my housework, or was walking up a hill. I would simply have to fight for my breath for six or 10 minutes. But now that has all gone thanks to Kruschen. I have lost 14 lbs. in my girth, and am able to get about in comfort. I can walk all day and not feel tired. I feel so much better and am so pleased to have lost some of the fat that was steadily gaining ground with me, and ruining my general health." (Miss) A.K.

There are six vital mineral salts in Kruschen. Those salts combat the cause of fat by assisting the internal organs to perform their functions properly so that every cell each day throws off its poisonous waste which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue. Unlike ordinary diet aids, Kruschen does not confine its action to a single part of the system. Its lotic effects extend to the liver, the glands, nerves and veins.

FREE TRIAL OFFER

If you have never tried Kruschen, try it now at our expense. Get a bottle from any chemist in the world, and follow the directions with breakfast for a fortnight. Then if you do not feel that Kruschen is the finest purchase you have ever made, return the empty bottle to us, and we will refund your money in full without question. We have made this offer for years. Hundreds of thousands have taken advantage of it. Obtainable from Imperial Chemical House, Ltd., Toronto.

HEART OF THE NORTH

By WILLIAM BYRON ROWLEY

(CHAPTER VII. Continued.

Alan told why he was looking for an airplane, sketched the strategy of his campaign, confessed his whole during plan of running the bandits to earth.

He asked, "Will you go, Buzzard?" It was an very simple a question, but there was a prayer in his voice and eyes.

"Will I go?" Buzzard echoed, almost angrily. He put the fat down on the table so hard that the salt shaker jumped. "Will I go—on a trick like that? If I'm safe, what a question! Would I miss my girl if she asked me to?"

Alan checked him: "Just a minute, Buzzard. Let's get a couple things clear. One is the matter of pay. I've got a couple hundred dollars in my pocket and five hundred coming by wire. It's probably take all that to outfit us, as right now I can't pay you one red cent. But I'm going onto a gone salvaged job, and I'll pay you before the year's over—"

"How much are you getting out of this? Nothing. Good! I'll take the same."

"But it's my affair, my quarrel."

"Then I'll have in on it. And be-

sides, I'll get my part out of it in the long run. Look at the publicity value, Alan, if you pull a stunt like that! With all the headline advertising I'd get—"

"But supposing your machine gets wrecked down north somewhere? It'll be a total loss. I couldn't pay you back for a long—"

"Listen when a fellow's plane is a total wreck, he doesn't worry much about the loss. All he cares about is a new bankstone."

"But look here now, and get this straight. We haven't any right to pull a trick like this. Damned. We're stepping outside the law. We're violating several hard and fast statutes. I hap-pen to know."

Buzzard grew impatient. "Suppose we get down to essentials. You need my machine and I'm ready to quit. A new prop costs like sixty. Then we need navigating instruments on a long trip like this. They came high. I could use fifteen hundred dollars."

Alan pulled a little, but he said dog-gedly: "I'll raise it. I'll raise it somehow."

Buzzard was thoughtful for a moment. "Maybe," he said finally, "you won't have to raise it. I'll tell you what, Alan; you give me two hundred, and I'll try to manage the rest of it. You'll need money for your outfit and we'll have to keep some for operating expenses."

Alan nodded, though he did wonder what Buzzard meant by that word "manage."

They went back to the Chateau and waited. At three o'clock the wire came from Victoria.

"The five hundred is accompanying this let me know if need more help," rang forward to seeing you and presumably meeting Mrs. Baker.

"G. I. C. Wire Transfers."

Alan was grateful for the despatch-ely needed money; grateful for the personal warmth of Buzzard's offer to help. But he felt that he had sold his freedom more and fundamental himself.

Stubbornly he forced his mind away from the heavy cost and regrets that tore at him. Putting aside those hateful dollars for operating expenses, he gave Buzzard two hundred and kept two hundred for himself. After arranging to meet out at the field that night, they separated.

At a noon shop Alan stopped and bought the service of Buzzard's fat x-12's of a costly make, they put a and dent in his roll. Further along he managed to purchase two travel outcases, one for his properties and ten dollar extra in lieu of a permit. Then came emergency food for the long trip and the flying togs Buzzard had advised him to get.

He still lacked a folding cases, a number of small items, and one last piece of equipment, the most vital of all his adventures. Down to fifteen dollars, he went into another pawn shop and bought an expensive watch and a diamond heirloom of his mother's, making the owner promise to hold them for six months. Then a hardware store supplied him with a pack-et, and a second-hand Ingersoll which the old gentleman had hastily given up for dead, but which still ticked on.

As he passed a fashion shop, his eyes happened to be caught by an exquisite costume Sachse, a broad cashmere blanket in old Quebec. Thinking of the worn and faded one Joyce owned, he stood admiring this bounty, imagining how rapturous Joyce would be if she had it. She never how to wear it properly with a saucy grace that only the motion girls could match, for the wearing of the bright girdle was an ancient voyageur custom rapidly dying out. . . . Forty precious dollars . . . but worth the price if shed like it a gift from him.

Alan went in. Today he would in and bought the girdle.

Later, through the gathering twilight, he walked to the armory. Two companies were practicing there this evening. By previewing to-ur's arms Edmonton citizen anxious to learn how to drill and perhaps to join the militia, he not only got inside but was shown all around the place by a lieutenant impressed by his stalwart, powerful physique.

The lieutenant was late in his duties, the emphasis went on drilling; the privileged spectators began trickling homeward. When the armory was deserted at eleven, even the guard building was locked up and barricaded. It was Alan Baker who rose up like a thief in the night, out of a dark corner, once in a corner on the ground floor.

Not daring to strike a light, he groped across the parade floor to the rifle racks, and, after some searching, had him the machine guns and explained their use to him, commanding of a machine gun plus through a dozen major battles." He felt around among various types till he laid hands on an old friend, the Browning air-cooled .A.-16. He found plenty of ammunition, a belter tripod, and lastly a tarpaulin to wrap the whole outfit in. Then he started down an Edmonton street with a machine gun over his shoulder he was not likely to get far.

Gathering all his things at the Chateau, he whipped on out to the rendezvous arranged with his new friend pilot.

The hangar and hour in some busy hours too. He had filled up on gas and oil; had attended to several reams and repairs; had managed to get a packchute, new propeller and had a dozen costly flying instruments.

With a couple of mechanics whom he had awakened at an all-night garage, he was busy putting on the new prop.

Vaguely suspicious, Alan took him aside and asked quietly:

"Say, Buzzard, how did you get all this equipment." You've got more than a thousand dollars' worth here, and you only had two hundred."

"Oh, I managed it," Buzzard airily replied. "There's servers, government 'planes here, and they had extra equipment."

"Borrowed it." Temporarily—?"

"Well, stole it."

"Hole it? Government property? Good Lord, man! That's a penitentiary offense. The authorities will send sure catch on to who took it."

"Yes, I expect they will. At least we might watch-man'll be fined several dollars in liquor for him, and he's sleeping it off over behind that hangar. He'll put them next to us."

"Look here, Buzzard, you're mad. Alan, I couldn't get it any other way. We simply had to have it, or give up our trip."

"No, we had to have it." Alan admitted reluctantly. "I guess you did right, Buzzard." But it staggered him that Buzzard had taken the pur-ner were criminals now in the eyes of the law. Their motives would be no excuse. They faced a prison term if they were ever caught. Buzzard was inevitable; soon or late they would have to show up somewhere.

He could not bring himself to reproach Buzzard. He himself had stolen a machine gun, though he had covered his tracks pretty well, and Buzzard after all had done that for his sake. And he felt that this theft was justified, if ever theft could be. With no chance of personal gain, at many cost of their own hard-earned dollars and at risk of their very lives, he and Buzzard were staging themselves against a pack of murderous criminals.

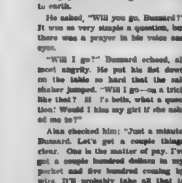
He said: "We'd better be getting away from Edmonton forthwith. At daylight there'll be people here on the field. It'll be our fists if we're not gone."

They donned their flying togs. Buzzard showed Alan how to put on his pack-chute, how to jump clear in case of disaster and jerk the rip-cord. They climbed in and snapped their safety belts.

Revving up to short order, Buzzard flashed the throttle, jumped over the chocks, taxied down the field, and gave it the gun.

Just as the first rosy fingers of dawn were reaching up into the eastern sky, they hopped off, left the sleeping city behind them, and roared away into the North.

(CHAPTER VIII. Coming.)



Pure, wholesome, and economical table Syrup. Delicious in its delicious flavor.

THE CANADA STARCH CO. LIMITED, MONTREAL

HEADACHE
Here's Quick Relief:

Aspirin brings you immediate relief. It acts before you can feel any effect at all from the ailment forms of relief.

Do not hesitate to take Aspirin tablets because of this speed. Their quick action is due to the fact they dissolve immediately They are perfectly safe. They do not depress the heart.

That's the beauty of a remedy like Aspirin. Anyone can take it, as often as there is any need of its comfort. In sufficient quantity to get effective relief. You could take Aspirin every day to the year without ill effects.

When you want relief from headaches, colds, neuralgia, or muscular, periodic pains, the stick to Aspirin. You know what it will do, and you know what you are taking.

The best reckoned price on bottles of 100 tablets leaves no room for experimentation. Get one tablet for relieving pain. Insist on Aspirin.

ASPIRIN

has SPEED!

It's Time That Makes You Feel So Wretched

Wake up your Liver like —No Calomel necessary

For you to feel cheerful and happy, your liver must pour into the bowels each day one pint of bile juice. If this bile is not flowing freely, your food does not digest. It just decays in the bowels. Poisons are absorbed into the blood. Then you feel sick, headachy, constipated, bilious, sour, sluggish, gassy, or roughish! They don't make you sick.

You need Nature's Remedy (Nature Vitalis Pills). They are purely vegetable and act gently on the liver. Ask for and get Carter's Little Liver Pills. Refuse substitutes. 25c. at all druggists.

Little Helps For This Week

"Then shall we know, if we follow on to know the Lord."—Hosea 6:3.

And as the path of duty is made plain, May grace be given that I may walk therein,
Not like the hireling for his selfish gain,
With backward glances and reluctant feet;
Making a merit of his coward dread,
But cheerful in the light around me thrown,
Walking as one to pleasant service led:
Doing God's will as if it were my own,
Yet trusting not in mine, but in His strength alone.
—J. G. Whittier.

It is by doing our duty that we learn to do it. So long as men dispute whether or no a thing is their duty, they never get very much further with it, or very wonkly about doing it, and the face of things alters. They find in themselves strength which they knew not of before, and the obstacles, which it was to them they could not get over, disappear. That which is called considering what is our duty in a particular case, in very often nothing but endeavoring to explain it away. Bishop Butler.

Prince Conducts Band

The Prince of Wales, using a drumstick for a baton, conducted the band in a lively foxtrot at the St. David's Dog dance given by the 1st Battalion of the Welsh Guards, of which he is the Colonel. The Prince's rendition was repeatedly encored until he laughingly told the dancers that conducting was more strenuous than dancing. Later he acted as master of ceremonies, selecting the tunes.

Most Famous Spy-Glass

One Owned By Lord Nelson Recently Sold In London

An auction sale was held in the West-end of London, England, recently and a spy-glass was put up for sale. It brought the equivalent of $7,700 par value. It was not nearly as good as any modern spy-glass costing a few dollars would be, nor was it equipped with Kilometik But it is probably the most famous of his kind in the world.

It was the glass that Nelson held up to his blind eye and said, quite truthfully, that he did not see an overwhelming armada bearing down upon his fleet at Trafalgar.

At the same sale $200 was paid for the silver watch presented to Midshipman Pollard who killed the sharpshooter who mortally wounded the British Admiral.

"Do you know where you are?" demanded the doctor of the patient.

"No," he admitted. "I'm as lost as the average American is when he starts on the third verse of the national anthem."

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Must girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the most critical period in her life. Due to general her health at this critical time. When she is a happy, healthy girl and mother she will thank you.

Cookery Parchment

Cook fish, meat and vegetables in Cusapar. You will be delighted with their new flavor —and no greasy scrape. At dealers or Write—

AN EPITAPH

Here lies a man who saved his all
Put it in when rain and snow should fall;
He knew no pleasure, shared no joy,
And died before the Missouf owns.

A complete printing service at reasonable prices. The Fort Record, Phone 321.

A SWIMMING POOL

By this time our readers will have perused the petition that appeared in last week's issue of the Record regarding the swimming pool proposed to be installed for the benefit of Fort Saskatchewan and surrounding District, with money from the fund known as the "Hospital Pool". The intention is to use only the money collected on the sports day in 1907 to pay the construction of the community swimming pool, which means that the ratepayers will not be taxed, in short, town taxes will not be affected in any way.

In this town we have a need something of this nature. In looking over plans of assessment for the consumer's recreation we find that there are two tennis courts, and a baseball or athletic field. All agree that swimming in the river and adjacent creeks is dangerous, which is borne out by life and fatalities that have occurred, all because there are no bathing facilities. The idea of a swimming pool is an excellent one, and is one of the best schemes tried in town. Besides giving enjoyment to both young and old this project should be a revenue producer as a whole. For example our neighbors from the Country would come in for a swim and then take the children to the movie theatre, which, by the way, is closed at present. They would do a little shopping, and so on, and everything helps.

The question now is, will the money already go towards a hospital as originally intended. Now it will be a long time before we will need a hospital, if ever. Modes of travel have changed since 1907, and we are within a short distance of the hospitals in Edmonton and the one at Lamont. We might ask what will become of the money if it is not used for this noble purpose. It is now lying idle and it might as well be used for the benefit of the town and district, especially the children who possibly have been little or no forms of amusement. As the petition in the Trustees of the fund points out, the construction of a swimming pool is closely allied to the purpose for which the fund was originally intended, inasmuch as it will provide a measure of healthful recreation. No doubt when the managing committee is organized, if everything goes alright, it will see that a good trustworthy man is put in direct charge, at a good remuneration, one who, we suggest might work the whole year around on sporting activities.

Since writing the little article, other schemes concerning the use of the "Fund" has been suggested, which we hope to deal with in the near future.

Townspeople Hold "Farewell Dance" for Ralph Pocock

A "farewell dance" was given by the Fort Senior Hockey team in conjunction with the citizens of the town last Friday evening in honor of Ralph Pocock who is leaving shortly for his home at Cheadle. A large number of friends from town and district crowded the Simmons Hall, enjoyed dancing to the excellent music rendered by the Misses Gertrude Featherstone; one grandson, Arthur Simmons, and one great grandson, Arthur Abram, both of Fort Saskatchewan; one sister, Mrs. D. Simpson of Waskatenau, and three brothers, E. of Camrose, Phillip of Waskatenau, and William of Fort Saskatchewan.

The funeral service was held on Monday afternoon at the United Church, Rev. D. C. Ramsay officiating and interment took place in the Fort Saskatchewan cemetery.

The pallbearers, under Oddfellows were: Messrs. E. Flintoff, S. Dennis, F. Shaw, E. Chesnutt, D. Magor, E. Hallam. Beautiful floral tributes were received from:—The family; Mert and Mary; Mrs. Fred Simmons and family; Mr. and Mrs. Fred Blank, Wilbur, Grace, Bert, Vera, Chrissie, Gertie and Lloyd; Mr. and Mrs. Adam Rippel and family; Sue and Luther, Frank and Gloria, Wilmot and Lelah; Mr. and Mrs. Jos Althoen; Mr. and Mrs. Geo Frey and family; Mr. and Mrs. A. H. Gibson and family; Atkinson Lodge; United Church Ladies' Class, Fort Sask.; The Town Council, Fort Sask.; Princess Rebekah Lodge No. 88, Fort Sask.; I.O.O.F., Fort Lodge No. 14; Canadian Legion; and The Northern Alberta Pioneers and Old Timers association, of which the deceased was a member.

The I.O.O.F. took part in the service at the grave-side, conducted by the Rev. C. Reed, chaplain of the Order.

The deceased was promoted in social and sporting circles. He was good enough to play during the present season, and was principal pitcher for the ball team. He worked on lock-keeper for the Fort Hardware Co., for the last 5 years.

His many friends wish him every success.

WEDDING

One of the charming weddings of the spring season was that of Miss Edith and Miss Esther Thompson, daughters of Mr. and Mrs. J. Thompson of Edmonton, to Mr. Sidney Gates of Highway and Mr. Gordon Lemon, of Fort Saskatchewan, which took place at Dalton Baptist church on Saturday, Rev. Charles Stone officiated.

The two young brides were given away by their father. They were gowned alike in white satin fashioned on long graceful lines Their tulle veils were worn cap fashion, and their flowers were shower bouquets of tulips.

The bridesmaids were Miss Hazel Brackenbury, Miss Evelyn and Miss Irene Hooper. Mr. W. Dennison and Mr. B. Lemon were the groomsmen.

Following the ceremony a reception was held to more than 100 guests.

Mr. and Mrs. Gates will live at Highway and Mr. and Mrs. Lemon will take up their residence at Fort Saskatchewan.

Proposing that the Dominion should not ask the Imperial parliament for amendments to the British North America Act as affecting this province without the consent of the legislature assembly, Colonel F. C. Jamieson, Conservative, Edmonton, will move a resolution to that effect in the house. Colonel Jamieson's resolution, which is seconded by W. E. Payne, K. C.

Proving the "scrip" idea, now being used in many American cities is an old one, an Edmonton man showed a Hudson's Bay Company scrip note, signed at London May 6th, 1858. Although more than 100 years old, the note can be cashed today for its face value of $2.

Death of Highly Esteemed Fort Old-Timer

Peter Davis Simmons one of the towns real old-timers, passed away at his home on March 24, aged 73 years

Coming from Parry Sound, Ontario, in 1885, he has lived in the Fort district with the exception of three years, when he resided at Wetaskiwin.

He is survived by his wife, one daughter, Miss Simmons of Fort Saskatchewan; one grandson, Arthur Simmons, and one great grandson, Arthur Abram, both of Fort Saskatchewan; one sister, Mrs. D. Simpson of Waskatenau, and three brothers, E. of Camrose, Phillip of Waskatenau, and William of Fort Saskatchewan.

The funeral service was held on Monday afternoon at the United Church, Rev. D. C. Ramsay officiating and interment took place in the Fort Saskatchewan cemetery.

The pallbearers, under Oddfellows were: Messrs. E. Flintoff, S. Dennis, F. Shaw, E. Chesnutt, D. Magor, E. Hallam. Beautiful floral tributes were received from:—The family; Mert and Mary; Mrs. Fred Simmons and family; Mr. and Mrs. Fred Blank, Wilbur, Grace, Bert, Vera, Chrissie, Gertie and Lloyd; Mr. and Mrs. Adam Rippel and family; Sue and Luther, Frank and Gloria, Wilmot and Lelah; Mr. and Mrs. Jos Althoen; Mr. and Mrs. Geo Frey and family; Mr. and Mrs. A. H. Gibson and family; Atkinson Lodge; United Church Ladies' Class, Fort Sask.; The Town Council, Fort Sask.; Princess Rebekah Lodge No. 88, Fort Sask.; I.O.O.F., Fort Lodge No. 14; Canadian Legion; and The Northern Alberta Pioneers and Old Timers association, of which the deceased was a member.

The I.O.O.F. took part in the service at the grave-side, conducted by the Rev. C. Reed, chaplain of the Order.

The deceased was promoted in social and sporting circles. He was good enough to play during the present season, and was principal pitcher for the ball team. He worked on lock-keeper for the Fort Hardware Co., for the last 5 years.

His many friends wish him every success.

DIED

MRS. FRANCES M. STUCKEY

Frances M. Stuckey, beloved wife of Frank G. Stuckey of Fort Saskatchewan, passed away at Fort Saskatchewan on March 20th, aged 55 years. She is survived by her husband, two sons, George T. and Roy W., both of Fort Saskatchewan, one daughter, Mrs. Albert Cameron of Vancouver, B.C.; her mother, Mrs. Sarah Hanlan of Fort Saskatchewan; three sisters, Mrs. William McAmond of Calgary, Mrs. Alf. Ottewell and Mrs. W. H. Clark, both of Bremner, Alberta, and one brother, William J. Hanlan of Lloydminster. The funeral service was held on Wednesday afternoon at 2:30 o'clock at St. George's Anglican Church, Fort Saskatchewan. Rev. Christopher Reed officiated and interment took place in the Fort Saskatchewan cemetery. Howard & McBride, funeral service.

A.A.A. Meeting

The March meeting of the Girls' A.A.A. was held on March 16th, at the home of Mrs. Jack Westover, when Miss E. White assisted as hostess.

It was decided unanimously to continue the purchasing of the milk until April 12th.

After discussion, it was definitely decided to have a gingham dress dance on May 5th, but further arrangements were to be made at the next meeting.

After the adjournment of the business meeting, the remainder of the evening was spent at bridge. Honors going to Miss H. Carmichael.

The girl who hesitates may not be lost, but she is apt to become an old maid.

Josephburg News

The Junior U. F. A. held their regular meeting at the home of Mr. and Mrs. E. Mann on Saturday, March 25th.

The President S. R. Rippel occupied the chair and roll call was answered by a favorite song.

The minutes of the previous meeting were read and adopted.

The next regular meeting will be held at the home of Mr and Mrs. P. S. Mohr on April 8th, as the form of a grain judging competition.

The roll call is to be answered by a favorite name.

A lengthy discussion was held on the subject of "Junior Conference Work."

After the business was completed the party indulged in Jig-Saw puzzles, with a dainty lunch served by the hostess bringing this enjoyable evening to a close.

The Junior U. F. A. will present a three act Comedy-Farce "SAFETY FIRST" at Josephburg School on FRIDAY, MARCH 31st. It will also be presented in the EMPRESS THEATRE on FRIDAY, APRIL 7th. at 8 p.m.

YPRES VALLEY

The Ypres Valley Baseball Club will hold their annual meeting in the school on Saturday, April 1st, at 2:30 p.m. All interested please attend.

We are glad to have Mr. D. O'Gorman home again from the hospital. Also Mrs. O'Gorman and baby daughter.

Miss Margaret White and Miss Bessie Gunn were week-end visitors at Spruce Grove.

The Young People's Club held a meeting last Tuesday in the school in the form of a basket roast.

The ladies aid entertained the cast and their friends of the Play "He's My Pal", at a social evening last Wednesday night in the school. Contests and games were enjoyed by all. This was followed by a scrumptious lunch, topped off with ice cream. The younger folks enjoyed a couple of hours at dancing.

Miss N. Lemke of Three Hills, Alberta, who has been visiting her sister, Miss L. Lemke returned home last Friday.

The warm sun of the past few days have taken considerable snow away, but roads are practically impassable.

Entries To World's Grain Show From Great Britain

Great Britain is well represented in the competitive classes of the World's Grain Exhibition and Conference which opens at Regina (Canada) next July.

The districts from which twenty entries from England come are London Kent, Worcestershire, Yorkshire, and Lincolnshire.

Scotland is represented by 18 entries from Aberdeen. West Lothian and Kincardineshire.

From Northern Ireland in addition to oats are two entries of new flax seed for fibre developed by the government station.

SIX BIRD SANCTUARIES ARE MAINTAINED BY ALBERTA

There are six provincial bird sanctuaries in Alberta with an area of 964 square miles. These sanctuaries are fully maintained by the province, having been taken over when Alberta acquired rights to its natural resources from the Federal government. In addition there are five small sanctuaries that are maintained by cities and private citizens, according to the Fish and Game Department of the Canadian National Railways. Alberta has 32 public shooting areas with a total of 32,000 square miles.

A Great Opportunity.

In articles written for this column a studious effort is made to avoid subjects of a part ans political character, because we are not concerned with the fate of political parties, as such, but only with the effect which the adoption or rejection of any given policy may have upon the welfare of the industry and people as a whole. For this reason, and no other, to avoid even an appearance of partisanship, discussion of certain subjects which undoubtedly are in the public interest, but which, unfortunately, have become involved in party controversy, are not even undertaken. The aim of this column has been, and will continue to be, to present information, logically and fairly interpreted, and leave it to the reader to reach his or her own conclusions.

One subject which has, therefore, been more or less taboo in this column is Customs Tariffs, their effect on prices, on the trade and commerce of this country, on both industrial and national development, and international relationships in general. That taboo on the wide subject of Tariffs still remains in force (applied another subject divided on this question, but there is one particular aspect of the Tariff and Trade question which, within recent weeks, has been lifted out of the realm of partisan controversy so far as Canada is concerned, furthermore is to the subject of reciprocity with the United States.

All political parties in Canada are now definitely committed to the policy of entering into favourable trade relations with our great neighbor to the south, and, most happily, the present Administration in the United States is also favourable. It would appear, therefore, that the only obstacle which interests in both countries are allowed to unduly influence the probable course of events, a new chapter in the trade relations of these two good neighbors will shortly be written.

After all, it will not in reality be the writing of a new chapter, but the re-opening after a long interval of the book at an old chapter, and a revision of that chapter in the light of present day developments in trade. Reciprocity did mutual many years ago between Canada and the United States, and it was admittedly advantageous to both countries. Why, then, was it abrogated? The Encyclopaedia Britannica gives the reason in these words:

"A heritage of differences and difficulties had been left by settled between England, Canada and the American Union as the result of the Civil War. In retaliation for the supposed sympathy of Canadians with the South in the struggle, the victorious North took steps to abrogate in 1866 the reciprocity treaty of 1854, which had conferred such great advantages on both countries."

Whatever the differences and difficulties and ill-feelings and suspicions which were engendered by the American Civil War, they have long since passed away. They no longer stand as a stumbling block to the development of the freest and largest possible exchange of trade between these two countries, each of which is the natural market of the other.

Now with the situation in Canada being that any Government in power at Ottawa, whether Conservative, Liberal, C.C.F., or a coalition of any two or all three parties, would be committed by their party declarations to the negotiation of a reciprocal trade agreement, and with the Government of the administration, supported by an overwhelming majority in both Houses of Congress, equally favourable, the time would appear to be most opportune for the reattendant of the arranged possible public opinion in favour of the early negotiation of such a policy on a comprehensive scale, and covering the widest possible range of commodities.

According to Henry Chalmers, of Washington, chief of the Foreign Tariff Division of the United States Department of Commerce, "the Government is working "full tilt" on a reciprocal tariff programme." Even before the Hoover Administration retired from office the Government tariff experts had been put to work on a reciprocal tariff programme, said Mr. Chalmers, in order to help "the Roosevelt Administration get a "flying start."

Mr. Roosevelt's Secretary of Commerce, Daniel C. Roper, openly advocates a United States tariff policy "of common sense and reasonable dealings with other nations." He says: "For too many years we have, as a nation, been formed in our proclamations of a desire to foster our international trade, while at the same time we have actually been doing our best to place in its path almost insurmountable obstacles. There can be no question as to tariff policies. But I believe that an overwhelming majority of the American people have unmistakably shown that they are tired of a policy that has antagonized every nation in the world, and resulted in cutting down our foreign commerce, he said, adding that no nation could successfully market its own goods if it persisted in refusing to admit a reasonable volume of the products of other countries.

Let it be repeated, therefore, that here with partisan differences in Canada having been thrown into the discard on this question, is the time for the people of this country to unite in the development of a great sentiment in favor of a far-reaching reciprocal trade agreement with the United States, and the consummation of a united front in order that our great national market to the south may be re-opened to which to sell our primary products, and freedom in buying across the line be accorded to our people in the case of many things which the United States can supply more economically than the stranglehold of cavalier, and more economically than any other country.

Italy will spend $28,000,000 on aviation in the next year.

"Civilization is the history of revolution in the next year."

Serves—Could Not Sleep Tired Out All The Time

Mrs. George Dodson, Hemphpstead, N.S., writes: "I was so run down I could not sleep at night, and felt tired out all the time.

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them at the time she gave me some to try. I found they were doing me so much good I continued to use them and they proved a wonderful help to me."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Factory-made Cottages in "Garden Cities"

Dwellings to Be Equipped With Conveniences Other Homes Will Not

Factory-made cottages that can be put up in a day have become popular in Sweden and Finland. It is alleged with little "garden cities."

The workmen who lives of apartment type can order a new home on Monday and have his girl to see the curtains and lay the rugs a few days later.

The "garden cities" are part of a communal building program, designed to provide low rents for wage earners, to which the city government has in the last two years extended its financial assistance and is nearly completed. Each house, or cottage, contains six rooms of the most modern conveniences and is nearly surrounded by a garden.

The program was instituted after the World War when there was a great shortage of houses and of industrial development. The government bought up large country estates, and these are parceled out on long leases.

The person who decides to build a cottage can have 90 per cent. of the cost financed by the government. The interest charges on this money pay for road development, gas, water and sewer mains. For a modern cottage, with light, heat, a kitchen and full basement, the dweller pays about $60 a year or $500 a year.

Like Buckingham Palace

King and Queen Fond Of Quiet Spacious Gardens

While some of the younger members of the royal family dislike Buckingham Palace, the King and Queen are fond of it. They love the quiet, spacious gardens where they can wander and read and work. Queen Alexandra was most reluctant to leave the Palace and return to Marlborough House after the death of King Edward. Prince George left the house, but he refused to be disliked it, but because he wanted to join the Prince of Wales, his favorite brother.

SAVED IMPORTED DRESS

"After a little worrying, a lovely green cloth dress imported from last color so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. On hearing the reason, she advised dyeing it and recommended Diamond Dyes. To make a long story short, it turned out beautifully. I have a lovely new dress that really cost just 15c the price of the package of Diamond Dyes.

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They seem to be made so they always go on smoothly and evenly. They never spot, streak or run. I thoroughly know the things I dye with Diamond Dyes are reliyed on."—Mrs. R.P., Quebec.

Property Of the King

Many Important Thoroughfares In London Belong To Crown

Choice residential districts and splendid agricultural estates are listed among the holdings of the Crown Lands Commission, which controls the estates now owned by the Kings of England personally in London the crown owns virtually all the modern shopping centre in the West End, Regent Street, and the broad boulevard called the Mall which leads to Buckingham Palace. Much adjacent property, too, belongs to the crown, besides many other important thoroughfares, including the Strand and Kingsway. The total of the crown estates in England amount to more than 100,000 acres. Revenues amounts to nearly $9,500,000 annually, from which $1,500,000 goes to the King's Privy Purse, amounting to about $1,000,000 is left.

Using Aviation Skills

Fire-fighters in Germany are using aviation skills to protect them from the terrible heat of modern conflagrations so that they may approach nearer the blaze and fight it more effectively. One pair of firemen in Berlin is shaped like a big umbrella and is opened and closed.

"Pierre Salter: "Stonehenge, eh?" Absent-minded Gent: "Yes, you're right, it does."

ROYAL YEAST CAKE

Coffee Cake

A Real Treat!

COFFEE CAKE—equally popular for tea, luncheon or supper . . .

Dissolve together 1/2 c. butter and 1/2 c. sugar, add 1 unbeaten egg and 1/2 c. milk. Add this mixture with about 2 c. flour and 1/2 tsp. salt to 1 c. Royal Yeast Sponge* to make a soft dough. Knead lightly and place in greased bowl. Cover and set to rise.

Roll 1 Royal Yeast Cake in 1/4 c. sugar. Add to dough with 1/2 c. seedless raisins, 1/2 c. citron, 1 tsp. vanilla and 1/2 tsp. each of cinnamon and nutmeg. Add 1/2 c. flour and 1/2 c. sugar. Cover and set to rise again until double in bulk. Bake in greased pan 40 minutes in moderate oven.

*SPONGE: 1 cake Royal Yeast dissolved in 1 pint lukewarm water, 2 tbsp. sugar, 2 tbsp. flour. Beat well. Cover and let rise overnight.

BE SURE to keep a supply of Royal Yeast Cakes on hand to use when you bake at home. Soaked in air-tight sealed paper, they stay fresh for months. These luncheon dry yeast cakes have been the standard for over 30 years. And send for our free copy of the ROYAL YEAST BAKE BOOK—gives 33 tested recipes. Address: Health Library, The E. W. Gillett Company Limited, Toronto, Ont.

Single Men For Air Force

Australian Government Prefers Them For Several Reasons

The Federal Government of Australia wants its air force personnel composed of young, unmarried men, and the reasons are psychological and commercial.

It is pointed out that the experience has been that single men are likely to accept the hazards of aviation with less misgiving than men who are under the responsibility of supporting wife and family. For that reason particularly, it is believed the single men display more nerve and are likely to make a better record where desperate risks must be accepted.

The other consideration is that dependents of married men have claims for compensation in the case of death or injury of the married airman and Australia's finances are not such as to justify extra outlay.

"Buy British" Campaign Should Be Modified

Originator Of Movement Thinks It Has Gone Far Enough

"Buy British," the campaign that was expected to bring about a revival of British manufacturing by turning purchasers away from foreign goods to home products, is now boosted by one of its most powerful advocates.

Sir Edward Crowe, Chancellor of the Department of Overseas Trade, writes in an address: "I think probably the 'Buy British' campaign has gone far enough. We want to buy American goods and we want America to buy British goods." His remarks were made to a gathering of American and British business men.

Sir Edward confessed he had been an originator of the movement but now would modify. It was set on foot by the Empire Marketing Board, of which he is a member.

World's Poultry Congress

The first World's Poultry Congress was held in the Netherlands in 1921; the second in Spain in 1924; the third in Canada in 1927, and the fourth in the United States in 1930. The fifth will be held in Rome, in September, to which Canada will send a fine contingent of Canadian birds through the Dominion Department of Agriculture.

"I want you to grow up straight, every inch a man," said the king to his son, "so that you'll make a good ruler."

Wheat Export Prospects

Canada Expected To Greatly Improve Her Position During Coming Year

Canada will in all probability greatly improve her wheat export position in 1932-33, as compared with the previous year, the monthly review of the wheat situation, issued by the department of trade and commerce, says. Scarcity of wheat in Russia and partial failure of the Danube crop are given as grounds for this prediction

In the present crop year to date, Russian and Danubian shipments have amounted to only 19,000,000 bushels, with the prospect that no more than an additional 5,500,000 bushels will be shipped to the end of July, 1932. This would reduce of the non-European wheat-producing countries an export of about 640,000,000 bushels for the whole crop year, or about the same as in the preceding year.

The report estimates the new Australian crop at 200,000,000 bushels, with a surplus of 150,000,000 bushels for current export. Of this, 101,000,000 bushels has already been exported.

Argentine's estimate is 250,000,000 bushels, leaving 136,000,000 bushels for current export. Of that a total of 87,000,000 bushels has still to be exported.

Canada's Mineral Production

"Canada's mining industry, being depressed as it is by world conditions, still remains one of the brightest spots in our industrial life," stated Dr. Charles Camsell, Deputy Minister of Mines, in his address before the Canadian Canadian Society in convention at Ottawa recently. He stated that the value of Canadian mineral production in 1932 was over $180,000,000, it provided employment for over 60,000 workmen, with a total pay roll of over $90,000,000.

for COLDS & SORES

MINARD'S KING OF PAIN LINIMENT

One Of the Contributory Causes Of the Present Crisis is That People Do Not Love the Land

Few thinkers by the cause of the present crisis on any one thing and although there is some disagreement to emphasis, most people include the following as the major reasons of the world's travail in the realm of politics, the war debts, excessive governmental expenditure, international commercial partisyns due to high tariff barriers, in the realm of economics, over capitalization, over concentration of spending power, over production, and in the realm of sociology machine, individual extravagance

There is not now, and perhaps there never will be, complete harmony over the order of importance of these causes. We even wonder how pertinent is their application to this continent With the exception of the War debt, and the latter item, the causes of the present "depression" are the word guarded-ly as listed above are to a large degree localized That is to say, they are not in North America and their influence is felt within its confines. This realization is challenging, for it forces a decision as to the causes of the existing economic and social turmoil.

Perhaps no astute investigator would not for long miss the profoundly disturbing psychological basis of the present conditions. North American are restless peoples As a racial group, they are not endeared to the land. It is true that no single industry is so universally great as that which derives its living from the soil, and that therefore the charge of rootlessness seems to be entirely unwarranted, but the tragic emphasis is that these people do not love the land. Rather, they wrest their livelihood from it; they take and take and take from the land, and they hate that which they loot.

The broad implication is that this is a condition that has arisen with the love – perhaps it is too shortly settled – since its soil is not loved. And destroying its wide reaches is a multitude of clacking lines, the Main Streets, with their restless resentful broods. Distorted instincts have made these towns unlovely and unlovable. The roots of most of their peoples have not penetrated the cement streets to the good earth below; humanity and the soil have not met.

This condition has held for several decades now. Youth, brought up on the farm, yearns for the city, and is swallowed up in its clashing machinery. And as the loaded cinema lush continues to pour forth from a mere idle rooting of forces in the staff from country to town. And now the continent seems to be paying a twice-extracted retribution for its superficiality.

Man should not merely conquer the land, he should also win it. And that is where North America has so far failed. The hoisted load, by creating a distorted, resentful, warring psychology in the hearts of its hosters, is wreaking a subtle vengeance that may yet be more terrible than anyone can conceive.—Winnipeg Free Press.

An Enviable Position

British Consul Complains Of People Importing To Path

Walter Lippman, writing in New York Herald-Tribune says: "Why is it that Britain is comparatively better placed at the moment than so many other nations? Is it because her fundamental difficulties are smaller? Not at all. The financial difficulties of Britain are real ones. But what Britain has lost is the confidence of a disciplined people, of a people politically competent that they are imperious to panic. In the past few months the American people have gradually had it brought home to them that the ordinary happy-go-lucky methods of each for himself, each Senator, each faction, each state, each section, each privileged group for itself, may be all very well in easy times, but in the midst of a crisis they are impossible as in time of war."

Use Canadian Wheat

Heavy Shipments Have Been Going Forward To United Kingdom

Canada continues to find a large market for wheat in the United Kingdom, according to the monthly review of the wheat situation by the Dominion Bureau of Statistics During the seven months from August to February, the United Kingdom imported from Canada 70 per cent of the total amount Canada's supplied about 16 per cent bushels or 89 per cent.

These figures indicate that during the present crop year British mills have been using an exceptionally high percentage of Canadian wheat

Washing Newspaper Ruins Fabrics

Jay-Ray

(By Ruth Regres)

575

A SMART MODEL WITH CERTAIN VERSATILITY REGARDING MATERIALS

It's unbelievably simple to fashion this model, because it is easy to begin, yet now and attractive to effect. The bodice is cut with kimono sleeves. All you've to do is to join the sleeves to the bodice. Inverted plaits form the skirt. The skirt has length-giving panels at the front.

As for materials for this charming model, it only remains for wool crepe to be mentioned.

For street, it is lovely in navy blue crinkly crepe with a white crepe silk scarf collar.

Very elegant and cool for spring and later wear is to make it with short sleeves of a crepe silk print with plain tuning crepe trim.

It's sporty with short sleeves of grey rabbit's hair woolen with pullover crepe silk scarf collar.

Style No. 575 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust

Size 16 requires 3¼ yards 39-inch, with ¼ yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Figures Are Interesting

Land Census Shows More Widows Than Widowers In Canada

Canada has more widows than widowers At the 1931 census the Dominion Bureau of Statistics reports, it was discovered there were 288 641 women who had lost their husbands and only 119 854 men who had lost their wives.

There were 3,119 644 single males and 2,771,936 single females 2,023,240 married males and 1,937,856 married females.

There were 5,641 divorced persons in Canada during census of 1931, of whom 1,041 were men and 4,600 women The divorced husbands formed 08 per cent of the male population and the divorced wives .91 per cent of the female population.

Divorced husbands in 1921 formed 06 per cent of the male population, exactly the same as in 1931 but divorced wives in 1921 formed .80 of the female population so that percent to population there were fewer divorced wives in 1931.

Certified Seed Potatoes

Official Tags Constitute Guarantee To the Public

Canadian certified seed potatoes are known as the finest seed in the world but nevertheless many people have a hazy idea of what is implied by the word "Certified" There need be no doubt as to the world's true signals save for the Dominion Department of Agriculture, and have been found vigorous and to conform to the standards set of freedom from serious diseases and of purity of variety, they may be certified. Official tags are issued for each bushel certified and these tags constitute the guarantee that Canadian certified seed potatoes are being used.

Professor Einstein announces that up to now he has been unable to find a connecting the Quanium theory with the Relativity theory. All of us will therefore have to be content with perfectly understanding each theory separately, as we now do.

A new type of safety glass that eliminates eye strain has been developed for motor vehicles. Reflections from rain, snow and bright surfaces of highways are filtered out by the new glass.

Planning To Establish A Well-Founded Town Worthy Of Western Canada's Sea Port

There will be an "bubble" boom for the Port of Churchill. Nothing that will glisten temporarily with optimistic opportunities only to crash from the lack of constructive solidment.

Prepared to throw open the townsite to public occupation this spring, Manitoba Government officials, administrators of the inland port, just entering its second actual year, are pinching to prevent any undesired rush to Churchill They want to establish a well-founded town worthy of Western Canada's outlet to the sea.

Meanwhile, directors of the town and port are optimistic People in 1,000 parts of the world are interested in the future of the rugged little settlement across the river from the scattered pile of rock that once was historic Churchill Hundreds of replies have been received to circulars sent out by the Department announcing that the townsite would be open for settlement.

Numerous applications for permission to establish various business enterprises have been received by H. W. Gyles, director of lands, who has charge of development work. Many have requested further information regarding business and shipping possibilities before deciding to make application.

If all applications were granted by the Department and construction were to begin at the spring opening, the summer would find a remarkable sight at the rock-bound mouth of Churchill River.

There would be a business district capable of catering to the citizenry of a small city. In applications submitted, permission is sought to build 32 hotels, 25 cafes, 25 stores, 30 warehouses, 26 offices, 20 public buildings (churches, Government offices, banks and libraries) and 30 shops (laundry, barber, printing, etc.); also 176 general enquiries regarding possibility of residential development.

Some applications, Mr. Gyles said, came from England, many from the United States.

If the port proves its worth, in the opinion of the director, there will be no difficulty in leasing space in the town, which has been surveyed and drawn into districts to provide for an ultimate population of from 5,000 to 6,000 persons. Present development, however, provides for population of only from 600 to 1,000.

The population would be great enough, Mr Gyles believes, to fill their plan for "slow and sure" development. It is going to be a "long, slow" task, he concedes, but he is confident of Sir Robert Peagle and Hudson who come to the port or establish business agencies are aware of the length of time it will require to give the new city a fair test.

The Government wants the town development founded on a basis so sturdy on the rocky townsite itself Though restrictions on passenger and freight traffic has been lifted officials will still watch closely the incoming population. No "overnight" businesses are wanted, and directors have notified all interested parties that leases on all properties here will be for 50 years, with possible revisions in rental every five years.

The picturesque site dominated by the towering white grain elevator, emissary of the port, is divided into well planned avenues and squares. There are also reserved such industrial use some historical character such as Hudson, Selkirk, Raddison, Grenfell-fors, La Verandrye and Franklin, with from 30 to 50 lots on each. Rental of these will range from $35 to $140 annually.

Already there exists a possibility of sufficient industries to build up the town population. Warehouses, shipping branches and commercial refinery and a rendering plant are rumored, but to avoid arousing any false hopes officials are reticent to discuss what may materialize.

With opening of navigation in Hudson's Bay the port will burst into activity The big elevator is planned to capacity with 7,500,000 bushels of Western Canadian wheat, which inspectors have just reported in excellent condition. The fur business will center, they said, but no ill effect on the grain, stored there last fall before water called a temporary halt to transportation over the Hudson's Bay Railway.

Movement of grain should start again immediately the elevator is cleared and officials expect this summer will find a shopping fleilin regularly carrying grain from Churchill to United Kingdom and other European countries. And in the interim a campaign is being waged among Western Canadian concerns in support of the movement to make importations through Churchill as vessels will not be delayed in travel to the northern port as hitherto.

Revising World Trade

Radical Change In Regard To Tariffs Only Possible Way

If there is to be an international economic system, and if world trade is to revive there must be a much freer exchange of goods generally than exists at present Unless the Economic Conference is able to achieve this, neither the gold standard nor any other international standard, will succeed in fix the exchange rates between different countries can be permanently maintained. In other words, before we attempt to re-establish order in the setting up an international monetary system, we must make it a condition that merely that the war debts are reduced in a harmless proportion, but that there is a radical change in the present situation as regards tariffs and trade restrictions.—Walter Layton in London News-Ch.onicle.

Should Be Fully Ripe

Bananas, just like any fruit, if eaten raw should be fully ripe. All suggestion of green at the tips should have disappeared and the skin be a deep yellow slightly speckled with brown In this condition the flavor is distinctly mellow and the fruit easily digestible For cooking purposes the slightly green fruit may be used with safety.

The British food control is watching closely the effect on consumption of present and future restrictions of meat imports.

The starfish has one set of eyes on each of its five arms.

Do You Know?

—Photograph Canadian Pictorial Bulletin

TODAY when a Pacific Coast Indian dies the grave is enclosed within a fence or a structure is built over it? While the canoes are placed the tools and weapons of the brave; the household utensils of the squaw or the toys of the child according to the age and sex of the occupant of the grave so that the spirit may not notice the "Happy Hunting Ground" unprepared. The photograph shows an Indian grave near Hazleton in northern British Columbia.

Prince Converses In Spanish

Explained Treasures In Windsor Castle To Argentine Official Mission

The Prince of Wales and Prince George acted as guides to members of the Argentine official mission during their visit to Windsor Castle. The party first inspected Eton College and then motored to the castle, where two hours were spent seeing St. George's Chapel, the State and private apartments, and the royal library. The Prince of Wales, who spoke in Spanish, explained in detail the treasures which he showed the visitors.

Making Name As Architect

Work Of British President's Son Shows Great Originality

Alister MacDonald, son of the Prime Minister, is rapidly making a name for himself as an architect, and at least one distinctive picture house in the North hears witness to his originality. His latest work is a modern cinema theatre which he has designed, a novel idea being that each row contains only six seats, which obviates the annoying crushing to allow late arrivals to reach their seats.

SEVERAL ARE THE SCHEMES LOVELY FOR THIS CUTE JACKET DRESS

Here's a darling red and white crepe model with which a matching sleeveless jacket to complete it.

The jacket has a capelet shoulder over an ascot.

Sew down the sleeve side-line types. Reversed pleats at the front provide an interesting swing to the skirt. Buttons are a clever finishing touch of the chic.

You can copy it exactly at just the cost of the materials.

Style No. 631 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 bust.

Size 16 requires 2¼ yards 39-inch for dress, with ¼ yard 39-inch for jacket.

For cruise wear, it's effective with the sleeves omitted from the dress. Carry it out in white linen and contrasting batiste crepe silk.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Alberta Government Warns Frank Residents

Recurrence Of 1903 Rock Slide May Cause Any Time

Although they have been warned that Turtle Mountain - again is an ugly mood, villagers of Frank, Alberta, west of Lethbridge in the Crow's Nest Pass, are not moving. They are clinging to their cottages and belongings as they cannot believe the mountain that slid in 1903 will repeat the horror. Yet shortly the province grew under and the danger to life and property increases.

Rock slides may occur at any time especially are they likely in the spring and the Alberta government has sounded a warning.

The main transcontinental highway passes through the ruins of the slide of 1903, when a mass of 50 persons were buried alive. Millions of tons of rock and earth swept in an avalanche across the valley. Tourists and travellers it is being urgently asked that the road be changed to a route through Blairmore. The Appeals are going forward in the government along these lines.

Old timers can now recalling the French slide Sunday of April 29, 1903. Early in the morning and without the slightest warning, Turtle Mountain, rising 5,147 feet above the mining village, was torn asunder and a hundred millions of tons of debris fell with a thundering roar over the settlement of the white occurred. Whole families were wiped out, others lost some of their members. For years this event was remembered with little flickered. Rocks have been moved and in those excavations the bodies of some of the victims have been discovered.

Gardens At Fort Resolution

Many Crops Successfully Cultivated For North Of Edmonton

Good gardens were again grown in 1932 at Resolution, on Great Slave Lake, 330 miles north of Edmonton, according to Dr. C. A. Bourget, M.D., the Indian agent at that point. In most of his own garden he could water with the help of an engine, and consequently had 13b bags of potatoes, against 150 the year previous. Unwatered gardens seem to have suffered, as they did at Hay River and Providence, further west. Simpson, still further west, had a bumper crop. Good onions and celery were among the doctor's 1932 achievements. He planted no tomatoes, but the corporal of the Royal Canadian Mounted Police and another gardener had enjoyable crops of both. Wheat and the Ohaka season had green ones by the tabful, ripening some indoors. All various points Dr. Bourget finds a few of his Indians planting potatoes and vegetables, and surprising results are obtained.

A jungle-born tiger or lion, if caught young, is easier to train than one bred in captivity.

Traffic policemen of Rome, Italy, received showers of gifts from automobile on recent gift days.

HOUSE UNITED IN ENDORSING PENSIONS BILL

Ottawa, Ont The government and the opposition united in expressing approv ation for the work of the parliamentary committee on pensions when the bill to amend the pensions act was before the House of Commons in committee. The bill is to give legislative effect to the recommendations of the pensions committee decided upon after a lengthy enquiry into the claims of organizations of returned men for more generous treatment The bill passed the committee stage quickly, and was then given third reading It now goes [illegible]

When he arose to explain the bill Hon. Dr J. H King, Minister of Pensions and National Health, paused the work of the committee He felt that not only would the returned men, but all the people of Canada, be pleased with the work which had been accomplished and highly appreciative of the untiring efforts of his colleagues of the committee The report of the committee had been unanimous

The bill revises the machinery for dealing with appeals of soldiers from the pensions board. It provides a veterans bureau to prepare the cases for soldiers. An important change gives a veteran the advantage when there is a reasonable doubt as to whether his incapacity was due to [illegible]

Congratulating the committee on the patient consideration and expert knowledge brought to this important question, Hon. R. B. Bennett said its [illegible] was unanimous in the hearts of the nation. The committee was composed of men with first hand experience of soldiers' problems. He especially praised the chairman, C. G Power (Liberal, Quebec South)

No difference of opinion existed among Canadian people, the Conservative leader declared, as to the pensions problem. They wanted a measure of generous compensation to all those who had risked their lives for this country It assured the returned man the country was behind him, said Mr Bennett

There was nothing partisan in the bill or in the methods by which the committee had worked.

Will Arrange Rating

Boy Scouts To Be Brought Under Crown' Next Agreement

Ottawa. Hon T A. Crerar, Minister of Railways, stated that it is the policy of the Federal Government to enforce Crow's Nest Pass rates on the Hudson Bay Railway. The railway will be in operation one year hence, and Mr. Crerar said that he proposed to take immediate steps to discover what the legal position is He will consult with the railway commission and find out exactly if Crow's Nest Pass rates automatically apply to the new route If not, he will initiate action to bring the Bay route under the Crow's Nest agreement.

Canadian Minister Selected

House Of Hanford MacNider, Iowa, Submitted To Government

Washington, D.C.— Hanford MacNider, of Iowa, has been selected by President Hoover as Minister to Canada.

His name has been submitted to the Canadian government and a favorable reply is expected shortly.

MacNider is a former assistant secretary of war, and a former national commander of the American Legion. His home is at Mason City.

Sky Ice Not Shipped

Brandon, Man.—Two cars of eggs of the Manitoba Co-operative Poultry Association were shipped to Montreal under the dry ice test. This means insulated containers are placed in the cars and that circulating cannon breaks gas produces the eggs.

Hannen's Successor

Oslo, Norway — Prof. H. U. Sverdrup, of Bergen, Norway, has been named to succeed the late Dr. Fridtjof Hansen, explorer, as leader of the proposed Graf Zeppelin Arctic flight.

Considering Reverse "Rhodes Scholarships"

Would Permit English Boys To Attend Canadian Universities

Toronto Ont. — Sir Robert Falconer, president of the University of Toronto, is a member of the committee of a reverse "Rhodes Scholarship" is being considered by a committee of educationists to permit English boys to attend Canadian universities

Dr Cyril Norwood, chairman of the party of English schoolmasters which recently visited Canada, strongly advocated such an exchange of students, stressing his wish to see English boys specialize in economics and science In praising the idea, Chancellor H. P Whidden, of McMaster University, said, "I consider the point by Dr Norwood, that Canada offers opportunities in the scientific and economic fields to well taken. One would hardly expect English students to study classics here when such excellent facilities are offered at Oxford."

Gen. C. H. Mitchell, dean of the faculty of applied science of the University of Toronto, said the exchange scheme of "Reverse Scholarships" practical and feasible.

Conciliation Board To Settle Dispute

Brothers At Vancouver Wish Albert Dunn In Renewed Agreement

Ottawa, Ont.—A labor dispute involving 1,100 waster front workers in Vancouver district is to be settled by a board of conciliation under the Industrial Disputes Investigation Act, Hon. Hugh Guthrie, Minister of Labor, announced. The parties involved are the Shipping Federation of Canada, Limited, and the Dunn Brothers employees who are members of the Vancouver and District Waterfront Workers' Association.

The men wish the renewal of the agreement with the employers covering wages and working conditions which expired November 30, 1929, with certain alterations. Two members of the board of conciliation have already been appointed: R. B. Pirie, of Vancouver, on the recommendation of the employees, and J. E. Hall on the recommendation of the employers.

Mr. Heenan is awaiting word from these two board members before the selection of a third member who will act as chairman.

Change Will Assist Trade

Canadian Tariff Given Many Advantages To British Manufacturer

London, Eng.— Sir Percy W. B. Smith, parliamentary secretary of the Board of Trade, said in the House of Commons, the changes in the Canadian tariff would enable Britishers operations to a great many sections of the export trade of British Empire. Every effort was being made to assist manufacturers and traders to take advantage of their new opportunities, he said. While the department of overseas trade believed no practical purpose could be served by such a conference it would be glad to adopt the proposals of particular groups if they felt that consultation would be useful, he concluded.

Saskatoon Cadets Victors

Win Junior Shield In Dominion Rifle Shoot

Ottawa, Ont.—A youthful team of cadets of Nutana Collegiate Institute, Saskatoon, Sask., won the junior shield in the winter cadet dominion indoor series held throughout Canada under the auspices of the Dominion of Canada Rifle Association. A report issued from headquarters of the association shows the Saskatoon cadets compiled a high average of 97.11 out of a possible 100. The Quebec Seminary team won the senior cadet shield with a shooting average of 96.80.

Germany Contradicts Report

Berlin, Germany.—A statement was published here from the Chinese north coalition by way of London, England, that the French authorities of Indo-China have intercepted a consignment to the Nanking government of poison gas, shields, it was clearly intended, came from Germany. The German foreign office, declaring it [illegible]

NEW POST LAUREATE

John Masefield some time sailor and vagabond, who has been appointed poet laureate of England The appointment follows the death of Robert Bridges, and novel "Sard Harker" are among his better known works.

Wants Public Represented

People Interested In Veterans' Allowance Act Says Major-General MacDonnell

Ottawa, Ont Criticism of the plan to appoint the commission to administer the War Veterans' Allowance Act wholly of returned men was made by Major-General A. H. MacDonnell, K.C.M.G., of the Senate committee investigating the bill. Dr J. A. Amyot, Deputy Minister of the Department of Pensions, informed the committee it was the intention to appoint veterans to the committee

General MacDonnell did not contend that the commission would not fill the offices, but he believed the general public should be represented as well. They judges could be utilized, he suggested, and they would bring to the committee experience that the majority of returned soldiers [illegible]

Toronto Man Killed When Parachute Fails

Was Making First Attempt To Jump From Airplane

Toronto, Ont.— Attempting his first parachute jump from an aeroplane, Kenneth Burgess, Toronto, was killed when the parachute failed to open. The aeronautical was at an altitude of 1,500 feet when Burgess jumped. The unopened parachute caught on a tangle of interplane wires, hurling him into the ditch. He was alive when picked up and a doctor was summoned, but died a few minutes later.

The aeroplane was a Colonial Airways machine, which left the company's field near Dufferin Street in North York Township.

Burgess is survived by his widow and [illegible]

Jolly Beggars Broadcast Joy

"The most truly poetical of all Burns poems," said Thomas Carlyle, "is one which does not appear in Currie's edition, but has been often printed before and since, under the humble title of "The Jolly Beggars."

With music revised, arranged and conducted from the first edition of 1785 (harmonized by Bishop), by M. Wood Hill, in collaboration with J. Campbell McInnes, "The Jolly Beggars" was presented as a ballad-opera by the Alfred Heather Light Opera Company, in the Canadian Pacific Railway's programme of music broadcast station WJZ and twelve associated [illegible]

Company, from 9.15 to 9.45, Eastern Daylight Saving Time, on Sunday, [illegible]

The following artists took part in the programme: J. Campbell McInnes as "The Narrator" (Robert Burns); Finlay Campbell as "A Mauchline Belle"; John Dutweiler as "A Tinker"; Mrs. Davies Wynne as "The Widow of a Highland Freebooter (Jessie Niecie); Alfred Heather as "A Bard and Jolted Stagger"; and Jean Haig as "The Soldier's Lass." The first song of this opera is of special interest as containing a reference to Canada: "When the bloody die on the Heights of Abram," referring to the battle [illegible] Wolfe and [illegible]

Suggest Advisory Board

Commission Would Help To Solve Problems Of Immigration

Ottawa, Ont Establishment of a permanent advisory commission on immigration, on lines similar to the tariff board, was one of the many suggestions dealing with the immigration problem in the annual meeting of the Canadian Political Science Association here. The suggestion was made in a paper by Prof W B Hurd of Brandon Man

In his opinion the regulation of immigration was a matter for even [illegible] economists and sociologists rather than politicians A commission could make a continuous examination of employment and social conditions throughout Canada and could give expert advice to the government on the number and type of immigrants which could profitably be admitted Persons interested in securing immigrants for any district would have to make application before the commission adducing evidence of an economic nature than a sentimental character

Naval Agreement Is Attacked By Admirals

Places Their Navy In Inferior Position Say U.S. Officers

Washington, D.C Two more admirals told senate committees [illegible] the London naval treaty has placed the United States in a position of inferiority

Rear Admiral J. V. Chase, of the General Board, said the pact did not represent parity with Great Britain and had many other flaws from the viewpoint of a navy man

Although he was an adviser at the London conference Rear Admiral J. F. Pringle said, he was not speaking for the United States delegation [illegible] The delegates against the cruiser disagreement [illegible]

Japanese Immigration

Ottawa, Ont Two hundred and thirty-four Japanese immigrants have been admitted to Canada since September 1, 1928, up to the end of the last fiscal year, according to a return tabled in the House of Commons Of these 130 were males, and the remainder females of families, going to agricultural workers, and 56 were domestics. The remainder were children. Only 50 Japanese are permitted to enter Canada annually.

No Press Ban On Dolphin

London, England. The only press information that will be given regarding the R-100 flight across the Atlantic will be that kept by Wing Commander R. B. R. Colmore, who will release it on the craft's arrival in Canada. On the return trip Canadian and British newspapermen will be carried.

NEW TARIFF ON FRUITS IS TO BE AMENDED

Ottawa, Ont - Amendments will be introduced [illegible] in relation to duties in the tariff resolutions affecting fruits and vegetables Hon. C. A. Dunning, Minister of Finance announced in the House of Commons The changes will apply to products which under the new schedule have ad valorem as well as specific duties The specific will be made to apply only in those seasons of the year in which foreign importations come in competition with Canadian grown fruit and vegetables

Dr. [illegible] of the Mennonite [illegible] was greeted with applause by the Conservatives who expressed the opinion that he had become a convert to the seasonal tariffs they have been advocating

When the uproar had quieted, Mr Dunning explained that the departure is limit the framework in certain seasons instead of the entire year had come as a result of conferences with the fruit and vegetable growers They had expressed willingness to co-operate in this connection He could see premium that the farmers would get all the growers from the Atlantic to the Pacific [illegible] the many differences in the dates when such products are marketed here, but an attempt had been made to deal as fairly as possible with all

The House spent the entire day on budget resolutions, and some progress was recorded The tea item, as amended by the budget, was finally approved. Under this item tea produced in the British Empire enters Canada free under the British preference, and is subject to duty of 10 cents intermediate and ten cents general

Approval was also given to the resolution which declared that excise duties or taxes shall be disregarded in estimating the market value of goods for special duty, when those commodities come in under the British preference, or intermediate tariff The resolution passed, however, only after protest by the Conservative members that the Canadian silk industry would suffer through the admission of Japanese silks.

Ask Amendment Of Criminal Code

Christian Scientists Want Clause Removed For Their Protection

Toronto, Ont.— A despatch from Ottawa to the Toronto Star, says that in a bill introduced by the government to amend the criminal code, a change has been made at the request of Christian Scientists, in three sections, which deal with the obligations and duties of families, people in charge of the sick, and masters and mistresses of servants and apprentices under sixteen. It is explained the purpose of the section is to permit Christian Scientists to practice their beliefs without fear of prosecution.

The new sub-section which is suggested for the criminal code in this regard is as follows:

"Any obligation which may be involved in this or the two preceding sections to supply medical or surgical attendance as 'necessaries,' or 'necessaries of life,' shall not apply to, or affect persons using or depending on prayer or spiritual means for the treatment of human ailments as an enjoyment or exercise of religious freedom."

Special Stamp Issued

Melbourne, Australia.— During a short and intensive campaign to assist the appeal of the prime minister of Australia, Hon. James Henry Scullin, for the greening of more wheat this year, the postal department has issued a special emcellishing stamp bearing the words: "Grow More Wheat."

French Troops Leaving Rhineland

Frankfurt-on-the-Main, Germany.— Evacuation of the Rhineland has been officially started in this sector of the third zone of occupation. Heavy artillery, pioneer equipment and columns of troops are moving toward France in the final exodus which will strip the States of French military.

MANY SIGNS OF WORLD RECOVERY ARE IN EVIDENCE

London, Eng. In an optimistic speech in the House of Commons Neville Chamberlain said he could not see why the world economic conference would not be held within the next two or three months

The Chancellor of the Exchequer has been charged with being too pessimistic in recent months, but this speech found him in a different mood "Looking over the world," he declared, "one can see indications the industrial situation is likely to improve within the next few months [illegible] Recommendations [illegible] regarding postmen in the United States and in Europe. "Confidence has largely been restored in the United States and on the European continent and where the situation a few months ago was considered desperate, any one can see there have been remarkable betterment changes"

Mr. Chamberlain looked to the restoration of export trade as the best aid to recovery in the United Kingdom. Trade had been hampered by excessive tariffs, exchange regulations and prohibitive quotas, he asserted.

Although there had been stagnation in some sections of [illegible] there had been considerable activity in others. For instance the first two months of this year had seen automobile exports equal both in number and value the exports of three months of last year.

One brief, but vital reference was made by the Chancellor to the domestic employment situation. "The policy of aiding unemployment by instituting relief works," he said, "has been tried by the Labor Government and found to resume it."

Treatment Of German Jews

Canadian Delegation Asks Premier Bennett To Investigate Trouble

Ottawa, Ont. Jewish members of the House of Commons, consisting of S. W. Jacobs, A. Heaps and Samuel Factor, waited on the Rt. Hon. R. B Bennett, Prime Minister and Minister for External Affairs, asking, on behalf of Canadian Jews, that steps be taken to ascertain the nature of the mistreatment alleged to have been suffered by German Jews since the Hitlerite government came into [illegible]

The Prime Minister received the delegation sympathetically and undertook to communicate with Dr. Oscar Skelton, under-secretary of state for external affairs, who is in London, asking for a complete report on the [illegible]

The delegation took the view that Canada, being a member of the League of Nations, of which Germany is also a member, and that as racial and religious rights are safeguarded by the league, appropriate action could be taken by that body to preserve Jewish rights, which, it is claimed, are being attacked by the Hitlerite forces.

Large Conversion Loan

Department May Be Presented To Canadian Bondholders In the Fall

Ottawa, Ont. A large conversion loan is expected to be held before Canadian bondholders early in the fall but it is unlikely any issue will be offered before that time, it is learned here. In his budget speech, Hon. E. N. Rhodes, Minister of Finance, forecast a conversion loan "at the opportune time."

The heaviest old gations of the government mature as a rule late in the fall and the first of [illegible] is understood the funding requirements will be in excess of $300,000,000.

Life Insurance To Be Discussed

London, Eng. Howden airship station, in the Yorkshire East Riding, home of the R-100, and during the war, of other airships, is to be pulled down. Howden airship shed cost £360,000, and was completed in 1921. The entire buildings cost £750,000.

Peace Club Organization

Premier of France May Meet Mussolini To Further Plans

Paris, France A trip by Premier Edouard Daladier to Italy for a direct discussion with Premier Mussolini may be the next move in efforts to organize a four-power "pool club," it developed here

The meeting appears the expression the reaction to Premier Mussolini's conversations in Paris held by M Daladier and Prime Minister Ramsay MacDonald, of Great Britain The British and foreign statesmen discussed the Mussolini "peace club" project, which the Italian premier had explained to Mr Macdonald when the British Prime Minister was in Rome

Semi-officially it was revealed no plans have been made for the [illegible] meeting which probably would take place in northern Italy For a number of years the Italian premier has made a cult of not having been out of his country

In principle the French have agreed to the Mussolini plan, but certain modifications have been asked The French want the "peace club" to go further than the specific duties of the League of Nations because they believe they would be able to muster sufficient influence in the league to [illegible] counteract a possible Italo-German bloc against them.

Wheat Conference

Plans Have Not Yet Been Advanced For U.S. Participation

Washington Plans have not yet been advanced for United States participation in a conference of wheat exporting countries, including Canada, seeking grain price stabilization, but the Farm Board will recommend a program of economic rehabilitation by international action was believed to be awaiting congress and consideration of the administration's farm [illegible]

A significant note in the new American farm relief program is the store trade normally through reciprocal agreements with customs' associations in other countries Hall's announcement that just as soon as congress has completed work on emergency domestic relief legislation, the board will request blanket authority to negotiate understandings involving exchanges of tariff privileges, through embargo restrictions and removal of other barriers in reciprocal commerce.

Meanwhile, the wheat conference was awaited as a formality to the existing acute world condition in which exporting countries hold vast surpluses while importers normally considered as wheat importers do not buy.

Home Rule For Canada

Provincial Government Of Alberta Will Give Canada Right To Amend Constitution

Edmonton, Alberta Full right for Canada to amend her own constitution, giving home rule in every sense of the term, is proposed in an amendment which Premier Brownlee will move to a resolution under debate in the legislature here.

The amendment was to a resolution moved by Col. F. C. Jamieson, Conservative, Edmonton, who proposed that the provincial government endeavor to make an agreement with the Dominion that no request for an amendment to the B.N.A. would be made without the consent of this assembly."

A Narrow Escape

Little Girl Run Over By Train, But Is Unhurt

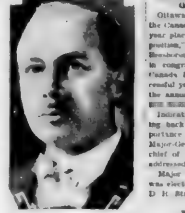
Didsbury, Alberta. Two-year-old Clara Klein, daughter of Mr. and Mrs. Otto Klein of Didsbury, was run over by a train, but is alive and uninjured although badly frightened.

The child was walking on the railway track when a train approached. Terrified, she started to run but stumbled and fell.

The engineer applied the brakes. The engine, however, passed over the little girl.

Members of the train crew immediately hastily from the cars and found Clara beneath the coal-tender. The child was slightly hysterical but had escaped without a bruise.

HITS WITH LEAGUE



A recent photograph of Hugh R Wilson, United States Minister to Switzerland who has been named by the United States as representative who will sit at the League of Nations deliberations on the Far Eastern trouble. Although the United States will not vote, but will it how is advance to League decisions. It will cooperate with other nations in endeavoring to find a solution to the Sino-Japanese tangle.

Frowns On Lotteries

Premier Bennett Says Winnings Should Be Forfeited To Crown

Ottawa, Ont.— Expressing the opinion that the winnings of all lotteries should be forfeited to the crown, Prime Minister R. B Bennett, in the House, voiced his strongest opposition to anything that would stimulate speculation among the Canadian people Mr. Bennett was winding up a brief discussion on the bill amending the criminal code respecting lotteries, sponsored by P. F. Chaguan (Lib., Charlevoix-Saguenay). The bill was talked out.

Canadian Banks Sound

Chartered Bank Comes Through Run Without Assistance

Ottawa, Ont One of the chartered banks of Canada came through a "run" in which $10,000,000 in deposits were withdrawn without the aid of assistance from other banks or from the Dominion government, Premier R. B. Bennett told the House of Commons.

The Premier mentioned the case as an instance of the soundness of Canadian banks when his government was charged with unfairness in not coming to the aid of the Manitoba savings office last year.

Canadian Ride Team

Congratulated By Governor-General On Their Performance

Ottawa, Ont The performance of the Canadian rifle team at Bisley last year placed Canada in "a very proud position," His Excellency the Earl of Bessborough, Governor-General, said in congratulating the Dominion of Canada Rifle Association on a successful year His Excellency attended the annual meeting of the association [illegible]

Indications the rifleman was coming back to his old position of importance in the army were seen by Major-General A G L. McNaughton, chief of the general staff, who also addressed the meeting

Major C. R. Crowe, of Guelph, was elected president, succeeding Col D R. Street of Ottawa.

Wins Air Trophy

Edmonton Flyer Awarded Brought-ton For Meritorious Service

Ottawa, Ont Maurice Burbidge, instructor of the Edmonton Flying Club has been awarded the trans-Canada trophy for meritorious service to aviation during 1932, according to an announcement issued recently from the headquarters of the National Defence Department Mr Burbidge is the sixth winner of the trophy annual award of which began in 1927

Mr Burbidge joined the Royal Flying corps in 1916. He was appointed instructor to the Edmonton Flying Club in 1929, and to his energy and leadership has been attributed the outstanding record of that organization.

Expect Price Increase

Jam and Marmalade To Cost More, Is Prediction

Hamilton, Ont. An increase in the cost of jams and marmalades is foreseen by Col. Armand Smith, of E. D Smith and Co., Winona as a result of the sugar and sales tax on jams Fifty per cent. of the content of jam is sugar, he said

The sugar will be increased five cents per bottle, said William Athens, prominent grape grower and wine man of Vineland, ontario and he thought this unlikely the liquor control board absorbs the additional costs caused by the sugar excise tax and that on proof spirits.

Follow Canadian Plan

Washington Proposals for re-financing United States agriculture and home mortgages along the same general lines as the Canadian system were announced by President Hoover.

GOVERNMENT TO STUDY PLANS FOR IDLE INSURANCE

Ottawa, Ont - The House of Commons took the first step to extend for another year the government's unemployment relief legislation and clothe the administration with wide powers to deal with the "peace, order and good government" of the country

Without recorded division, a resolution was passed instructing the government to bring in the relief legislation changing a week or more [illegible]

The government is gathering data on a contributory unemployment insurance scheme, but every turn collides with the constitutional rights of the provinces, W. A. Gordon, Minister of Labor, told the House. It will be necessary for the provinces to surrender some legal rights before a nation wide scheme is possible added Hon. Hugh Guthrie, Minister of Justice.

At the recent Dominion-provincial conference, continued Mr. Guthrie, the provinces declined to surrender their legal powers over immigration and were opposed to an amendment to the British North America Act to enable the Dominion to act alone

Before any federal scheme could be established, the Dominion must have power to compel employees and employers to contribute to the central fund a power now vested in the provinces

The Dominion placed no detailed insurance scheme before the provinces at the conference, the labor minister said, discussion ranging around the constitutional issues at stake Until that barrier was removed, details were impossible.

Continue Relief Plan

Minister Of Labor Replies To Question Of Opposition Leader

Ottawa, Ont. The Dominion Government will continue to do its part in the future what it has done in the past year with regard to unemployment relief, Hon. W. A Gordon, Minister of Labor, told the House of Commons. The minister was replying to a question in which Rt. Hon Mackenzie King, leader of the opposition, asked whether "apart from the dole, the minister had any comprehensive, co-ordinated plan to announce to the House dealing with unemployment relief."

The government's policy was that moneys would be devoted first to assisting the provinces in those they were unable to take care of their own people, said the minister. The government would help the provinces to project any scheme which they may conceive or which the Dominion may conceive within the financial limitations of the government to provide employment or take care of direct relief.

Mr Gordon believed the situation was not getting worse. He knew there were people who would be gratified to see things on the downgrade and thus fulfill their own prophecies However, the Dominion government would not invade the jurisdiction of the provinces.

Starting Bank Probe

Ottawa, Ont—The government will set to work at once to set up the legal commission to investigate the Canadian banking system and consider the pros and cons of arguments in favor of a central banking system. The commission was confirmed in the budget speech of Hon. E. N Rhodes, Minister of Finance, in the House of Commons.

Alberta Redistribution

Edmonton, Alberta Alberta government will introduce a redistribution of provincial ridings if the legislature adopts a resolution introduced by Hon. G. L. McPherson, Minister of Public Works. Quite a reduction in the number of legislature members would result, it was stated, if such an inquiry was held.

Electro-Magnetic Balance

An electro-magnetic balance has been designed that will detect metals under-ground to a depth of 15 feet or more, a bervisture umbeard of range.

THE SOUTH ATLANTIC'S FIRST FLOATING AERODROME

The Nordeutsche Lloyd liner "Westfalen," of 5,000 tons, has been converted into a floating aerodrome and is to be placed in the South Atlantic Ocean for the use of pilots on the way to and from South America, from Africa. Our picture shows the catapult on board the "Westfalen" for starting flying boats.

The Agricultural Dollar

Value Has Greatly Decreased During Last Few Years

A Bend county farmer in a letter to the Farmer's Advocate, rightly deplores the shrinking value of the agricultural dollar, due to the ruinously low prices of farm commodities and the relatively high obligations he has to meet in taxes, insurance, rent, etc. This letter of the soil has kept a record of transactions over a period of years. On delving into the past for purposes of comparison with present day financing problems he discloses the following:

I turn my ledger of 1914 and find, October 1, sold 100 bushels of wheat at $1.02 per bushel $105, October 20, 6 bags at 1½ cents $42.50, November 5, 1 cow at 5 cents—$7, making a total of $262.50. On the other side I find, December 1, taxes, $17.35. A little less than one-fifth of the income.

Then I turn to 1922 and find: Wheat, 500 bushels, sold at 45 cents—$45. 6 bags at 2½ cents $42; 1 cow at 2 cents $26, or a total of $113. Now comes the tax roll. Returning to the other side of the ledger I find the item of $1250 paid for taxes. This shows how the farmer's dollar has shrunk without even mentioning the Dominion and Provincial taxes that we pay indirectly from day to day.

One can readily see that the agriculturist being in a hard row to hoe when a quantity of farm products sold two decades ago would have paid the taxes five times over, whereas today the same quantity won't quite settle the tax bill. It goes to show that the farmer must be paid more for his commodities if he is to make ends meet. We can't expect hard times until wheat, hogs, cattle and other farm products bring much higher prices.—Kinchener Record.

Cow Wheat in Alsace

France Is Experimenting With Soil In French North Alsatian Colonies

Experiments in wheat growing in North Africa, with the aim of producing "cow" wheat and so enabling France to cut down her imports from the American continent, will be financed under the 200,000,000 francs credit recently authorized by the Chamber of Deputies to aid agriculture, the United Press learned from a reliable source.

Even when France produces domestically enough wheat for her needs, she requires to import bread wheats from the United States, Canada and the Argentine to mix with the softer French varieties in milling. This was strikingly demonstrated during 1922. Although the native crop totaled 310,000,000 bushels last season—10,000,000 bushels over her needs—the imports of hard wheats attained approximately 50,000,000 bushels.

Agricultural experts have reported favorably on the soil of the French North African colonies as being eminently suitable for experiments in raising healthy quality cereals. Every year, larger areas are being cultivated in Algeria, Morocco and Tunisia, which shipped during 1922 a record crop of 30,000,000 bushels across the Mediterranean to the metropole.

Received His Share

Man Got Household Goods As Divided By Former Wife

A recently issued issue, says the Chicago News, received his share of the household goods the other day as divided by his former wife, now living in South Chicago. Items of the goods had been put in storage when the marital smash-up occurred, and the settlement included some choice bits of old mahogany, pieces of Stafford-shire and Spode, rugs, mirrors and pictures. When he inspected the crates he hit his chere was: One stuffed owl, one baby carriage, his cost of arms, an Algonkoff, an old leather chest, a box of mayonnaise costumes, an assortment of college pennants, one red-leather chair.

The oldest varnish still existing in the world is that on Egyptian mummy cases. In some instances, the varnish is 3,000 years old.

W. N. U. 1987

A spectacular picture of the last moments of a good ship before she took the final plunge to Davey Jones' locker. The stricken vessel is the Danish motorship "Crotagne" which went to the bottom off the coast of Holland after a collision with the British craft, "Thelma," from which this picture was made.

Saskatchewan Relief

Figures Show Wide Extent Of Undertaking To Aid Farmers

Administering to 275 000 people last year, the Saskatchewan relief commission distributed 4,000,000 bushels of wheat in seed alone, 300,000 bushels of oats, 500,000 bushels of coarse grains and 4,000,000 gallons of coal oil according to Chester B. Daniel, general manager of the commission, who characterized its work as probably the biggest relief undertaking on the continent.

The system is one of return as well as distribution, the latter being made with provision for repayment before November of this year, Mr. Daniel, who was interviewed while on a visit to St. John, N.B.

Already, under the repayment system, the commission has collected $1,000,000 bushels of wheat, 200,000 bushels of oats, 150,000 bushels of barley and 300,000 bushels of rye.

Conditions in Saskatchewan improved this year, said Mr. Daniel, but relief work will be necessary until August.

Uniformity Of Sentences

Disparity Of Penalty Noted Out To Different People Charged With Same Crime

Uniformity of sentences on accused persons charged with similar crimes was urged at Calgary by Mr. Justice A. A. McGillivray of the appellate division of the supreme court of Alberta.

In his address to the Calgary Bar Association, his lordship also urged establishment of a civil code similar to the Criminal Code of Canada, and legislation preventing courts of appeal from writing more than one judgment. Mr. Justice McGillivray spoke on "Reflections of a Junior Judge."

"One of the observations I have made is the disparity of sentences meted out to different people charged with the same crime," he said. "Some people seem to draw different sentences. I appreciate that judges should use discretion under different circumstances, but there should be some semblance of uniformity in sentences."

Bandit To Publisher

Magazine Tariff Has Given Work To Many Writers

Several Canadian printers and publishers have benefited as the result of the magazine tariff which came into effect on January 1, 1925, it is said. Firms print the Canadian editions of fifty-two regular published United States magazines, with a combined annual circulation of approximately 33,000,000 copies. The combined circulation drawings 2,500,000 a month. Of these magazines, seven with a circulation of 500,000 per issue, are published weekly; seven, with a circulation of 100,000, semi-monthly; 28, with 900,000 circulation, are published monthly; 3, with a circulation of 1,000 are published quarterly. In addition to these home publications of a few magazines have been temporarily suspended and one or two issued at irregular intervals.—Running Run.

A newly advertised cigarette made exclusively from Virginia grown tobacco in Canada is on sale in Great Britain and is proving a favourite.

Machines for setting type by photographic processes have been developed.

Claim Is Unchallenged

Scotland Is Most Law-Abiding County In Great Britain

For the fourth year in succession there were no prisoners for trial at the assizes held recently in Dalkeith, England. Ruthan's claim to be the most law-abiding county in Great Britain is unchallenged. Only 16 policemen are needed to watch over the 97,000 acres of the county and control the 17,000 or so Ruthanders. F. W. Calder, chief constable, finds it difficult to recall when the white-washed prison cell in the police station last had a tenant. He has ample time for indulging in his favorite pastime of gardening.

In the opinion of Mr. Calder, absence of big towns is largely responsible for lawfulness. Crime is a product of environment, he says. In this cheese-loving country everyone leaves everyone else and they all try to be friendly to each other.

In many ways the life of Rutland reminds the same as it did in feudal days. Old families have managed to retain their estates to a greater extent than in most other parts of the country. The landlords grant interest in the well-being of their tenants and by assisting them wherever possible, help to make them contented. There are worse systems than the old feudal system.—St. Thomas Times-Journal.

No Ban On U.S. Broadcasts

Ex Business Canadian Radio Broadcasting Commissioner

No ban is being placed on the broadcasting of United States radio programmes in Canada, officials of the Canadian radio broadcasting commission declared. A Toronto radio station and its announcer will be called upon by the commission to explain statements made over the air charging a commission "effort" against United States broadcasts.

Far from prohibiting United States programmes, the commission states it has entered into tentative negotiations looking to an exchange of programmes between the commission and the larger United States broadcasting companies.

Scientists say that smiling babies are no more intelligent than solemn ones.

Toured Sahara On Bet

Young Swedish Society Woman Crossed Desert In Small Car

As a result of a bet, Madame Dickson, a beautiful young Swedish society woman, has just crossed the Sahara Desert and equatorial Africa in a small automobile. Accused at a dinner party in Nairobi of being interested only in dancing and cocktails she bet that she could cross the desolate country Mme. Dickson started the next day, accompanied only by a native boy, and went through Kenyar, Uganda, the Belgian Congo, French Congo, Nigeria, and across the Sahara by way of Oran, London and Biarritz. Parts of the route were under water, and near Fort Lamy one large and five small bridges had been washed away. She rode 75 miles on horseback to a military post for help, and in 24 hours all the bridges were repaired.

England's Historical Exhibit

Wheat From Land Tilled 30 Years Sent To Grain Show

English farm land, tilled continuously for 30 years, will be represented at the forthcoming World's Grain Exhibition at Regina.

Specimens of wheat grown on the same ground for 30 years will constitute part of an historical and educational exhibit arranged by the Rothamsted experimental station at Harpenden, Hartford, according to word reaching the city Saturday, March 15.

The exhibit will also demonstrate by graphic and models the effect of extended research into cultivation of potatoes, mangolds and other crops.

In addition there will be an exhibit in the commercial section of machinery and other products of British manufacturers.

Nothing To Say

Leaving England for America, Sir Reginald Lindsay, the British Ambassador, said to reporters: "There is little more that I can tell you, for I have gone on a gold standard of silence." This would be another ideal world medium of exchange for those in high places or low who have nothing to say.

Dallas based his story, "Robinson Crusoe," upon the experiences of Alexander Selkirk, a castaway.

Gardening Notes

By Gordon Lindsay Smith

When this old earth really begins to warm up in the spring the normal person feels an impulse to get out and dig, but the experienced gardener advises extreme caution. If the earth is too wet there is grave danger of a musty cold mat to mention dire consequences to the soil itself. Too early working will cause the latter to pack down hard and it may require a whole summer of constant digging and raking to get it back into its old crumbly self again. There is a simple test. If the soil crumbles after a little is squeezed in the hand, or if it does not muddy the hoels it is safe to go ahead.

Grafting and Training—Grafting is not a difficult operation The main thing is to get a portion of the inner bark of the scion or twig bearing grafted onto the tree exactly opposite and tight up against the inner bark of the bush of the tree on that the two may grow together When working on a big limb it is best to take the tree or three twigs and insert them around the edge of the sawed-off portion with the two inner barks in close contact Later on when growth has well started—remove all but one twig. After putting together tie tightly with rafia or some soft twine and cover all around the joint with grafting wax.

Any one wishing to get some good Government bulletin on this subject before attempting the work. By having the one can repair a tree which rabbits or mice have girdled and which would die without this treatment, and can put a complete new head on a broken down tree or one of a non-desirable variety.

Grafting and training opens up interesting possibilities to the gardener. One apple can be made to fill the place of three ordinary trees if an early variety like the Yellow Transparent or Astrachan and a late winter apple such as the McIntosh Red are grown on the same trunk. By careful pruning and training, shrubs and trees may be made to assume weird shapes. One may make bushy shrubs and trees more by only allowing a single stem trained to a stake and then encouraging this to branch by cutting it off when it reaches a certain height. In Japan, by judicious pruning and withholding of water, dwarf trees, palms and oaks of very dwarfed proportions are grown in pails and tubs.

Rose and Shrubbery Planting—Before planting shrubbery there is no end to set out most new shrubbery, roses, ornamental and fruit trees, climbing vines and hedges. Careful planting will make the grounds about the house attractive. These should be bought from the nearest reputable source of supply. Do not buy may be planted as soon as possible. In planning this part of the garden it is important to secure plants that are suitable to Canadian conditions, and if satisfactory results are to be secured it is essential that good stock is bought. One will find a wide range of prices quoted, just as in any other line, but here again as always, good plants, well-grown, healthy and true to name cannot be sold at the lowest figure. Unless the plant is in prime condition with plenty of green bark, moist, pliable roots and large, live buds, it will have little chance and if it lives at all a whole year will be lost in getting it started.

On arrival, the new plants should be planted immediately in moist soil, but if this is not possible, dig a shallow trench and "heel in by covering roots firmly with soil. All shrubs, rose bushes, trees and vines should have been pruned back and they should be set in permanent quarters a little deeper than they were planted in the nursery bed. Give the roots plenty of room, spreading them loosely about the hole, then cover with good garden soil, throw in a pail of water, fill in the remainder of the hole and press soil down firmly. In the case of trees, provide some support against the wind in the form of a stout stake and tie with soft twine or rafia.

Clerk: "I have received a letter from a firm asking for a reference for that man Brown who used to work here."

Manager: "Tell them that he is a rogue and a thief, and that anything he knows he learnt from us."

CHAPTER VIII.

A Deadly Trap

"Rob-ley" Jensen was glaring around him at the other five faces in the tent.

"Some of you lubbers," he growled, "ain't got the nerve you was borned with. You'll have a pain with your whining and grueling and always wanting to argy about what I tell you. How I'm gonna explain just what's ahead of us and what we gotta do."

The six men were no motley a crew as ever the whaling fleets of Davis's sea and the Western Arctic could muster up. With one exception the skin of them were duck brush—wheel wolves of gutter speech and alley vices; strange men to be camped in the heart of a wilderness that even the Indians seldom penetrated.

There was John Stefelski, a square-faced squat Alsatian, a descendant of the Cossack Pompadour lenski (fur-hunters) who for generations, when Russia ruled the northwestern shores of America, had held brutal sway over the Aleuts and Kodiak in their lair for fifty years.

There was Pete Gonsales, a Brazilian half-breed, brown-skinned, his white teeth flashing, his dress gaudy and picturesque.

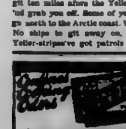
There was "Lumpen Dick," a wiry stunted Limey, with flattened nose and quick jerky ways.

There was "China" Woolley, a quarter-Chinese, an olive-faced, silent nonconcerpt, with his right arm in a sling from Bill Hardnock's bullet.

The fifth was a Dogrib metl named Andre, a thin small weasel-like man of fifty. He had just returned from a scouting trip down the Big Alcoolic.

The six of them were talking, or listening rather to Jensen talk, of their plans to escape. Echoing the identical line of reasoning which Alek Baker had sketch in Haskell's cabin.

Jensen went on: "Some of you wants go back to the River and git outside Hudsnay. H—fly Sea—you'd mebbe git ten miles afore the Teller-stripes 'ud grab you off. Some of you wants go north to the Arctic coast. Whatfor? No ships to git away on, and the Teller-stripes've got patrols there to



Improves flavour of meats, fish and vegetables. Pays for itself many times over. All dealers, or write—

Crosse & Blackwell

boot. You say, 'Head south' Yeah . . . and run into the nest of p'lice posts down there around Athabasca We can't go north nor west nor north, but we kin go east . . . .

Lannon Dick spoke up:

"Close hover t' 'Udson Bay or Manitoba? Two thousand miles that haway? That's a bloody long 'ard trot. Blob-like."

Jensen turned on him with a fierce anger and withering sarcasm that silenced Lannon for an hour.

"Sure it's a h—l-ish long hard trot, you runty bugs rat! I know it. I know it! But I'd rather tramp ten thousand miles than do them twenty slow short steps from a housegown to a scaffold!"

The others all nodded emphatically, fearful of Jensen's scorching anger They were sitting there on a hundred and fifty thousand dollars which they had got for them. They owed their very lives to his quick thinking aboard the steamer, when he had grabbed their trick out of the fire when they were leaning on him now to save them from the Mounted and get them back to the comforts of a big city.

He went on explaining the escape. "Now, here, all of you—look't here." He smoothed a place on the mud floor and as the others leaned forward to watch, he drew a rude map with his long thumb nail. "We'll follow the Incomna east a ways and then head south for Manitoby. We'll spend the rest of this summer and fall working down into timber country. We'll find some good hiding place and build a couple of shacks and lay in meat, and we'll wait there till the hunt for us peters out. Then we'll go over to Winnipeg, or Moose Jaw or Regina, and there we'll be with better'n a hundred and fifty thousand in bills and clear!"

His own personal and private plans after they did get out to Winnipeg, Jensen did not see fit to disclose. He knew a party there in the Queen City of the Wheat Plains who would buy the furs at two-thirds of their auction value and say "nothing" about dust, being unstamped, could be sold anywhere. He himself, both business manager and leader of this crowd, would naturally attend to those business matters. Once with the money in his pocket, would he split six ways with these lubbers? Or would he take a train and fade out of their lives and have that hundred and fifty thousand for his own sweet own? You bet your life he would!

With his plans clear and the men completely under his sway, Jensen leaned back against a pyramid of furs and sat, smoking, thinking.

He guessed that for once the police were altogether baffled. They were probably pounding their heads to explain who he and his men were, where they had come from, how they had got into the country unknown, unseen, and how they, complete strangers, knew the ins and outs of this northern wilderness as well as the Indians themselves. He thought of them as a pack of hounds circling frantically to pick up a scent. It was pleasing to know he had out-manoeuvered them from start to finish. A man who could beat the Yellow-stripes would have no trouble at all dodging the provincial police and town cops.

But this reflection was only on the surface of his thoughts. He was thinking of the MacMillan trading post, 'Brood Andre had said that Dave MacMillan was not there. Jensen shrewdly guessed where the trader was. From the MacMillan girl being alone at the post, except for that white-whiskered old coot, Jensen guessed Dave MacMillan had got into trouble over that pack of otter furs in the storage shed.

Through the tobacco haze Jensen looked back across six years and saw again all the details of a certain incident between himself and Joyce MacMillan He had resented that incident a thousand times since it happened The memory of it, the memory of that laughing-eyed girl, had come to him across the years like the scent of fresh violets Two weeks ago when his party passed the MacMillan trading post he had avoided it and deserted, and drawn by some overpowering impulse to see her, to be near her again, he had flung caution and bold to the winds and stopped, and gone 'shore The picture of that MacMillan girl asleep, an arm under her head, a tress of gold curved to her hair that fleshand-blood reincarnation of her former memory had been a madness in his blood ever since. It had smothered his wrathful thoughts, had flitted across his dreams, had been present with him even during the hot battle with the three Mounties at the edge of Many Waters.

The news which 'Breed Andre had brought back that Joyce was practically alone at the trading post, scarcely two days travel away, that her father was away on a long hunting or metis came now, that the officer commanding at Fort Endurance was giving her no protection whatsoever made him to Jensen see like a match to a barrel of powder.

His deliberate brain saw danger in his passion for her but had flicked that far the furs and gold, and that hundred and fifty thousand was far less vivid, less tangible, less impassioning to him than the memory of that moment when he stood looking through Joyce's window. He had spent a year in the interior wilderness, had been apart a year of exile in Alaskan mountains, among prospectors . . . There are hungers more powerful than the hunger of food or gold . . .

It would be ridiculously easy, he imagined to knock the old coot on the head, and take the defenseless girl. They would land above the station and creep upon it through the bush. Two of his men would go in peacefully, as though in trade, and watch their chance to seize her. His party could swoop, strike, and have the whole thing over in ten minutes.

Knocking the ashes from his pipe, he leaned forward

'Men, I got an idea. I just showed you lubbers our one chance to 'scape. Now I'm gonna show you how we it's make our getaway dead sure and certain. How we c'n the Teller-stripes up in a sack and throw away the key. Anybody objecting? Anybody wanting to kick over the traces.

Glaring around him, he saw emphatic denials. The men were hanging upon his words: He knew they would obey him without a whimper of protest.

He went on. "We're going to make a little call down the Athabasca to MacMillan's trading post. We're going to it tomorrow. We'll rap that white-whiskered old coot and take the girl. We'll throw them Teller-stripes clear off the scent. While they're hunting for her, we'll be making tracks southeast to Manitoby. I'mind how we saved our skins on the steamer by taking that other shirt? We'll do it again; but we'll carry t'ke's on along with us. No one'll ever know what happened to her. . . . ."

* * * * *

For a few days after Alan Baker bought out of the service and left Fort Endurance, Inspector Haskell enjoyed more peace and security than he had felt in many months. But after the first satisfaction were away, it gradually occurred to Haskell that maybe he ought to make some move to capture those six bandits. To let them escape without raising a hand against them would look bad, very bad, to Superintendent Williamson on his coming visit to the post.

Thinking over his situation, he remembered how Baker had demanded to lend a patrol to the Incomna River and lie in wait there. Baker had said they would try to escape by that route He knew what he was talking about Haskell realized he knew.

Should he send a detail to the Incomna?

The more Haskell pondered the idea, the more it appealed to him. It was reasonably sure to succeed. It would be the positive action he needed. On his wall map he busted for the Incomna He found a small channel of the Mackenzie by that name, but Baker's Incomna was some large river. Perhaps the chart listed it as "The Unknown." the English translation of the name. He searched for an Incomna and an Unknown, but found neither. Such a stream simply was not shown on his map.

When Little Otter came in to the post for a supply of chewing steamer, Haskell pumped him. The half-breed had only the haziest idea where the Incomna was, but Indian-like he would not admit his ignorance. He started talking, questioning — till Haskell caught him in a flat self-contradiction and kicked him out of the cabin in angry disgust.

(To Be Continued).

FREE TRIAL OFFER

KRUSCHEN

If you have never used Kruschen try it now at our expense. We have distributed a great many special "TRIAL" packages which make it easy for you to prove what Kruschen Salts will do for you. Each little jar contains enough Kruschen Salts for one month's use and will last for 4 weeks. The reason why so many people keep on buying Kruschen Salts is because they feel so much better in health after taking them. They get rid of those troubles which are making life miserable. Kruschen Salts will do the same for you. Obtainable from all druggists throughout the world. Price 75c per bottle.

Produced Queer Fruit

Skull Lemon Shell Orange Evidently Evolved From Grafting

A very unusual fruit, half lemon and half orange, was received in a shipment of California fruit opened at the Garton Holmes store, in Simcoe, Ontario. The "lemon-orange" has the appearance of having been grafted by some experimenting joker after the fruit had commenced to grow. Divided longitudinally into two hemispheres, the orange half is 100 per cent. orange with a bright orange-coloured skin, while the lemon half is just as much of a lemon with typical light yellow skin. There are the usual differences in the textures of the two, but the two halves are solidly grown together, a narrow ridge running around the fruit where the two halves are joined. The fruit grew on one stem.

Symbolic Meal Produced

A chemical process just discovered in London is claimed to produce a synthetic "meat." Although only tiny portions have been made so far, they continue to grow in size even after slices have been cut off. It is stated that any type of meat—beef, mutton, pork, or chicken—can be produced.

SORE THROAT

. . . Here's comforting relief without "dosing."

Just rub on

VICKS

Little Helps For This Week

"Forgetting those things which are behind, and reaching forth unto those things which are before, I press toward the mark." - Philippians 3:13, 14.

Yet I argue not
Against Heaven's hand or will, nor bate a jot
Of heart or hope; but still bear up and steer
Right onward

—John Milton.

It is not by regretting what is irreparable that true work is to be done, but by making the best of what we have. It is not by complaining that we have not the right tools, but by using well the tools we have. What we are and where we are is God's providential arrangement—God's doing though it may be man's misdoing; and the meanly and vile way is to look your disadvantages in the face and see what can be made out of them. He is the best general who wins the most splendid victories by the retrieval of mistakes.—F. W. Robertson.

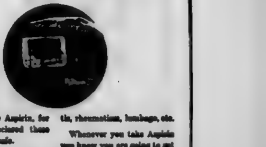
A Vanished Race

No Living Eskimos in Northeast Greenland Since 1886

A vanished race has left traces of an active life on the shores of Northeast Greenland. No trace of living Eskimos in that district has been known since 1886. It is thought that some sudden tragedy must have overcome the Eskimos, because in several huts were found a number of skeletons. In one place, explorers of the Royal Geographical Society found a number of implements among the ruins, many of which were well preserved and of archaeological value. To judge from the implements, the coast seems to have been inhabited about 1400-1500.

FOR ANY PAIN

Have you ever found any quicker relief than this?



Anyone can take Aspirin, for doctors have declared these tablets perfectly safe.

And there is no quicker form of relief for any pain.

It is well to remember these things when anyone tries to persuade you to try anything in place of these tablets.

Aspirin may be taken as often as there is any need of its comfort: to stop a headache, throw off a cold, drive away the pains from neuralgia, neuritis, rheumatism, lumbago, etc.

Whenever you take Aspirin you know you are going to get immediate results — and you know there will be no ill effects. *You know what you are taking.*

Why take chances on some form of relief which may not be so swift—may not be as safe? The new reduced price on bottles of 100 tablets has removed the last excuse for ever experimenting with any substitute for Aspirin!

Aspirin is a trade-mark registered in Canada

CARD OF THANKS

Mrs. B. Simmons and family wish to thank their many friends for the kindness and sympathy received during their recent bereavement and also for the beautiful floral tributes.

FORT SASKATCHEWAN RECORD

Published Every Wednesday
WEDNESDAY, MARCH 29th, 1933

ANOTHER YEAR

With this number another twelve months have past and it is just three years since we have had the pleasure of speaking to you through the columns of The Fort Saskatchewan Record, and, on the whole, twelve months of pleasure, true, at times the work has been strenuous.

The Record has, throughout it's days, stood for advancement of the Fort and district surrounding it, and hopes always to stand for that principle.

We have always endeavored to give our readers a good, clean newspaper and hope to go right along improving.

Our subscribers and advertisers have a right to expect good value for their money therefore it is our aim to more than fulfill their expectations. In the advertising section we have only good things to say of the merchants who used the paper as a medium through which their customers may learn of the different lines of goods they have to offer.

May we also thank the merchants and subscribers for the opportunity of supplying their stationery supplies.

We are also very grateful to our district correspondents for the very efficient and interesting manner in which they have reported the news of their districts.

In looking over our subscription list we notice quite a few new names that have been added since we took over the publication of the Record.

In connection with this we might point out that no concern can do business for the accommodation of the public, so must your obligations promptly when they come due. The Record of all times is only too glad to meet the farmers in various ways of paying their subscriptions.

ABOUT THE SWIMMING POOL

A suggestion has come to our attention during the past week, which on thinking it over, might work out alright. If it is possible to use the "Hospital Fund", for a swimming pool, why not have a covered one. The money is here! Well the Town has the memorial hall (which it is presumed was actually a community hall), on its hands which it does not know what to do with. It is suggested that a pool could be installed in the basement of the hall with very little work and the second floor a gymnasium could be fitted up, or a place where meetings could be held etc. The town and community would have swimming 12 months of the year, instead of about four. Another thing in its favor is that a water main is within easy distance of the building.

It is also pointed out that in the proposed location for the outside pool, mosquitoes, and sand-dust blowing from across the river would have to be contended with.

THE MATTER OF PRIVATE PROPERTY

(Alberta Labor Mews)

Organized Labor and the farmers will welcome any real conversion of the Liberals and Conservatives to the home-saving policy. That is what the C.C.F. platform stands for. "Security of tenure for the farmer on his own land and for the worker in his home." "Un-land" means, of course, land that is used for productive purposes. It does not mean the millions of acres of the land owned in the country that is held by the C. P. R. and other big corporations for speculative purposes. Such land would be converted, as speedily as possible, into "un-land." But it does mean what it says: "Security of Tenure," for the man on the farm and the worker in his home. It offers to him something that he now does not possess.

VOL. [illegible] No. 1 — FORT SASKATCHEWAN, ALBERTA WEDNESDAY, April 5th, 1933 — $1.00 PER YEAR IN ADVANCE

Fort Council Board Held Light Session

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the fire chief's office on Monday, April 3rd, 1933 at 7:30 p.m.

Present:—Mr. F. Atkinson, Chairman Trustees:—Mr. R. A. Brown, Dr. Calhoun and Dr. Turner.

The minutes of the last meeting were called for and read. Moved by M Brown and adopted that—minutes of meeting held on 6th of March be adopted as read.

Moved by Dr. Calhoun and adopted that—in order to secure a cheap rate at least 15 gallons of the best polish now being used on the floors be purchased

Moved by Mr. Brown and adopted that—the Chairman be empowered to make necessary arrangements for the procuring and planting on the School grounds of caragana seedlings, and for the purchase of suitable wire for a small fence.

The Secretary was authorized to purchase stationery required (letterheads etc.) from the Record.

The Principal, Mr. Anderson, was present and submitted attendance and other reports to the Board.

The following accounts were passed for payment on motion of Dr. Calhoun: Calgary Power Co., $2.80; G. A. Cranston coal $66.82; A. M. Carscadden $8.00; F. Etherton $1.00; E.A. Meyer Co., Sanitary supplies $10.34; Imperial Oil, floor polish $5.87; Tuxedo Coal Co., 2 tons coal $13.00; Record, printing $2.00; Secretary, postage and sundries $2.00; Secretary, salary for March $75.00.

The next meeting of the Board will be held on Monday, May 1st, 1933 at 7:30 p.m.

The meeting then adjourned.

F. ATKINSON, Chairman.
A. M. CARSCADDEN, Secretary.

BREENER ENJOYS ONE-ACT COMEDY-DRAMA

A comedy in three acts was presented by Brenner U. F. A. and U. F. W. A. on Friday evening, March 24, at the U.F.A. Hall The play, entitled "Tommy Tolmson's Tale", attracted a capacity audience

Members of the cast included Mrs. T. A. Marler, Mrs. W. H. Parsons, Mrs. Clayton McGhan, Mrs. Roy Marler, Miss Ruth McGhee, Mr. S. Marler, Mr. Roy Marler, Mr. Clayton McGhan, Mr. Lester McGhan and Mr. James Barclay

This play was presented at Clover Bar United church on Monday evening.

The Brenner Red Cross auxiliary held a whist drive and dance at the U.F.A. hall on Tuesday evening. Five monie was supplied by Mr and Miss Theuniissen, Miss Daly and Mr. Stanley Dyas. A large crowd was in attendance.

NEW HOMESTEAD LANDS

Specified crown lands in areas of the province will be thrown open at noon on early date for settlement, according to an announcement made by Hon. R. G. Reid, provincial treasurer and minister of lands and mines. Announcement as to the particular areas will be made later on, when necessary investigations are completed. Areas will include certain tracts in the west central portion of the province.

Saskawahadahai—for the meaning of this word—Opera House, April 29 and 30

ANNOUNCEMENT

Owing to present agricultural conditions, I have reduced my fees $5 per cent. on a cash basis.

Dr. C. H. Grunert.

COMING EVENTS

The Ladies Aid of the United Church will hold their regular meeting at the home of Mrs. F. Baker's on Thursday, April 6th, at 2:30 p.m.

"Keep Easter Monday open for St. George's W. A. Dance. Watch for further announcements.

The St. George's W. A. will meet at the home of Mrs. L. D. van Ittfland on Thursday, April 6th, at 3 o'clock.

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held in the Union Hall on Thursday, April 13th, at 2 p.m.

A paper will be given on "Roses and Gardening Hobbies". There will also be a demonstration of hand made rugs.

New members invited.

The Ladies Aid of the United Church will hold a sale of Home Baking and Baked Beans on Saturday, afternoon, April 8th, from 2 to 6 o'clock at Jones, Graham & O'Brien's store.

The Junior U. F. A. will present a three act Comedy-Farce "HAPPY FIRST" at Josephburg School on FRIDAY, MARCH 31st. It will also be presented in the EMPRESS THEATRE on FRIDAY, APRIL 7th. at 8 p.m.

St. George's Tennis Club will hold a meeting in the Rectory on Thursday evening, April 6th. All members are asked to attend.

Meeting of the Fort Community Tennis Club on Monday, April 10th, in Dr. Calhoun's office. Report of officers, election of new officers. Old members requested to attend. Any others interested in tennis welcome.

A light Opera "The Rajah of Bajapore" will be presented in the Empress Theatre on Friday and Saturday, April 28th, and 29th, by a chorus of 50 voices under the direction and supervision of Mr. Hugh A. Watt.

David Gunn is Elected In Division No. 1

David Gunn was elected by a majority of five votes over Andrew Gillies in an election held at Baker School on Saturday, April 1st, to elect a councillor to represent division No. 1 in Clover Bar municipality No. 217.

CONSOLIDATE TAX ARREARS

Consolidation of tax arrears for payment over a period of six years is provided in a bill introduced into the legislature

A NEW ACT ON BINDER TWINE PURCHASERS

The act provides that any person who sells binder twine on credit to a grain producer may obtain from the purchaser a crop mortgage note which in turn is designed to respond to the demand of the government making guarantees to the banks by placing security in the crop grown in the year which the twine is sold.

CHANGE IN DISTRICT COURTS

Formation of two district courts in this province, instead of three being one in each of the sixteen judicial districts, is provided for in a bill to amend the District Courts Act just submitted to the legislature. The act provides for one district court in Northern Alberta, having jurisdiction in the territory north of and including Red Deer. The district court of Southern Alberta would function in the region south of Red Deer. Five judges would comprise the district court of Northern Alberta with a similar number for the Southern Alberta territory.

DIED

Mr. F. G. Stuckey and family wish to extend their sincerest appreciation for flowers and spiritual offerings received, also tokens of kindness and sympathy from their many friends during their recent bereavement.

The funeral service of Frances M. Stuckey, beloved wife of Frank G. Stuckey of Fort Saskatchewan, who passed away on Sunday, March 26th, aged 55 years was held on Wednesday afternoon at 2:30 o'clock at St George's Anglican Church. Rev. Christopher Reed officiated and interment took place in the Fort Saskatchewan cemetery. The pallbearers were:—Messrs. J. S. Wright, H. Atkinson, A. Wooston, W. A. Graham, R. Magor and O Lamoureux.

Beautiful floral tributes were received from: The family; Mrs. H. Hanlon; Mr. and Mrs. McAmond; Mr. and Mrs. A. Ostowell; Mr. and Mrs. A. Cameron; Mr. and Mrs. Ed. Allston; Mr. and Mrs. S. Corcoran; Mr. and Mrs. Otto McLellan; Mrs. F. Hanlon and Sons; Mr. and Mrs. Lloyd McIntyre; Mr. and Mrs. J. Hall; Mr. and Mrs. Gavin Brockenridge; Mr. and Mrs. M. Hanlon; Mr. and Mrs. E. Hanlon; Mr. and Mrs. Art Irwin; Mr and Mrs. S. Harten; Mr. and Mr. Jack Corcoran; St. Georges W. A.; Mrs. Trubenco; Mrs. E. A. LeRiche and Hilton; Mr. and Mrs. Bullock and Winnifred; Mr. and Mrs. F. A. Boyle; Mr. and Mrs. D. J. Smith, Poncha; Rover Scouts and O. Lamoureux, R.S.M.; Mr. and Mrs. A. Wooston and family; Mr. and Mrs. A. Cuxford, Alice and Mable and Jack; Mrs. Brockenridge and family. Mr. and Mrs. C. Magor and Dick; Mr. and Mrs. James Graham and daughter; Mr. and Mrs. J. Earl Graham; The Senior Hockey Club, Fort Saskatchewan Branch Canadian Legion; Mr. and Mrs. W. R. Clark and family; The Atkinson family.

She is survived by her husband, two sons, George T. and Roy W., both of Fort Saskatchewan, one daughter, Mrs. Albert Cameron of Vancouver; her mother, Mrs. Sarah Hanlon of Fort Saskatchewan, three sisters, Mrs. William McAmond of Calgary, Mrs. Alf. Ostowell and Mrs. W. M. Clark, both of Brenner, Alberta, and one brother, William J. Hanlon of Lloydminster.

FERTILIZERS CAN BE APPLIED TO GARDENS

Working in the ground well after plowing or spading. For garden crops and flower beds this is a very good method, as the grower is not so much concerned with the amount of fertilizer required, as he is with the final result; tender, early, crisp vegetables, and beautiful flowers.

Working in fertilizer at the rate of one ounce per square yard before planting is a very good practice. Before planting seeds or transplanting plants, add to the furrows the amount given in the directions and work well into, and mix well with the soil. A reminder or the with holes punched in the bottom makes a handy fertilizer distributor for the garden. Then work into the sod with a rake.

Side Dressing. Fertilizers can be used to advantage at intervals through the season by side dressing in trench or furrow along the row or around the hill, either by using the solid fertilizer, or by a water solution, as a liquid manure application. (A heaped teaspoonful (one half ounce), dissolved in a gallon of water, apply along the trench or furrow).

Repeated applications at subsequent intervals of four or five weeks is a very good practice for vegetables. If this last method is employed, use small quantities.

These are general suggestions. The gardener should realize many methods can be used, but best results are obtained when small quantities and more frequent applications are made.

TOWN HOST TO FARMERS

Vermilion Will Invite Farmers To Free Community Day

The Vermilion Board of Trade has decided to sponsor a community day at a date to be fixed for June or July next. The board of trade, backed by the citizens generally, will be hosts to the farmers of the district and their families, the program to be arranged to include sports, baseball events, horse racing, winding up the day with a big dance. Everything will be free to the visitors.

A strong committee has been appointed to arrange details and it is anticipated it will bring together the largest gathering of people in the history of the town.

ALBERTA PILOT HONORED

For the third time an Alberta air pilot has won the McKee trophy for the most conspicuous air service in Canada. The trophy for 1932 goes to Captain Maurice Burbridge of Edmonton. Two other Edmonton pilots had won the trophy in previous years.

Fear Controls The World.

Conditions throughout the world today demand and should command the serious attention and earnest thought of all people. In this particular article we are not referring to the general economic troubles of the world. They are in large part the result of other conditions to which specific attention is here directed, namely, "Fear" which possesses so many nations and peoples and which is finding expression in various countries in what may best be described as "reign of terror."

Our daily newspapers are filled with reports of the persecution of this or that race of people, or of groups adhering to this or that religious sect, with resulting outrages, boycotts and killings. Some of these reports are no doubt exaggerated; some possibly entirely false, with propaganda for this or against that the underlying motive. But making due allowance for all this, the fact remains that persecutions and outrages are being perpetrated in many lands. This is inevitable when democratic forms of government are overthrown and dictators take control of government and the affairs of nations, directing not only their national and international affairs, but the very lives of the people.

To all practical intents and purposes the German republic established after the Great War has disappeared, democratic forms of government suppressed, and a close dictatorship set up. This has resulted immediately in a nation-wide persecution of the Jews, which has overspread the people in all nations. It is a religious persecution reminiscent of the dark ages.

In India every effort of the British Government to grant more responsible government to that great country with its teeming millions of people is frustrated by reason of the bitter racial and religious antagonisms existing between Moslems and Hindus and the impossible caste system prevailing which shows no a gas of breaking down.

In Russia every conceivable effort is made to destroy all religion, and to set up in its place a cult of State religion of communistic socialism with Lenin as its god. Justice as we know it in this country does not exist; rather a reign of terrorism prevails with no person being able to call his soul his own, the whole upheaval by a huge standing army, and with the acts of war being taught in every factory and on every collectivist State farm.

Europe is armed to the teeth, each nation obsessed with a narrow nationalism, alive with deadly racial and religious suspicions and hatreds. Every effort to achieve any substantial disarmament has failed because of the all-prevailing "Fear," and we find the British Prime Minister and his Foreign Secretary hurrying the leading capitals of Europe in a desperate effort to prevent a complete breakdown of the Disarmament Conference and another great war.

Japan wages undeclared war on China, and meets the condemnation of its conduct by the League of Nations with defiance to that world body, resignation of it, and withdrawal from it.

Even in our own country we have tribunal which commits, sometimes, those Provinces, even the Dominion, Lawyers into turmoil based on objections of one portion of the population to the religious views, or because of the racial origin, of another portion.

All down through the ages of the past the longest and bitterest wars have been fought in the name of religion. The bloodiest pages of human history record deeds primarily done in the name of and sanctified by religion. And the world seems to be headed for another holocaust of war, the first contagion in the eruption being manifested by such events as are now reported from Russia and Germany.

It is "Fear," which stalks in the nations today, that is primarily and chiefly responsible for the financial and economic troubles in Canada, the United States, Great Britain, the whole world. Remove that "Fear" and all peoples would settle down to their usual occupations in life, and living would become sweet and the world happy and prosperous.

Canada suffers because the whole world suffers, and the world suffers because of the present state of men's minds. It is not the political or economic systems under which the world has been progressing that have broken down so much as it is the morale of men which has been weakened by reason of a remorseless of the perverted views of the dark ages.

Canada wants concord and peace. It is the only foundation upon which it can develop and prosper. Therefore, it behooves all Canadians, irrespective of their creed origin, their religious beliefs, their racial and political opinions, to throw their whole weight into the balance in favor of world tournament. And the most effective way in which that can be done is to now and forever repudiate all the old racial and religious prejudices which have spoilt our national life on many occasions in the past. The fervor of such an example from Canada would not be lost upon other nations.

Over Two Million Feet

Twenty-six firms were engaged in manufacture of hardwood flooring in Canada in 1931. New materials (rough lumber and logs) cost $3,497,- 103, and the value of the finished product was $4,889,716.

U.S. Leads In Apple Production

Apple orchards of the world are estimated at 7,140,000 acres, with a yearly production of 600,000,000 bushels. Canada supplies only 3.4 per cent. of the total, the United States being in the lead with 38 per cent.

Paper Stamps

A year's refuse from London's theatres would cover an area of 35 acres to a depth of nine feet.

Great Lakes' Fish Yield

Report Shows Lake Erie Leads In Annual Catch

The fish yield of the Great Lakes for the ten years between 1921 and 1931 has totalled in the neighborhood of half a million tons the United States Bureau of Fisheries reports. Actual figures issued by the bureau for that period covering the four Great Lakes and including Lake of the Woods, Rainy Lake and Nipigon Lake show a yield of 988,173,000 pounds of commercial fish or 494,086 tons, exclusive of a considerable catch from the Detroit River, St. Clair River and Lake St. Clair.

The catch of commercial fish in 1931, the last year for which a report has been made, covering all the Great Lakes was 81,270,000 pounds, in 1930 94,548,000 pounds and in the previous year 85,760,000 pounds. Between 1918 and 1928 it ran from 89,000,000 to 97,000,000 pounds.

The annual catch from Lake Erie runs almost twice as high as from any other of the five Great Lakes. Lake Michigan holds second place in this respect and the others in order of their importance, are Lake Huron, Lake Superior, and Lake Erie for the last ten years has run from 18,000,000 to 26,000,000 pounds a year while from 1918 to 1928 it averaged 30,000,000 pounds. Between 1914 and 1928 it ran from 39,000,000 to 97,000,000 pounds.

Oldest Canadian Champion Aged Skater

Prince Edward Island Man At 68 Takes Sixth Title

In Joseph E. Arsenault, the town of Wellington, Prince Edward Island, believes it has the champion aged skater of the world. With 93 years to his credit, Mr. Arsenault has been duly acknowledged victor with a skating exhibition at the rink this winter.

With energy and vigor extremely rare in a man of his advanced years he has "worked out" almost every day that ice has been available for the last three years and hopes to continue, at least, until he has spanned the remaining seven years which separate him from the century mark.

The powerfully muscled limbs which still drive him over the ice at a good clip were developed, the aged skater says, in the days when as a youth he taught school at Cheticamp. He lived about seven miles from the school and it was his habit to don the blades and skate the full distance to the school house each morning that ice conditions permitted.

This practice, coupled with "right living and moderation in all things," has left him in a state of physical perfection which belies his years. His father stood him in good stead during his 36 years of railroading and the subsequent years of retirement. To-day, he is still able to step off a lively jig with all the vim of a man 40 years younger.

NEIGHBORS TALK

"I am employed in a theatre and it is a problem to make ends meet, as I have support my wife and seven children. I like to dress well but haven't very much to spend on clothes. To give the appearance of variety to my slender wardrobe I change the color of a shirt or stocking as often as the things become faded. I always use Diamond Dye for the reason that I can get any color I desire and as little for stockings. I have always gotten such perfect results that my neighbors talk about the great number of "things I have."

I learned about Diamond Dyes from our wardrobe mistress. She says she has used Dyes for years and is the smartest but same do such splendid work and we owe her lots for the improved Dyes. I understand they are the world's most popular dyes—and they deserve to be."

L.P., Montreal

Old London Newspaper

Copy Of the St. James Chronicle Of the Year 1797 Found In Saskatchewan

On a recent round of inspection in southern Saskatchewan, Inspector George Binning, R.C.M.P., Swift Current, picked up a very interesting copy of an old London newspaper, the St. James Chronicle. The paper, a semi-weekly, is dated June 24-27, 1797, and is in good state of preservation.

The front page head is centred with the crest of King George IV., and there are personal items regarding the royal family, note being made that his majesty had been riding until 2 o'clock, when he returned to Kew, and that "his grace and party" came west out airing in post coach and four and returned to the lodge about nine.

On the front page appears an announcement of the Irish state lottery, drawings in which were made at licensed state lottery offices, half shares costing three pounds, 13 shillings and a penee.

Another item contained a speech by President Adams to the United States Congress, delivered more than a month previously, May 16, 1797.

Race Hard On Horses

Canada Ad Absives Where Grand National Is Run In Most Difficult

The most difficult race for horses in the Grand National, over the famous steeplechasing course at Aintree, England, near Liverpool. From 60 to 60 horses start in the event, which calls for four and one-half miles of running and jumping over the 30 barriers. Crowds ranging from 200,000 to 300,000 are in the stands or with lining the racing strip. Few horses finish. In the decade from 1900 to 1910 only 75 of the 320 horses that faced the barrier reached the judges stand.

"Book Of Remembrance"

Barry Lake Being Taken To Make It Imperishable

The following article is by Grant Dexter of the Regina Leader Post, Ottawa Press Bureau:

Astor Pantages Lookout, Ontario, has received orders to undertake a contract of especial interest to many people.

Mr. Purvis will write Canada's Book of Remembrance." He will write by hand and in imperishable ink, the names of 68,000 Canadians who were killed in the Great War. It will take him at least five years to do it.

Mr. Purvis will begin where the technicians and scientists left off. He will work with the most carefully selected materials that the wit and knowledge of the best brains in Canada's service can assemble.

The material going into the "Book of Remembrance," has been selected with painstaking care. Take the matter of ink. For six months the scientists have been working to produce an imperishable compound—one that will never fade, or encrust, or age and outgrow the page. While not withstanding the unsettled conditions prevailing at that time. And although economy conditions existed in the government, figures to hand show that February, 1933, was the biggest month in the history of the Rogers-Peet Company for the production being shown in every department.

This substantial sales increase is due, largely, to the introduction, during the last year, of several popularly priced fancy lines. Grocers and thirty housewives alike were quick to recognize these real bargain values. The fact, too, that the Company is now able to guarantee fresh deliveries every day from Winnipeg to Vancouver Island is stimulating sales to the point that new high records are expected.

Game Bird For Saskatchewan

Five Hundred Pheasants Are Sent By North American Government

Saskatchewan's wild bird life population was increased by 1,000 pheasants when several carloads of this beautiful game bird arrived from North Dakota.

The pheasants were sent to the game branch of the Saskatchewan government in exchange for pictured eggs shipped from Jack Fish Lake to the North Dakota government.

The birds will be distributed widely throughout the province, stated Major John Bignell, deputy minister of natural resources, while 600 or 800 will be retained at the wild animal park at Moose Jaw. The birds at Moose Jaw will form the nucleus of a hatchery from which eggs will be distributed to all parts of the province.

Tokyo, Japan, has a building boom.

If The World's Entire Supply Of Gold Was Assembled It Would Occupy But Small Space

All the talk of gold the gold standard the lure of gold, the hoarding of it drives professors at New York University into a corner the other day, and when they came out they revealed that if the world's annual supply were brought together it could be stacked away into a couple of four-story brownstone fronts.

Its some fancy figuring says the New York World Telegram they discovered that since Columbus came to America there have been produced in the world 1,100,000,000 troy ounces of pure gold, worth in United States money approximately $23,000,000,000. This they said is the equivalent of about 63,526 cubic feet of gold, and would make a cube 39 feet 11 inches on each side.

They then showed what has become of it.

In gold coin and bullion through out the world there are $60,000,000 troy ounces, worth $12,000,000,000 and occupying 21,544 cubic feet, and would make a cube 27 feet 4 inches on each side.

Included in this is the imperishable "Book of Remembrance," has been selected with painstaking care. Take the matter of ink. For six months the scientists have been working to produce an imperishable compound—one that will never fade, or encrust, or age and outgrow the page. While not withstanding the unsettled conditions prevailing at that time. And although economy conditions existed in the government, figures to hand show that February, 1933, was the biggest month in the history of the Rogers-Peet Company for the production being shown in every department.

This substantial sales increase is due, largely, to the introduction, during the last year, of several popularly priced fancy lines. Grocers and thirty housewives alike were quick to recognize these real bargain values. The fact, too, that the Company is now able to guarantee fresh deliveries every day from Winnipeg to Vancouver Island is stimulating sales to the point that new high records are expected.

Largest Telescope in Britain

Building At Greenwich Now Ready To House Big Instrument

A new 26-inch telescope largest in England, will soon be installed at Greenwich Observatory. The building which will house the instrument is now ready and the telescope itself is erected on a temporary state at the works of the Newcastle firm which is making it. It will not be ready for use for some months. Although much smaller than the instrument at the Mount Wilson Observatory in the United States it is probably the largest to be erected in the British Isles. The climatic conditions are not such as would make a cube 39 feet 11 inches on each side.

They then showed what has become of it.

In gold coin and bullion through out the world there are $60,000,000 troy ounces, worth $12,000,000,000 and occupying 21,544 cubic feet, and would make a cube 27 feet 4 inches on each side.

About 150,000,000 ounces of gold are estimated to be hoarded in India and the Orient. It is worth $4,000,000,000 and is equivalent to 6,382 cubic feet, making a cube 20 feet 3 inches on each side. The Bank of England's reserve than this three years ago, but high prices have brought some of it out of hiding places in India.

"It is impossible to make any accurate estimate of the gold in use in the form of jewelry, spectacle frames and gold teeth, but still theoretically available," the professors pointed out. "Probably 100,000,000 ounces is a reasonable figure. This would be worth $2,000,000,000 and would occupy 3,191 cubic feet and would make a cube 10 feet 5 inches on one side, the cube of gold estimated to be hoarded in the East."

Out of the total gold known to have been mined since the discovery of America this leaves about 220,000,000 ounces unaccounted for. It is worth $4,000,000,000, equivalent to 13,438 cubic feet, making a cube 23 feet 8 inches on one side. It has been lost or used up.

Before Columbus' time the world's gold stock probably did not exceed $1,000,000,000.

As to gold reserves still in the mint, it is stated, the professors said, that they are diminishing so rapidly that either new supplies must be discovered or new methods of extraction devised if the output is to keep up. A rough estimate of minable gold known to be in mines in not even 400,000,000 ounces worth $8,200,000,- 000, equivalent to 22,955 cubic feet and making a cube 28 feet 5 inches on one side.

Much larger amounts of gold are known to be present in low grade ores, not profitable to work under present conditions.

But by far the greatest amount of gold of which science has any certain knowledge is that supply in the water of the seven seas.

"Quantitative estimates are very uncertain because the gold content of sea water varies from place to place in the ocean and has not been surveyed accurately," the professors said.

"A minimum estimate, based on the best available data and assuming about two-tenths of a grain of gold in a ton of sea water, indicates that the total gold in the ocean is at least 50,000,000,000,000 troy ounces, or about 10,000 times as much as has been mined since Columbus discovered America. This would be worth $1,- 000,000,000,000,000. It would equal 227,000,000 cubic feet and would make a cube 720 feet on each side."

It would if they could get it out, but despite the chemists' repeated efforts to extract oceanic gold by cheap processes, they don't know how.

The Hungarian partridge feeds to a very large extent on weed seeds.

Britain Always Ready To Make Sacrifices

But Other Nations Are Not So Ready To Follow Suit

Some weeks ago Mr. Neilan declared an embargo on the shipment of arms to Japan as it stands. When the government made this announcement it expressed the hope that other nations would fall in line and that the war in the Far East might thus be localized and confined. Other nations have not seen fit to do so, and the embargo has been of little effect. Japan has found little difficulty in securing arms from other countries.

Mr. Neilan's action was made possible by the fact that Britain has already established a control of the trade in munitions. Such control is necessary if the embargo is to be effective. Without it, arms can be shipped from any country where cannot higher cost can be obtained. Without it, the embargo would be worse than useless. It would be a trap for the unwary. Britain has established this control.

Peace has been in the case of war debts. She has repeatedly offered to forgive them. Her people as she asked others to forgive her, but all to no avail. So it has been in the case of disarmament. The British have reduced their defence forces on land at sea, and in the air far below the requirements of a world-wide Empire, and far below the outgoings of a huge navy, a colonial and mercantile fleet known on its laughing mate. A land army is practically nil, and there to her own people. Some of the other nations have not done their part. The British Government has confessed that it cannot go on disarming unless other countries play the game. Recently Premier Ramsay MacDonald and the Irish Free State are battling against what appears to be an immanent failure of the World Disarmament Conference. Toronto Mail and Empire

Special Stamp Issue

Ask For Special Series of Stamps For World's Grain Show

In answer to a special series of stamps to commemorate the world's grain exhibition and conference in Regina will be proposed shortly to the postal authorities.

Sometime ago a proposal for a special issue was placed before him Arthur Sauve and it was turned down.

It was said that the cost of the special issue would be too high to be justified at present.

Sponsors of the proposal are preparing another appeal to Mr. Sauve Special despatches from Ottawa indicate that the postmaster general will make the final decision in the matter.

583

DELIGHTFULLY SMART AND COMFORTABLE

Easy to make, easy to launder. Today's fascinating pattern is a versatile one. It is for frocks in dainty materials and also for those of sturdier character.

Navy and red and white dimity with pique white inspired the first model. Its darling two frills over puffed edged.

You can imagine it also lovely in sailor-blue linen with white organdie.

Should sturdy cotton be your choice, you've only to omit the frills. You may then bind your edges. For the collar a plain and white piqued collar. Use the candy stripe on the cuffs for binding.

Style No. 583 is designed for sizes 14, 16 and 18 years.

Size 4 requires 3½ yards 36-inch, with ½ yard 35-inch contrasting.

Price of pattern, 20 cents in stamps or coin (coin is preferred) Wrap coin carefully.

Sir Arthur Currie Deplores The Spirit Of Despair and Failure Which Has Seized Many People

Artist Carves "Fairy Tree"

Children In Melbourne, Australia, Go In Hundreds To See It

A remembrance of elves, gnomes, sprites, birds and animals has appeared in the Fitzroy Gardens, Melbourne, on the grassed red gum tree Children go in hundreds to see it.

The magic wand which commanded this strange land into the shady glades was the sharp carving instruments of Miss Gia Cohn the sculptor, whose art the Fairy Tree is likely to express for many years to come.

Miss Cohn, who is an Associate of the Royal College of Art London, returned to Melbourne last year after nearly a year's study in England and on the Continent. She got the idea of a Fairy Tree from one she saw in Germany, and after a look through the gardens of Melbourne she chose the great trunk of a gum tree estimated to be 300 years old.

Using the niches and the crevices on the knots and protuberances, the little figures emerged upon the wood A bank, Australia's little native bear, carries a tiny baby bear on her back a pygmie elf rides on the back of a great stalking saving a frush in his hand to protect himself against a snake which is creeping slyly out of a knothole A kangaroo interestedly watches a cockatoo's behavior between his knees and an emu inquisitively arches his head round to see what is going on behind. Just below the outspread fan of a huge eagle a potato rat bonebourne looks down on his laughing mate. A lizard or two creep here and there to bee own people Some of the other animals have not done their part The British Government has confessed that it cannot go on disarming unless other countries play the game Recently Premier Ramsay MacDonald and the Irish Free State are battling against what appears to be an immanent failure of the World Disarmament Conference Toronto Mail and Empire

M CHALMPIN EATS HIS "HAT"

This is not a gramophone record-eating competition but Fender Champion tasting the gold gramophone record presented to him to commemorate his uninterrupted consultation for over thirty years with a famous British gramophone company. The gold record is a replica of the record of "The Volga Boatmen," which has been the best seller of any of the famous Russian boss's records.

A strong plea for a recapturing of the spirit which characterized the sons of the Canadian Corps and the pioneers of Canada in order to overcome the present national difficulties was made recently at Bowmanville, Ontario, by General Sir Arthur Currie former commander of the Canadian Corps in France. He deplored the spirit of failure and despair which had seized so many people and pleaded that harmony and goodwill mutual trust and confidence were essential to bring the ship of state safely into harbor.

Recounting some of the experiences of the second battle of Ypres in April, 1915, Sir Arthur told of the young Canadians around him standing unafraid, and their only question was what do you want us to do."

"Today, after eighteen years," he said "the memory of those immortal men and boys comes to us as an inspiration. And today, against whatever is doing the caches and the crevices on the knots and protuberances, the little figures emerged upon the wood A bank, Australia's little native bear, carries a tiny baby bear on her back a pygmie elf rides on the back of a great stalking saving a frush in his hand to protect himself against a snake which is creeping slyly out of a knothole A kangaroo interestedly watches a cockatoo's behavior between his knees and an emu inquisitively arches his head round to see what is going on behind. Fast Readers Are Best

Test Shows They Remember More Of What They Read

Fast readers are better readers than slow ones, an educational survey has shown.

Evidence supporting this contention of economists noted and reported at the University of California by Dr John A. Hockett, ass stant professor of education, after a series of tests with his students.

The fastest readers remember more of what they have read than slow readers, Dr. Hockett found. He asked 30 questions of his students, based on text they had read in two minutes.

The group of students that read fastest answered an average of 12.7 questions correctly, the middle third answering 11.8 questions correctly, and the slowest reading third answered only 10.4 correctly

The group tested by Dr. Hockett was composed mainly of graduate students in education. The students read at speeds varying from 310 to 320 words a minute, with the average rate 305 words a minute The test dealt with educational subjects.

A group of teachers in an Oakland elementary school, given the same test, read at an average of words a minute with individual rates and maximum of 400 and words a minute.

Wheat exports

Wheat exports from Vancouver for the current crop year to date now total 60,750,302 bushels, and it is expected the record movement of 90,- 407,519 bushels established during the 1930-31 season will be exceeded.

Poke Around Her Heart

Third Out After Being Choked Unconscious

Mrs. Mary Brown, Hotel Cumberland, writes:—"Last fall I had pains around my heart, and in morning, after being choked unconscious, I seemed to get sleep all night and out.

Seeing that Milburn's Heart and Nerve Pills were highly recommended I sent for a box and after taking the Pills for a short time I felt a change for the better. Since then I have had no return of the sleepy spells and pains around the heart."

Price 50c. a box, 3 for $1.25, at all dealers or mailed direct on receipt of price. The T. Milburn Co., Ltd., Toronto, Ont.

WORLD HAPPENINGS BRIEFLY TOLD

The famous international horse show in London, has been abandoned for this year.

A record, probably without parallel in the Dominion, is one held by Guelph, Ontario, where not a single member fatality occurred within the city limits during 1932.

Major W. H. Gladstone Murray, M.C., permanent official of the British Broadcasting Company, has arrived in Ottawa to begin his temporary duties as advisor to the Canadian Radio Broadcasting Commission.

Construction of a $ 875,000 oil refinery in Calgary is planned by Federated Oil Consumers, Ltd., Harold J. Mahony, chairman of the company's board of trustees states. The plant's capacity would be 250 barrels a day.

Alberta's legislature has adopted a motion presented by Premier J. E. Brownlee, urging the Dominion Government to call as soon as possible a conference to discuss changes in the British North American Act.

England will probably not be represented at the Canadian Rhodes centenary ranges, Ottawa, this August, Lord Cuthbert, president of the National Rifle Association, who "Grave financial conditions would prevent" the sending of an English team.

Broadcasting Hat Now

Had Its Origin In Halifax Over Thirty Years Ago

If you think broadcasting is something new, read this from the Halifax Herald: "Broadcasting, considered new within the last few years, had its origin in Halifax more than 30 years ago, when the unusual experiment was made in the old academy of music. The Baker Opera Company was playing there. Creighton Mitchell, now of Wolfville, then an employee of the New Scotia Telephone Company, rigged a large funnel over the stage, placed a telephone microphone in the mouth of the funnel, and carried the program over telephone wires to the telephone company's building, where it was enjoyed by all the staff."

WHEN IN THE PUBLIC — THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Liver people take bad news seriously and get blue and grouchy. Their livers don't pour enough bile into the bowels to digest the food. Then the food rots and ferments and poisons the system. Gas presses on the heart. You feel sick and miserable, vomiting is frequent, constipation sets in. Your head aches and you feel all gone inside.

Carter's Little Liver Pills will soon get the liver working right. Then you feel like a new person. Ask for Carter's Little Liver Pills. Refuse substitutes. 25c at all druggists.

CARTER'S LITTLE LIVER PILLS

W. N. U. 1933

Winter Had Fresh Winter

Lowest Temperature Recorded Was Seven Degrees Above Zero

Yachting on the harbor was not the only unusual incident of this fresh winter in Halifax. For the first time since weather records were first begun in the city about 60 years ago, the mercury failed to drop to zero during the months of December, January and February.

Mean temperature during February was 20.2 degrees, or nearly six degrees higher than the mean mark of 26.09 established during the last 30 years, according to figures compiled by Frederick B. Benman Dominion meteorologist here.

The coldest day of the winter was Feb. 11, when the temperature was seven degrees above zero.

Absence of snow was another unusual feature of the winter. For instance, the total of snow and rain combined in February was 1.31 inches. During the same month last year the total was 17 inches.

SMART! DON'T IT! WITH MANY FOLKS TO ADD THE SMALLER FIGURE

How won't go wrong to choose this jacket dress for your Spring wardrobe!

It's a Flare Favorite

The jacket has the latest interest, the flare! Youthful, too! It is the youthful "boxy" type.

And isn't the dress just adorable? The cross-over neckline is slenderizing, and it has a pretty bow! The panelled cut shirt will make you appear tall and slender. The scalloped cuffing has the effect of diminishing the bust.

The original model was the prettiest rosy-beige sheer rough woolen, with beige and brown checked woolen. The vest was white piqué.

It's an opportunity to have a stunning wearable suit at a moderate cost.

Style No. 879 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 bust measure.

Size 20 requires 4¼ yards 39-inch, with 1¼ yards 39-inch contrasting.

Price of pattern 20 cents. Silver or coin (coin is preferred). Wrap coin carefully.

Makes Domestic Story

American Money Is Spent Here By Queen To Europe

Mr. King George of Greece has the upright carriage, the high, bold tore head, and the small, tied box, legs of his father, the late King Constantine. Although not well off he probably receives his present annual revenue in the distressed exchange which enables his banishment necessitates, and he is regarded for small in London and during their long friendship between Greece and Italy would at times it was broken by Mussolini's insistent bombardment of Greek ships, it would be in the proclamation of a republic. How the King and Queen escaped from the royal palace on that occasion makes a dramatic story. Some months ago Mrs. [illegible] Judge Cary, the American [illegible] visited Athens, and the Queen was in the hot season, and was surprised to find the palace [illegible] Mrs. Cary promised to send [illegible] some cold-dry curtains from America, but finding it difficult to get them through, sent a cheque for 1000 dollars instead, with which they could be bought in Europe. The money arrived the day before the curtains, and it is only by the old that the King and Queen were able to bribe their way out of the country.

Statement Is Denied

Statements Days Have Not Change Other Hours, Is Radio Night

Brown says do not turn time during the long night of the polar region, according to Dr. Vilhjalmur Stefansson, noted Arctic explorer. Science Service quotes him as refuting, in a communication to the editor of Science, the statement made in another magazine that "after a prolonged absence of sunlight, men on polar expeditions find that their eyes, irrespective of previous color, have turned blue."

Dr. Stefansson, in all his long experience in the Arctic, of long nights, could not recall having observed this phenomenon. The statement was alleged to have been supported by an entry in the journal of Captain Scott, British explorer who perished after having reached the South Pole. Inquiries made of Captain Scott's companions and collaborators not only failed to bring confirmation of this supposed fact, but brought statements to the opposite effect. Darkened men see the sun return at the end of a polar night with eyes that are still dark.

Managing a Crowd

England's Police Know How To Quell Disorder Without Violence

Over in England as we have repeatedly pointed out the policeman carries no fire-arms, but only the policeman's baton. Yet when a great crowd of over a hundred thousand assembles in London and there was any disorder and some violence. It was guessed to order and not a shot was heard, not a man was killed. There were no machine-guns, there was no parade of revolvers, there were no sawed off shot-guns, and nobody's blood let in any man's door. England can still show us something in the management of crowds and in the control of human life.—Halifax Chronicle.

Block Gold Stored

More than $ 1,000,000,000 in gold has been hoarded throughout the world in the last eighteen months, League gold experts estimated. Every country, League's statistical report, has contributed several million more dollars in gold this disappeared from world circulation. The hoarding has increased since late in 1931, soon after England went off the gold standard.

SUNDAY SCHOOL LESSON

LESSON X

JESUS REJECTED, CONFESSION AND LOYALTY

Golden Text: "If any man would come after Me let him deny himself and take up his cross, and follow Me." Mark 8:34.

Lesson Mark 8:1 to 9:1

Devotional Reading: Romans 8:31 to 39.

Explanations and comments

Cross-Bearing the Duty Of All, verses 34-38. The Twelve had learned to regard Him as the Christ, and it was as much as they were ready to do further knowledge was brought home to them in practical form by the cross. There was no more need for private consultation after this last journey to Jerusalem, which was to end on Calvary. The first sign of this is the deliberate change in His methods. It is hardly possible that the next step was taken without an internal Jesus was alone with His disciples apparently when the great confession was made. In the next sentence He is at least within call of the crowd that the proximity of the two persons is intended, one would infer, to imply that the new revelation was the direct result of their intimacy. Nor is it likely

Canada's Pole Timber Supply

Interesting Authentic Figures To Meet Steady Demand From Commercial Sources

The steady demand for all elements of wooden poles for telephone and telegraph line construction by Canadian companies has provided problems the solution of which has been one of the important tasks of the Forest Products Laboratories of the Forest Service, Department of the Interior, on all recognized pole species available in the Laboratories and from the records of creosoting and public utility companies throughout the Dominion.

Far Greater Production

Two Thousand Alberta Farmers Apply For Forage Crop Seed

More than 2,000 farmers in the province of Alberta have applied for forage crop seed under the joint federal-provincial plan whereby seed is furnished and grown under special supervision Selection has been made of some 500 of these to whom seed will be granted. This is nearly three times as many farmers as were granted seed under the arrangement last year, which was the first year of the experiment. The object is to promote the greater production of forage crops of high quality in the province.

Hamilton Tobacco Factories

The outstanding feature of the tobacco-growing industry in Canada continues to be the growing importance of the bright flue-cured type, says the "Economic Annalist," published by the Dominion Department of Agriculture. Production of this type has risen from 10½ million pounds in 1925 to 37 million pounds in 1928.

New Typist (after boss has rattled off letter)—I'm sorry, Mr. Tomkinson —went out on you between "Dear Sirs" and "Yours Faithfully"!

Our picture shows the Canadian exhibit in the Empire Marketing Board section of the British Industries Fair in London, England. Canada and two exhibits at the Fair but the one above was sponsored by the Marketing Board whose duty it is to boost Empire products in the British market.

Re-Establishing Elk In Ontario

Fifty Animals From Buffalo National Park Will Be Placed On Reserve Near Original Farm Lands

Canada's leadership in wild life conservation, as witness her success in the restocking of the buffalo, the production of the antelope, and the propagation of the elk (wapiti), is widely recognized and the recent experiments in the re-establishing of the elk in Ontario have attracted widespread attention. The Government of Ontario last fall established a herd of twenty-five elk in a selected area in the Pembroke Crown Game Reserve near Petawawa. These animals were supplied by the Minister of Parks Service of the Department of the Interior from the herd of close to 1,500 in Buffalo National Park, Wainwright, Alberta. The success of last year's experiment led to the proposal to establish another herd on the lands of the Hydro-Electric Power Commission, twenty miles east of Sudbury, Ontario. At the request of the Ontario Fish and Game Department, the Departments of the Interior is supplying two carloads of these animals, fifty head in all. The capture of this herd in one of the paddocks of Buffalo National Park and the subsequent will be shipped east as soon as it is completed.

The shipment last autumn of elk for Petawawa left Wainwright, Alberta, on the morning of November 4, and arrived at its destination on November 13, in excellent condition. The twenty-five head were shipped direct in the car under the care of an experienced park warden, who accompanied the animals and saw that they were fed and watered at proper intervals en route. The animals suffered no disorder during their five-day journey and all arrived safely. The area on which the animals were placed was once part of the natural habitat of the elk, but they have long since disappeared from the district, owing, no doubt, to the advance of civilization.

In introducing the National Parks of Canada, one of the objects was the conserving of wild life. Much park is a wild life sanctuary, and were it not for these sanctuaries, many species of wild animals would, undoubtedly, have disappeared or been greatly depleted. These reservations serve the purpose of the distribution of species of wild life within their confines, and act as reservoirs from which depopulated areas may be replenished.

The Darkest Hour

Queen Of Sorrows May Lose Its Tragic Away

Toward the end of every luminous depression in history, an economic depressed psychology always developed. There is nothing new or strange in this; the same mental conditions obtained toward the end of every depression in a hundred years of business and stock market history. The darkest hour preceded dawn—this is as true in business as in relation to outer phenomena. The hopeful thing about it all is that this state of thought invariably heralded the commencement of better things.—Augment, San Francisco.

July, 1924, is the time set for the opening of the $60,000,000 Mooney tunnel in England.

For Freight Rate Adjustment

Basis On Butter Shipments Is Protested At Regina

An application was made by the Saskatchewan Co-Operative Commission for a reduced scale of freight rates. The application was supported by the representatives of the Saskatchewan Government, placed before the board by George H Smith, traffic and freight rates expert.

His decision was given and permission was granted to the railways to submit written argument, on the condition that a copy of their submissions be sent to Mr Smith.

Briefly, the application asks for:

1. The establishment of fair and equitable rates from Saskatchewan shipping points to eastern Canada on all butter shipped from those points.

2. The inauguration of a similar rate policy on Saskatchewan butter as now applies to Red River Valley, Northern and Southern Pacific Railways have adopted on butter shipments from Minnesota and North Dakota, transcontinental, which provides for a special commodity rate from butter producing stations to final marketing points.

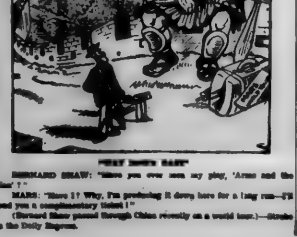
Fallen From Grace

Judge Sentences Golf Champion

During an ice skating tournament in Lingay Fen, in London, recently, fifty policemen were chosen in order to better control the long lines of spectators. The "Bobbies" were to act as point skaters and sailed up and down the track with the graceful gestures of the Russian ballet. Several British amateur championships were decided at the event.

Judge—You, a respectable young man, stole a coat! In consequence you have lost your past, and brought trouble and sorrow to your parents.

Accused—Yes, and it was too tight.



BERNARD SHAW: "Have you ever seen my play, 'Arms and the Man'?"

MARS: "Have I? Why, I'm producing it every here for a long run—I'll send you a complimentary ticket!"

(Forward three pound through China recently on a world tour.)—Strube in the Daily Express.

Had Record As Horseman

John Wesley the Evangelist Travelled Thousands Of Miles In Saddle

Equestrian statues to soldiers are quite common, but the statue recently unveiled at Bristol to the Rev John Wesley, may be unique in that the evangelist is shown on horseback It was at Bristol when 33 years of age that John Wesley preached his first open-air address, and from there he set out on one of his horseback tours by his message to the people of England. John Wesley, if not the first circuit rider, was the greatest of all, he came he spent more time in the saddle than any man in the world who has ever been honored with an equestrian statue. His annual preaching beats that of any cowboy or lumberman who ever lived.

In his Journal, under date March, 1778, he states that he had then ridden, "above a hundred thousand miles." He died 21 years later, in March, 1791, aged 88, and he was still riding in his eighties, though latterly he used his carriage when journeying for the longer stretches.

Of the 250,000 miles he travelled in his 53 years as an itinerant preacher, by far the greater part must have been on horseback And as to the time he spent in the saddle, it must be remembered that he spent at a pace which allowed him to read.

"History, poetry, and philosophy I commonly read on horseback, having other employment at other times," he said. And he timed his hours later on to his neck while engaged with his books.

Riding with a shrub rein saved him from accident, and he observed: "I scarcely ever remember any horse except two (that would fall head over heels any way) to fall, or make a considerable stumble, while I rode with a slack rein." It will "prevent stumbling, if anything will; but in some horses nothing can."—St. Thomas Times-Journal.

The chickadee is as much at home hanging upside down as it is in an upright position.

Gardening Notes

By Gardener Thomas Smith

In the small garden vegetables cannot be planted to those things which cause their freshness quickly after picking and consequently are sold in small quantities often and usually at the immediate locality. Peas and beans, carrots, peas, Chard, celery, sliced cucumbers or tomatoes and the natural attractiveness that they possess, every morning they take a half-teaspoonful of Kruschen Salts in a glass of warm water before breakfast.

They do this every morning without missing one for it's the only dose that takes off the fat." I get some news day before yesterday that cut me up pretty bad

He waited for her to comment, but she said nothing You remember last winter I said my father was in poor health? I got a radiogram night before last about about him."

Elizabeth understood that his father had died She was quite well aware that Haskell was not exactly stricken by the news, though he was trying to play upon her sympathy

She wondered why he was discussing the matter with her now

As he went on talking of it, she began to see his reason He mentioned the big country estate outside of Chatham, the town house in Ottawa, the extensive and valuable timber limits up the Klamiki. When he hinted at himself being the only heir and the owner of all this, she saw his whole drift

The news left her entirely cold. From his treatment of Alan she knew how utterly mad and dishonorable he could be He was trying to bait her She caused unnecessarily at him for being so crude about it thought to make her his Ottawa mistress

The affections of such a man were evanescent at best, and certainly he refused to build upon. Imagining her relatives with this man if she ever allowed herself to become dependent on him, she saw him starting off marriage by the old throughare dodges, and at last turning coldly away from her, as he had done in time would go farther than Haskell and his Cobbsen estate. Alan was honest, he could be depended upon.

Angry and contemptuous she arose, "I've got to go. But there's something I really must thank you for, Inspector."

"To thank me for?" He too had risen; he was leaning toward his visitor. "I'm glad . . . I didn't know I'd done

"You didn't intend it as a favor. But it was. I'm very grateful." Then she went on: "Last winter Alan was offered a very splendid position in Victoria. I wanted him to take it. You may be two a non-com with no prospects, and that was somewhat as I felt. He didn't want to leave. He wanted to stay in Ottawa and live here in the North. Just when he was wavering, you forced his hand. You made him keep on duty, and so you made our marriage possible. I'm awfully grateful to you, really. You didn't realize what a favor you were doing."

She left him standing there, staring after her, dazed and speechless.

That same evening, only an hour later, Haskell made it necessary so startling that in some measure it took his tortured thoughts away from Elizabeth.

A knock sounded on the door, and Whipple came in with a report.

"Sir, last week I missed fifty gallons of gas and five of oil from our stores. I thought it might be a paper mistake, but today I checked up again and we're short still more."

"And what about it?" Haskell snapped.

"Nothing, sir; nothing at all," Whipple said hastily. He saw that his chief was in a vicious mood, and he barked away to the door. "I just thought that you would like to know, sir." Most likely some half-breed with an outboard motor is stealing this, sir." And he closed the door quietly.

Alone again, unable to bear his stinging thoughts, Haskell turned in desperation to the service radio set in an effort to distract himself As he had done on evenings past, he picked up an Edmonton station. Among the orders, news and personal messages, he heard that an orderer named Pantheof and another man, named Tripping down the grassy terrace to Mrs Drummond's flower garden, she and down alone by the edge of it

He said one of the Indians came and sat along the twilight slope toward her

Hat in hand, Haskell came up. With cold sardonic eyes she surveyed him, amused at his humility. Toward her the man had no pride left

She reminded him sharply I believe I asked you not to talk with me again

Yes you did,' he said humbly "I haven't forgotten. It's made these last couple weeks pretty miserable But when I saw you over there tonight . . . Elizabeth, won't you let me—can't I stay just a little while? I

Haskell pondered the possibility a minute and then dismissed it. It was Bill Hardcock who inadvertently opened his eyes to the truth

Knocking entering standing before the desk, Bill reported

"Sir, if you don't mind I've got three days free time coming to me, and if you don't mind I'd like to take them now I'd like to have them in a row, if you mind

"I'm short of men as it is, Haskell cut him off "You can't go That's that!

It wasn't "that" for Bill Refusing to be driven out, he planted himself in the doorway and pleaded for his three days pleaded till Haskell saw that the corporal must have some special and urgent reason for wanting off duty

Are you getting married?" he demanded sarcastically

"No, sir," Bill answered, with more outward respect than he had ever shown before "I want to go trout fishing."

HEART OF THE NORTH

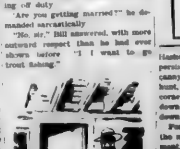
CHAPTER VIII Continued.



"Are You Getting Married?" He Demanded Sarcastically.

Haskell angered He started to order Bill out of the cabin on penalty of a court martial, but he restrained himself, he half-rose from his chair, gasping, with a revelation rushing through him

There it was the whole crushing truth! Baker's strange haste to buy out his strange journey out to civilization, that "plane coming north, the missing gasoline. Bill Hardcock's request for a leave of absence. . . . All these disjointed facts suddenly clicked together like the parts of a Chinese puzzle

That man wanted to escape, had been Baker! He was coming back in a "plane to get those bandits! Hardcock was stealing gas and oil for the machine to manoeuver on! He needed those three days of absence in order to take the fuel out to the rendezvous!

Wanting time to think, time to plan the right move, Haskell said jerkily: "Just a minute, corporal I'll have to . . . I want to consider your request." And he turned away to the window.

So Baker had not given up! He was out of service, but he was coming back to finish with those bandits.

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschen Salts is appealing to girls and women who are striving for an attractive Proportion-fat figure

Here is the method they are following to banish fat and bring back health all the natural attractiveness that they possess every morning they take a half-teaspoonful of Kruschen Salts in a glass of warm water before breakfast.

They do this every morning without missing one for it's the only dose that takes off the fat." I get some news day before yesterday that cut me up pretty bad

He waited for her to comment, but she said nothing You remember last winter I said my father was in poor health? I got a radiogram night before last about about him."

Elizabeth understood that his father had died She was quite well aware that Haskell was not exactly stricken by the news, though he was trying to play upon her sympathy

She wondered why he was discussing the matter with her now

As he went on talking of it, she began to see his reason He mentioned the big country estate outside of Chatham, the town house in Ottawa, the extensive and valuable timber limits up the Klamiki. When he hinted at himself being the only heir and the owner of all this, she saw his whole drift

The news left her entirely cold. From his treatment of Alan she knew how utterly mad and dishonorable he could be He was trying to bait her She caused unnecessarily at him for being so crude about it thought to make her his Ottawa mistress

The affections of such a man were evanescent at best, and certainly he refused to build upon. Imagining her relatives with this man if she ever allowed herself to become dependent on him, she saw him starting off marriage by the old throughare dodges, and at last turning coldly away from her, as he had done in time would go farther than Haskell and his Cobbsen estate. Alan was honest, he could be depended upon.

Angry and contemptuous she arose, "I've got to go. But there's something I really must thank you for, Inspector."

"To thank me for?" He too had risen; he was leaning toward his visitor. "I'm glad . . . I didn't know I'd done

"You didn't intend it as a favor. But it was. I'm very grateful." Then she went on: "Last winter Alan was offered a very splendid position in Victoria. I wanted him to take it. You may be two a non-com with no prospects, and that was somewhat as I felt. He didn't want to leave. He wanted to stay in Ottawa and live here in the North. Just when he was wavering, you forced his hand. You made him keep on duty, and so you made our marriage possible. I'm awfully grateful to you, really. You didn't realize what a favor you were doing."

She left him standing there, staring after her, dazed and speechless.

That same evening, only an hour later, Haskell made it necessary so startling that in some measure it took his tortured thoughts away from Elizabeth.

A knock sounded on the door, and Whipple came in with a report.

"Sir, last week I missed fifty gallons of gas and five of oil from our stores. I thought it might be a paper mistake, but today I checked up again and we're short still more."

"And what about it?" Haskell snapped.

"Nothing, sir; nothing at all," Whipple said hastily. He saw that his chief was in a vicious mood, and he barked away to the door. "I just thought that you would like to know, sir." Most likely some half-breed with an outboard motor is stealing this, sir." And he closed the door quietly.

Alone again, unable to bear his stinging thoughts, Haskell turned in desperation to the service radio set in an effort to distract himself As he had done on evenings past, he picked up an Edmonton station. Among the orders, news and personal messages, he heard that an orderer named Pantheof and another man, named Haskell's knowledge of Baker's grim personal nature and the man's mercenary wisdom in a tense moment, whispered to him: "And he'll corner them, too! He'll run those men down! He's going to have a showdown fight with them."

For a moment he was staggered by the man's superb daring. For a moment, fighting personal wars between himself and Baker, he felt an admiration for this magnificent attempt.

Then, as he saw deeper into the consequences of this feat, his admiration darkened and flickered out. How would it look for the ex-corporal to capture or kill those men, or at least corner them and go down fighting? What would the higher officials have to say about that?

All his hatred and jealousy of Baker fired up. Not only was this man going to marry the girl he loved; this relentless sergeant, rising out of a crushing defeat, was going to show up and condemn the very name a John throughout the Force.

"You are instructed . . . he still heard those crushing words delivered across the wilderness from Edmonton . . . to capture that plane and to arrest those criminals on sight, if necessary. You are empowered to use force, certain of a possible penitentiary sentence! Somewhere to the south he was flying his plane into isolation. He had a rendezvous somewhere with Hardcock.

Hardcock could be trailed to that meeting place! The plane could be captured, Baker arrested, sent up for a term. . . . .

(To Be Continued.)

Were True Patriots

Two U.S. Citizens Involuntarily Overpaid Income Tax Last Year

Two persons intentionally paid the State of New York greater sums in income taxes last year than the law required, one, a retired professor waived his personal exemption from taxes on a part of his income, and the other, an executive in a transportation company, forebore to write off $25,000 of losses sustained in sales of securities. They acted on a generous regard for the welfare of their fellows dictated. Their sacrifice is acceptable at a time when securities is difficult and when the State finds it more difficult than is living memory to obtain the revenue that it requires. Their example may be recommended to others who can make similar sacrifice without pinching it on to their own dependents.—Brooklyn Eagle.

The Prince of Wales is an expert on ejector.

HEADACHE

Here's Quick Relief:

Aspirin brings you immediate relief. It acts before you can feel any effort at all from the slower forms of relief.

Do not hesitate to take Aspirin tablets because of this speed. Their quick action is due to the fact they dissolve immediately. They are perfectly safe. They do not depress the heart.

That's the beauty of a tablet of 100 tablets for one reason for experimenting with any substitute for relieving pain. Insist on Aspirin.

ASPIRIN

Little Helps For This Week

"I must work the works of Him that sent me while it is day, the night cometh when no man can work." — John 9:4.

He who interrupts
The appointed task and duties of the day,
Untunes full-oft the pleasure of the day;
Checks the finer spirits that refuse To flow, when purposes are lightly changed.

W. Wordsworth.

By putting off things beyond their proper times one daily trends upon the heels of another, and all duties are full as irksome obligations, a yoke beneath which we fret and lose our peace. In most cases the consequences are that we have no time to do the work as it ought to be done.— F. W. Faber.

Sufficient for the day is the good thereof, equally as the evil. We must look for the evil as it comes, and with strength, the merciful deed our hand findeth to do or it will never be done, for the hand will find other tasks and the arrears fall through. And we shall one day be charged as faithless and recreant before God. — J. H. Thom.

Germans War On Mosquito

Herr Adam Roth, chief trapper for the Bavarian Government, has just completed a war against mosquitos in that part of Germany, during which thousands of the pests were slain by an invention which he patented. The county Memmingen had great damage there, but now Bavaria has few, if any.

Fort Saskatchewan Record

VOL. 12. No. 7 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, APRIL 12, 1933 $1.50 PER YEAR IN ADVANCE

Much Business Done At Town Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Secretary's Office on Wednesday the 5th. April at 8 p.m.

Present Mayor Montgomery, Councillors Lobreda, Pillmore, Magee, Watt, Graham and Neale.

The minutes of meeting held on the 15th. March were read and adopted.

Letter from Sec.-Treas. Beverly re application from L. Swanson for this Town to pay his rent in Edmonton while unemployed was ordered to be filed.

Report of the Medical Health Officer for March was submitted.

Letter from Bureau of Labor re Memorial Hall alterations was considered by the Council and a motion was passed That alterations be made to Memorial Hall with exit lights and that the hall be fixed up for rental purposes.

Two applications for relief were approved by the Council and recommended to the Department of Municipal Affairs.

Two applications for the use of the Memorial Hall were referred to the Town property Committee for the necessary action.

A resolution was passed That the motion of 15th. March re Auditor be rescinded as it is not in accordance with the Town Act, and that Mr. R. Tenby be appointed Auditor at $150 per year for four audits. Mayor Montgomery voted against the part of this motion which reads "That Mr. R. Tenby be appointed Auditor at $150.00 for the four audits.

A motion was passed instructing the Secretary-Treasurer to proceed at once with the tax sale under The Tax Recovery Act.

It was moved and adopted That this Council use the men on relief to do work in streets, and such other duties as may be found for them, under the supervision of Constable Dennis, at $1.00 per day of 8 hours.

The offer of F. Etherton of $20.00 cash for the Knoll House was accepted, by the Council. A motion that the sum of $50.00 cash for the old Sinclair house be accepted, was declared lost.

Fort Tennis Club Elects Officers for 1933

A meeting of the Fort Saskatchewan Community Tennis Club was held in Dr. Colbourn's office on Monday evening, April 10.

It was decided to erect a stand pipe to provide for the watering of the courts and to purchase new hose and make the few necessary repairs on the nets.

The following officers were elected for the coming year.

President.—A. Simmons.
Vice-President.—E. Truby.
Sec.-Treas.—F. Fleming.
Executive.— G. Neale, I. Hutton, and H. Oxley.

It was voted to have the fees remain the same as last year, viz., $2 for adults and $2 for school children, which fees were to be paid not later than June 1st., 1933.

A discussion of the courts followed and it was decided to put a surface of shale on the east court if the said shale could be obtained and handled without too great an expense.

The courts will probably be ready for play on or about May 1st. when an opening tournament is planned for all members and prospective members. Let's go!!!

Josephburg News

A soft-ball meeting was held in the Senior room of the Josephburg School on Monday, April 10th, for the purpose of electing new officers for the year.

Earle Cranston occupied the chair. The following officers were elected

Hon. Pres.—Mr. Bissell.
Patron and Patroness—Mr. and Mrs. Bissell.
Manager—Mr. Cranston.
Coach—Mr. Bissell.
Captain—Mr. Cranston.
Sec.-Treas.—Miss Margaret Mann.

The following Board is to interviewed to see if they would buy the equipment.

The fee to be paid was left until after the interview.

A miscellaneous shower was given on Tuesday evening, at the home of Mr. and Mrs. A. Bissel, in honor of Mr. and Mrs. Gus Althoen who were married a short time ago. Mrs. Althoen was before marriage Miss Mary Mohr, daughter of Mr. and Mrs. John Mohr Sr. A social time was enjoyed by all and just before midnight a decorated wagon, loaded with presents was drawn in by little Norma Frey and Alvin Frey who were mentioned honor for the occasion. Many nice useful gifts were received. Mr. and Mrs. Althoen thanked them all in a few well chosen words. The hostess then served a dainty luncheon.

The ladies aid meeting was held at the home of Mr. and Mrs. John Mohr Sr., on Thursday, April 6th.

Miss Irma Beebe returned home after spending some time in Edmonton with relatives.

The three act drama "Safety First" was present in the Empress theatre on Friday evening, April 7th, by the Josephburg Junior U.F.A.

The following players comprised the cast:— Wilfred Mann as Jack Montgomery, a young husband. Rudolph Rippel as Jerry Arnold, an unsuccessful fiancé.

Anna A. Mohr as Mr. McHutt, a defective Detective.

Walter Frey as Elmer Pinnel, awfully Shrinking.

Carl Untereckstein as Abou Ben Macka, a Turk from Turkey.

Ruth Mohr as Virginia Bridger, Ruth Mohr as Mabel Montgomery Jack's wife.

Dorothy Wilde as Virginia Bridger, Ruth Mohr's sister.

Elsie Gerlitz as Mrs. Barrington-Bridger, their mother.

Evelyn Frey as Balaika, a tender Turkish maiden.

Leona Hennig as Mary Ann O'Flinnerty, an Irish cook lady.

During intermission Wilfred Mann and Ernest Mohr sang "I'm Shy Mary Ellen". During the second, Margaret Mann and Hilda Frey sang "A Capital Ship".

Owing to bad roads there was no U.F.A. meeting held on April 8th.

Service will be held at The Reformed Church on Good Friday, April 14th, at 11:00 a.m.

On Easter Sunday, April 17th, at 10:30 a.m. special service will be held. There will be no Sunday School.

Coal production in Alberta for the month of February totalled 486,282 tons, as compared with 477,895 tons in January, and 583,203 tons in December. Production in February of a year ago was 549,561 tons.

Where Alberta University Grads Are Found

Permanency of the value of the University of Alberta to the cultural and professional life of the province is illustrated by a report showing the present residences of university graduates. Total number graduated since founding of the university 23 years ago is 2, 165. Only 152 of these are permanently resident in the United States, at total of 1,360 of the graduates are resident in the province, 309 reside in other provinces, while 27 are outside the North American continent.

Tennis Meeting

The St. George Tennis and Badminton Club held the first meeting of the season at the Rectory on April 6th.

The following officers were elected for the ensuing

Patron and Patroness Lord and Lady Redesy.
President.—Mrs. Rudd.
Vice Presidents.—Miss West, Mrs. von Iffland and Mr. T Holt.
Sec.-Treas.—Dr R H Mason.
Honorary Members.—Mr. and Mrs. C. Read. Mr. and Mrs J D McLean.
Executive Committee.—Mrs. Rudd, Mrs. Martin, Miss West, Mrs. von Iffland, Mr. T. Holt, Dr. Mason and Mr. Shaver.
Grounds Committee—Rev. C. Read, Mr. T. Holt, Mr Ardley, Werner Olhaus, Dr. Mason and George Martin

The question of fees was discussed and settled. Other important matters were considered. Another meeting will be held shortly to draw up a plan for the opening day.

Grasshopper Expectations

Though there is no need for great alarm among the farmers this spring regarding grasshopper outbreak, there undoubtedly will be outbreaks in certain of the southern sections of the province. Farmers are urged not to be concerned about hoppers or eggs appearing at present but to be on the watch for breeding grounds during the latter part of May, when the natural species will appear. The usual co-opping arrangements are being made this year by the provincial government to assist the farmers in combatting outbreaks. Farmers are asked to send samples of hoppers or eggs at any time to H. L. Seamans, Dominion entomologist at Lethbridge or to Prof. Birkland at the University at Edmonton. The poisoning campaign will be under the direction of E. L. Gray, Field Crops Commissioner.

Municipal District Hold Regular Meeting

The Council of the Municipal District of Clover Bar, No. 917, held a regular meeting of Saturday last, with all members in attendance.

The report of the returning officer covering the special election in Division No. 1 showed that Mr. D. Gunn had been elected by a majority of five over Mr. A. Gillies.

Practically the entire meeting time was taken up in the discussion of hospital bills, funeral expenses and relief matters. It was decided to terminate all direct relief on the 30th of April.

Mr. H. Muller having completed the payments for lots 2 to 9, Block 24, Crescent View, the Secretary was instructed to issue him the necessary transfer.

It was decided to rent "z" Ridgeway Park to Mr. C. E. Morris for the sum of five dollars per annum, subject to sale.

The Deputy Reeve and Secretary were authorized to represent the District at the appeal of the Canadian Pacific Railway Company of the Company's water dam at Elk Island which is to be heard by the Alberta Assessment Commission on the 19th instant.

Orders were given to Mr. F. W. Smith and the United Grain Growers, Ltd., for a supply of gopher poison. The poison can be obtained from your local councillor or at the municipal office.

The following were appointed as fire guardians for the year 1933:— C. H. Horton, Div. 1., Bid Ottewell, Div. 2., Geo. Kelly, Div. 3, John Flesher, Div. 4 and J. R. Kelly, Div. 5.

After the reading of correspondence and the passing of payments and accounts the meeting adjourned at six o'clock p.m.

In order to give the better type of transient families now on relief in urban centres an opportunity to become self-supporting, the Provincial Relief Commission proposes to place these families in suitable farm buildings.

It is the intention to rent buildings and several acres of cultivated land with good water supply, and where firewood is available, if possible. The rent is to be low, and Department will allow the owner rent equal to one year's taxes on a quarter section. This rent will be paid quarterly when the buildings are occupied.

Any farmer having vacant buildings and wishing to rent same please forward to available, if possible. The get in touch with the Municipal office.

Nature Cannot Be Defied.

It is recorded in Holy Writ that God created men and gave him dominion over all the earth, over the fish of the sea, the fowl of the air, over every living thing that moveth upon the earth; in a word, over every thing wherein there is life, including all fruit and seed bearing trees and plants. In his conquest and control of these things man has waged, and must continue to wage, a never-ending battle, and he has waged it, on the whole, successfully and with increasing efficiency as the years and centuries have come and gone.

Bestowing his dominion over every living thing, and as a means of exercising control over them and to secure for himself the abundant and bountiful and comfortable existence, man has gone further afield and assumed control over many of the forces of nature. He has overcome the obstacles of mountains by driving tunnels through them; he has bridged great streams and gorges; he has dammed mighty rivers to obtain power, he has delved into the bowels of the earth for fuel and materials to serve him; through his inventive genius he has overcome the handicaps of distance and space, making both the sea and the air serve his purposes.

Still not content, man has attempted to control other laws of nature over which he was not given control and which, despite all his efforts, are and ever will be beyond his control. As a result of fashionable and stylish developing as mankind increased in numbers, man quarrelled and fought among themselves. They divided into tribes, and these tribes, developing distinct national traits of character and ambitions, each ruthlessly endeavoring to secure to itself a larger measure of control over the earth than that enjoyed by their rivals. Then, unnaturally warring with each other to obtain and retain such control.

The world was created for man,—the whole world for the whole race of man. Its climate was varied, and with variations in climate there is variation in products and methods of living, each part having something to contribute to the welfare of men in other parts, and all going to make up a completed whole. But man developed narrow tribal and nationalistic tendencies and ambitions, hived himself off in groups into separate compartments, and sought to live unto himself, self-satisfied and self-contained, apart from the rest of the world. Such a mode of living might succeed for a time, but must end in disaster, perishing himself, denying himself many of the benefits and comforts which an entrenched nature intended he should possess and enjoy. The whole race of mankind is now paying the penalty for that great error.

The primary error led to many others, and man set his ingenuity to work to overcome the difficulties he had himself created. Having failed one great law of nature he thought to correct that mistake by defying other laws. He conceived the mistaken idea that he could, by the exercise of his own man-made laws, substitute artificial political boundaries for the natural boundaries as defined by geographical facts. He had changed the courses of rivers, why could he not change the streams of man's intercourse, communication and trade with each other? Why could he not obtain power from the waters of the world's surface that are by nature for agricultural purposes, for great manufacturing centres? Where nature designed that commercial and trade should flow north and south, with each country dependent upon those to the other, why should not men order otherwise and force commercial communication and trade to run east and west in order that it might command certain political divisions set up by himself in the name of freedom and liberty?

Men thought he could do it, and he proceeded to try, with the result that the whole race of man is to-day mired in a morass of its own making. All men and all nations are floundering with no solid ground under their feet. In their difficulties and desperation they still blindly rely upon the commandment of their own man-made policy after another, each a further defiance of nature's immutable laws, to get them out of their trouble, instead of frankly acknowledging their initial mistake, wiping out their narrow nationalistic policies, and allowing the laws of nature to operate freely without restriction or attempted control by man, who will assume control then.

Men do not created to be so ordered and controlled. They are given a body, a mind, a soul of his own. He was to have dominion over all things, but not over a fellow creature by himself, to serve his own selfish ends. It was given him to find nature in this old earth's history and to subdue it in accordance with it is being tried again in this country under Socialism by Party and Government, under communistic principles, and under other forms of despotic government in so-called less enlightened countries. It may obtain for a time, but it will fail sooner or later. And it will fail because man in his individual, with a mind and soul of his own, his initiative will not be denied. Men and women are born free, and they will, in spite of whatever control is imposed upon them, and then only, call in again whatever supplies and

Britain Rich in Minerals

Practically Every Known Metal Is Found in Empire

The news that the vast beds of iron ore in Northamptonshire are to be worked on a great scale calls to mind the fact that Britain is still one of the richest metal-bearing countries in the world. This remains true despite the fact that during the past half-century the total value of minerals raised in Great Britain was about three thousand five hundred millions of pounds. Of this, coal represents about two-thirds; the rest comprises nearly every metal or mineral in common use and a number of the rarer ones. Cornwall and Devon still produce the immense quantities of rich tin ore lie below the surface, but so far below it that at present the mines require composite surrounding with the shallow tin dredgers of Malaya and the open workings of Bolivia. Cornwall, too, has copper, antimony and arsenic, to say nothing of radium. There is a roof of gold-bearing rock under the Forest of Dean which contains enough gold to pay Britain's national debt. Under present conditions, however, it does not pay to work it.

Worthy Of Consideration

Opening Jazz From Radio Broadcasting Station Good Idea

Ultramodern Berlin has framed jazz music from the North broadcasting station on the ground that it is not a cultural factor.

The idea is worthy of consideration elsewhere than in Berlin. The children hum-hum of the jazz orchestra, its monotonous rhythm, its blaring and bleating and blatancy, combined with its horrors of cacophony that are enough to make all dead composers of melody turn in their graves, stamp it as a production of the lower orders of musical intelligence.

Jazz has enjoyed such a long—a far too long—life as a popular craze on this continent and in Europe. But from all quarters reports have been coming in for a year or so to the effect that its popularity is on the wane, and there is ample evidence that this is the case. Such a patent proof of a return to cultural ideals is welcome on many grounds, but on none more vitally than that it relegates the abolition from the home of one of the most inane, discordant and inartistic forms of noise yet conceived by humanity.—Montreal Star.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save a dollar is by renewing the color of faded or out-of-style dresses, coats, sweaters, and underwear. For dyeing, or tinting, I always use Diamond Dyes. They are the most economical item by far because they never fail to produce results that please you purpose. Why, things look "better" than new when redyed with Diamond Dyes. They never spot, streak, or run. They go on smoothly and evenly, when in the hands of even a ten year old child. Another thing, Diamond Dyes never take the life out of cloth or leave it limp as some dyes do. They deserve to be called the "world's finest dyes!" "

S.R.G., Quebec.

Sugar Elevators

Represent the First Plans in Canada To Adopt This Plan

Sugar from this famous sugar beet growing country will be stored in elevators in the same manner grain is stored. Raymond, Alberta, is the first place in Canada to take such a step.

The Canadian Sugar Factories, Ltd., announced that they would build four elevators at a cost of $85,000 for the purpose of storing the sugar produced in the Raymond area. Each elevator will be 50 feet in diameter and 132 feet high.

Good Ads Always Pay

Give Their Daily Message To the Buying Public

"Good advertising will sell goods even in bad times," says Louis Tannhauser, production manager of R. H. Macy & Co., the famous department store of New York. The Macy executive have proved it to their own satisfaction. In their recent anniversary sale they found that well planned advertising brought crowds to the big store.

Experienced executives of successful stores know that "good ads always sell." That is why they keep hammering away, telling their message to the people day after day.

Fewer Sterilizations Plan

Grand Token By Lieutenant-Governor Of Ontario Is Conceded

The Toronto Local Council of Women and several clergymen joined in expressing appreciation of the stand on behalf of sterilization of mentally unfit taken by Dr. Herbert A. Bruce, Lieutenant-Governor of Ontario.

On recommendation of Mrs. R. G. Smythe, mental hygiene convener, the local council of women wrote Dr. Bruce reckoning his stand. Mrs. Smythe said what the province would need was permissive and selective sterilization of the mentally unfit.

Rev. Canon Lawrence Sheay, Anglican, said there were "two or three thousand feeble-minded children in Toronto. We are all behind the Lieutenant-Governor and are proud that he has had the courage to speak his mind for the welfare of the people.

Jasper National Park, Great Alberta Reserve, Is Outstanding Game Sanctuary

Jasper National Park in Alberta, Canada, is today one of the greatest wild life sanctuaries in the world. Here, in an area of 4,200 square miles many species of wild life live free from human molestation. At the time white men first entered this region, a little over a century ago, big game was plentiful. Bighorn sheep and Rocky Mountain goat fed on the hillsides, deer and elk ranged the valleys, and the first a few miles south of the present Jasper townsite were frequented by buffalo. The whole country was a rich hunting ground for both white men and Indians.

When Jasper National Park was set aside in 1907, by the Government of Canada to meet the recreational requirements of the people and to serve as a refuge for the native fauna, great inroads had been made to the wild life by hunters. As a result of the establishment of a sanctuary conditions the preservation of the different species of wild life indigenous to that region has been assured, and now hunters may feel confident of having an unfailing supply of game in districts adjacent to the park.

One of the chief attractions to visitors at the present time is the variety of wild life which may be seen along the motor highways and trails in the park. Bear, moose, deer, bighorn sheep and mountain goat may frequently be seen from a car, while others may generally be sighted in the high open passes of some of the nearby mountains.

In recent years there has been a remarkable increase in the wild life of the park. It is estimated that the number of bighorn sheep has doubled within the past few years in the Athabaska Valley. They are especially numerous at Pocahontas, Interlakes, Brazeau River, Snake Indian Valley, Moose Horn Creek, and Southesk River. Rocky Mountain goat are numerous and are spreading in new range in the park. The largest herds of these animals are to be found at Shale Banks, Smoky River, Colin Range, Maligne Lake, Whistler Mountain and Circue Valley.

Elk, Moose, Deer and Caribou are seen in large numbers throughout the park. The elk, which had so nearly been exterminated a few years ago, have increased to such an extent that now they are extending their ranges in many directions. Reports state that they have been seen as far west as McBride, British Columbia, on the Canadian National Railways, which is one hundred miles west of the park. Moose are also increasing in numbers, especially in the northern part of the park, which is heavily timbered and well suited to the needs of this animal. Deer in the park are rapidly increasing in numbers. Caribou are spreading throughout the park and overflowing from the Smoky River area into British Columbia, as far south as the Canadian National Railways' line. The main herds are about Eyagg Creek, Tree Lake, Tonquin and Circue Valleys, Smoky River, Brazeau Valley, Upper Snaring River, Dennison Creek and Miette Valley.

There has been a large increase in the number of bears, especially in the immediate vicinity of Jasper. There are many grizzlies common in the park and the animals are increasing rapidly in numbers. The beaver constitute one of the numerous attractions at Lac Beauvert, where visitors in the evening hours catch glimpses of them in their home waters.

Millions Have Selective Hearing

There are approximately 3,000,000 people in Great Britain with defective hearing in both ears. This statement appears in a survey of two years' research by the National Institute for the Deaf and the Department of Industrial Physiology of the London School of Hygiene, published in the British Medical Journal.

An inspecting machine developed in University of Toronto laboratories is claimed to greatly aid germinating of clover seeds through its action in breaking or weakening their hard seeds.

Zoo Loses Ancient Tortoise

Was Each Curator Of 150-Year-Old Reptile

London papers record the death from influenza of Sapo, the giant Seisake tortoise at the Zoo. There is no doubt that her registered age, one hundred and fifty, is correct, there had been served upon her undershell the year of the Peace of Versailles, 1783. This three-hundredweight reptile had been 131 for some weeks. Recently pneumonia developed, and has now claimed her at her prime. The official was a native of Galapagos. It lands off the coast of Ecuador.

In spite of her death Sapo will continue to be an object of interest, since she is to be mounted for exhibition purposes in the galleries of the Natural History Museum at South Kensington.

JAUNTY SMARTNESS IN COAT-DRESS WITH A NEW BROAD-SHOULDER EFFECT ACCENTED.

It's the sort of stunning little dress you can wear and wear, and feel smart in.

It slips easily under a coat and is the sort you can pack without one when the warm Spring days arrive.

You'll have guessed that the original was of navy wool jersey, and quite daring navy crepe for the collar, button and tied girdle.

If navy blue crepe is your choice, it's just as snappy with coral-red trim.

Grey checked woollen seems to be one of the smartest fabrics of the year, with crepe silk collar and cuffs with a wide grey leather belt.

Style No. 358 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 3¼ yards 54-inch, with ¼ yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred.) Wrap coin carefully.

Eskimos Drink Alcohol

Civilization Bringing Natives Of Hudson's Island

"Civilization" is ravaging the Eskimos of Victoria Island. They have taking to drinking denatured alcohol, according to the report of Corporal Wall of the Royal Canadian Mounted Police.

In paying into trial calls, this poison and methylchloride are among the agencies named. The corporal fears if the practice continues it will seriously endanger the health of the natives.

Some collectors [illegible] are noted however The influence of the missionaries is strengthening and the Eskimo pride themselves not only in their hymn books but in their ability to sing these hymns.

They observe Sunday very closely and will not do a thing regarding most of the day singing hymns even if the camp is out of meat.

Humanitarian influences are now being borne in on the natives. Corporal Wall noted the average of the Eskimos he knew was three years, of whom there were as many girls as boys. The practice of setting the girl babies die at infancy is dying out, he says.

Has Ancient Lineage

Greyhound Probably Oldest Of Dog Family In World

The greyhound can boast of a very ancient lineage, and is probably the oldest of the dog family in the world. It figures on Egyptian frescoes of the early Pharaohs and was used for coursing by Greeks. A fine Assyrian sculpture in the British Museum of two greyhounds proves that they were appreciated by the Romans. Greyhounds were favorites with almost all English kings from Canute to Charles the First and King John repeatedly took greyhounds instead of money for payment of the penalties he suffered. Until modern times the greyhound was an aristocratic dog which only "gentlemen" freeholders were permitted to keep. A lover of this regulation can be found in the fact that in England until 1835 a special tax of twenty-two shillings each was levied on greyhounds to place them beyond the reach of all except the favored few.

Notice Availed Nothing

Idea Of English Vicar Did Not Save His Apples

A vicar who had a nice orchard attached to his vicarage was rather perturbed when he learned that pedlars were coming to the village on a field close by. He put a card against one of the trees with the inscription

"Please do not touch the apples. We want them for the Harvest Festival."

The soldiers arrived, and the next day when he went to the orchard he found that all the fruit had been stripped from the trees. The card had been reversed, and the following substituted for what he had written:

"All is safely gathered in, ere the winter storms begin."

Work of Canadian Plant Breeders In Improving Quality of Wheat An Epic of Scientific Achievement

Dentists In Olden Times

Artificial Teeth Were Familiar In Time Of Pharaohs

Dentists played an important role in the ancient civilizations of Egypt, Assyria and Peru, according to Dr Leroy M S Miner, dean of the Harvard Dental School.

Excavations among the Incas remains in Peru, Dean Miner said, revealed that the teeth of the Incas were ornamented with fine gold discs. In Honduras, tooth work ornamented entirely covered by an overlay of gold. In ancient Mexico and India, they were commonly adorned with turquoise and other precious stones.

In an Egyptian document nearly 3,000 years old, archaeologists found reference for toothache and for tightening loose teeth, and in the ruins of Nineveh was found a clay tablet, 2,500 years old, in which a court physician recorded his diagnoses of a royal toothache.

"By the time of the Ptolemies," declared Dean Miner, "artificial teeth were familiar. The Roman poet martial notes with a sarcastic eye the efforts of the beauties of his day to maintain their charms and remarks that 'the belle buys down her teeth at night just as she does her silken robes.'

"In another place he unkindly remarks that she now has removable teeth and would have removable eyes if they were for sale'."

Women Have Pet Aversions

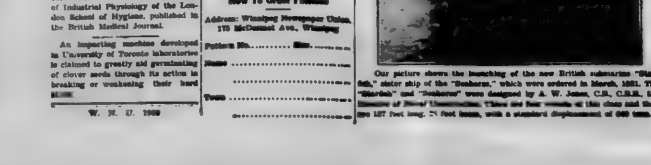
Best Dislike Of Job Usually Varies With Individual

Every housewife has a pet aversion among her duties. This tested job varies with the individual. Such were conclusions of the members of the Women's Institute of Burton, England, when this past completed a survey on housekeeping. The president was positive about her aversion. It was getting up in the morning. Other dislikes were cleaning windows, spring cleaning, chopping wood, washing up, washing one's hair, darning, patching, cooking, cleaning boots and shoes and tidying grates. Three agreed that skinning rabbits was the worst. Two others said it was cleaning chickens. Another disliked keeping hens waiting, and an old lady declared that she "detested everything."

A Northern Outpost Of Agriculture

Agriculture is being successfully carried on 165 miles northwest of Prince Albert at Beauville, Sask., on the Beaver River. At that point there is a well-equipped farm producing cereals, vegetables, hay and tobacco for the use of the local mission. The locality is shown on the 1:e-i-h-inch map sheet issued by the Topographical Survey, Department of the Interior, Ottawa.

BRITAIN LAUNCHES THE "STARTLER"



Our picture shows the launching of the new British submarine "Starfish," sister ship of the "Seahorse," which were ordered in March, 1931. The "Starfish" and "Seahorse" were designed by A. W. Jones, C.B., C.B.E., the Director of Naval Construction. These new boats of the class and they are 127 feet long, with a standard displacement of 640 tons.

Work of Canadian Plant Breeders In Improving Quality of Wheat An Epic of Scientific Achievement

"The contributions made by Canadian plant breeders in the form of superior varieties of field crops stand second to no spot in the history of economic achievement," stated L. H. Newman, Dominion Cerealist for the Canadian Government Experimental Farms, in a recent address broadcast over a chain of Canadian radio stations. "These contributions," he continued, "reveal a story of nearly half a century of determined effort, replete with discouragement and disappointment but ultimately rewarded with enormous gain.

"The most important plant-breeding contribution made thus far in Canada has been in connection with the development of varieties of wheat capable of thriving under conditions which characterize much of the great wheat-growing plains of Western Canada.

"While the creation of an early-ripening, high-yielding variety of wheat of good quality has been a major objective of the Canadian plant breeder for many years, more recently he has been grappling with another problem of equal if not even greater importance. That problem is an attempt to combine in one variety the yielding ability and baking quality of such varieties as Marquis with the ability possessed by certain new-bread wheats to resist the attacks of that dread enemy of the wheat grower, the disease known as wheat stem rust. This work, which is conducted largely at the Canadian Government Plant Research Laboratory at Winnipeg, seems to be progressing rapidly toward the desired goal and it is confidently expected that within the next few or three years the most important announcement will be made that a new rust-resistant wheat of high quality and good yielding ability is available for propagation by farmers in the affected districts."

A Record High Tide

Damaged Old Fortress That Resisted Wolfe's British Invasion

The rock-ribbed old fortress that stubbornly resisted Wolfe's English invasion has fallen before the onslaught of a storm that drove huge seas into Louisburg's sheltered harbor, in Nova Scotia.

A record high tide breached a gravel barrier for the first time in 177 years and flooded a large part of the ancient battlement-in, lapping the floors of the French Frenzel Magazine in the fortress grounds. The approach roadway to the west gate of the fort was practically ruined and it is expected that restoration work on the remainder of the fort will have to be halted this year to allow it to be repaired.

The last recorded occurrence of the kind took place in 1756 two years before Wolfe took Louisburg and crushed the French stabilities much trouble Hentzie had to be with-drawn because the water rose up to their waists.

Not Much Of a Success

Airplane Wedding Was Found Too Noisy For Comfort

Marriage in an airplane may be a novelty but it is not romantic according to Mr and Mrs James Carmarker, who were wed high above Sydney, N S W. The bride and groom took off from the nearest airport to have their wedding broadcast to the world. The plan to switch off the airplane engines during the ceremony was found impossible. Bells in the hills of the Dulwich Hill Congregational Church, had the same idea and pealed forth to shatter the silence. The radio announcer almost shouted himself hoarse. The couple had to grasp the rack above their heads several times to avoid being thrown out of the swaying plane during the ceremony. When the party reached the ground, Mrs Carmarker had had enough of airplane weddings, the motion picture operator reported that the Registrar General had assigned the closing of the civil and radio listeners complained that they had heard nothing.

WORLD HAPPENINGS WEEKLY TOLD

Mme Blanche Doumer, widow of the late assassinated president of France, died April 4.

Mount Everest, highest mountain in the world, was crossed by aeroplane April 3, for the first time in history.

More than 1,000 men are expected to enter the Cranbrook area this summer in one of the greatest gold rushes this district has witnessed.

Hillsboro, Irish Free State, is erecting municipal houses to be rented to working people at $1 a week including taxes.

President Roosevelt has ordered reductions in United States veterans' allowances, totaling approximately $460,000,000. The reduced rates are effective July 1.

Twenty-five thousand dollars in gold pieces and $1,000 in currency were found by police today in searching the house of Mrs. Josephine Schuman, 76-year-old recluse who died suddenly of heart disease in Detroit.

Mayor of Fort William and Port Arthur were in Winnipeg recently in discuss with a committee of the Winnipeg Grain Exchange the proposal to move the exchange and its facilities to the head of the lakes.

Communistic activity in Canada is more dangerous and acute today than for many years, Hon. Hugh Guthrie, Minister of Justice, told the House of Commons, and it might be necessary to increase the force of the Royal Canadian Mounted Police.

Yemba Matsoaka, Japanese statesman on his way home from Geneva, following his country's withdrawal from the League of Nations, said in his opinion United States and Europe could help speed the return of peace to Japan and China by refraining from further interference.

New Creamery Opened

Many Leading Citizens Attend Ceremonies At Prince George, B.C.

A large gathering of leading citizens recently attended the opening ceremonies in connecting with the inauguration of the Interior Creamery at Prince George in the northern central interior of British Columbia. After having the machinery set in motion and the milk handling equipment and labeling in operation as an initial demonstration of the modern machinery built by the Vancouver firm, the gathering was addressed by prominent officials.

Francis Gaisan and Dubar, in Bengal, are to be connected by an Atlantic cable, 2,400 miles long.

W. N. U. 1809

SASKATCHEWAN JUNIOR GRAIN JUDGES

One girl and three young men were selected to represent Saskatchewan in the junior grain judging contest at the World's Grain Show from this group who took part in the final elimination contest at the University of Saskatchewan recently. Reading from left to right in the rear row are William J. Hawrylak of Maple Creek, Edgar Lake of Turtleford, John McKay of Govan, Leonard Weber of Vawn, and in the front row, Roy C. Mathison of Bounty, David Clark of Inchskeith, Isobel Hutcheson of Regina, Mabel Anderson of Regina, and James H. Bragg, instructor.

Highest points were secured by Isobel Hutcheson, Regina. W. S. Hewrylak, D. Clark and R. Mathison. These four will receive further instructions at the University of Saskatchewan and three of them will represent Saskatchewan in a contest that will include teams from all the Canadian provinces and many of the states in the south.

Plucky Passenger Takes Fly-Tox

By Ruth Rogers

BANISH SCHOOL GIRL FROCKS IN FAVOR OF SMARTER STYLE TYPE

It's very simple—as it should be for youth.

It carries a sporting air in its buttoned closing from back to underarm. Its caped sleeves are another smart touch.

Still another asset is that it is easily fashioned.

For it, linen in sailor-blue is accordingly attractive with white trim and buttons, carrying out the nautical idea, now so popular.

Angora weave woolen in a yellow and green plaid pattern is another effective scheme with yellow trim.

Style No. 5977 is designed to fit sizes 30, 32 and 34 years.

Size 8 requires 2¼ yards 39-inch, with 1¼ yards 9-inch band.

For warmer weather wear, you can omit the long sleeves or sew in the shorter ones.

Pattern 5977 is 20 cents in stamps or coin (coin is preferred.) Wrap coin carefully.

Canada's First Wood-Pulp Mill

The year 1928 marks the beginning of the manufacture of wood-pulp in Canada. In that year the first groundwood, or mechanical pulp, mill was built at Valleyfield, Quebec, and the first chemical pulp mill at Windsor Mills, Quebec.

SUNDAY SCHOOL LESSON

APRIL 16

JESUS TRANSFIGURED

Golden Text: "And the Word became flesh, and dwelt among us (and we beheld His glory, the glory as of the only begotten of the Father), full of grace and truth."—John 1:14.

Luke 9:28-36.

Devotional Reading: Hebrews 1:1-9.

Explanations and Comments

The Transfiguration.—verses 2-5.—The Transfiguration took place about a week (six days) after Peter's confession at Cæsarea Philippi and Jesus' announcement of His coming death. Dr. A. R. Bruce reminds us that the Gospel historians are not wont to be careful in their indication of time, and their minute accuracy here signifies a purpose. While the foregoing conversation and announcement were being made among the whole group, the thought of all the wondrous events we are now about to relate took place. The glory is, in fact, "a fragment pointing back to the communion on the mountain and saying, 'If you desire to understand what follows, remember what went before'." The disciples had naturally recoiled from the thought of a cruel and shameful death of their Lord. Despair must have seized them. Their faith must have failed. They must be encouraged, must see their Lord glorified. Then came another fact also. Jesus Himself needed strengthening for the fate before Him.

Taking with Him the three favored disciples, Peter and John and James, Jesus went up into the mountain to pray (Luke 9:28). They were the three who were with Him in the garden when He took the daughter of Jairus, at the grave of Lazarus, and in the Garden of Gethsemane.

It is a beautiful thought that even Jesus coveted the presence and sympathy of those whom He loved. "That is a chilly and frost-bound disciple," said he, to quote Dr. Henry Van Dyke, "which prefers to enjoy its happiness and bear its grief alone. The presence of a friend who can bear with us, even if he cannot help, is a more silent presence of a friend—is something which enhances pleasure and lightens sorrow in every kind and noble heart."

"Prayer," says it mark on the character, on the very face. The look of care, as Dr. Glover says, relaxes into peace. The look of anxiety passes from the face of Jesus. The look of joy, of peace, of God. It was almost the very first thing that impressed him with the reality of religion. And then transformation goes deeper than the face. It changes down to the very heart. It is nothing that so effectually transforms all hateful things from the soul, and begets love and hope and faith in it, as prayer. As we behold Christ, and meditate on Him, we are changed into His image, from glory to glory."—J. D. Jones.

Italy's appropriation for education this year is 70 per cent. more than in 1922.

POULTRY RAISERS CONSULT A VETERINARIAN

Practice of Veterinary Medicine Restricted to Graduates

And in the logs form A. Sheath, and there has been for about 3 months, a bad smell coming from the logs. I do not know what is causing the smell, but I think it is dead rats. I have tried to get them out, but cannot get at them. Can you tell me what I can do to get rid of the smell?

Ans.—Remove the logs and pour into the hole a strong solution of chloride of lime. Cover the hole with boards and put a few inches of earth on top. Repeat the dose in a few days.

Q. Mrs. H. Bruce, Sask.—I have a cow that has a bad cough. She has had it for about a month. Can you tell me what is the matter with her?

Ans.—Your cow probably has tuberculosis. Have her tested with tuberculin.

Q. J. Hall, Man.—I have a cow that has a bad cough. She has had it for about a month. Can you tell me what is the matter with her?

Ans.—Your cow probably has tuberculosis. Have her tested with tuberculin.

Home Grown Vegetables

Need For a Good Garden For Every Family In the Community

An excellent work is being carried out by the Extension Service of the Manitoba Department of Agriculture Miss Esther Thompson, of the women's Division, is directing the effort. The object of which is to stimulate an interest in the home vegetable garden. The suggestions offered come at a time when everyone realizes the need for greater economy. Miss Thompson stresses the desirability of a good garden for every family in each community. In a circular sent out from her department, she says:

What can you do, individually or as an organization, to help the people in your community realize the importance of an abundant supply of home-grown vegetables as a means of providing economical health insurance? A good garden, supplemented with canning drying and storing will help to insure appetizing and nourishing meals during the whole year. Since this is the time for sowing, what is to be done must be done quickly. Many people have already planted the first seeds.

Following are some suggestions for your consideration:

1. Begin at home. Plan to have a good garden and to fill your own cellar.

2. Get in touch with your neighbors and friends and talk to them about growing more vegetables and filling their cellars for next winter.

3. In every community there are individual men and women who have excellent gardens and who produce a variety and an abundance of vegetables under almost all conditions. They have the knowledge which the less experienced need, and they are always ready to share their ideas with others, and to give in the most helpful way any help desired." Think of these experienced gardeners and let them help you to promote a good school.

4. Are there people in your community who may require assistance in procuring seed?

This is what one busy Manitoba homemaker did last year: "We started the tomato plants in the house in the middle of May, and by June 20th picked 20 pails of tomatoes. We had ripe ones every day for two months, and I canned 54 quarts.

"In all, fruits, vegetables, pickles, jams, meats, etc., I canned 350 quarts. I also have carrots, onions, cabbages and the standby potato stored in the cellar. We would not be without our garden for anything. The only canned goods we buy are fish and pineapple, which we cannot grow. We have been a family of four as well fitted as that of her thrifty neighbor with a greenhouse. It holds good for the whole winter, yes, sometimes for every day and every meal.

"My children remark certain very vital food substances which are a necessary part of our food. If we omit them, we undermine the growth of children and impair the health of adults. When included in the diet they build up vitality, thus increasing resistance to disease; they provide necessary nourishment for the muscles, bones and teeth of the body and are invaluable as a means of regulating body processes.

A Highly Prized Bible

The pocket Bible which was used by John Wesley, the founder of the Methodist Church, is carefully preserved in London, where it is perhaps the most highly prized possession of the Church. Formerly it travelled everywhere with the President of the Church.

The S.S. Modern City in February this year loaded 301,000 bushels of grain and was ready for sea in 9 hours and 40 minutes, setting a new record for the port at Vancouver.

New Method Of Skin Grafting

Dust Particles Of Skin On Open Wound Is Latest Plan

Research workers of the University of Montreal College of Medicine added a modification of the humble salt shaker to the implements of the surgeon.

It's used in skin-grafting, that delicate operation whereby skin is transplanted to restore burned or otherwise damaged tissue.

Not always successful, the method of grafting now generally in use didn't satisfy the medical research men of the university here, Dr. Louis Herrman said. Sometimes the transplanted skin wouldn't grow. When it did, scars often showed.

Taking a patch of skin ready for grafting, they ground it, dumped it in a medical salt shaker and then sprinkled it over the exposed wound.

Skin stuck fast and grew, spreading until the desired surface was covered with normal tissue.

"This," said Dr. Herrman, "is like sowing a seed instead of transplanting a tree."

It didn't seem to make any difference, he said, whether the particles of skin fell "right side" up or down, the skin grew just the same.

Before, he explained, it was customary to cut pieces of skin about the size of a postage stamp and fit them carefully over the damaged area. Even if the pieces stuck, scars often showed at the edges.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel

You are "feeling punk" because your liver isn't functioning the right way properly. Liquid bile should flow freely into your bowels daily. If it doesn't, your food just decays and poisons the entire system. Then you feel sour, sunk, sick and miserable.

Carter's Little Liver Pills Purely vegetable. Act surely and gently on the liver. Ask for Carter's Little Liver Pills. Refuse substitutes. 25c. at all druggists.

Not Counted By Pessimists

Abundance Of World's Goods Do Not Make One Rich

[illegible] died in London the other day. He left £1,000,000 and his estate paid $400 in actual cash. But he was one of the world's richest men, just the same—and if you don't believe it, look at the final paragraph of his will. It read: "I leave [illegible] a wonderfully happy time and I thank God for a boon [illegible]," and a little earlier in the will occurred this sentence: "I can only wish that I had been more worthy of the affection lavished upon me from birth by my mother, father, uncles, relatives and later by my very dear wife, my children and my friends."—Calgary Albertan.

SIMPLY WORN OUT?

Take Lydia E. Pinkham's Vegetable Compound

Take Pinkham's Compound to relieve periodic pain, backache, nervousness, "all gone" feeling, and that tired-out condition. Made from roots and herbs. Contains no narcotics. Pleasant to take. Follow label directions. Worth a trial.

RECIPROCAL TRADE WITH U. S. OTTAWA RUMOR

Ottawa, Ont.—Events of the past few days have strengthened the belief here that a reciprocal trade agreement between Canada and the United States is in the making.

No official confirmation of this report is available, but it is not the custom of the government to make any disclosure while such projects are pending.

Hon Percy C. Black, on his return from Ottawa to Halifax, said, with respect to the lumber industry, that the government had "other measures under consideration expected to be of great benefit to the industry in this province."

Observers here interpret this statement as an indication that Hon. Vincent Massey, Canadian minister to the United States, minister referred to the possibility of reduction to Canada of certain duties of the United States, particularly the market, for many years the great outlet for the products of Canadian forests.

The fact Hon. W. D. Herridge, Canadian minister to Washington, spent the greater part of March in Ottawa in close consultation with officers of the Department of External Affairs, adds weight to the rumors.

In the House of Commons some days ago, speaking of requests that certain Canadian industries, including lumber, be included among those to be assisted by the export stabilization fund proposed in the budget, Prime Minister R. B. Bennett observed there were other means of assisting those industries.

The tariff commission announced recently that President Roosevelt has banned his first proclamation, under authority of the flexible tariff law, calling for increases in duties on certain agricultural hand tools. The president ordered a decrease in the duty on hoes, rakes and cultivator tillmer forks from eight cents each to four cents each and 22½ per cent. ad valorem, the maximum decrease possible under the flexible law.

Investigate "Akron" Disaster

U.S. Naval Court Will Make Searching Inquiry

Washington.—Minute and searching inquiry into the destruction of the U.S.S. Akron will be opened at Lakehurst, N.J., by a naval court of inquiry headed by Rear Admiral W. W. Phelps.

The court was ordered by Admiral William V. Pratt, chief of naval operations, after he and other high officials had heard a personal account of the tragedy from the only three survivors, Lieutenant-Commander Herbert V. Wiley, Richard E. Deal and Moody E. Erwin, enlisted men.

From naval craft searching hundreds of square miles off the New Jersey coast numerous coasts mans reported "no luck."

But Pratt sent out new orders to keep up the search until "there can be no thought of hope."

He ordered the submarine rescue ship "Falcon" to start dragging for the wreckage. Pieces of the craft, he felt, might contain the vital clue to the cause of the crash, upon which the three survivors could shed little light.

Upon the court's findings will hinge, probably, the course to be followed by congressional investigations for which plans have been started. The wave of sentiment for abolition of lighter-than-air craft met a reaction in some quarters. A few congressmen spoke up against "hysterical" conclusion.

Belongs To Denmark

The Hague, Holland. Denmark's title to eastern Greenland was confirmed by a decision of the permanent court of international justice in her favor in a dispute with Norway over its ownership.

More Jobless In U.S.

Washington. William Green, president of the American Federation of Labor, in a statement, estimated that 250,000 persons lost their jobs in March bringing the total unemployed "well over 13,000,000."

History-Making Conference

Ramsay MacDonald Flies Early Visit To Washington

Washington.—President Roosevelt laid plans for a history-making conference here soon with Prime Minister Ramsay MacDonald while his special envoy abroad, Norman H. Davis, moved to learn from the Hitler regime in Germany what cooperation for world disarmament and economic recovery.

From London came the word that the Prime Minister looks favorably on the idea and a meeting presumably all arrangements for acting about the [illegible]

Meantime word came to the state department that Davis is going to Berlin from Paris, Friday, to talk with Adolf Hitler's foreign minister Baron Konstantin von Neurath Davis will discuss matters limited to disarmament and a date for the economic [illegible]

Hitler's rise to dictatorial power at the expense of Chancellor Pascal movement has led to fears in some quarters that the nation would seek to carry on in defiance of the Versailles treaty.

London, Eng.—J. Ramsay MacDonald, Prime Minister of Great Britain, and Joseph Paul-Endericle minister to Washington, it was learned Mr. MacDonald will confer with President Franklin D. Roosevelt and his aides regarding troublesome European and world problems

Remaining in Washington only a few days, Mr. MacDonald will return to London soon after the House of Commons reassembles April 25, prepared to preside at the World Economic Conference, it is said, when it meet plan at Geneva, and to continue the European pacification scheme inaugurated with Premier Mussolini at [illegible]

Sustax On Higher Incomes

B.C. Bill Imposes Additional Tax On Revenues Over $5,000

Victoria, B.C.—A bill providing for a sur-tax on higher incomes imposes a tax of one per cent. on all incomes of $5,000 and up to $7,500, and is increased by one per cent. every additional $2,500 up to $47,500, when a maximum levy of 18 per cent. is reached, to apply on all incomes in excess of that amount.

The second reading of a bill to amend the Income Tax Act, every corporation will be compelled to furnish to the commissioner of taxation a return of all dividends and bonuses paid to its shareholders or members during the preceding calendar year. The return must be made on or before the last day of February.

Flee From Germany

Prof. Einstein's Daughters Leave Germany For France

Cap-Rye-Mer, Belgium.—Prof. Albert Einstein's two daughters have fled from Germany, the scientist declared.

The younger daughter, who is married to a Russian, is now living in France. Her sister, the wife of a German, left Berlin secretly and has arrived at the town of Scheveningen in Netherlands.

Mrs. Einstein learned that the eldest daughter had fled when she telephoned to her home in Berlin, and was told by a weeping servant that her mistress had left secretly for the [illegible]

Welcome Jap Training Ships

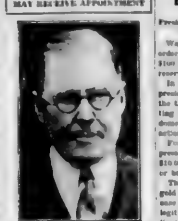
Victoria, B.C.—Twenty-one guns from the naval salute at Esquimalt barked a formal welcome to the Japanese training ships, "Iwate" and "Yakumo," when they arrived in Esquimalt harbor. Shortly after they dropped anchor more than 1,000 sailors were given shore leave and crowded the streets of the city.

To Aid Livestock Men

Ottawa, Ont.—A general survey of foreign markets by a livestock export commission was suggested in the House of Commons by Earl Rowe, Conservative member for Dufferin-Simcoe. There was no hope for economic stability in Canada until agriculture regained its feet, declared the Ontario livestock breeder.

W. N. U. 1809

MAY RECEIVE APPOINTMENT



It is understood that Sir Frederick Sykes will shortly have completed his term of office as Governor of Bombay and that J. C. C. Davidson, Conservative Chancellor of the Duchy of Lancaster, may succeed him.

Peace Club Plan

Premier Mussolini Of Italy, Says Plan Must Remain Intact

Rome, Italy.—While the French Government was drafting what reportedly is a revised peace project to submit to Premier Mussolini, of Italy, Il Duce has issued an advance notice that the fundamental provisions of his "peace club" plan must remain intact.

Premier Mussolini's statement was issued through the grand council of Fascism, his highest advisory body, after a late night session.

It declared that revised suggestions, asking for collaboration by France, Germany, and Great Britain for peace, are the only issues on which "peace can be built."

At the same time, the conviction was expressed that "through the revision of the treaties where it is needed," the plan will find in the leaders of the government "the same comprehension that already has been shown by the people."

The council said it felt sure that the formation of a new political atmosphere will make a fruitful international collaboration also possible in the field of economics.

Hon. Frank Oliver Mourned

Crowds Attend Funeral Of Edmonton's Best Known Citizen

Edmonte, Alberta.—All Edmonton mourned when the funeral of its best known citizen and the west's greatest champion—Hon. Frank Oliver, was held. Following a simple but impressive service in First Presbyterian Church at 2:30 p.m., a lengthy procession travelled to Edmonton cemetery where burial took place in the Pioneer plot.

Rev. A. R. Osborn pronounced the last earthly rites for the pioneer, statesman and publisher. There were four manned choirs.

AS IL DUCE MET BRITISH PREMIER

Here is pictured the historic meeting between Premier Ramsay MacDonald (left) of Great Britain, and Premier Benito Mussolini, of Italy, when they met recently to confer on a plan to preserve the peace of Europe. The photo was made as Il Duce greeted the British Premier on the latter's arrival at Rome from Geneva by 'plane. Following this meeting Premier Mussolini announced his Four-Power plan for a five-year disarmament holiday.

Lift U.S. Gold Embargo

President Roosevelt To Permit Free Exchange Under License

Washington.—President Roosevelt ordered the return of all gold ever held by individuals to the federal reserve system before May 1

In the same executive order the president authorized the secretary of the treasury to issue licenses permitting the use of gold in necessary domestic and foreign trade transactions.

For violation of the order the president decreed a maximum fine of $10 000 and imprisonment of 10 years, or both.

The order was issued to get such gold as is still in hoarding and to ease the national embargo to permit legit mate transactions under federal license.

The president will continue the firm executive hold on the gold supply of the United States to prevent foreign raids or domestic hoarding but underscores the gold embargo will be relaxed.

By the order the secretary of the treasury is authorized to permit its free exchange again under a licensing system.

Fight Grasshopper Plague

Manitoba Taking Measures To Combat Expected Outbreak

Winnipeg, Man.—Plans are being made to combat a grasshopper plague of alarming proportions in Manitoba next summer, Hon. D. G. McKenzie, Minister of Agriculture, told the Manitoba legislature when estimates for his department were under consideration.

The most effective forms of bait have been chosen and sources of supply arranged, Mr. McKenzie said. Surveys of areas of infestation from "poison clouds" were completed last fall by Dr. Norman Criddle, Dominion entomologist, and a grad idea was obtained of the areas where the outbreak of grasshoppers is likely to be most serious.

The amount of money needed to combat the menace could not be estimated this early, Mr. McKenzie explained. It might be between $50,000 and $60,000, Premier John Bracken indicated a bill may be brought in before the end of the present session.

Decrease Wolf Bounties

Bootlegging Of Pelts From Manitoba and Quebec Bothers Ontario

Toronto, Ont.—Induced by an epidemic of wolf-pelt bootlegging from Manitoba and Quebec, a bill will be introduced to the Ontario legislature cutting the wolf bounty from $25 to $15, by Hon. G. H. Challies, provincial secretary. Since the first of the year, Mr. Challies said, more than a dozen cases of Manitoba wolf skins had been passed off on the department of game and fisheries as Ontario-taken. Manitoba has, it is understood, eliminated wolf bounty payments.

BRITAIN PLACES EMBARGO ON RUSSIAN GOODS

London, Eng.—The House of Commons gave second reading to the government's bill authorizing executive declaration of an embargo against Russian goods, after turning down a Labor motion for its rejection by a vote of 347 to 43.

Opposition Liberals refrained from voting

The government tabled in the House of Commons a white paper in which Sir Esmond Cvey, British ambassador to the Soviet, told his own story of the arrest in Moscow of six British electricians on charges of sabotage, describing conditions in Russia as a "reign of terror."

The ambassador described in these words an interview with five other prisoners

"While the prisoners seemed generally in good health the drawn expressions of Thornton and Cushey gave me a definite impression of their having been 'put through it.' They were all obviously terrified of speaking and confined themselves to a minimum of replies."

On March 16 Mr. Robert Vansittart telegraphed Sir Esmond the substance of a conversation he had with the Russian ambassador to Great Britain

In that conversation, he said, he told the Russian ambassador there was a wide-spread feeling in the United Kingdom that the charges against the six engineers were grotesque, hysterical, "a stage performance, and a very bad one at that, intended only to impress, by serving up scapegoats, Ill-smeares of certain industrial undertakings in Russia."

In a stormy debate in the House of Commons over the bill giving the government wide powers to act in invoking trade relations with Russia, Sir Hilford Crigge called upon authorities on international law to show interference by way of reprisal was only justified when the accused had exhausted all means of redress before all the courts of the country in which he was detained.

"Do you want to wait until they are shot?" shouted a voice amid a storm of Conservative interruptions

Sir Esmond described his attempts to secure specific information on the nature of the charges against the men and to ascertain if they would get a public trial.

He told of an interview with Alan Monkhouse, director of the company, in which he learned Monkhouse had been questioned continuously for 18 hours after his arrest. At 3 a.m. he said Monkhouse was allowed to go to bed, but was aroused again at 7.30 the same morning and questioned for another 17 hours. He added good meals were provided, but that the questioning proceeded with the prisoner and his examiners ate.

Inquiry Is Ordered

Cattle Export Trade To Be Investigated By Commission

Ottawa, Ont.—Decision to institute an inquiry into Canada's cattle trade by a committee of the senate means the cattlemen of Canada will have their problems thoroughly aired at the present session of parliament. A committee of the House of Commons is already busy investigating the milk trade and the dairy branch of the livestock industry.

The inquiry followed a proposal advanced by Senator D. E. Riley, of High River, a veteran cattleman himself.

Worship Plane

Hillman In Mount Everest District Experience Change Of Heart

Purnea, India.—Hillman of this country kneel and worship the planes of the British expedition which flew over Mt. Everest and Mt. Kanchanjanga. When the first planes were sighted the hillmen believed the mountain deities would punish them for incursion upon their realms, but having watched the planes in their remarkable ascents, they have experienced a change of heart and now worship the planes as they pass overhead.

Racial Origins Of Canada

Persons Of British Origin Constitute Nearly 56 Per Cent Of Population

In a total population of 10,376,786 in Canada in 1931 about 56 per cent were of British and French racial stock according to an official report, entitled "Origins of the People," which has just been issued. The British races numbered 4,361,971 in 1931 as against 4,868,738 in 1921, a gain in the decade of 10.53 per cent. The population of French origin increased from 2,452,743 in 1921 to 2,927,990 in 1931 or 19.38 per cent.

From 1921 to 1931 there was an increase in the population of 1,508,837 which represented an increase of 16.66 per cent over the 1921 census. Of the increase recorded in 1931 persons of English origin contributed 198,081, or 13.24 per cent of Irish, 125,606, or 7.74 per cent, of Scottish, 172,725, or 10.57 per cent, of other British races, 20,542, or 1.20 per cent of French, 475,347, or 29.91 per cent. The British races make up 5,12,533 or 22.35 per cent. of the total increase in population from 1921 to 1931 and with the French population, which is almost wholly of Canadian nativity, account for 987,500, or more than 62 per cent of the total increase made in the decade.

Persons of British origin constituted 61.86 per cent of the total population in 1931, as against 58.62 per cent in 1921. In 1931 the English made up 26.42 per cent of the total population Irish, 13.97 per cent; Scottish, 23.72 per cent, and all other European races, 17.88 per cent. Asiatics were about four-fifths of one per cent of the whole.

Refuge For Jews

Immigration Into Palestine Is An Acute Question

Sir Philip Cunliffe-Lister, secretary for colonies, states that immigration into Palestine must be governed by the economic absorptive capacity of that country, and that this principle cannot be departed from.

He had been asked in the British House of Commons whether, in view of the position of Jews in Germany restrictions on immigration into Palestine would be relaxed for the benefit of refugees.

He pointed out, however, that administration of the immigration laws lies with the high commissioner of Palestine and that the Palestine executive and the Jewish agency may make any representations they wish to the high commissioner.

Ice Effects Of Rain

Two Hundred-Inch Lens Being Made In California College

Machinery is being installed at Pasadena, California, to grind and polish a mirror which will enable scientists to peer millions of miles farther into space than man has ever before.

The machinery will be housed in a huge, heavily insulated room of the optical shop nearing completion on the California Institute of Technology. The mirror, 200 inches in diameter, will be a part of a giant telescope to be built by the institute.

The largest now in use is the 100-inch reflector of the Carnegie Institution's observatory on Mount Wilson.

Prelude Big Show Parade

The jig-saw puzzle is a blessing, believes Rev A. Lloyd Smith, D.D., of Dominion-Douglas United Church, Montreal, because it is helping to keep families together following a time when the home was merely an empty boarding house by the garage. It is also another factor in promoting of the simpler life, the minister told the American Women's Club.

The Ordinary Budget

A man—How do you spend your income?

Smith—About 20 per cent. for shelter, 20 per cent. for clothing, 40 per cent. for food, and 20 per cent. for amusement.

Jones—But that adds up to 120 per cent.

Smith—Don't I know it!

W. N. U. 1999

Round But Not Very Good

Ninety-Seven Per cent. Of Anglo-Saxon Skulls Believed Round

Truth

Anglo-Saxons have a decidedly bad teeth record. Dr Percy Thomson, joint secretary for Canada of the Dental Hygiene Council told the Toronto Health League.

Preventative dentistry, the speaker said, is a health measure and began only 85 years ago when the first unorthodox dentist hung out his shingle in Baltimore Prior to that time the apothecary and the blacksmith attended to those tooth which ached their owners pain. drastic removal measures. Extraction era was followed by the "conservation age" when the policy was to save everything in the mouth Bridges and crowns flourished as dentistry supreme Then came the X-ray which led to the discovery that 90 per cent of disease is caused by infection and that 70 per cent. of the infection begins in the mouth, and goes via the blood to the weak parts of the body

Dr Thomson mentioned among the diseases most frequently attributed to infected teeth anaemia, rheumatism, tuberculosis and some heart diseases. Prevention of decay was most important, the speaker said, and stressed the wisdom of inculcating health habits in the first seven years of a child's life.

A survey had shown that 97 per cent. of the Anglo-Saxons have decayed teeth, 64 per cent. of the Central European, the Maori of New Zealand only 7 per cent. and the Esquimo only 2 per cent and decayed teeth in the children of these two latter races is unknown. Scientists have been forced to the conclusion, Dr. Thomson said, that good teeth are the product of foods eaten in their natural state, with all the essential minerals.

Art Treasures Moved

Chinese Afraid Museums In Peiping Might Be Looted

Twenty-four cases of the art treasures of the Palace Museum in Peiping, since the property of Chinese former emperors, have been taken for safe keeping to Kaifeng and Loyang-fu, in Honan Province, two cities which were both at one time imperial capitals of China. It is possible that museums may be opened in the Honan cities, where the public may observe the art objects of Old China.

The museum's treasures were moved because it was thought that if the Japanese continue their drive extended to Peiping, it might cause damage to the museum there. The bulk of valuable all the treasures was too great, so that only one-fifth were transported. Even so, 3,600 packing cases and two trains of 24 cars each were used.

The Palace Museum in Peiping has so many art objects that it cannot display more than 10 per cent. at one time. It has been suggested for some years that the treasures be divided, and other Chinese cities be given the privilege of having a share for museums. But Peiping residents have vigorously protested such suggestions. They have argued that the palace of the emperors who gathered the collections form an ideal setting for their exhibition.

But now just one-fifth of the art objects have been taken from Peiping. It is doubtful if they will be returned. They are more likely to grace museums in other Chinese cities.

Command Planned Cow

Until the close of her long reign the second Victoria and Albert regularly visited Cowes in the royal yacht. Of various anecdotes related concerning her experience afloat one of the most quaint remark made after meeting the crew's grog: "I think it would be very good if it were strong-er." Naturally the men were delighted with a command so made to the point.—London Saturday Review.

War Lessons For Germans Begin

Boys of Germany between the ages of eight and 18 are receiving military instruction At Hecklenburg one of the courses includes advancing through wire entanglements at a point. In another class throwing hand grenades is taught. All instruction is under military supervision.

With (to Stubby, whose holder has fallen): "Try to hang on for one minutes, dear, while I pick those tulips" The Humorist, London.

Bad News For Shoe Shiners

Modern Insects Assuming Development Of Half-Fashioning Leather

A new, self-polishing shoe leather is announced by the Mellon Institute of Industrial Research at Pittsburg, Penn.

The heat of the foot, says the announcement, activates a polish impregnated to stay color in the leather so that the shoes require only a slight rubbing to preserve the desired polished effect

The polish is only part of "an entirely new combination of materials" impregnated in leather, the announcement continues. These substances are said to "support and lubricate" fibres of the leather, preventing their breaking down under wear, to simplify manufacturing processes, "add to the leather's water-resisting qualities," do away with "creaking" and to produce a shoe "practically scuff-proof."

The novel finish is announced as applicable to various kinds of leather, but particularly designed for the kid types.

More Dignity Required

Modern Clergy Must Not Carry Big Bundles On Street

Dignity is stressed in new Turk ish regulations for the Moslem clergy, most important of which is the shortening of their coats. The regulations set the length of garment to six inches below the knee, doing away with the down-to-the-ground length. They are also forbidden to carry large bundles, baskets or water cans through the streets Their salaries ranging up from 67.50 to 250 per month have been slightly raised as they can bite others to do the work.

Modification of Italy's standard of living income tax is being demanded.

Gardening Notes

By Gordon Lindsay Smith

The first vegetables to come are usually those grown for their leaves like spinach, cress, mustard and lettuce One can sow the first of these just as soon a the ground is ready, and a method of sowing them at intervals of a week for about a month. This will give a much longer season and a succession of very necessary vitamines at a time when people are just getting over the effects of a long diet of starchy stored foods or imported southern stuff in all of these the new seeders which will keep the table supplied with greens right into July With the first of these early leafy vegetables should go in the first sowing of peas The best and largest crops of peas come from the early planted seed This vegetable will stand considerable frost, and a shower all after planting should not be viewed with alarm but as a good omen The early varieties will begin to bear in forty-five days.

At this time, too, should be put in the first sowing of radish. A week or two later got in the second sowing of the leafy vegetables and more radish, the main sowing of peas which should be made at least one late, one medium and one early variety, so that the season is prolonged to its maximum. Do first of the beets and carrots and half of the parsnips. It is good business at this period to risk a row or two of corn and beans in a late frost rather than to be in a small loss anyway in the third planting group will come cabbage and cauliflower which should not go out until danger from frost is past, and a little later when the soil really warms up plant melons, cucumbers and celery.

Materials For Paths: A well planned path usually adds to the appearance of any garden. Curves are advisable, but unless there is an obvious reason, such as a corner of a building or fence, one should be supplied by planting a tree or clump of shrubbery. A path curving under some covered trellis and leading up to a new vista of the lawn with the Stevens behind is very effective. Several materials can be used. Flat limestones laid irregularly are probably the best, though gravel, cinders, brick or, if the traffic is not to be too heavy, a grass passageway between flower beds is also very good. In laying the other materials mentioned, particularly brick or stones, this should be done in such a way that the surface will be flush with the top of the surrounding sod, so that the lawnmower will run over it. Sun dials, pools, garden seats, statuary and arbours can be incorporated in the general layout.

Plant Plants In Bunches: Plants started from seed sown in shallow boxes on the window sill or in the hot beds will require some attention. Just as soon as the second set of leaves has developed there should be a little thinning, so that the individual plants will have about half an inch each way. Be careful not to water excessively and on fine days open the window a little. Later on when the plants have reached about two inches in height it will be well to transplant to more commodious quarters and to harden still more by raising the window or putting the boxes outside. With the hot beds the usual procedure is to replant in shallow boxes and place in a cold frame, which is simply a glass covered frame without any heating manure. In this the plants are gradually hardened by exposure until the time comes for putting them in permanent quarters after all danger of frost is over. It is not too late to start any flowers or vegetables which will transplant, either in a sunny window or a hot bed. In these sections of Canada where the season is short petunias, asters, tomatoes, cabbage and such things really should be started inside if one is to be sure of results.

Canadian Furniture

The market for Canadian furniture is changing domestic as shown by the fact that only $182,208 worth of Canadian-made furniture of wood was exported during the calendar year 1931, while the total annual production was over twenty-seven million dollars. The imports of furniture of wood and other material amounted to $1,234,994 during the same year.

Already Collecting Cargo

Pennsworth Will Make First Big Voyage in July

The S.S. Pennsworth will leave Newcastle-on-Tyne July 25 with its first cargo of the year for western Canada by way of the Hudson Bay route

Announcement of this was made in a cable received by the Saskatchewan Government and the Regina Board of Trade from the Dalgleish Steamship Company.

Leaving Newcastle, the "Pennsworth will take on additional cargo at Antwerp If there is sufficient cargo available at other ports such as Liverpool to warrant it, the ship will call at them ports before sailing for Churchill.

Disputing For Honor

Two Professors Claim Invention Of Propellerless Ship

Professor Orestes Angelini and Prof. Mondello are contesting the honor of having discovered the means of building a ship without propellers.

While Prof. Mondello has applied for a patent for his motor ship without propellers, Prof. Angelini claims that the Italian navy has already accepted his invention in theory and is now studying up a ship for experimenting his invention.

Trials of both devices will soon take place.

Wins Bruce Medal

George E. Murray, metallurgist of the Consolidated Mining and Smelting Company, at Trail, B.C., was awarded the Randolph Bruce medal at the 54th annual convention of the Canadian Institute of Mining and Metallurgy held in Toronto, for the year's most notable contribution to the advance of mining.

CHAPTER VIII Continued.

Presently Haskell turned around, smiling pleasantly. "I was disgruntled about something when you first came in, corporal. You really have patrolled hard for several months. I'm sorry I snapped at you. You can have a day or two days off whenever you like. You want to start tomorrow?" And when Bill nodded eagerly: "Very well, I'll throw in the rest of this evening, too. By the way, when you go past barracks ask Whipple to step down here."

"Snakes!" Bill breathed to himself, as he thanked Haskell and went out the door. "That Spring-heel Johnny must be winding up to ask a favor of me, or something. But I've got my three days to help Alan out. Lord, I hope Alan shows up during my free time. He might maybe let me go along on his trick."

With no suspicion of the ugly truth, he turned up the twilight slope.

When Whipple came in, Haskell ordered him to close the door and pull down the window, to guard against possible eavesdropping. Then he tersely explained the situation. He added:

"Hardock will probably steal some more gasoline and oil tonight. What he's already stolen isn't enough for a plane to do much manoeuvering on. I want you to watch him stealing that stuff so that you can later be a witness. He'll probably have time to take those drums only a couple miles from here tonight. Tomorrow he'll take all of it on to the place where he's to meet Baker. He's been sneaking it away little by little when he had the chance, and hiding it close by; but during his three days he'll take it to the meeting place.

"You go down to the river bank now to those two tepees and get that Indian called Ogi-Tomax. You remember Hardock thrashed him one time last winter for carrying a squaw-climber home with him. Get him on a personal interest in this, he's just the man we want Take a carton of my cigarettes with you and a little rum as a silence-purchaser. I'll personally pay him five dollars a day Do you understand so far?"

Whipple nodded. Haskell went on "You and the Indian are to shadow Hardock tonight and tomorrow Find out where he's taking that stuff and where he's going to meet Baker. As soon as you do that, whip back here and report to me"

It was late the next evening before Whipple returned. He came looking tired, bedraggled, but with electric news.

He and the Indian had watched Bill steal more gas and oil from the stores. They had shadowed him to the temporary cache two miles up the Mackenzie. There he had loaded his canoe to the gunwales with the drums and cans and had taken them all to a big lake twenty miles on up the river.

He had cached the fuel on a headland called Goose Point; and was waiting there without the faintest suspicion that he had been trailed and was being watched. The Indian, lying near bank in the willows, was keeping an eye on him.

As Haskell listened to the report, he forgot the haggard day and night of responsibility. He had scarcely dared hope for such news as this.

After careful thought, guarding against any slip-up, he ordered Whipple: "Go get your ride and bait-gun. I'll take mine, too. We'll go up then in the launch. You can drive it. We'll capture Hardock and those supplies. That'll be that. Then we'll wait there. The plane'll be alone in a couple days. We'll keep the launch in good overshipping. When the machine lights down and they go ashore to get the supplies, we'll run it and put it out of commission. Then we'll have Baker and this Featherof—and we'll put them where the dogs won't bite 'em!"

After his despair of their last week after his helpless festering anger at Baker, it was a new lease on hope to know he was going to smash Baker's two vessels and throw him into prison and make his marriage to Elizabeth impossible! Baker was waiting all unsuspectingly into a deadly trap. Walking into arrest and criminal disgrace and prison. He would be lucky to get off with a sentence of two years. That was the statute minimum for his offense.

Buckling on his belt-gun, Haskell smuffed the candles and went out of his cabin on the easiest mood exultant, most deadly certain trip he had ever made.

CHAPTER IX

Wings Over The Wilderness

On that first day of fight as dawn broke full and the wind chased away a layer of gossamer clouds beneath the White Speedair Alan looked down with marveling eyes at a strange panorama. Evergreen forestry, silvery lakes and silvery network of rivers far below swept past at speed to amaze him In thirty minutes he was covering a distance which would take a whole day's hard traveling by canoe or humatik.

Knowing that if he and Bunnard showed up at a posts post or larger trading center, it would mean a quick and sorry end of their flight. Alan planned to avoid such places religiously He had a constitution that he and Bunnard were wanted" They had left too many tracks in Edmonton clews that would speedily be followed up The police there, a wire was out, had certainly connected them with the theft of all that government prosperity and had radioed instructions for their arrest.

Eventually he and Bunnard were going to be caught It was an inevitable as sunset. Now or late they would have to return to civilization and face the music To Alan the worst of it was that Bunnard was going to pay a heavy price for having to him on this thankless job. For himself he did not greatly care, he hardly thought of it . . . He was headed north again on his last patrol, his greatest patrol.

As they worked on north, they made moderately good time, but only by incessant care and worry Engine trouble caused them delay. Again and again they set down on some unknown lake or lake and sweated for hours over the old motor. Fuel was a constant problem. Avoiding Mounted detachments of Royal Mounted stations like the plague, they cared stop only at wilderness-buried posts where radios were unlikely and no police. They could never be sure, be certain of getting fuel, and what they did get was usually half kerosene.

Alan was looking forward to his rendezvous with Bill as the end of all this worry about gas and oil. Besides the fuel there at Goose Point, Bill had promised to cache some drums also up the Alouska near Joyce's home.

Alan was fervently looking ahead to meeting Bill at Ella Traverse lake, to getting those precious supplies, to seeing Joyce again them on the Big Alouska. All of his loyalty to the sister of his dead partner could not keep him from comparing Joyce's vital spirited personality with Elizabeth's leisure-bored smut, and Joyce's two years of heroic sacrifice with Elizabeth's idle deliberate dependence.

On their last evening together, after a day of engine trouble and head winds and blinding rains, they alighted in a little spruce-burned lake on Silverfish River a short hundred miles south of Fort Endurance. Anchoring the plane, they paddled ashore, cooked a meal, and turned in early in their blankets for a few hours of desperately needed rest.

"Tomorrow's the day of days," Bunnard remarked, thinking of the supplies and a base to manoeuver from.

"It's the day of days," Alan agreed, but he was thinking of Joyce's eyes down the path, bareheaded in the sun, to greet them. Tomorrow he would know if she was safe. Tomorrow he would rendezvous with Bill the White Speedair would be dropping down upon the Big Alouska.

Bunnard was asleep almost instantly, but Alan, tossing in a useless attempt to sleep, finally got up, built a tiny fire, and sat beside it, thinking, a dead pipe in his teeth.

As he sat there under the solemn spruces, he tried to look steadily at his looming marriage to Elizabeth, and decide his course. No longer blinded by idealization of her as a girl, he saw now, with pitiless insight, that all along she had not wanted him unless he had a good income and was out of the North. She might love him as well as she had ever loved anybody; but to her he was not greatly more than a means of getting what she wanted out of life.

Has So Short of Breath Could Not Lie Down to Sleep

"Mrs. F. J. Chernoff, Shoreacres, B.C., writes:—"I have been troubled with shortness of breath I could not lie down to sleep.

I couldn't do any hard work, or climb the stairs, and had nervous and smothering feelings, and became very weak.

I tried all kinds of medicine, but could get no relief until after I had taken three bottles of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

Price 50c. per box. At all dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1999

The prospect of marrying her, when his respect was gone, made Alan writhe And his respect was gone with a vengeance These moments in the cabin, when she offered herself to him, had been a shock and revelation. She had acted not out of excusable passion, not out of love, but as a guarantee that he would take that Victoria job. He thought of the indecent with something of revulsion.

Now he was groping to see the honest and righteous thing for him to do. He wondered whether it would be courage, or a weak yielding to desire, for him to break with Elizabeth and sweep aside the obligations binding him. There was right on both sides. Elizabeth was waiting for him; he had promised to marry her and take her out. he had burned his bridges and committed himself to that Victoria job. Yet it was wrong to enter a loveless marriage that would bring tragic unhappiness. It was wrong to marry Elizabeth when his whole-hearted respect and love went out to Joyce MacMillan.

In the lonely anguish of his thought,s he had his decision to make on his in the hands of himself. He but he must see Joyce again before he could take a decisive step. If he did capture those arms criminals and so cleared her father, she would be grateful with all her heart. He meant to tell her about the tragic happenings which had bound him to Elizabeth. If he could win back that old intimate comradeship with her and they could begin now, then the righteous thing was to put Joyce's happiness above Elizabeth's.

(To Be Continued.)

Unemployed Turn To Placer Mining

Seven Thousand Men Are Combing Placer Areas In British Columbia

One of the highlights of the British Columbia gold industry during 1932 was the active search that was made for placer gold, according to the Department of Mines report for the year. From the number of free miners' certificates issued, it is estimated that some 7,000 men, formerly unemployed, participated in this search. These men, it is stated, have scattered through the old placer areas, in search of making wages with the "Gold pan" and "rocker." Experienced prospectors have been literally combing the placer areas, particular attention being given to the new areas for old pre-glacial and inter-glacial drainage channels. Reports of new discoveries of coarse gold, found underlying false bed rock are quite common in the old camps, such as the Cariboo, Omineca, and other areas.

An inter-island air service has just been inaugurated in the Philippines.

WHOLE FAMILY WITH INDIGESTION

A mother of four writes — "Myself and family of four all seemed to suffer from acidity, pains in the back, and other forms of indigestion I suffered whatever I ate. But since we have been taking Kruschen (for the last three months) we can eat anything, and all enjoy our food much better. We never have a trace of acidity or pain now I think it is wonderful— it has no upsetting results. Whatever we may have to go without, we could not give up Kruschen." —(Mrs.) M.E.

Kruschen flicks out'ity neutralizing acid, takes all the bruised out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals. Kruschen will keep your inside clean and sweet. Pure and invigorated blood will be sent coursing to every part of your body. You'll feel wonderfully energetic and well. As healthy and keen as it is humanly possible to feel.

Links Helps For This Week

"Wait on the Lord, be of good courage and He shall strengthen thy heart, wait, I say on the Lord." — Psalm 27: 14.

"He giveth power to the faint, and to them that have no might He increaseth strength."— Isaiah 40.29.

Should we feel at times disheartened and discouraged, a comforting thought, a simple movement of heart towards God will renew our powers. Whatever He may demand of us He will give us of the increased the strength and the courage that we need.—Fenelon.

We require a certain firmness in all circumstances of life, even the happiest, and perhaps contradictions come in order to prove and exercise this. If we can only determine so to use them, the very struggle will bring tranquility to the soul, which always enjoys having conceived its strength in conformity to duty.—Wm. von Humboldt.

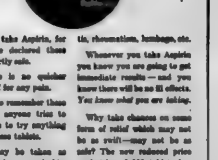
The Sunday Way

The Fort William Times-Journal says one of the reasons why the world is so loaded down with debt is that it is so much easier to seek for new forms of taxation than to study new economics. Governments have much the same mentality as the fellow who gave a note in settlement of an account and then murmured, "Thank God that's paid."

Old Lady (to policeman)—"You lost my canary. Would you mind notifying the flying squad?"

FOR ANY PAIN

Have you ever found any quicker relief than this?



Anyone can take Aspirin, for doctors have declared these tablets perfectly safe.

And there is no quicker form of relief for any pain.

It is well to remember these things when anyone tries to persuade you to try anything in place of these tablets.

Aspirin may be taken as often as there is any need of its comfort: to stop a headache, throw off a cold, drive away the pains from neuralgia, neuritis, rheumatism, lumbago, etc.

Whenever you take Aspirin you know you are going to get immediate results — and you know there will be no ill effects. *You know what you are taking.*

Why take chances on some form of relief which may not be as swift—may not be as safe? The new reduced price on bottles of 100 tablets has removed the last reason for ever experimenting with any substitute for Aspirin!

Aspirin is a trade-mark registered in Canada

LOCAL NEWS

The Rajah was a great admirer of love and beauty — are you? Empress Theatre, April 25 and 26.

A business meeting of the A.A.A. was held on Monday, April 10, when final arrangements were made for the "Gingham Dance" to be held May 5. It was decided to have the dance in the Memorial Hall, if this hall can be obtained for that date, and to have the Peggy Pale Orchestra supply the music.

"To save an editor from starvation, take his paper and pay for it promptly. To save him from bankruptcy, advertise in his paper liberally. To save him from disorder send him every item of news you can get hold of. To save his from profanity, write your correspondence plainly on one side of the sheet and send as soon as possible. To save him from untimely burial by him—feed men are the only ones who never make mistakes."

A dance will be held at Pleasant View hall on Wednesday, April 26th.

The School will be closed for the Easter holidays on Good Friday, Easter Monday, and the four days immediately following Easter Monday.

All phases of business will be closed Good Friday.

Far-famed world championship wheat from Alberta will be used to seed fields in far away Newfoundland this season, as a result of the sale by the Alberta Department of Agriculture of a carload of prize seed wheat from Wembley district, in the Peace River, to the Newfoundland Department of Agriculture. The carload was made up half of Marquis and half of Reward.

Taken From the Files
10 Years Ago Today
Thursday, April 14th, 1910

Seeding is now general in the Fort Saskatchewan district this week.

The town boys defeated the Bible Class at a ball game here last Friday, by a score of 21 to 11. A small crowd witnessed the match.

Easter services were observed at all churches in the Fort last Sunday.

James Graham finished sowing 50 acres of wheat last night.

Jot Carmodden, government bridge builder, called in town with his gang Thursday last.

The cement work on the provincial road building is now being put in. Mr. Dobbing is the boss in charge.

A presentation was made by Mr. Stevens, the people's warden of St. George's Church of an address and a purse of gold to Miss Davies, in token of their appreciation of her gratuitous service as organist.

The school board is taking advantage of the Easter vacation to give the school a through fumigating and general clean-up.

COMING EVENTS

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held in the Union Hall on Thursday, April 13th, at 3 p.m.

A paper will be given on "Rose and Gardening Hobbies". There will also be a demonstration of hand made rugs.

New members invited.

School Fairs

Under th general policy of economy the provincial government will make no grants to school fairs this year. There is, however, a quantity of seed on hand which will be distributed to those school fair organizations who are in a position to carry on themselves this season.

More than one-fifth of the total population of England and Wales live in Greater London.

YPRES VALLEY

Miss Clara Dittrich who under went an operation last Friday in the General hospital is progressing favorably

The baseball club held their meeting on April 1, when it was agreed that Partridge Hill and Ypres Valley combined to make up a team. Mr Bill Pearce was elected manager. Mr. Wilson Alton elected Captain and Clarence Cranston Sec Treas. for the club.

On Wednesday April 5th Joseph Jenny Junior U.F.A. local met at their play "Safety First" in the school here. The cast is to be congratulated on the excellent program they gave. Had rain's prevented many people turning out and they sure missed a treat. The play was followed by a dance.

Quite a few of the folks around here are in bed with the flu. The ladies aid meeting is postponed in the meantime.

A few people went over to Partridge Hill last Friday evening to the play there and enjoyed the same.

ARTHROSAN NEWS

Under the auspices of Brosmer U. F.W.A., a play was presented last Friday evening in the United church entitled "Yiamdo Yemen's Yeh". This play has been given at various points throughout the district, and enjoyed by capacity audience.

Proceeds will be in aid of funds of the U.F.W.A. and W.H.S.

Light Opera to Be Presented Here, April 25 & 26

The Cast of the light opera, The Rajah of Rajahpore, is working often and late over the production. Chorus, dances and leads are trying hard to make the evenings of April 25 and 26th enjoyable to all. To send their hearers home humming the tunes and laughing at the jokes is their ambition.

The opening scene is laid outside of the Palace of the Rajah of Rajahpore with the chorus attending a garden party in honor of Miss Nelly O'Neal (adopted daughter of Major-General Bungay, V.C.), in whose honor the Rajah is giving a grand fete that evening. Elsie, Violet, Rose and Dorothy, Neilless friends, are impatiently awaiting her arrival, when Patrick, The Major's Irish servant announces her coming. Harry Linle, a young clerk in the Government offices, is in love with Nelly, who returns his affection, but the Major will not hear of such folly, as he has made up his mind that she shall marry a rich wealthy husband. The major and the Rajah appear upon the scene, and the later produces the "Magic Ruby", a priceless heirloom handed down to the Rajahs of Rajahpore from generation to generation. Ras, the Rajah's retired as a Magician, enters, and hearing the story of the wonderful jewel, determines to possess himself of it. He is successful, and the Rajah offers wealth and power to whoever shall recover the Magic Ruby, thus saving the fortunes of Rajahpore.

In the second act Ras Kol is discovered in his cave attended by his band. From the distance comes the sound of a hymn sung by the people to the outing run. Ras and his men depart and Harry Linle, who has suspicions that the Ruby is in the Bandit's possession, enters endeavouring to find the Jewel and the remainder of act 2 is concerned with Harry's efforts to recover the jewel and the enlisting to his aid of Hunter, Goddess of Light. The third act completes the story and ends amid scenes of general rejoicing.

ST. JULIEN'S DAY

Canadian Legion, B.E.S.L.

Owing to the fact that the United Church has its quarterly Communion Service on Sunday next, it is requested that a joint service cannot be arranged. The Veterans will therefore keep the Anniversary at St. George's Church, on Sunday at 7:30 p.m., when a special service will be held.

The Chaplain of the Fort Branch the Rev. C. Read will be the preacher.

All Veterans are especially invited and will be welcomed.

OLD-TIMER OF LAMOUREUX DIES SUDDENLY

Cyrille Demers of Lamoureux, Alberta, passed away at his home at Lamoureux on April 13th. He is survived by his wife, two daughters, Rose and Adrienne, and three sons, Joseph, Archille and Maurice, all of Lamoureux. The funeral service will be held on Thursday morning at 10 o'clock at the Lamoureux Roman Catholic church. Rev. Father Garnier will officiate and interment will take place in the Lamoureux cemetery. Howard & McBride, funeral service.

BROWNIE MEETING

The Brownies have been very busy preparing for their second class badges which they hope to have presented to them by the Guide Commissioners, Mrs. Purdee of Edmonton, and Miss MacEachen of Winnipeg, Dominion Field Secretary, at their next regular meeting Monday, April 24th, after 4 o'clock. Anyone wishing to attend will be welcome.

At the last meeting of the Brownies they received a letter from the Secretary of the Fort Saskatchewan Red Cross thanking them for several cakes of bunion which they had knitted.

Josephburg News

The Josephburg baseball club held a meeting in the school when the following officers were elected for this season.

Manager, Alfred Hennig.
Captain, R. R. Rippel.
Sec.-Treas. Wm. Unterschultz.

The ball diamond this year will be situated on Frank Thomas's land just opposite the Josephburg Service Station.

The ball players are all enthusiastic and are contributing money towards the purchase of new ball suits.

The Josephburg Junior U. F. A. will hold their regular meeting at the home of Mr. and Mrs. P. B. Mohr on Saturday evening, April 22nd.

Rev. Korn of Vegreville will hold service at the Reformed Church on Sunday, April 23rd, at 10:30 a.m. There will also be Sunday School.

Mrs. Jacob Thomas spent several days with her sister Mrs. Bohler at Sunny Flats.

Quite a number surprised Mr. and Mrs. Ed. Frey on Monday evening, the occasion being their twentieth wedding anniversary. The evening was spent in dancing and card playing. At midnight they were presented with a lovely tea-set, the gift of their relatives.

Mr. Alfred Mohr of Three Hills spent Easter with his mother, Mrs. M. Mohr.

Mrs. Alfred Brenken of Meadow Lake, Sask., left for home, after visiting with her father, Mr. V. Gaul and sisters and brothers.

PERMITS FOR TRUCKS TO CARRY PASSENGERS McPHERSON PLAN

Edmonton,—Permits for freight vehicles or motor trucks to carry passengers along certain routes are provided for in an amendment to the public vehicles act which Hon. O. L. McPherson, minister of public works, introduced to the legislature.

The bill gives the department authority to make regulations as to operating such vehicles and fees to be charged for such permits.

Hon. McPherson said there were cases where trucks operating along the route formed the only means of transportation. Granting of permits would enable these trucks to carry passengers, while also transporting mail or freight.

NOTICE OF PREPARATION OF ASSESSMENT ROLL
Town of Fort Saskatchewan
Assessment Roll 1922

Notice is hereby given that the Assessment Roll of the Town of Fort Saskatchewan for the year 1922 has been completed and is open for the inspection at the office of the Secretary-Treasurer of the town from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer of the town.

Dated this 10th day of April 1922.

Jas. Biddle,
Secretary-Treasurer.

Mother: "You were very, very naughty to disobey me, and I have punished you to impress it on your mind."

Son: "Mamma aren't you mistaken in regard to the location of my mind?"

A dam during the summer of 1922, may mark the turning of the tide and the advent of better prices.

Women's Institute Held Interesting Meeting

The regular meeting of the Fort Saskatchewan Women's Institute was held on Thursday, April 13th, when an interested audience listened to a paper on Garden Hobbies by Miss Evelyn Murphy, Edmonton.

Much excellent advice, gained from actual personal experience was given concerning choice of annuals and perennials, flowering of rose culture which is Miss Murphy's particular garden hobby, she said that she soaks new bushes in a tub of water for 24 hours before planting. The holes should be planted 15 or 18 inches apart in beds sufficiently large that the roots may be well opened out. The graft joint must be planted two inches below the surface of the ground and the earth so firmly pressed down that no air pockets remain. The bushes should then be pruned drastically, leaving only two or three buds on the branch above the ground and cutting out all weak branches. Hybrid tea roses only bloom in new wood so do not spare the pruning knife if the roots are there to support the trees a glass gem jar over them and the results are like magic. The ground must be kept well cultivated on the surface but the roots must not be disturbed. Roses in well rotted cow manure in the spring every two years. For winter protection the mound the ground thoroughly just before frosts set in and then puts a mound of earth borrowed from the potato patch about ten inches over each bush. Between the mounds is filled in with leaves and potato tops to make the surface level so that in the spring the sun will not penetrate to the roots too soon and start growth before danger of frost is over. The covering is not removed till the first of May, and the pruning follows, growth may be stimulated with the inverted gem jars as mentioned before. It may take weeks for the slow ones to sprout but they seldom fail.

Among the roots highly recommended by Miss Murphy were, Pres. Karl Druschki (white), General McArthur (red), Grues an Teplitz (red), Madame Butterfly (pink shaded apricot) Ophelia (salmon flesh), Rev. F. Page Roberts, (orange gold), Madame Edouard, (bright cherry rose) and Elen Poehlen (red).

Mrs. Arnold Carmodden gave a demonstration of rug making, showing how to put the foundation in the home-made frame, how to cut the materials and do the actual work. She emphasized the necessity of having the foundation of sturdy material, carefully and strongly bound and having it in the frame absolutely straight with the warp of the goods.

Six handsome rugs displayed on the wall were convincing evidence of what may be accomplished with what would otherwise be waste materials at a minimum of expense provided one has patience, skill and artistic ability. After the demonstration Mrs. Ehrenmiller answered the hosts of questions put to her by the highly interested audience.

Mrs. Davis thanked Mrs. Carmodden on behalf of the meeting.

Mrs. Baker read an appropriate address to Mrs. T. W. Lane expressing the regrets of the Institute over her departure from the Fort and extending good wishes for her in her new home.

A report of the Cemetery Committee was read and this will appear in a future issue of the Record.

Mrs. Calhoun and Mrs. Grunert were hostesses during the tea hour.

Shakespeare talks of "livers white as milk." A liver shark recently taken at Harbor de Loutre, New Brunswick, yielded 350 gallons of liver and a great quantity of oil, according to the Canadian National Railways. The shark measured 32 feet and weighed 8,000 pounds. That was "some" liver.

Boss (conscientiously): "So you went to get this afternoon off? I suppose your grandmother died, eh?"
Office Boy: "No, sir. She eloped."

COMING EVENTS

The Brownies will present Two Short Plays in the Empress theatre on Friday, May 12th.

The reserved seat sale of Rajah of Rajahpore light opera is now open at Smith's Drug Store.

There will be a meeting of the Wolf Cubs in the Town Council Chambers on Friday evening at 7:30 p.m.

A DANCE
(Old-time and Modern Dancing)
will be held on
WEDNESDAY, APRIL 26th.
at
Pleasant View Community Hall
Refreshments. All welcome

I WANT TO HOLD SPARES DAY ON JUNE 2

Latmost will hold an old-time sports day on June 2rd. Baseball, basketball races in fact entertainment of all kinds will attract all members of the family.

A grand dance will wind-up the day's festivities.

The Curling Club are responsible for this effort to revive the flagging spirits of the community in general.

Engineering Professor: "What is the greatest water-power known to man?"

Student: "A woman's tears."

Taken from the Files
10 Years Ago Today
Thursday, April 20, 1914

The Amateur Athletic Association will hold a sports day on May 25th. Several new features this year besides the usual big programme will be for the enjoyment of the people.

Seeding operations are in full swing in the Partridge Hill district.

Forty thousand pounds of iron are being made up into iron guards for the windows of the new goal in the town.

J. Carmodden is putting automobile guards on the C.N.R. bridge across the river West of town.

The first robin appeared here last Sunday morning. This time the editor was the first to see and hear them.

Alex. McKinnon and his driving team cut for the first time this season on Tuesday. Mac leaves for his homestead next Wednesday.

W. A. DANCE SUCCESSFUL

The St. George's W. A. held a very successful dance in the memorial hall on Easter Monday, April 17th.

A fine crowd attended the dance considering the unfavorable weather.

The Peggy Pale Orchestra supplied the music and at midnight luncheon was served in the buffet room by the ladies, after which dancing was resumed until 2 a.m.

The Jig-Saw Puzzle of Life.

Have you participated in the prevailing rage or fad of these latter days of the depression: the jig-saw puzzle?

If so, what did you get out of it? A few idle hours of lazy enjoyment as you sorted out the many last variegated pieces and put all in their immediate places, and nought in its them together? Is that all you got for your money, your time, your intent concentration? If so, it was largely waste, and you would have been better employed in reading, or some light occupation, or even lying down in quiet and complete relaxation.

Or did you, as your fingers played with the fascinating bits of colored cardboard and you pieced them together until out of a jumble of colors the design of the artist began to emerge into a thing of beauty, allow your thoughts to stray, and even study your own reactions to the comparatively idle task in which you were engaged?

For example, an hour after hour slipped by while you selected the piece and that and manoeuvred them about the table, endeavoring to make them fit where it seemed they ought to fit, but would not, did you become more and more impatient, or were you actually and truly developing what has become to many people, the test of patience? The question is: Did indulgence in this jig-saw puzzle strengthen or weaken your will power to cope with the real puzzles which life itself presents?

Did working over the jig-saw suggest anything else to you? Did your employment in this form of recreation for tired bodies and troubled minds, lead to more serious thought, to a contemplation of the complexities of life, the consciousness of life, and, as you finally solved the puzzle, the wonder and the beauty of life? Did you pause in contemplation of your own life, and give some head to the pattern you were weaving out of the many pieces under your control to make it a thing of beauty, or near it with eighteen?

A well known authoress, writing in the current issue of a popular magazine, tells how she spent most of the night working over one of these intricate jig-saw puzzles. As she worried well into the small hours, the pattern of the puzzle continued to elude her efforts. It would not make the whole design come together; it persistently lacked both coherence and purpose. She became discouraged as the hours went by, growing both impatient and incensed, and, at last, in extreme desperation, she held one improbable piece against the other one, and brushed aside these sections she had neatly completed.

Having almost given up hope of successfully solving the puzzle, she saw a certain distinctive fragment off to one side of the table. It was a big piece, and yet, when she had fitted it into the puzzle, her difficulties suddenly vanished. For that tiny fragment held the necessary clue to the puzzle's color and form. Set in its place, the pattern became clear and the design stood out in bold, brave fashion. In fact, in a very short time the jig-saw puzzle had ceased to be a puzzle; it had become a picture.

Surveying the finished picture, this authoress said to herself: "Life is pretty much this way. It is a maze of irregular, jagged pieces until we are able to find the secret of it. It seems absolutely without meaning until we've mastered the key piece."

The key piece—it is all important whether in working out the solution of a jig-saw puzzle of that still more intricate puzzle, life itself. Once anybody we have quoted further says, many of us work doggedly through the long darkness over the jig-saw puzzle called life. Often our profitless labor marries us well into the dawn, until we meet that hour when vitality is at its lowest ebb. We are prone at this time to grow confused and lose concentration, tearing up the bits that we have put in order, trying to fit impossible combinations together in a foolish manner.

This is a dangerous period in our lives—in the lives not only of individuals, but of communities and states. It is then we are beguiled into accepting fads and fresh experiments, to forsake all the groundwork and experience of the past. We do not always realize that we are discouraged and confused when we are in the very place we should be. But it is there, most frequently, even though that place has long eluded us, we will find it—if we have patience and vision. It is not the part of wisdom to destroy the whole picture, but to continue to hunt for the missing piece,—the key piece.—That will serve to point out where other pieces have been misplaced, where additional pieces should be placed, until the whole stands out strong and splendidly completed.

And here is the greatest and most important truth in the whole world,—the key piece is usually a little thing that has close at hand! This is true in a jig-saw puzzle employed to pass an idle hour; it is true of the key-stone of a great and lasting building; it is true in life itself no matter how complicated and tangled it may seem.

As you work over your jig-saw puzzles, of what are you thinking? What are you making, what do you intend to make, of the all-important jig-saw puzzle of your own life?

Unleashed For Discovery

Death At Council University Indicates Mind May Cause Heart Trouble

An unleashed for discovery that diet may cause heart disease comes to light with the death of "Depression," the pure synthetic diet goat of Cornell University.

Apparently in perfect vigor, "Depression" was confined under a few days ago and dropped dead. Autopsy showed death due to degenerated heart muscle. In the ventricle.

"Depression," moreover, was the sixth goat fed on the synthetic diet, and all the others died of heart disease. This was a 100 per cent record for whatever caused the fatal diet deficiency.

The diet substitutes cellulose for hay. It includes starch, casein, the solid part of milk, various mineral salts, yeast and cod liver oil. It is fed in pans and other animals in the Department of Animal Nutrition under direction of Dr. L. A. Maynard and Dr. C. M. Haag. The object is to discover the food factors but for animals.

Depression was 10 months old, the first herbivorous animal in history to live any length of time on synthetic "hay." His age brought home the significance of the discovery completed.

Whether there may be human lessons in the heart diet factor is not known. In view of the fact that heart troubles cause more victims in many deaths annually in the United States as the most powerful disease, cancer, excepted, [illegible] the goat experiment with interest.

FASHION HINT

How to make my of short skirts conform to the new length was a problem until I hit on the following plan. I plunged the [illegible] and let the part that had been [illegible] hang down inside the skirt. Then I pinned the [illegible] to the skirt, after having blanched the [illegible] following directions in the Diamond Dyes package.

I used Diamond Dyes for the re-dyeing, of course. I have dyed many things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—smooth, even colors fast to wear and washing. Friends think my things are new when I simply re-dye them with Diamond Dyes. They do give the most gorgeous colors!

Mrs. G.C., Levis, Quebec

Helps With Invention

Wife Of Noted Inventor Gives Him Valuable Assistance

Mrs. Allen Mary Harriet Russell Rivers, who announced in the "London Gazette" that she intends to assume the Christian names of her husband, Mr. Sydney George Rivers, F.R.S., instead of her own, is a most able lady, who has taken a leading part in developing her husband's inventions, mental and gymnastic inventions. These have won him many distinctions. He is one of the greatest and most prolific inventors of modern times. By means of one of his inventions the Flying Corps first received wireless messages on airships and aeroplanes and his gyroscopic compass is one of the most interesting marine devices of the age.

An International Preacher

Has Church In Canada and Also In United States

With a church in British Columbia and another in Alaska, Rev. Frank H. Buchsbel, formerly of Winnipeg, one of the first to be working out church unity on an international scale.

One congregation worships in the United Church of Canada at Stewart, B.C., and the other, the Methodist Episcopal Church of United States, at Ryder, Alaska. Mr. Buchsbel belongs to the former and is a minister in the United Church. He is a graduate of Victoria College, Toronto, and has served in Alberta and Vancouver.

A Good Rigg Story

A versatile man of New Rochelle, New York, had lost a dog, one of which was bastardly grey and the other jet black. Then she told an ordinary white one, meant to the raise of Mrs. Michael Cowell, her owner. The white one had a double yolk. The colored eggs are not broken, so the state of their interiors is not known.

National Dairy Council

Allan C. Fraser, Of Calgary, Is Appointed Secretary-Treasury

Allan C. Fraser, well-known Calgary agriculturist, has been named secretary-treasurer of the National Dairy Council of Canada, succeeding W. F. Stephen, of Ottawa. Announcement followed the close of the two-day annual meeting of the council at Toronto.

W. M. Forster, of Hamilton, and P. C. Colquhoun, of Maple Creek Sask., were returned as president and vice-president, respectively.

Features of the annual meeting was the amendment to the constitution providing equal representation on the executive for producers and manufacturers. The latter had previously enjoyed two-thirds representation on the board. The number of voting delegates on the council was reduced from 33 to 18.

Producers named their executive members as follows: P. C. Colquhoun, of Maple Creek, Sask.; Norman Clarke, of Didsbury, Alberta; R. U. Harcourt, of Courtney, B.C.; Hector Gagnon, of Trois, P.Q.; and W. A. Clay, of Huntingdon, Que.

Manufacturers' representatives on the executive are: C. B. Price, of Montreal; W. H. Forster, of Hamilton; Robert Barbour, of Yorkton. Sask.; J. M. Carruthers, of Winnipeg, and W. G. Merritt, of Toronto.

Appointment of Mr. Fraser to succeed Mr. Stephen will take effect on the latter's 70th birthday, May 30.

Debate Via Radio

Speakers In Edmonton, Saskatoon and Winnipeg In Consecutive Hours

The recent radio debate between representatives of the University of Alberta and the University of Manitoba was the first in Canadian history and the third in a series. It was unique in that the public, listening in, heard speakers in Edmonton, Winnipeg and Saskatoon, in consecutive hours [illegible] [illegible] [illegible]

BABY'S OWN SOAP

WORLD HAPPENINGS BRIEFLY TOLD

The Baltic Observatory reported that volcanoes in the central Chilean mountain region were moderately active, with indications of intense activity in the near future.

Prof. Albert Einstein, who renounced his German citizenship because of anti-semitism in Germany has accepted an invitation to become a member of the faculty of University of Madrid.

The French naval air force was ordered to help maintain order along the frontier of Djibouti territory in French Somaliland, Africa, where several rebellious Abyssinian tribes threatened trouble.

The honor of being the first woman professor in Scotland has fallen on Miss Cecilia J. MacTaggart, of Glasgow, who has just been appointed to the chair of Biology in the Andersen College of Medicine, Glasgow.

Calgary school board will take court action against parents who keep their children from attending school in protest against the city requiring to the summer unemployment relief schools.

Wyoming has lost a United reclamation and Engineer has gained an earl. Oliver Henry Wallop, 72, renounced his allegiance to the United States, gained his degree in metallurgia and became the Earl of Portsmouth, the 99th ranking peer of England.

Alberta will have only two district courts if an amendment to the Districts Courts Act, submitted to the legislature, is approved. At present, there is a district court in each of the 16 judicial districts of the province.

Poultry raisers in Western Canada are finding a market for their products in Great Britain. In the last two months of 1932, 1,500,000 pounds of fresh Saskatchewan and Manitoba turkeys were shipped to British markets.

Arthur Mauvaguin, of Stettler, Alberta, has been awarded the Rhodes-Harris memorial scholarship for 1933 at the University of Alberta. The entitles the holder to journey to Geneva for a summer course at the Rhodes School of International Affairs.

Argentine Delicacies

One Called "Paladin" Entails Cutting Down Palm Tree

The visit of the Argentine Minister to London has already had its influence on restaurants. Many are experimenting to devise and introduce particular to South America. One of these is "palmito," an insect-source very popular with the Prince of Wales. He first tasted it in Buenos Aires three years ago. Its preparation entails cutting down a palm tree. The heart is then cut into cubes, cooked in oil, and served with lemon, anchovies, and sliced olives.

"Want an appropriate-looking hunting shawl?"

"Yes: It's made of dog-eared and covered with bark."

A Cold Summer

Prediction That the Sun Will Show Less Heat For the Next Two Years

A prediction the sun will be colder for the next two years, with the possibility the earth will be affected in a way as yet unknown, was issued by Dr. Charles G. Abbot, secretary of the Smithsonian Institution.

Dr Abbot already has had some success as a predictor of the sun's "weather". In 1920 he forecast two warm years on the sun, which in general has been fulfilled. Measurements have shown the sun has been giving out considerably more heat than normal since then.

Dr Abbot's prediction is based on long study of periodical flaws and dalls in the sun's heat.

854
CHARMING DAY WEAR IN SUPPLE WOOL JERSEY
FEMININE LINES
Loveliness for daughter or for mother.
Jumper dresses are so smart! Of course you'd want this princess model, in a contrasting color.
It's carried out in navy blue crinkly crepe silk. The gulage is manufactured separate. It's causing the navy silk dress down the back with tiny rubber buttons.
Fit tucks make the waistline fit to perfection in the jumper with the dress. There is a one-piece collar. Make it a jaby!
A printed crepe silk would be effective for the jumper with the gathered skirt of plain crepe.
Style No. 854 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.
Size 16 requires 2½ yards 35 or 39-inch, with 1¼ yards 35-inch for blouse.
Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Boxer Party Is Latest

Social Event Held Recently in Buffalo Proved a Success

Entertaining has reached the stage of social function in Buffalo, not merely because adapting amusement to limited times is a feature of the day, but also because there is fun in novel experience.

The Carrousia Social Club, made up of women who have been in the entertain stage which makes learning necessary, has set the example with a dinner party, and the members had such a good time that they voted to make it an annual event. The objects offered for hats were benches, necklaces, beach coats, preserves, cakes use of automobiles, others to new and novel, order for gasoline, bridge lessons and a multitude of other things representing the activities of the modern women.

To Take Precautions

Farm Of Saskatchewan Threatened With Hopper Plague

Early precautions against the outbreak of a grasshopper plague in parts of Saskatchewan are urged upon farmers by officials of the department of agriculture.

Severe outbreaks of the plague are reported in municipalities in Saskatchewan in the Estevan area, comprising a semi-circular tract of land including the towns of Torquay, Manitou, Whitewood, Hottingham and Carnduff. The badly affected area also takes in a congestional strip up the centre of the province, starting in the district of Assiniboia and stretching far north in a narrow area to the southern boundary of Saskatoon. Lesser area are located at Nokipath, Paquet and Semptre.

Protection For Them

An Umbrella Will Shield Both Of the Propeller

An ice umbrella for propeller hubs is a device said to overcome the last remaining ice peril for aeroplanes, was announced at Cleveland yesterday.

This umbrella shields the hub of the propeller.

The danger is not from the ice on or directly in front of the hub, but the danger is from the ice spreading in both directions outward along the whirling blades.

His Bullet-Proof Car

Viscount Makoto Saito, Japan's eleventh Premier, has bought a large armored American automobile. It is bullet proof against small weapons. The machine, costing $6,000, is a closed limousine with bullet-proof glass. Threats against the Premier's life have been increasingly frequent. His two predecessors were assassinated by nationalist fanatics.

SUNDAY SCHOOL LESSON

APRIL 23

CHRIST APPEARS TO SIMON PETER

Golden Text "Because I live, ye shall live also." John 14:19.

Lesson: I Corinthians 15:1-8, 20-26. Devotional Reading: I Corinthians 15:51-58.

Explanations and Comments

The Historical Evidence Of the Resurrection Of Christ, verses 1-8. "Now, brothers, I declare unto you the good tidings which I preached unto you, which I was with you at Corinth." Paul wrote his church there. The good tidings were not to be confined to dogging Christianity, but of not accepting He from hanchings as Paul had proclaimed them, and so he continued: "The good tidings which you received, to which you subscribe, by you remain true to my preaching unless you believed in vain."

"If I believed in immortality as you believe in it, as you profess to do, I should live a far better life than you appear to live. I should strive more earnestly and hear more patiently. I do not think I should ever be troubled with a fear, or worried with an earthly burden. I think I would be all strength and joy if I believed as you do in eternal things in resurrection and a life beyond in which all things will be made right."—Harriet Martineau.

Most important of all the good tidings which I declared unto you, which you took [probably by Peter and James on his visit to Jerusalem recorded in Acts 9:27, 28], is that Christ died to atone for our sins according to the scriptures, that He was buried, and that he was raised on the third day.

"Oh, vanquished grave of Jesus where is thy victory? Oh, empty grave where is thy sting?"

"Oh, empty grave of Jesus whose sign can hide a whole world of sin!"

"O glorious grave of Jesus through whose gloom lies the pathway to Immortal Life!"—Ralph Cleary.

That He appeared to Simon Peter [Luke 24:34]; to The Twelve (Him forgot the symbolical number, though Judas was dead); then to more than hundred at once, many [most] of whom Matthew 28:7, 10-20]; some of whom are dead, but the greater number are still living [and you can have their direct testimony, if you choose]. Then He appeared to James, the brother of Jesus Acts 15:13; Gal. 1:19]; then to all the apostles, just before the Ascension (Acts 1:4). And last of all, as to the child untimely born, He appeared to me also, in the way to Damascus (Acts 9).

Celebrating In Adda

Alexandra Club Was Started In London By Women

The Alexandra Club, oldest of women's clubs in London, is about to celebrate its jubilee. It was launched in a day when women of good social position could not stay at hotels unless they were formidably chaperoned. As to eating a meal in the public dining-room of an hotel or restaurant in 1883, it was simply not done by "gentlewomen." The Alexandra Club was started by a band of pioneers, who were irked by these restrictions. So carefully was it conducted that no man was allowed to enter the premises. To this day men are only tolerated at teatime.

Disease-Resistant Wheats

Small Quantities Of Seed Are Now Made Available

Highly disease-resistant wheats have now been produced that are perfectly satisfactory from the stand point of quality and aggressive behavior, the associate committee on field crop diseases announced at the conclusion of its fifth annual meeting in the Dominion Rust Research Laboratory in Winnipeg. Dr. C. H. Goulden, of the laboratory, presented the report.

"It seems that out of 82 strains in the co-operative tests of 1932 at least six are suitable for distribution to farmers, but only small quantities of seed are available at present. And it will take two seasons to increase the quantity available to the required point," the statement read. "In the meantime, commercial milling feed will be made on the strains selected and further field tests, with a view to reducing their number to two or three adapted to the varying conditions to be found in the wheat-growing area.

"Every effort will be made from now on to increase the seed of these wheats as rapidly as possible."

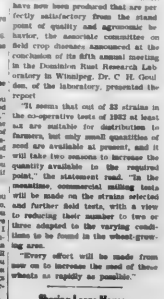
Sharing Large Houses

Families Introduced In London By Duke Of Connaught

In these hard-up times people in London are trying to solve the problem of being saddled with houses too large for them by dividing them into family flats. Instead of young married couples taking small houses in Chelsea or elsewhere, they instal themselves in part of the parental home with separate housekeeping of their own. The idea was started by the Duke of Connaught, who gave Lady Patricia Ramsay, on "apartment" in Clarence House when she married.

Made Success Of Hobby

A striking record was made by Constable Carl F. Walldon, of Stockholm, who recovered 21,000 lost or stolen bicycles in his thirty-one years of service. He has just retired on a pension. Finding missing wheels was a hobby with Walldon.



HITLER APPOINTS NAZI LEADERS AS GOVERNORS

Berlin, Germany. Chancellor Adolf Hitler has added the post of governor of Prussia to his duties and immediately appointed Hermann Wilhelm Goering, one of the principal Nazi leaders and minister without portfolio in the federal cabinet to serve as premier of the state.

The Hitler appointment as governor was approved by the cabinet [illegible] Minister Hermann Kinnal von Epp, another Nazi, to serve as governor of Bavaria. The general has been acting in [illegible] for that state.

Captain Goering, who is in Rome at present, is expected to present his Prussian cabinet list to the chancellor when he returns.

German scientists were angry about a letter written by Professor Albert Einstein from Belgium to the Prussian Academy of Sciences. In this letter, dated April 5, Professor Einstein described present day Germany as being "in a state of mass psychosis."

A report from Cologne said the Rhenish and Westphalian sections of the Catholic People's party, which was founded by Dr. Gustav Stresemann, has decided to disband and urge its members to join the Nazi party. Hitler was believed to spell the doom of the party, whose national executive committee will meet May 7.

The government published a law under which the terms of lay judges and jurymen will expire June 30, 1933, instead of ending normally December 31, 1934.

This means the ousting of both panels of Jews and Communists, and presumably also Socialists.

An official denial was given here to reports in the Stockholm newspaper Social-Demokraten, which said that 500 persons, including 17 Nazis, 14 Jews and 216 Communists and Socialists had been slain in Germany from the time of the reichstag fire, February 27, until March 25.

The denial says: "The total political slain in March was not one-tenth thereof."

Mennites For Saskatoon

Unit Of Thirty-Five Sent From Winnipeg For Mounted At Regina

Saskatoon.—Thirty-five mounted R.C.M.P. men arrived by train from the training school at Regina, headquarters for Saskatchewan.

Under the command of Inspector L. J. Sampson, there are two corporals and 32 men in the group. All have horses, brought here in three horse cars over the Canadian Pacific Railway.

According to an official statement the Mounties were brought here to complete their training by mounted patrol work in district tributary to Saskatoon. All the men have been enlisted in a local hotel and their mounts have been stabled in a west side barn. Non-commissioned officers among the new arrivals are Corporals J. Hollois and F. Cleary.

British Exports

Trade Figures Show Evidence Of Business Revival

London, Eng. An improvement in British exports for March is announced.

Preliminary board of trade figures gave the March export total as £32,-851,000, as compared with £27,920,000 for February, and £31,190,000 for March last year.

Imports show £56,346,000, as compared with £49,577,000 in February and £61,161,000 in March, 1932.

Death Of Scientist

London.—John Pierard, father of Dr. Auguste Piccard, explorer of the stratosphere, died here at the age of 66. He was a professor of chemistry in the University of Basel 40 years and was widely known for his scientific [illegible].

Akron Naval Inquiry

Evidence Indicates That Mammoth Dirigible Broke In Mid-Air

Lakehurst, N.J. A picture of the Mammoth dirigible Akron dropping through darkness with its bow up at an angle of 35 degrees and hitting the water with a crash "like stepping on a penny box of matches" was given the United States naval court of inquiry here.

With the picturesque words of a native Woody Erwin, aviation metalsmith second class, told the story of the flight that cost 73 lives Erwin was one of three survivors of the disaster.

Lieut. James Richard E. Dodd Boettcher, in telling of the breaking of longitudinal girders and the steep incline of the ill-fated airship following what both described as a terrific "gust of wind."

Both, too, testified the first break in the structure of the ship occurred in the air following the gust they described, whereas Lieutenant-Commander H. V. Wiley, the third survivor, changing his opinion, said the ship's framework did not break until the Akron struck the water. The break described by the two enlisted men was in longitudinal girders on the right hand side, midway between the bottom and top

Curb Reckless Skiing

More Stringent Regulations In Mount Inin Areas Are Recommended

Banff, Alberta. Curbing of rock slide skiing in mountain areas was sought as a consequence of the inquiry into the death of Dr. R. E. C. Stearns, Montreal surgeon, who was killed in a fall from Fossil mountain while skiing over prohibited area.

A coroner's jury concluded its work with the finding Dr. Stearns came to his death through an inadvertent while trying to traverse a steep snow slope in a prohibited area. Evidence at the inquiry indicated that the federal parks department draft stringent regulations governing skiing expeditions from all camps.

Skiers would be liable to safeguard skiiers within park limits as was unknown here Regulations barring skiiers from certain dangerous areas are now in force and all skiiers are warned of the prohibited areas by the park wardens on the camps. It was expected that the department of [illegible] would adopt recommendations from the summer ski clubs with a view to implementing local regulations.

Calgary Hill Rate

Property Tax For 1933 Set At Fifty Mills

Calgary, Alberta.—City council last night approved a property tax rate of fifty mills for 1933, a reduction of ten mills compared with last year.

Previously Mayor Davison feared the mill rate would be set at 55 the highest in the city's history, but council last night instructed the commissioners to lower the rate by one mill compared with last year

Letter Of Forgiveness

Toronto, Ont. In behalf of a group of Toronto clergy, a letter of forgiveness has been sent to John A. Mulcahy at Stony Mountain penitentiary, to which he was sentenced to seven years for theft of funds from the University of Manitoba. Rev. H. F. Woodcock said the Oxford group had brought a "change of heart" to himself and fellow clergy, and it was decided to send a letter of forgiveness to Mackray for the loss of church funds in his custody.

An Old Theory

Washington. Cordell Hull, United States Secretary of State, described as antiquated, obsolete and breakbarred the theory that a moderation of tariffs would flood the United States with the products of cheap foreign labor and drive down the U.S. standard of living.

Boiling Against Cutbills From Ireland

London, Eng.—A new scale of specific duties for live cattle for food imported from the Irish Free State was imposed by a treasury order. In future such cattle, instead of paying 10 per cent, ad valorem per head, will be divided into five classes.

Sir Stafford Cripps, Former Solicitor-General in the MacDonald-Baldwin Government, who declared himself opposed to the emergency bill passed by the British House which gave wide powers to deal with the Soviet in the event that the forthcoming trade talks with British subjects did not end satisfactorily. The bill received its third reading with a large majority

No War Pension Reduction

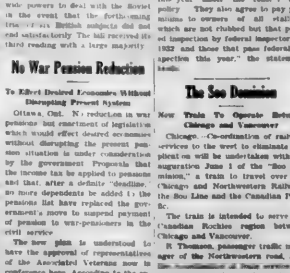
To Effect Desired Economies Without Disrupting Present System

Ottawa, Ont. No reduction in war pensions but enactment of legislation which would effect desired economies without disrupting the present pension situation is under consideration by the government Proposals that the income tax be applied to pensions and that after a definite "deadline" no more dependents be added to the pensions list have replaced the government's move to suspend payment of pension to war-pensioners in the civil service

The new plan is understood to have the approval of representatives of the Associated Veterans now in conference here According to the reports, it would be impossible to safeguard skiiers within park limits as was unknown here Regulations barring skiiers from certain dangerous areas are now in force and all skiiers are warned of the prohibited areas by the park wardens on the camps. It was expected that the department of [illegible] would adopt recommendations from the summer ski clubs with a view to implementing local regulations.

Rainbow Trek Almost Ended

Ottawa, Ont. The long trek of Canada's reindeer herd from western Alaska to the Mackenzie River delta is nearly ended Hon. T. G. Murphy, minister of the interior, said recently the herd, which has been traveling since December 1929, has arrived at the west bank of the Mackenzie River at the delta where it flows into the Arctic ocean.



AKRON SURVIVORS IN WASHINGTON

Chade Swanson, United States Secretary of the Navy, is pictured as he congratulated Lieutenant-Commander Herbert Wiley and his two fellow-survivors, Richard E. Dael and Woody Erwin (background), on their narrow escape from death in the Akron disaster. The men flew from New York to Washington to give their version of the catastrophe. They were referred to by Secretary Swanson as "members of as gallant a crew as ever served in the United States Navy."

Horse Breeders' Subsidy

Bonus To Assist Farmers Here Inducted by In Saskatchewan

Ottawa, Ont. A bonus to owners of stallions in the province of Saskatchewan in which the Dominion and provincial governments will co-operate on a 50-50 basis was announced by Hon. Robert Weir, Minister of Agriculture

The scarcity of good stallions in the prairie provinces and the shift by farmers from motor traction to the use of horses has made it necessary to assist the horse-breeding industry.

Because of conditions in the west with low grain prices many farmers found it difficult to finance the operations of tractors and in the spring of 1932 various horse breeders of the three prairie provinces approached Mr Weir urging him once he given to stallions which passed federal inspection this year," the statement reads.

"Each department agrees to pay 50 per cent of grants to clubs formed the year under the federal club policy

They also agree to pay premiums to owners of all stallions which are not clubbed but that passed inspection by federal inspectors in 1932 and those that pass federal inspection this year," the statement reads.

The Soo Dominion

New Train To Operate Between Chicago and Vancouver

Chicago.—Co-ordination of railway services to the west to eliminate duplication will be undertaken with inauguration June 1 of the "Soo Dominion," a train to travel over the Chicago and Northwestern Railway, the Soo Line and the Canadian Pacific.

The train is intended to serve the Canadian Rockies region between Chicago and Vancouver.

R Thomson, passenger traffic manager of the Northwestern road, said the Dominion will make service between the Soo line and the Northwestern was "new to this region and is expected to prove beneficial to both roads."

The train will operate over the Chicago and Northwestern to St Paul, over the Soo line to Portal, N.D. where it will be delivered to the [illegible]

Chicago Teachers Parade

Chicago Chanting "We want cash!" more than 1,000 demonstrators paraded through the Loop here in protest of non-payment of school teachers, stormed the offices of the board of education, and smashed their way through a door before meeting Orville Taylor, board president. The city owes teachers some $26,000,000 in back pay.

INDIA WILL END TRADE TREATY WITH JAPAN

New Delhi, India.—The government of India announced steps had been taken to end the trade convention with Japan signed in 1905. The government has given Japan six months' notice of termination of the "most favored nation" clause of the convention

Removal of Japan from the list of nations enjoying "most favored nation" treatment in the Indian customs tariff schedules is a protective measure to offset dumping it was explained by Sir Joseph Bhore, commerce member of the viceroy's executive council.

The announcement was made while the legislative assembly was discussing Sir Joseph's motion for consideration of an anti-dumping bill.

The minister explained abrogation of the treaty with Japan was intended to offset the effect of special conditions such as Japan's depreciated currency, and other factors which resulted in the dumping of goods in this country at abnormally low rates.

India's greatest customer in recent years for her cotton has been Japan, but this is exported in the natural state and a great part of it is reimported in cotton piece goods. Japan has gradually increased her advantage over the United Kingdom in selling cotton piece goods to India.

H.B. Co. Report

Improvement Is Shown Over Last Year, But Still Unsatisfactory

London, Eng. Substantial improvement over last year is shown in the annual report of the Hudson's Bay Company Limited, for the year ended January 31 although a trading loss of £235,336 is reported after the allocation of £190,000 to depreciation.

Appropriate provision has been made for losses in respect of investments realized also against stock values. In addition, the report tates, £166,-297 has been provided against losses on sales and the disposal of properties. It has been decided to release properties which have become superfluous although such sales may involve a book loss if these properties were sold during the current year. Provision has, therefore been made for the losses incurred and a reserve set up against further anticipated losses in the connection.

Currency Depreciation

Secretary For Dominions Refers To Situation In South Africa and New Zealand

London, Eng. J. H. Thomas, Secretary for the Dominions, told the House of Commons he does not think the depreciation of the Australian and New Zealand currencies were deliberate breaches of the agreements agreed at Ottawa during the Imperial Economic Conference. Mr. Thomas said he did not think the question appropriate for the British government to make representations on. It was suggested it was done to help trade of those countries.

Alberta House Prorogues

Close Of Third Session Of Seventh Legislature

Edmonton, Alberta. After putting on new acts on the statute books of this province, the provincial legislature was prorogued April 11th, by Hon. W. L. Walsh, Lieutenant-Governor.

The speech of his honor brought to a close the third session of the seventh legislature of Alberta which opened on February 9, just over two months ago.

Dumond New Trial

New York The International Labor Defence League announced petitions to be presented to President Roosevelt would be nationally circulated demanding a new trial for Haywood Patterson, convicted at Decatur, Ala. in "the Scottsboro case." Patterson said he expected 1,000,000 signatures to the petitions within a week.

Special Appeal To Women

Australia's Safety Council Hopes To Prevent Accidents At Home

The National Safety Council of Australia realizes it utters a special appeal to women everywhere. The first letter has reference to the frequency of crushing accidents to children, due to the careless handling of utensils containing boiling water or other liquids. A common cause of such accidents is the practice of putting boiling water into the bath and then turning away to obtain towels, or to get cold water to add to the hot water instead of putting in cold water first. A child recently swallowed the safety pin and chain attached to its "comforter" and died. Why a "comfort" at all?

The safety council refers specially to the danger of cleaning cages (green with) petrol, and a case in which the cleaning of silk gloves led to severe burning. But the risk is equally great with any kind of gloves, and with any material if it is rubbed when wet with petrol. Women will be very grateful to anyone who finds a substitute for petrol in cleaning that requires a large quantity of the cleaning agent. Dry cleaning by an expert is too expensive to be indulged in frequently, and there are few materials used for women's good dresses or coats that will neither fade nor shrink when washed, some form of home cleaning is therefore necessary. Then there is the danger of inhaling the fumes, which may have serious effects. It is important to do all petrol cleaning out of doors. The price of safety is incessant vigilance and care.

SUPPORT THE ADVERTISERS

DIED

Thomas Noble Magee

The funeral of Thomas Noble Magee of Clover Bluff, Alta., who passed away at his home on April 6th, at the age of eighty years, was held on Thursday, April 9th, at 2:30 o'clock from the Standard Church at Good Hope, Rev. D. W. Parks, assisted by Rev. J. Hoist, officiated. Interment took place in the Good Hope cemetery.

Beautiful floral tributes were received from relatives and friends.

The pallbearers were: Ernest Johnstone, Amos Moyer, Fred Black, Thomas Johnston, William Bennett and Gordon Magee.

The late Mr. Magee was born in Ireland and while still quite young he moved with his parents and child family to Collingwood, Ont., a few years later they moved to the Perry Sound district where Mr. Magee met with and married Mary Ann Ford, who predeceased him (over five months ago). A family of seven children, 4 girls and 3 boys, was born to them.

In 1911 they moved to the Fort Saskatchewan district, about 1920 they settled at Good Hope, where they have resided ever since.

He has left to mourn his loss, four daughters, Mrs. E. Magee, Mrs. J. C. Cripps, Mrs. D. S. Whitson, Mrs. A. Bernard and three sons, James, William and Thomas, all living in the Fort district, also 34 grandchildren, and 17 great grandchildren; Two sisters, Mrs. J. Armstrong and Mrs. S. Crowder and three brothers John, David and Henry all living in Ontario.

How to Fashion Belts from Package Wrappers

SMART, colorful, accessory belts can be fashioned from the gay wrappings of cigarettes, cigars, cakes, candy and other things you get the most of in New York and Hollywood, the movie fashion centers where "celebrities" rate but between them. "Celebrities" has been taken into place as a symbol for the number of smarties known not only to the public at large but to each other as well. Celebrities are always getting together and holding little informal teas and what-not.

Informal affairs, sometimes and patrons are achieved through various methods of wearing the strips. One of these, Nanelle and thread, may be used to secure the links if this is thought necessary.

Another most popular belt is the Double Weave. For this belt cut strips of "Cellophane" 6 inches long by 1½

DOUBLE WEAVE

inches wide. Fold the "Cellophane" as in the single weave, but fold the strips at the edges to the center, then fold again, bringing the edges together. Weave as in the single weave, but fold the "Cellophane" so that the edges will be on the outside of the belt. Hold the two together with a pin, as shown. Insert a third belt through the center of the beginning and of the first two. Insert a fourth link, hooking it through the first and through the third. Be sure that this link is passed on half sides of the first link, and not both sides on top of it. Insert a fifth link, as above, and continue until desired length is obtained.

Suggestions to gain inexpensive quality or in colours, for the making of these smart belts, may be secured from the productive wrappers now supplied on many household articles or in connection with many department, stationery or candy stores.

FARMERS
We have a complete stock of your Spring stock necessities. You need:—

Much Business Done At Town Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Secretary's Office on the evening of Wednesday the 19th. Instant.

Present Mayor Montgomery, Councillors Fillmore, Magee, Watt, Graham and Neale.

The minutes of the meeting held on the 5th. Instant were read and adopted.

The following accounts were passed for payment Jones, Graham & O' Brien $9.55 repairs for Town property, Calgary Power Co., $117.00 for street lighting, $6.50 for Town Hall, $1.30 Memorial Hall Workmen's Comp'n Board Accident fund assm't. 1st instalment $14.25.

The following are expenses in connection with Memorial Hall:—
Jones, Graham & O'Brien $18.90, chairs; L. F. Hurlbut $28.60; A. S. Fillmore $15.00; Mrs. McPherson 1.00; Coal $15.63.

A motion was passed approving the action taken by the Committee appointed to re-adjust assessment on Town Property and farm lands.

Attention was called to the number of dogs in Town still without a license, and the C-constable was instructed to take necessary action. The matter of getting ashes, refuse etc., moved from backyards, lanes etc., by those responsible, on or before the 1st of May, will be checked up after that date.

The matter of arrears of special school tax was considered and the Secretary instructed to collect same. The statutes require that every resident, of the age of 21 years who does not pay taxes, shall pay this annual tax of $4.00 for school purposes.

It is the intention to cut off relief at the end of this month.

COMING EVENTS

CARD PARTY TUESDAY, MAY 3

Will the ladies kindly be at the church at two forty-five (2:45), where cars will be waiting to take them to Mrs. Frey's.

*****

The Chancel Guild of St. George's Church will hold a sale of young Plants and Slips at the Rectory on Wednesday next, May 3rd., from 2:30 till 6 o'clock. A great attraction will be a Superfluity Stall where many useful articles can be bought for a small sum. Tea will be served.

CONTINUE PROBE OF STATE MEDICINE

Investigations of a plan of state medicine will be continued by the special committee of the legislature which presented an interim report at the recent session of the legislature The committee, under the chairmanship of Hon. Geo. Hoadley, represents all groups in the house.

BIG WORKS PROGRAMME

The Northern Alberta Railways announced last week of a works programme for the coming season which will amount to $441,760, according to latest word from Edmonton.

Farewell Party For Mr. and Mrs. W. T. Lane

One of the most representative gatherings held here for a long time was the crowd in Simmons' Hall last Friday night to bid farewell to Mr. and Mrs. W. T. Lane and family. As reported in last week's Record, Mr. Lane has been transferred to a larger and more important station, and will leave shortly for Wainwright. Mr. Lane and family following later on.

The hall was packed with an enthusiastic crowd of well wishers from town and district, which shows the high esteem in which the Lane's are held.

Dancing was indulged in by a long card list, with old time tunes predominating, the music being furnished by the Peppy Pals ever popular orchestra. Just before refreshments were served, Mr. J. D. McLean who was chairman of the committee called Mr and Mrs. Lane, Mrs. F. M. Baker and Mayor Montgomery to the platform. Mr. McLean in his most witty manner read a very appropriate address.

The address was received with prolonged cheers. Mrs. Baker then presented Mrs. Lane with a handsome purse and Mayor Montgomery in a few well chosen words presented Tommy with a beautiful club bag. Both Mr. and Mrs. Lane gracefully thanked everyone and invited anyone when down around Wainwright to call in and see them.

Dancing was kept up till well on in the morning, and a most enjoyable evening was brought to a close, by everyone saying goodbye to the honored guests.

"We are sorry that space does not permit us to publish the address.

Partridge Hill

The Partridge Hill Young People presented their play "A Poor Married Man", in the Empress Theatre last Wednesday evening.

The play under the direction of Mrs. Rys. Mrs. Flintoff and Mrs. A. Cheadelsdon, drew a fine crowd, which pleased the young people very much.

Note: As the Editor attended the Council meeting full details of the play are not given.

ANNOUNCEMENT

114th. Anniversary Service of I.O.O.F.

Sunday, May 7th, 1932 at 3 p.m. Oddfellows and Rebekahs are invited to be present.

Past members of the Order are cordially invited to join with us at this service.

Rev. Bro. C. Reed assisted by the choir will conduct the service which is to be held in the Empress Theatre

Everybody welcome.

Taken from the Files

19 Years Ago Today

Wednesday, April 20, 1914

The Conservator has changed the date of publishing the paper from Thursday to Wednesday. This is to give the advertisers more time.

The Lamont Tribune made it's first bow to the public last Wednesday, under the editorship of Mr. Lawkins.

A bolt on the wood sawing machine at G. Dent's, John Scanner had his arm broken.

All union help was used when building the jail here.

ALBERTA MUSICAL FESTIVALS

During the past few years Alberta has seen a remarkable growth in the number of musical festivals, and these were held in no less than eleven school inspectorates last year, involving a large number of artists. These are in addition to the general provincial musical festival which has been a feature of musical activities in the province for over 25 years. The districts in which festivals were held last year included Hanna, Coronation, Wainwright, Vermilion, Lamont, Vegreville and Peace River.

Report of the Women's Institute Cemetery Committee

As spring opens up this Committee is pleased to present their fourth annual report to the Women's Institute and to the general public.

During last season the Cemetery grounds have continued to show gradual but steady improvement. The lilacs and honeysuckle shrubs are growing wonderfully and the bloom was quite luxurious. Between the shrubs which have been kept well cultivated, clumps of hardy perennials have been started through the good offices of Mr. G. T. Montgomery, for whose interest and assistance the committee wish to express their thanks and appreciation.

The spruce windbreak planted two years ago is thriving very well only six of the 120 trees planted have died but these have been replaced. Through the kindness of Mr. J. D. McLean, Warden, tanks of water have been supplied for the trees and shrubs during the very dry periods.

The caretaking is the big item of expense in carrying on this work. This year the committee starts the season with some balance which will shortly be augmented by the proceeds of a W.I function, notice of which appears elsewhere in the Record. Private subscriptions however small will be welcomed also.

In order to reduce expenses, copies of this report will not be sent to local people but only to those out of town. Townsfolk who feel able to help are asked to give their donations to either Mrs. J. D. McLean or myself and these will be duly winged in the Record.

Pleasing features of the financial statement are the gen'rous grant of $75 from the Town of Fort Saskatchewan and the welcome gift of $5 from the Partridge Hill U.F.W.A. Several who were unable to attend the annual W.I. card party last year contributed their bit and so helped along.

The financial statement from April 1932 to April 1933 is as follows:—

Receipts—	
Balance on hand April 1932	$27.33
M. Thorne,	$10.00
Mrs. Wilmot Ashton,	1.00
A. Shackleton,	5.00
H. D. Strong, (Bruderheim)	1.00
R. E. Staples, (Edmonton)	5.00
W. C. Time, (Toronto)	5.00
P. D. Gordon, (Vancouver)	10.00
G. Bowden, (Vancouver)	10.00
A. H. Rogers,	10.00
Mrs. Pennison, (Redwater)	4.00
Mrs. C. Walker, (Edmonton)	1.00
W. Seymour,	5.00
P. Pollard Sr.,	5.00
Mrs. Geo. Hendey, (Penhold)	1.00
Mrs. Edith Atkinson (Radway)	1.00
Proceeds W. I. Card Party	14.35
Partridge Hills U.F.W.A.	5.00
Grant Town of Fort Saskatchewan	75.00
Total	$194.33
Expenditure—	
Paulsen, lumber cement etc	$6.30
Caretaker	134.00
	$140.30
Balance on hand April 1933	53.98
Total	$194.28

Marion M. S. Rogers,
Convener of Committee.

A UNIQUE CIVIC IMPROVEMENT SCHEME

The town of Raymond, south of Lethbridge, which is the centre of the sugar beet industry in Alberta, has adopted a unique plan for civic beautification. Through the board of trade a complete survey of every house, building, and lot has been made by a committee of experts, officials of the provincial and dominion governments living in the vicinity. The undertaking was for the purpose of giving directions and suggestions to each property owner for beautification and development. The result has been the development of a keen interest in the work, and this summer is expected to see many of the ideas and suggestions offered carried into effect.

THE OXFORD GROUP

It would be interesting if some of our clergy and leading citizens could arrange to bring one or two of the Oxford group to the Fort, (or all of them for that matter). The drive down through our beautiful country some afternoon or evening would please and surprise them.

Their teachings are simple; they appear to have had the co-operation of the churches in the 27 different countries they have visited, and their sincerity has never been questioned, anyway those interested in the Fort who could not go to Edmonton would have an opportunity to see and hear them first hand.

YPRES VALLEY

Claude Simmons had the misfortune to break his arm in two places while cranking the car.

*****

Mrs. Bill Pearce is visiting friends at Vancouver, B.C.

*****

Miss Lammel is back from her Easter vacation and school opened Monday morning.

*****

We are glad to have Clara Dittrich home again, after her stay in the hospital.

*****

Rev. Mr. Hodgins expects to start Church services once more next Sunday.

Why Canada's Trade Declines.

Official figures of the trade of Canada for the fiscal year which ended on March 31, 1923, recently issued by the Dominion Bureau of Statistics at Ottawa, are of interest these days to a far larger group of citizens than those who usually make a study of statistical information as a guide to the trend of national and international affairs. Since the stock market crash of October, 1929, and the steady fall in prices of all primary commodities the world over, with all the concommitant evils of depreciated money values and violently fluctuating exchange rates, the farmer, laborer, shore clerk, has taken an increasing interest in economics and eagerly reads all the information on the subject available to him. The average man and woman has been undergoing a real education in the fundamentals of economics and finance, international business relationships, and they have come to appreciate the fact that these things very intimately affect themselves and their families.

For this reason the figures referred to are of more than passing or mere statistical interest, because, in concrete form, they reveal just why it is that business will not break throughout Canada in an early depression, with the unemployment general, and governmental relief services necessary for the maintenance of thousands of families.

The year preceding the crash of prices in October, 1929, was the biggest trade year Canada ever experienced. The official figures of imports and exports tell the story, just as the same statistics for the succeeding years down to the present time tell what has since taken place. For the information of readers of this column the figures for the past five years are here given, from the highest in the history of the Dominion in 1929 to the lowest since 1913, the year in which the Great War broke

Fiscal Year ended March 31	Imports	Exports	Total
1929	$1,260,875,907	$1,258,694,168	$2,604,479,165
1930	1,048,373,582	1,144,838,070	2,203,211,652
1931	906,613,880	817,258,868	1,723,644,748
1932	579,317,744	567,960,517	1,146,952,261
1923	466,213,973	480,821,397	947,035,370

These comparative figures disclose the fact that Canada's trade is now only one-third what it was five years ago. It is because of that fact that all business is depressed, no new enterprises are under way, tens of thousands are unemployed, railway equipment is largely idle and the companies are in financial difficulties, governmental revenues are short of income, and public debts and taxation of the people steadily increasing.

The loss in the total volume of trade is, of course, not quite as large as these dollar values of trade indicate because the value of all commodities is less today than in 1929; nevertheless the decline is startling. Furthermore, it is this decline that is the real menace to the business of the country, international and, in practically the same proportion, in our internal trade between provinces and communities. The total falling off in trade is, therefore, enormous.

What occasioned this tremendous loss? Scores and hundreds of reasons are advanced, and most of them may be contributory or subsidiary causes. Many say the chief responsibility lies in the competitive capitalistic system, and in the prevailing monetary and banking systems. But it was under these same systems that the trade of Canada and the world was carried on prior to and during 1929 and brought to the peak indicated by the figures given above. The monetary system worked while the trade of the country was moving and increasing, but when trade was checked and gradually killed off there was not the same demand for credits, and credits began to dry up because that security which lies back of all credit was first disorganized. Let trade be revived and prices will again rise, credits be called for and be forthcoming, because security resulting from increased and profitable trade would again be in evidence.

The question then is: What has so largely destroyed the trade of the world. Various factors are included? Despite the many, and often conflicting views advanced, the true answers is not far to seek.

The Great War destroyed millions of lives, maimed more millions who became pensioners of the State, destroyed tens of billions of property, imposed billions of debt upon the nations, upon which hundreds of millions in interest charges have to be paid annually. And most disastrous of all, the war left an even more disastrous train of bitter feelings, suspicions, and narrow nationalistic views in its wake. The nations are not friendly with each other, perhaps more so than ever, and continue armed to the teeth. But the war has taught them one lesson, and that is that food supplies for their populations are just as important, even more so, in fact, than arms and munitions. Nations surrounded by enemies became convinced that they must become more self-contained if they are to survive in any future war.

So France turned its magnificent and highly profitable vineyards into less profitable but more essential wheat fields. Germany and Italy made essential forms of production to grow wheat: Italy did the same thing, giving large State bounties; Russia embarked on its ambitious five-year plan, other smaller nations followed the same course. To encourage these programmes these nations imposed terrifically high tariffs, prohibitory tariffs, against other countries. Instead of importing wheat, which they could have done much more cheaply and in every way more economically than growing it themselves, they stopped doing so. Producing largely for themselves, they had less of other things to export, and became other countries, Canada included had lost their markets in Europe by which to sell their surplus products they had no money wherewith to buy in those markets.

Therefore, because every export by one country is an import by some other country, and every import by one an export by another, and with all determined to reduce imports to the vanishing point the inevitable consequents effort is to reduce exports to the same point. Thus is the trade of the world being destroyed.

That is the answer to the seeming riddle of the depression. It is not the existing economic system, including monetary systems, that is at fault. It is "Fear," fear of war. Until that fear is removed and confidence re-established, there can be no restoration of national or international credit; trade will continue to languish and grow less and less; the world depression will continue.

Will Shoulder Burden

Canadians Paying Heavy Taxes But Will Not Tolerate Extravagance

Jack Canuck pays for many things, unrolled at the opening of John Bull in town, and particularly his snug-fixed in accepting heavy taxation at times. The old gentleman has inwardly shrugged his shoulders, smiled, tightened his belt and turned to the work in hand, tackling the most immediate problem with a confidence that was amazing to others.

Now Jack Canuck is getting a taste in a tax way of what it is like Bull has become common. In other words Canadians have come to realize that those who are earning and spending must be prepared to pay more into the coffers of the country to improve its financial position.

The Rhodes budget is heavy. It hurts. But when one is hurt he is apt to take a deeper interest in the reason for that condition. Hence Canadians will in the future scan governmental expenditures with a keener eye. They are willing to pay, willing to meet their just obligations, and will shoulder tax burdens like John Bull for the national good, but they will not tolerate extravagance or political wire pulling where public funds are directly or indirectly involved. — Kitchener Record.

Cattle Shipments Active

Fair Demand in Britain For Choice Canadian Cattle

There's a fair quantity these days of what may be regarded as the "roast beef of Old England" being served to the British people in their restaurants and at short time before was prime young steer in Canada. The shipments of live cattle from the Dominion to the British market are pretty active this year. From January 1 to March 25, 1933, a total of 7,965 head were exported from Canada, which reported there will be heavy shipments from Montreal to the large cosere already received from buyers in Britain.

Opinion Of Dirigible Expert

Brigadier Thisbe Brook Was Cause Of Akron Disaster

Dr. Hugo Eckener, dirigible expert, discussed the theory that a storm had caused the Akron tragedy, and said in his opinion, from reading the reports of the inquiry, the crash was occasioned by a break of the big ship in the airplane carrier room.

Dr. Eckener said he always had considered the ship in which Commander Rosendahl's plane were stowed, a weak point in the Akron's framework. His comment came following New York reports tracing the Akron disaster to broken ribs in the huge dirigible.

Unbreakable Milk Bottle

Has Been Developed In Pittsburg From Wax-Like Material

An unbreakable milk bottle has been developed in Pittsburg. The bottle is first molded in one piece from cellulose to the shape of the standard half pint, pint, and quart glass container. It is then impregnated through its entire wall thickness with a transparent creation, "wax," a tasteless and odorless wax-like material. The bottle will not soften under constant exposure to water or lactic acid, it is said, and will pass through present types of filling and capping machines.

Record Bedfeathered

Dr. Ferruccio Ranier, of Trieste, Italy, claims to have discovered the process used by early violin makers who were able to produce the deadening and sweet-ringing effect of stringed instruments. He says that a resin obtained from plants that grow only in Persia furnished the base of the secret, which used by Italy's classic violin makers.

Record Of Flying Squad

Arrests made by the Flying Squad of Scotland Yard last year numbered 550; in 450 cases the prisoners were convicted, and 100 of them carried firearms. The strength of the Flying Squad is less than forty.

Large Landward Movement

Many Families Have Been Placed On the Land Through Colonization Work

Between October 1, 1930, and January 31, 1933, the Canadian Government Department of Immigration and Colonization, the Canadian National Railways, and the Canadian Pacific Railway, working together, have been instrumental in placing upon farms in Canada a total of 10,738 families. These were families already resident in Canada on the basis of five to the family this means 53,685 persons. This family settlement was established in towns who had sufficient capital to establish themselves on the land.

In the same period 29,855 single men were placed in farm employment. Adding these to the families the comprehensive total of 76,918 persons returned placed on the land is recorded.

Simultaneously with this movement land settlement activities were being carried on by the Provincial Governments. In one year 1931 the Government of the Province of Quebec placed 5,894 families in farm settlement, and in the three years 1929-1931, and 1932, the Government of Alberta granted 19,723 homesteads to residents of that province. Similar activities were carried on by other provinces. In addition, there was a large landward movement entirely on the initiative of the individual settlers themselves.

U.S. Taxes Heavy Too

Comparative Figures Given By Sun Francisco Paper Are Startling

Tax money for 1932 could empty, at the $15-a-month rate paid by relief agencies, no fewer than 17,946,711 men for a whole year.

The combined annual rent of our Army, Navy and Air Forces equals less than three woolen tax impositions for 1932

The tax burden averages $300 for each family in the land.

If all the paper currency in circulation throughout the country were changed to all kinds of assorted bills, even the tax collectors as much more again and more.

This year's taxes could pay off every farm mortgage in the land, with enough left over to donate almost a thousand dollars to each of six million farmers.

The total salaries and wages being paid this year by two hundred thousand manufacturing establishments to some eight million executives and employees will not match the National tax claims.

Thirty-six Panama Canals could be built with one year's tax receipts. — The Argonaut, San Francisco.

Holding "Enjoyment Week."

Lord Mayor Of London Sponsors Unique Entertainment

Under the auspices of the Lord Mayor, London is holding an "Enjoyment Week," starting May 27 and concluding like the glorious exhibition in Gilbert's "Mikado," with "general rejoicings and a grand display of fireworks" on June 3, the King's birthday.

"A week of festival," says the Lord Mayor, "will undoubtedly have the effect of getting the country to take the brighter view of the situation. The situation is by no means as bad as is supposed in some quarters, either," said his lordship.

Hardly secondary to this aspiration though is the desire to further popularize London as a tourist centre. It is hoped the program will include a pageant procession and a gala demonstration.

Mystifying Magic

New York Audiences Seen Strange Things At Bendix Show

An audience in a New York theatre applauded the other night as a woman "burned to death" before their eyes. They asked questions of a grisly skull and marched forward to have its teeth pulled. One man even smiled as his new derby hat was used as a mixing bowl for pancake batter.

These strange events took place during the annual benefit show of the Society of American Magicians.

Magician Bendix called Joe Kelso's derby hat trick and grinned delightedly as the borrowed derby was filled with batter, which changed mysteriously into six hot pancakes, leaving the derby steaming but unblemished.

Chestnuts, almonds, filberts, walnuts, pecans and other varieties of nuts have been successfully grown in the Okanagan Valley, British Columbia.

Delayed Taking Out Patent

Inventor Of Moving Picture Camera Lost Millions and Died Penniless

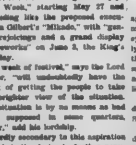
A recent report from the Surrogate office removed that Jean A. Le Roy, inventor of the motion picture projection machine died penniless. The millions of dollars that were rightfully his and legally his, went to others because he neglected to patent his invention soon enough.

An ironical feature is that Le Roy's last few years were spent in poverty. Paralyzed, he subsisted largely on the bounty of friends. All he had at his death was reputation but that doesn't pay doctors or food bills. And that latter utterance came to him only late in life.

How many years, the origin of the motion picture camera remained shrouded in mystery. There were many claimants. An impartial investigation finally allotted the honor of being the father of the motion picture industry to Le Roy. But it was not until two and one-half years after he had perfected the first projection machine that Le Roy got the idea. He sought to patent his invention. Then, he found he had been six months too late.

Le Roy's experience is not novel in the history of invention. He lived in an age when the commercial idea was not so prevalent as now. He gave his first public exhibition of moving pictures in 1894. His statement on why he never patented his machine expresses, perhaps, better than ever before, how so many inventors lived to see others reap the enormous profits of their genius. Said Le Roy:

"I didn't patent my invention because I didn't realize what I had. That is the real truth. It was unfortunate for me that my knowledge of patents and patent law was exceedingly meager. Like the average inventor, I centered my interest in the invention itself, to the absolute exclusion of everything else." — From Ex's New York.



Pulpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Bingham, South Current, Sask., writes:—"I was bothered with palpitation of the heart, and my nerves were so bad I could not sleep.

I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

Get 4 at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Canada Has Become One Of The Most Popular Playgrounds On The North American Continent

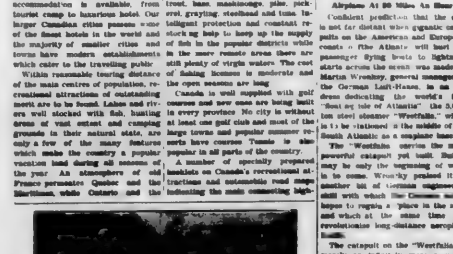
In recent years Canada has become one of the most popular playgrounds of the North American continent and millions of tourists visit this country, annually, in search of recreation.

Canada possesses an extensive system of modern highways with good secondary roads linking together the main routes of travel. Excellent train services are in operation to all parts of the Dominion, while adventurous canoes and equipment may be rented and guides are available at practically all districts. Subject to reasonable fire prevention regulations the camper may camp where he pleases. Game laws may come and go, but protection through the country's vast forested areas never.

Canada's fishing waters, as a result of their extent and diversified nature, provide an exceptional range of sport for the angler. The game fish include, salmon, brook trout, lake trout, bass, maskinonge, pike, pickerel, grayling, steelhead and ouananiche. Intelligent protection and constant restocking go hand in hand up the supply of fish in the popular districts while in the more remote areas there are still plenty of virgin waters. The cost of fishing licenses is moderate and the open season long.

Canada is well supplied with golf courses and new ones are being built in every province. The city is within at least one golf club and most of the large towns and popular summer resorts have courses. Tennis is also popular in all parts of the country.

A number of specially prepared booklets on Canada's recreational attractions and accurately detailed maps indicating the main connecting highways between one province and another, are obtainable free of charge by adults from the National Development Bureau of the Department of the Interior, at Ottawa. The Bureau also has on file information concerning practically all phases of recreation in Canada, which will be gladly supplied, upon request. In order that the most complete information may be supplied it is desirable that application be as specific as possible as to the area in which interested.



Stream the principal cities, while canoeing, boating and all forms of ocean ports. Every class of travel accommodation is available, from tourist camp to luxurious hotel. Our larger Canadian cities possess some of the finest hotels in the world and the majority of smaller cities and towns have modern establishments which cater to the travelling public.

Within reasonable touring distance of the main centres of population are numerous attractions of outstanding merit are to be found. Lakes and rivers well stocked with fish, hunting areas of vast extent and camping grounds in their natural state, are only a few of the many features which make the country a popular vacation land during all seasons of the year. An atmosphere of old France permeates Quebec and the Maritimes, while Ontario and the Western provinces have much to offer by way of historic sites and monuments.

For those who desire a vacation close to nature, a visit to any of Canada's extensive system of rivers and lakes offers a limitless choice of route and type of trip. For the novice there are many trips close to civilization, which may be taken with comfort and perfect safety, while unequipped and even unexplored regions challenge the expert and the adventurous.

A class of boys was asked to write a short story. The shortest story, and the best, came from the pen of a small boy, who wrote: "One bull, two horseshoes, one ball, one horseshoe; one bull."

W. N. U. 1991

A new wood pulp material has properties similar to celluloid and is being used in manufacture of toys.

He: "I don't know whether to be a barber or an author."

She: "Your for it! Heads or tails."

Boy Scouts

Two Hundred and Fifty-One Medals Are Awarded For Life Saving Work

Since the inauguration in 1921 of awards for life saving in Canada, 251 medals have been given for life saving or notable work in a serious emergency and 69 certificates of merit and 75 letters of commendation for valuable service in lesser emergencies. The medals included 13 bronze crosses for life saving at great personal risk, four silver crosses for life saving at serious personal risk and 129 gilt crosses for life saving without personal risk or the other work in an emergency.

Brings New Flying Era

Gorman Autogiro Can't Loop-the-Loop Airplane At 80 Miles An Hour

Confident prediction that the day is not far distant when gasoline consumption on the American and European continents the Atlantic will bear 50-passenger flying boats to lightning hurls Juan de Ayerra, inventor of the "flying saucer" of Atlantic" the 5,000-ton steel steamer "Westfalia," which is to be delivered at Hamburg of the South Atlantic on a regular base.

The "Westfalia" carries the most powerful catapult yet built. But it may be only the beginning of what is to come. Wrong-by praised it as another bit of German engineering skill with which the German nation hopes to regain a "place in the sun" and which at the same time will revolutionize long-distance aeroplane flight.

The catapult on the "Westfalia" is merely an infinitely more powerful rocket than those in use on many another ships in the navies of the world powers and on the North German Lloyd fast-liners, "Europa" and "Bremen." The increase in power of the catapult threw up numerous obstacles which the constructors, the Heinkel aeroplane works, overcame after months of experimentation.

The "Westfalia's" catapult can shoot an aeroplane weighing eight and one-half tons into the air at a speed of 90 miles an hour. The speed is developed in one and one-half seconds.

Canadian Gold Output

Increase For January Since Began Reduction Over Last Year

Canada's gold production in January last totalled 233,456 ounces, as compared with 206,710 ounces in the preceding month, and 232,826 ounces for the corresponding month last year.

Ontario led the provinces for the month with 171,879 ounces; Quebec came next with 33,041; British Columbia produced 17,894 ounces, Manitoba 10,493, and Nova Scotia 241 ounces.

Defends His Pens

Benjamin E. Bailey, watchman at the Denver post-office, resents the declarations that post-office pens are not what they should be. Bailey, who has served under Republican postmasters for many years, declared that he changed all the pen points in the Denver post-office himself, and that the present Postmaster-General James A. Farley, did not originate the practice.

Flood Risks In the Chine-Ningpo Air Line are being inaugurated.

Wheat Production In The Western Provinces Is Said To Be Rapidly Approaching Peak

Require Special Care

Precautions Necessary To Keep Seed From Freezing In Spring

Bees know their homes by location only, but when they have been forced suddenly to leave their homes for long periods, location is forgotten and old habitations must be learned anew when the next flight is taken. Bees that have been wintered in cellars or dug-outs are as a rule, badly disorganized when taking their first flight in the spring unless special precautions are taken to prevent as much as flight when removing them from their winter quarters.

If weather conditions are such that the bees may be freely taken in the air when they are removed from their winter quarters, they will rush pell-mell from their hives without marking themselves with the result that many may drift to other hives when the flight is over. Drifting usually causes the strong colonies to become stronger and the weak colonies weaker.

To prevent drifting, indoor wintered colonies should be moved from the winter quarters when the weather is suitable for an immediate flight, or late in the evening after all flight for the day is over. They will retain in the environment and enable the bees to become acquainted with their new location gradually.

Placing colonies too closely together is encouraging drifting especially if the hives are all uniform in appearance, the entrances all facing in one direction, and there are no guiding marks for the bees to follow. The colonies should be at least six feet apart if they have the same style of hive they occupy. Bees that have wintered outside have already learned their location, but if several colonies are standing together in one yard, unless reliable confusion and drifting may be caused when removing the cases in the spring. Colonies placed in the cellar may be moved together. The cases are best removed and the colonies spread apart when the bees are confined to their hives because of bad weather.

Drifting is a strong problem, for once the colonies become established little or no drifting occurs. If drifting can be prevented when returning the colonies to their summer stands, more work of equalization will be avoided.

Canadian Labrador Has Thirty Small Villages

Medical Missionary Gives Interesting Talk On Community Life

Life on the Canadian Labrador with Dr. Herrington's hospital as the centre of a community was described at London, Ontario, recently, by Dr. Donald Hood, who spent his furlough and for seven years on the hospital staff. In the Canadian Labrador there are 30 small villages of fishermen, although controlled by the provincial department of education it is still backward and there are few qualified teachers. most of the teaching being done by the young people of the district who have had only elementary schooling.

"The hospitality of the people is wonderful," Dr. Hood said. "They may only have bread and a baked apple, but it is shared joyfully with every guest." Difficulties of an insufficient supply of fresh water were cited. There are no wells, and the granite formation of the rocks, the doctor said, makes it impossible to dig. Herrington they are dependent on the rainy season for their water supply. As far as babies are concerned, old wives' tales are overcome, and all other possible ills are welcomed. These are made into "shoes" for the dogs who suffer from frostbite, caused by continual trotting on the ice.

From Various Wells

At one training college for candidates for the Church, the students recently included a rear-admiral, retired, two policemen, two Army officers, two farmers, and a dancing master. Out of the forty-nine candidates, only twelve had come direct from a University.

The future of the Canadian export trade in wheat is discussed by Dr. D A MacGibbon professor of political economy, University of Alberta, in a paper published with numerous graphs in the University of Toronto studies in history and economics. His conclusion is that Western Canada is destined long to remain an important and cultivated and exporter of wheat, but that we are approaching more closely than people suspect the point of production and export of wheat.

In 1928 Western Canada harvested approximately 543 million bushels of wheat, and said to be the world's best and worst flour ranged at $4.25 bbl now in 928, when Canadian wheat was predominantly exhibited from the world's markets exports ceased one-half in 1930 carryovers or surpluses of wheat, the great fall in price of wheat, and the financial difficulties of the small goal appeared as economic problems, and in 1931 there occurred the disastrous drought in the southeastern half of Saskatchewan and in adjoining parts of Alberta and Manitoba.

Dr MacGibbon calculates that Saskatchewan may reach a maximum point of about 400 million bushels in wheat, or an increase of about 85 million bushels. By a similar calculation Alberta may reach 211 million bushels an increase of 60 million bushels. Manitoba is reached its established position Hence, he arrives at a possible maximum wheat crop of about 700 million to 750 million bushels in Western Canada But after Saskatchewan and Alberta reach the point of maximum production there will be a considerable decline just as there was from Minnesota, Kansas, Nebraska and Dakota.

Dr. MacGibbon says that Canada exported on the average 262 million bushels of wheat The rapidity with which increased production available for exportation is entitled will largely define whether Canada will ever sub stantially better this average Personally, Dr. MacGibbon does not expect much increase in exports. On the other hand he sees no ground for believing that average exports will fall below 200 millions for many years to come The late Professor Mayor in his paper read at the British Association in Canada in 1909, estimated that for export at 262 million bushels Dr MacGibbon thinks that even with this quantity Western Canada probably continues to be our most important article of export.

It may be that the authorities quoted have not made full allowance for the no yet unoccupied wheat lands of the Peace River Country and the Mackenzie River District. Even in the settled portions of the Prairie Provinces millions of acres are as yet unfilled There is also the fact that new types of hardy rapidly maturing wheats are constantly pushing inwheat line further north On the other hand the prospect of mixed farming will operate to curtail the acreages sown to wheat even though the present proposal to limit wheat acreage internationally comes to nothing. - Toronto Mail and Empire

Some Salvage Operations

British Export Has Lost Money At Sugar Flow

A Sugar Flow, denotes buy in Dr Ontario Lumber and terms of the mightiest salvage operation ever undertaken, is seen to return to its At the start after ten years of being activity

F E. Cox, British's salvage engineer who has succeeded in raising 32 the 41 warships of the German grand fleet, which were scuttled shortly after the Armistice, has decided to abandon the remaining ten as well still at the bottom of the bay

Until the beginning of the year it seemed that he would recover money on the deal, but with a slump in prices for scrap iron and copper he finds he has lost $750,000 of the $3,000,000 deal with the Admiralty.

A tourist highway will be built across the Bavarian Alps.

WORLD HAPPENINGS BRIEFLY TOLD

The Roosevelt economy campaign is bearing for a reduction of from $4,000 to $5,000 in the strength of the United States army.

Approximately 10,000 acres will be eaten to sugar beets in southern Alberta this year an increase of 1,000 acres

Amelia Earhart has received the award of the 1932 Harmon international trophy for women flyers for her flight across the Atlantic in May, 1932, the first crossing ever accomplished by a woman alone.

Decrease of more than 1,000,000 pounds was shown in butter holdings on April 1, as compared with the corresponding date last year, according to a report issued by the Dominion Bureau of Statistics.

Fifteen gold output in British Columbia increased from $158,713 in 1930 to $346,000 in 1932, a gain of nearly 200 per cent Free miners certificates were issued to 10,000 men last year.

Long a source of revenue to druggists on the outposts of civilization, Canadians on lumber waives have slumped 50 per cent Henceforth the beauty will be $15 per pair compared with the $40 formerly paid.

To assist school districts, municipalities and other public bodies to improve the surroundings of schools, public buildings and community halls, the Alberta government will distribute close to 3,000,000 evergreen seedlings.

A move was among trans-Atlantic lines, it was reported in shipping circles, will be the probable results of differences between members of the shipping conference respecting rates for first class and cabin class accommodations

Closing of Government House at Edmonton official residence of the lieutenant-governor of Alberta, in preference to reduced educational grants by the Alberta government was urged in a resolution passed by the executive of the United Farmers of Alberta.

B.C. Eugenics Board

Will Assume Control Of Its Duties July 1st

British Columbia's board of eugenics, to be created under the Sterilization Act, will assume control of its duties when the statute comes into effect July 1 It will be a voluntary board, composed of a member of the judiciary, a psychiatrist and a social worker, yet to be named, who will receive no remuneration.

The duties of the board will be to pass upon recommendations from superintendents of any provincial mental home or industrial school where it is suggested that hereditary mental deficiency or serious mental disease may be passed on to succeeding generations without interference

If the consent of the patient or a guardian is obtained, the board may order sterilization of the patient in such case, first holding individual investigation into the case. Where consent is refused, the operation would also not be proceeded with in any case. The cost would be borne by the institution concerned and choice of a surgeon would be accorded.

Proposed Bill Wipes Out Creditors

When Peden Cutterwax was recently released from the county jail at Las Cruces, New Mexico, after being held since April 1, 1932, on a charge of a murder case, he presented Sheriff Dick Trivis with a set of bedroom furniture made entirely out of cigar boxes. Cutterwax served the furniture during his idle moments in the county bastile.

Copper Wells For Bungalows

Bungalows with copper wells are being constructed in Germany since it has been found that this metal offers advantages over steel houses, principally because it is rust-proof and requires no protective coat of paint.

The Debt Adjustment Act, 1933

Important Legislation Passed In Saskatchewan At Recent Session

The Debt Adjustment Act 1933, passed at the recent session of the Saskatchewan Leg slature does not differ very materially from the Act of 1932, which it replaces. Its scope, however, is much wider Whilst the former Act applied only to certain restricted classes of residents, the new Act protects every person who is a normal resident of the province, and that protection extends to every person who, though not an actual resident, has a number of farming interests in the province on which a member of his family conducts farming operations All companies, except banks, carrying on business in the province, are also protected

Scope of Act Extended

Small Creditors

The new Act repeals the provisions of the superseded Act with further necessary arrangements for settlement of debts. Such arrangements may be made through the medium of the Debt Adjustment Board, between a resident and his creditors, and may provide for settlement of the resident's debts either in full or by a composition.

Small Creditors

If an adjustment cannot be arrived at between the resident and his creditors, the board is empowered to determine the amount by time the basis on which the resident ought to pay the claims of his creditors and on which the creditors ought to accept the payment of their claims, and, in many the resident ought to comply with any directions given by the board, the board may issue a permit authorizing the creditors to proceed against the resident.

Restrictions Between Debtor and Creditor Upon Petition

Failing an amicable agreement between a resident and his creditors, or failing compliance with any directions given by the board, the board is empowered, upon petition of the resident or any of his creditors, to make such orders as may be just for the mean expedient for the relief of the resident or for the preservation of the contractual relationship between the resident and his creditors, having regard to the economic conditions prevailing at the date when the indebtedness was incurred, those existing at the date of the petition and those existing during the intervening period. In particular the board may, by order, provide for the postponement of payment of all or any debts of the resident; prohibit the issue of process or the execution of process already issued; stay proceedings in civil actions; vary the exemptions privileges of the resident. Direct the resident to deal with his or any part of his property in such manner as the board deems expedient.

Effect Of Prohibited Unless Permit Is Issued

The main provisions of the Act are contained in section 11. That section commences by providing that no legal or other proceeding, including any certain described classes, shall be taken, and any proceeding instituted or resident unless a permit has been issued for the purpose by the Debt Adjustment Board or a member thereof, or by any person authorized by the Lieutenant-Governor in Council.

The prohibited classes of proceedings are as follows:

(a) action or suit for any legal or equitable or arbitratory claim, demand, debt or account, or for any matter or thing;

(b) action, suit, or proceeding upon a covenant under an agreement for sale or mortgage of land or for assignment of such agreement, sale or mortgage;

(c) action or proceeding for the order of foreclosure or sale, mortgage on land, or for cancellation, rescission or specific performance of any agreement for sale or mortgage of land or for recovery of possession of land, whether in court or otherwise;

(d) proceeding to acquire title to land by virtue of any tax enquiry, a preliminary application by a tax purchaser to a judge or registrar of titles pursuant to and by virtue of sections 58 of The Arrears of Taxes Act;

(e) proceeding by way of caveat against;

(f) action or proceeding in land under or in satisfaction of any judgment or mechanic's lien;

(g) issuance by the bailiff of an execution or distress, or under any lien, agreement for sale, chattel mortgage, hire purchase agreement or conditional sale agreement, whether by virtue of rights at common law or under statute;

(h) proceeding under any agreement for sale of land used and occupied as residential property;

(i) proceeding under any agreement for sale of farm land or farming chattels or any shares or crop payment agreement for sale or mortgage, in respect of the share or interest which any person making a tenancy is entitled under sections 2 and 3 of The Limitation of Civil Rights Act, 1933, and whether by virtue of rights at common law or under statute;

(j) such other class of legal or other proceedings as may be prescribed within the provisions of this section by order of the Lieutenant-Governor in Council.

And the prohibition applies to proceedings commenced either before or after the twenty-seventh day of March, 1933, the date on which the Act came into force.

But there are some important exceptions to the general prohibition above set forth. Those exceptions are as follows:

1. The prohibition does not apply to any contract made or entered into after the 27th day of March, 1933, for consideration for which seems after the first day of April, 1933, nor to any action or suit which is founded on tort. save with respect to a contract entered into or made by a resident or of a contract org only entered into prior to that date.

2. Again the prohibition does not apply:

(a) on action or suit by a municipality for recovery of taxes, or of any of the other remedies available to a taxing-entity for the collection of taxes;

(b) actions in the nature of a distress for rent, provided that the goods distrained must be sold or otherwise dealt with except with the consent of the resident, or by leave of the board; and

(c) such further class or classes of legal or other proceedings as may be withdrawn from the operation of the Act by order of the Lieutenant-Governor in Council.

3. Proceedings by way of attachment or garnishment may be instituted by a creditor of a resident and may be carried on to judgment, but no further steps in such proceedings may be taken without the consent of or permit by the board.

4. The provisions of the following sections and proceedings in personal:

(a) actions or proceedings for sale under or foreclosure of mortgages on land, or for cancellation, rescission, or specific performance of agreements for sale of land, or for assignment of such agreements of land, whether in court or otherwise, commenced and set down for trial prior to the coming into force of the Act and which have been set down for trial or are under appeal prior to the coming into force of the Act, which shall be dealt with and shown the same manner as judgments in foreclosure actions, unless the board issues a permit for the purpose.

Issue Of Certificates

The provisions of last year's Act authorizing the issue of certificates appears again in the new Act. Under it debtor certificates were issued only on the application of a resident who owes $500 or less, on his behalf the application of a resident or of any of his creditors. After a certificate has been issued no proceedings of the nature above mentioned can be taken, made or continued against the resident without the written authority of the board; the resident is prohibited from dealing with his property, and no purchaser made in good faith under a conditional agreement has any validity unless the previous written authority of the board has been obtained.

Where a certificate has been issued, or a permit has been refused or cancelled, the board is authorized to:

(a) direct the resident named therein to deal with all or any part of his property in such manner as the board may in its discretion see appropriate;

(b) in the case of residential property occupied as such by the resident, have regard to all the circumstances, for a sum to be paid by the said, the transfer to the resident to pay it in the manner and on the terms specified to the mortgagee or vendor of the property or to any person claiming through or under such mortgagee or vendor.

It is the duty of the resident to comply with such directions, and the board is empowered to distribute the proceeds of sale of any property of the resident received by it for distribution in such manner as it deems fit.

General Postponement

The Act also provides for the postponement of payment of all debts. The Lieutenant-Governor, or of the enforcement of liens or incumbrances or of the enforcement of any other remedies available to a creditor by reason of the proclamation of the Lieutenant-Governor in Council published in The Saskatchewan Gazette. The Lieutenant-Governor in Council is also authorized to prohibit the issuance of writs, or the continuation of process already issued, or to stay proceedings in any civil matter, cause or suit pending or otherwise save the exemption privileges which constitution dubious rights.

Agreements Waiving Act Have No Effect

Agreements providing that the Act shall not apply, or that the remedies provided by it shall be curtailed, are declared to be null and void and of no effect.

Crop Payments

A reference has been made to sections 2 and 3 of The Limitation of Civil Rights Act, 1933. These sections are as follows:

2.—(1) Notwithstanding anything contained in The Crop Payments Act or in any agreement for sale or mortgage of land to which that Act applies, or in any other agreement for sale or mortgage of farm land, or in any share of crop lease collateral to a mortgage or agreement for sale of land, but subject to the provisions of section 3, the rights of a vendor or mortgagee or his assignees shall not in respect of the crop grown by the purchaser or mortgagor in the years 1932 and 1933, affect more than one-third of the crop produced in either of those years, and the purchaser mortgagor or lessee may in the year 1933, out of the share of the crop belonging to the vendor mortgagee or lessee, pay one year's taxes upon the land on which the crop is grown, and, in such case, upon production of the receipt of the municipality for such payment, the vendor mortgagee or lessee shall be entitled only to the one-third share of the crop, or the share authorized under section 2, less the amount shown upon such receipt

(2) The benefit of the provisions contained in subsection (1) of this section shall be applicable to and include the assignees of agreements for sale and mortgages, and the assignees of purchasers and mortgagors respectively.

3 (1) This section shall not apply to the case of the sale of land with chattels to a resident upon an entire consideration.

(4) For the purpose of subsections (1) this section "chattels" shall not have the same meaning as in The Debt Adjustment Act, 1933, but shall be interpreted in accordance with its ordinary significance.

3. In any case to which the provisions of subsections (1) and (2) of section 2 apply, where a vendor or mortgagee has purchased or supplied the seed or pays a share of the cost of threshing and binder twine, such vendor or mortgagee shall be entitled to the share of the crop not exceeding one-half thereof agreed to be delivered to him, provided that the purchaser or mortgagor may make application to the Debt Adjustment Board for relief from such agreement, and thereupon the board may determine what share of the crop, not more than one-half thereof, shall be delivered to the vendor or mortgagee, and direct delivery of such share, the interest in the crop of the purchaser or mortgagor shall cease and determine.

Duration Of Acts

The Debt Adjustment Act remains in force only until the first day of March, 1936. There is no such restriction in the case of The Limitation of Civil Rights Act.

SUNDAY SCHOOL LESSON

APRIL 30

JESUS SETS A NEW STANDARD OF LIVING

Golden Text: "As ye would that men should do unto you, do ye also to them likewise." Luke 6:31.

Lesson: Matt. 5:38-48.

Devotional Reading: Philippians 2: 1-13.

Explanations and Comments

Jesus the Children's Friend, verses 15-16.—Jesus was much displeased when His disciples rebuked parents who were bringing their children to Him that He might bless them. One commentator observes that the failure of these children brought to Jesus have not had fair play, for in all the pictures of Jesus with children the mother is taken part in it. Yet there are many failures as well as successes, for the participate in the Greek is "suffering."

As Dr. T. R. Glover says, Pharisees had come in their bitterness and hate to catch Him in His words; great numbers of sufferers the blind, the lame, the leper, the demon have been brought to Him to be healed; greedy people flocked out to Him because they ate of the loaves and were filled; sinful people pressed upon Him to hear His words of spirit and life; sinful people forced their way into His presence and fell at His feet, praying that they might be forgiven. But no people ever came into His presence who were so welcome to Him as those little children.

"Under the Rule children to come unto Me; forbid them not," He said; "for of such belongeth the Kingdom of God." Jesus took it ill, as an old commentator expresses it, that the Twelve should so entirely misunderstand and ignore His teaching, should act so entirely contrary to every principle He had laid down, and He rebuked them.

"If such belongeth the Kingdom, I have heard the charter of the Society and the Prevention of Cruelty to Children spoken of sometimes as the Children's Charter" but this is the real Children's Charter. It is the great word of Christ that has given to each his royal place."

"In the breast of a bulb is the promise of spring;
In a little blue egg there's a bird that will sing;
In the soul of the seed is the hope of the end;
In the heart of a child is the King-dom of God."

—William L. Stidger.

Good Habit To Cultivate

Canadians Would Do Well To Spend Vacations in Canada

According to official estimates $56,000,000 was spent on foreign travel during 1932 by residents of this country, notwithstanding the depression and adverse discount of Canadian funds in certain countries. While there was a decrease of $18,452,000 in such expenditures, compared with the previous year, there would still appear to be room for further reduction. The circulation in Canada of so large a sum as that spent by Canadians on foreign travel would be of inestimable benefit to those who cater to the travelling public and to the numerous classes that would be indirectly affected by the resulting increased purchasing power. Vacationing in Canada therefore is a habit which every Canadian might very well cultivate, to his own and the country's advantage.—Department of Interior Bulletin.

Radio Sales Last Year

Total Purchased In All Provinces Valued At $6,760,000

Saskatchewan radio buyers accounted for 8.4 per cent. of the radio sales in Canada in 1932.

The total sold during the year was 132,454 valued at $6,760,000.

Percentage of other provinces were: Ontario, 39.3; Quebec, 22.9; British Columbia, 9.6; Manitoba, 8.6; Alberta, 6.6; Nova Scotia, 4.1; New Brunswick, 2.1; and Prince Edward Island, .4.

The sales in 1931 were 206,122 sets, valued at $16,141,247.

A wood-burning automobile has in operation in Germany is claimed by the inventor to effect an 80 per cent. saving in fuel cost.

UNITED STATES GOES OFF THE GOLD STANDARD

Washington. The United States swung away from the gold standard on President Roosevelt's prompt call to seek congress for new powers to effect a controlled inflation.

Withdrawal of gold support for the American dollar in foreign exchanges by the president was interpreted by the treasury as a move to encourage exports. Woodin, as incoming temporary suspension of the traditional gold standard basis of currency.

In his first moves, the president officially put himself into a position to negotiate for a revised world gold standard by withdrawing support of the American dollar in foreign exchanges to combat the depreciated currencies of the foreign nations now in the ascendancy.

He has in mind bringing all nations back to the gold standard as a measure of stability but he is considering a new standard whereby the present ratio of 60 per cent. gold reserve for currency would be reduced.

He will look for cooperation by all the nations in establishing the new ratio which will permit more currency to be circulated on the same world supply of the precious gold basis.

Meanwhile, the Roosevelt administration attached the problem from its purely domestic angle Governors of the 12 Federal Reserve banks reported to Woodin and to Secretary Woodin, and then studied means of pumping available idle currency into circulation.

The governors also tackled the task of freeing the four to five billions still locked up in closed banks. Quick action appears to be assured.

Just how the gold embargo remains to raise American commodity prices is somewhat involved and difficult of explanation. It was explained, that cotton, for instance, is sold on the gold basis.

On the present gold basis the rate is about six cents a pound. Should the price of gold slide off 10 per cent. a resultant increase in cotton of 10 per cent. is regarded as inevitable.

The president apparently has won a respite from the leaders in congress who have been hammering hard for outright currency inflation.

Mr. Roosevelt considers the heart of the problem the raising of the price level. But he wants it raised in such a manner that it will be under control at all times and not permitted to go too high.

No Political Jobs

Premier Bennett Says Appointment Of Rail Trustees To Be On Merit

Ottawa, Ont. "I do say that the appointments of these trustees will not be political Prime Minister R B Bennett promised the House of Commons committee considering the railway legislation

Mr Bennett then proceeded to define political appointments as those involving the selection of a man because of his services to a party and who possessed only the qualification for the post to be filled.

Mr Bennett stressed difficulty of securing suitable men in Canada to fill important posts for the country did not have the great reservoir of public men which existed in the United Kingdom

"You know better than the appointing body what these difficulties were

The number of men who are willing to serve their country at present is amazing commented Mr Bennett To make the necessary selection was very difficult, he said, particularly when confronted with the innumerable applicants whose only qualifications was those in their ability to provide patronage

Some Gold In Sand Pit

Small Quantities Found In Yorkton By Local Prospector

Yorkton, Sask Small quantities of gold are to be found in Yorkton a sand pit having been discovered by Fred Chandler, local prospector, who has had experience panhandling and prospecting for gold in northern Saskatchewan. Although not a big find in Yorkton country, Mr. Carson explained to a press representative that when he made the discovery in the sand pit there was no use of the opinion that the material was "fool's gold," more commonly known as mica, but he made a mercury test and convinced himself that the mineral was real gold.

He expressed the opinion that the gold flakes found in Yorkton's sand pit had been deposited there during the glacier period and stated that only between a ton and a ton's worth of gold could be obtained from every cubic yard of sand in the pit.

Another Mount Everest Flight

Two Aeroplanes On Second Flight Negotiate High Mountain

Purnea, India. Two aeroplanes of the Houston expedition flew over Mount Everest, the highest mountain in the world, for the second time yesterday, it was learned here.

The flights, which required exactly three hours, were made in good weather. Lieut.-Colonel L. V. S. Blacker, who participated in the first flight, Air Commodore P. F. M. Fellowes and a moving picture operator manned the planes.

At lower altitudes visibility was a bit hazy, but at the higher levels it was excellent.

Hay Continue Camps

Ottawa, Ont. The general has under consideration the desirability of continuing relief camps for single men, after April 30, Hon. Wesley A. Gordon, Minister of Labor, told John Vallance (Lib., South Battleford), in the House of Commons. No decision has yet been reached, he said.

Leads In Lumber Shipments

Victoria, B.C. For the last three months British Columbia has led Pacific lumber shipments in the offshore trade, Capt. A. Longbottom, director of Lands, said in commenting on the resumption of logging in Vancouver Island woods, and the reopening of mills that had long been closed.

Canadian Secrecy Veil

Ottawa, Ont.—The veil of secrecy which has hung over the salaries and many of the other expenditures of the Canadian National Railways was condemned in the House of Commons by Rt. Hon. Mackenzie King. Premier R. B. Bennett declared he was in agreement with the Liberal leader in this particular.

Present Problem

Unemployed In Saskatchewan Flock To Cities

Regina, Sask. Single unemployed are coming in from farms, where they have been employed all winter by the Saskatchewan Government, and are presenting a problem to officials. The population of the camps at Regina, Saskatoon and Prince Albert has jumped by about 400 in the past month.

The men were paid $5 a month by the relief commission and placed on farms. The farmers are now letting them go, stating they are not in a position to pay them wages during the summer.

Few farmers are taking men in Saskatchewan at the present time.

Lord Milton Weds

Dublin, Irish Free State. Lord Milton, only son of Earl and Countess Fitzwilliam, and Miss Olive Plunkett, daughter of Most Rev Bishop Benjamin Plunkett, former Bishop of Tuam and later of Meath, were married here recently. More than 500 tenant farmers from the Fitzwilliam estate in England attended.

Show Reaches England

Southampton, Eng. George Bernard Shaw, arriving home from a cruise of the world, declared, after visiting 29 countries, he thought perhaps the best place in which to live would be heaven. He denied reports he had made Ana Harding cry when he was in Hollywood.

NEW SPEED KING

Hurtling his open seaplane over Lake [illegible] [illegible] Capt. [illegible] at an hour Flight Officer [illegible] Angle, who was a member [illegible] the Royal Air Force [illegible] [illegible] world's record [illegible] years ago by Lieut. Auto Tourist Traffic Down

Cars Entering Canada Last Year Were 800,000 Fewer

Ottawa, Ont.—A Dominion wide summary of tourist traffic in Canada in 1932, compiled by the Department of National Revenue, shows that over 4,000,000 foreign automobiles were entered for touring purposes last year through Canada's frontier ports, 800,000 fewer than the previous year.

While totals from every province show decreases, several of the ports show substantial increases. The most striking summary was a shrinkage of about 160 men in the number of Canadian cars reported outwards for touring purposes.

Canadian automobiles expected for touring purposes in 1932 numbered 976,887, as against 836,685 for the previous year

Will Attempt Atlantic Flight

Plane Used In the Gold Fields Of the North To Be Used

Toronto. The well-named "Bourdough," veteran monoplane of the Northwest Territories and the subject of feeble efforts which has been flown by many northern pilots, will have a new and even more thrilling experience within two months.

The "Bourdough," with J. D. McCrea, Scotch-Canadian, at the controls, will attempt a flight from London, England, to Toronto in the first week of June J H. Hammell, well known mining man, has donated the monoplane to Gray a Toronto pilot, for the flight.

Endorses Roosevelt Action

J. P. Morgan Pleased With Embargo On Gold Exports

New York J P Morgan in one of his rare public statements, endorsed President Franklin Roosevelt's action in suspending gold exports.

I welcome the reported action of the president" he said in a written statement "and the secretary of the treasury in placing an embargo on gold export.

It had become evident that the effort to maintain the exchange value of the dollar at a premium as against depreciated foreign currencies was having a deflationary effect upon already severely deflated American price and wages and employment

It seems to me clear that the only cure of the depression is to combat and overcome the deflationary forces Therefore I regard the action now taken as being the best possible course under existing circumstances."

Defeat Sweepstakes Bill

Finders Gambling Is Stand Taken By House Of Commons

Ottawa, Ont Canadian must continue to buy their sweepstake tickets if at all in dark alley fashion, the House of Commons defeating a bill to legalize lotteries conducted for the benefit of hospitals The ayes months bright a time-honored parliamentary way of killing a measure was given the bill, 78 to 13 the vote cutting across party lines

While at least one member drew a sweep-like third from his pocket book, nine Conservatives five Liberals, and one Laborite supported the bill

Premier R. B. Bennett, leader of the Conservatives, Rt Hon Mackenzie King, leader of the Liberals and Robert Gardiner, leader of the United Farmers group, united in opposing the measure.

The bill passed the senate after a rough passage but found few supporters in the elected chamber. The common ground for opposition was that it fostered gambling and would not assist hospitals

Plane Crash Kills Four

St. Louis, Four persons, one a wealthy Arkansas planter, were killed when the aeroplane in which they were flying from Augusta, Ark., to St. Louis, crashed and burned in a wheat field near Valmeyer, Ill., about 25 miles south of here

To Appoint Commissioner

Vancouver B.C. An order for the appointment of a commissioner for the Corporation of the City of Prince Rupert, was made in supreme court chambers by Mr Justice W. A. Macdonald

BRITAIN'S MOSCOW AMBASSADOR ARRIVES HOME

Here is Sir Esmond Ovey (left), British Ambassador in Moscow, waiting over to 10 Downing Street for a consultation with the Prime Minister and the British Cabinet regarding the arrest and trial of British subjects in Moscow. With Sir Esmond is Sir Robert Vansittart (right) British Under-Secretary of State for Foreign Affairs

BRITAIN PLACES EMBARGO ON SOVIET IMPORTS

London England — An 80 per cent embargo on Russian imports was proclaimed through King George as a result of the trial in Moscow of an British electrical engineers.

Shortly thereafter however, there were authoritative statements that the action might be revoked if prison sentences of two of the Englishmen would be commuted to banishment from Russia.

Soviet Ambassador Maisky chairman of the Russian trade delegation, and his chief assistants conferred with Sir John Simon, secretary for foreign affairs, and officials of the board of trade in an effort to avoid the break because of the crisis

The British Labor ranks aroused by the threatened reprisal commenced leaders of trade unions to a conference with the Labor party and Labor-Socialist members of parliament to consider the whole question of the embargo.

George Bernard Shaw, returning home from a world cruise, immediately jumped into the controversy with the statement that "all people trying to provoke war with Russia should instantly be hanged for practical treason to their own country."

The British government announced last week by parliament to declare the embargo, has mented it is primarily concerned with the safety of subjects in Russia. Great public interest was aroused

If the embargo is carried out, 80 per cent of Soviet purchases valued for importation into Great Britain would be banned, including all important commodities except furs.

Commercial and credit relations between the two countries would be left in a tangled state

The government's drastic action was based on a policy of protection for British citizens in the Soviet Union, and so far it has been considered successful as the Metropolitan-Vickers employees received right sentences.

The British government has contended that its prime concern was the safety of its subjects in Russia.

On the basis of current trade figures, the embargo gang into effect on April 26 will bar imports aggregating (9,600 600 annually.

It was authoritatively stated that 60 per cent of Russian imports will be affected. All grain, butter, raw cotton, petroleum and timber will be [illegible]

Currency Stabilization

U.S. Going Off Gold Standard May Help Canada

Toronto Ont. Officials of Canadian Bank head offices in Toronto declined to comment on the statement by W H. Woodin, secretary of the United States treasury, that prohibition of gold exports had sent United States off the gold standard.

One high official said, "In all probability currency of the United States and Canada would come to a more equal level and there possibly would follow a rise in commodity prices in which the Dominion would share

"At any rate, the United States going off the gold standard will have no adverse effect on Canada."

Agree On Pensions Act

Ottawa, Ont. An amicable agreement has been reached between the government and representatives of the associated veterans emerged from a Pension Act conference which Prime Minister R. B Bennett and Minister of Finance E. N. Rhodes held with spokesmen of the ex service men, according to a statement issued by the veterans following the meeting

Brewery Swamped With Orders

St Catharines, Ont - A local brewery has announced it is literally swamped with orders for beer from all over the eastern United States and from as far away as Atlanta, Ga. The first shipment was sent to Utica, N Y "There is a demand for 200,000 barrels a day," said E T Sandell of the brewery.

If Mars Were Nearer To Earth

Many Details About Planet Would Be Made Clear

Mars has a diameter of 4,215 miles, as compared with 2,160 for the moon, so that if he were as near to us as the moon, we should have a many-hundred spheres about twice the width of our moon. We should see this sphere of Mars with the broad expanses of orange tint which give the star its reddish hue. There would also be greenish and blue-grey areas with outlines of a curious geographical appearance and hazy extensions, to ends, sometimes, suggesting a world similar to our own.

The similarity would be accentuated by a large bright area covering the North Pole of Mars, which will shrink from about 1,000 to 200 miles in diameter. This polar area which is now turned toward us is the most brilliant part of his lovely orb and is apparently the planet's snow and ice covered area. It would be seen gradually to diminish in size in the course of the Martian spring and summer and at times ledge portions might be seen to break away and float southward, or if on high plateaux, become detached and take longer to melt. All this has already been observed in powerful telescopes at various times.

Meanwhile some of the less lying areas and seas would appear to have grown more extensive apparently by the inundations produced by the melting snows. These obvious inundations have been seen to extend toward the equator with the result that the greenish tones increased considerably with the coming of the Martian summer.

All these details would be obvious were Mars as near as the Moon is, but 239,000 miles away instead of 29 million! Probably some of the more distinct of the greyish streaks would be seen, corresponding in a rudimentary manner from various bays, estuaries and certain well-defined peaks on the coasts across the extensive reddish areas.

These would appear to be desert regions, and the greyish streaks cross them apparently in straight lines, as a rule, though there are certain well-known curved streaks. They would be seen to grow in length with the advance of the Martian season, link up with one another, and unite in greyish spots and patches—areas, they are called, these would vanish, others reappear after long intervals.

These are the so-called canals, of which over 600 have been counted, the widths varying from 20 to 150 miles, and extended in some cases for over 3,000 miles. Some of these so-called canals are regarded by astronomers who have studied them, and know most about them, to be cultivated areas of vegetation irrigated by the waters collected in narrow channels which occasionally appear in pairs. Gathered here and there are areas of dots, suggesting patches of vegetation following lines of irrigation. The greenish areas have been seen in places to turn brown as the Martian autumn advances.

Occasionally we should see a white thin plaque and cover up parts of this beautiful spectacle. These are the mists and clouds which are generally scarce on Mars, for it is extremely rarefied in vapor, it is thought.

As added interest for us would be to see this fascinating world, as it hung above us, probably turn round on its axis in the course of 24 hours 37 minutes, and bring the whole of mysteries into view.

London's Ancient Toolsmiths

Aged tradesmen are still plying the streets of London, in answer to a question, it was revealed in the House of Commons that out of 6,064 motor cabs licensed by the Metropolitan police, 211 were more than 20 years old, and 1,794 were between 10 and 20 years old. The House laughed decidedly when this information was given.

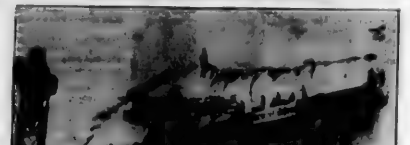
"Uncle, you're not married are you?"

"No darling."

"Then who tells you what you ought not to do?"

Child output in South Africa outdistance in beach records.

THE LAUNCHING OF THE SECOND POCKET BATTLESHIP



Our picture shows the launching of the second German pocket battleship, "Admiral Scheer," before a vast crowd of spectators at Wilhelmshaven. Note the Nazi salute being given as the new vessel slides down the slips.

Something Wrong With System

Alberta Can Make Distribution Where Big Spread Between Producer and Consumer

From evidence submitted by the head of a milk distributing firm to the parliamentary committee now investigating milk prices throughout the Dominion, the Farmer's Advocate ascertains that the ten-cent piece which the urban customer sometimes pays for his quart of milk is divided as follows, using data for February last:

The farmer got	Cents Per quart
Hauling charges at depot	3.10
Transported on the city	.05
Production costs, including interest	.54
Pasteurization	1.10
Selling and delivery	4.15
Containers (bottles)	.10
Insurance	.02
Net profit	.04
Unaccounted for	.30
Average selling price	9.60

This looks like rather poor business from the standpoint of the dairy farmer. Certainly there must be something wrong with the system of distribution when the costs attending the selling and delivery of milk alone are nearly double what the farmer gets for the raw product. As the Sun also points out, the gross spread between what the farmer receives at the farm and the ultimate selling price is over three and a half times what the farmer gets to cover the whole of his production costs.—Strathcona Recorder and Times.

Now You Tell One

Amateur Poultryman Of Montreal Has Small Queer Hens

Members of Jack Chevrier, of Montreal, amateur poultryman extraordinary, who has a one-legged hen which laid a double egg, which in turn produced one dead and one chick, on and one five three-legged bird.

"The double egg was not the common two yolk kind," Mr. Chevrier explained out.

"It was the rare two shell type, one brown and one white joined together from the outside.

Mr. Chevrier, in addition to his out preoccupations to greatness for his chicken's feet, has, in addition, a chicken which eats with equal delight cigarette butts, broken glass or waffles, and which can stand on one foot for hours.

"This bird's feet includes canary seed," Mr. Chevrier explained.

But all of Mr. Chevrier' birds take to beer "with gusto," he said.

Mr. Bennett In England

The Victorian Colonist says other in England have no debt fundations such as are imposed on this continent. Despite this there has not been a single default on municipal bonds in England. That is a high tribute to municipal management there.

Labeled Milk

Milch cows should not be fed heavily on turnips or turnip tops, rape or rye, decayed cabbage, bulbs, celery or apples, otherwise a taint will appear in the butter.

Castle in the Air

Home At Sudbury, Ontario, Is 20 Feet Above Ground Level

Eighteen years ago the late Simeon Paquette decided he needed plenty of fresh air and built his unit into itself a home on the crest of a rock on Notre Dame St. Sudbury, Ontario. Since then he has climbed approximately 100 miles of steps. Mr Paquette died two years after the house was built.

The home is 20 feet above the street level and there are 65 steps leading to it. Assuming that on the average of once a day Mrs. Paquette has gone down town it is calculated that she has navigated 684,100 steps. The upward climb totals 238,900 feet or 90.54 miles. Too close to a hundred for comfort.

And though the house itself contains hundreds of stairs, Mrs. Paquette does not complain.

"I suppose my husband wanted it that way," she told the Sudbury Star. "I don't know any other reason for built it there. He may have liked the view. It is wonderful."

The view indeed is one of the best in the city. All of Notre Dame St. as far as the Sacred Heart College, can be seen on one hand. On the other, the view extends to the main streets of Sudbury, past the post office, and behind the Canadian National Railway station.

Furthermore Mrs. Paquette raised two sons and one daughter, and never once did the children fall down any one of the 65 steps.

The only drawback, Mrs. Paquette added, is that passers-by stare at the home in its unusual location.

Two corpulentances met in a department store

"Hello, dear You look busy."

"Yes, I'm trying to get something for my husband."

"Had any offers?"

Over Million "Removed"

Hounds Run Way Of Dealing With Rodents Called Unfavorable

Those Canadians who are keen for closer Anglo-Canada with Russia will be interested to learn on the authority of Walter Duranty of the New York Times, that a million souls have been ruthlessly removed to exile by the Moscow regime The new terror appears in different forms in town and country, but they are really identified in that both consist in the forcible uprooting of Russians from their normal abodes, and in their transfer to other sections of the country, where they are employed, as the Stalin mediocrity chooses.

People of undesirable social origin, such as former aristocrats, priests, officers, police and business men, on the one hand, and workers on the other, are taken from towns and cities and sent where the powers that be wish to have them. It is said that the number thus removed runs into at least a million. In a similar manner thousands of families have been taken en masse from areas where they have opposed the collectivisation of farming and put in sections where they can be made to do as their tyrannical rulers direct. If our Russo-Canadian like this sort of thing why do they not go where they can enjoy it? Toronto Mail and Empire.

A Mechanical Horse

A mechanical horse, designed to substitute for the farm animal, or even light tractor, has been invented in Italy. Propelled by a motor of only five horse-power, the mechanical animal not only carries a person, but pulls a light farm vehicle over rough ground.

There are 30,000 street traders or peddlers in London. Of this number, 700 are sandwichmen.

Gardening Notes

By Gordon Lindsay Smith

The earlier trees, shrubs, rose bushes, climbers and such things are planted, the better. This also applies to herbaceous perennials. Just as soon as one can dig the soil in the best time to get these things in as there is then plenty of moisture in the ground and in this plentiful supply of moisture is the secret of successful transplanting. Spread roots out well and cover firmly with fine soil. A little commercial fertilizer dusted in with water will greatly help at this time.

Improved Flowers: In recent years there has been a great deal of improvement in flowers. Some of the old common things are much appreciated in the old gardens have been glorified and brought right up to the modern standard of large delicate blooms of brilliant hue There is now a magnificent single Aster which many people prefer to the older type and also the new Pentstemon, Shasta, Scabiosa, Calendulas Marigolds, Cosmos and Poppies are improved. The difference between the from the sort many people were familiar with years ago One would be well advised to give some of these a trial as they offer a really wonderful range of color

With Annuals Alone. Wonderful results can be achieved with annuals alone which is a boon to the person who expects to move in the near future Borders of mixed annual flowers arranged in clumps of one color, with the taller sorts generally towards the rear are very attractive, and from the latter part of July are really more colorful than a bed of perennials For solid beds such things as Petunias, Zinnias, Globe-flax, Portulaca Dahlias, Calliopsis and Nasturtiums may be used Hedges, upright screens or backgrounds can be created by the use of the taller growing annuals such as the Cosmos, Pear O'Clock Marigolds Mexican Sunflowers, Castor Beans and similar high, bushy plants For climbers there are Hops, Trailing Nasturtiums, Sweet Peas, Scarlet Runner Beans, and quick growing vines that cover ahead and soon make a splendid screen.

Abundance Of Vegetables: The average Canadian does not realize the really wonderful variety in vegetables which this climate allows As a matter of fact with a little planning, the utilization of early, medium and late varieties, and above all successional plantings, that is a few rows of the seed planted at intervals of ten days or two weeks instead of all sown at once, it is quite possible to have a supply of many vegetables and have substantial vegetables coming on all summer and fall and of having these come at the height of their freshness, too.

For instance, one should not confine himself simply to a short row of beets, but should plant a few each week it is young and tender The crop can be strung out over the whole season if there are, say, three plantings each of three different types. There will be the *land* lettuce first, then the head and, later on during the hot weather, the Cos, which comes up in a conical head and is practically self-blanching One can supplement salad material with cress, it grows quickly in any bed and can be had in early spring; grass onions sown at ten-day intervals until the first of July so that they will be ready to be heard all the details of Bill's heroic siege.

"How about Joyce?" he asked "You've been to see her, Bill?"

"I ducked aside twice. Last time was a week ago. She's taken in a big rait of petiry. She's closing up the place to go out to Edmonton and be with her dad."

"A week ago," Alan thought. "Anything could have happened in a

QUIVERING NERVES

Yield to Lydia E. Pinkham's Vegetable Compound

When you are just on edge . . . irritable, can't control the children . . . ready to scold . . . when everything is a burden . . . when you are irritable and blue . . . try this medicine. We have letters from grateful women.

It will give you just the calm, cheerful feeling. Like well women worth living again.

Salt and Sweet Cream

When cows have free access to salt they will keep in better health, will give more milk, and the cream from this milk will have a better flavor than cream from cows that do not get any salt at all, or receive it only at long intervals.—Dairy Branch, Ottawa.

THREW AWAY HIS STICK

When Solution Yielded to Kruschen

There can be no doubt that this gets into the blood with a stick. for it is now four years since he discarded it

He writes "For 16 months I suffered with chronic sciatica and rheumatism and was unable to walk without the aid of a stick But after taking Kruschen Salts for a short time, I was able to throw away the stick It is now four years since this happened and I have had no return of the complaint and have not had a day from work I shall never be without Kruschen Salts as they are worth their weight in gold You can use this letter as you please as I can honestly recommend Kruschen Salts to any sufferer" (—)

If the eliminating organs become sluggish they permit harmful uric acid to accumulate and deposit itself in the tissues muscles and joints in the form of needle-pointed crystals, which, piercing the nerve sheaths, cause excruciating pains of sciatica The six salts in Kruschen stimulate the eliminating organs to healthy regular action Kruschen is the safe aid in then given no chance to collect.

HEART OF THE NORTH

By

WILLIAM BYRON MOWERY

(TWO Serial)

Copyright by William Byron Mowery

CHAPTER IX Continued.

"I've been awake four or five days and nights' that's what! Not a wink! Didn't dare sleep. It made me sweat blood to think of you lighting down over there and getting nailed I had to draw your attention somehow when you were over the lake; and it had to be something big to get you. In that far away I got a couple big piles of birch paper ready and had a drum of gas hauled to each. Then I just kept a dry-wood fire going so's I could stand back and throw a blazing bunk at the paper. But it made the signal all right. It nearly singed me and I stood thirty feet back."

"I'll vow it made a signal," Buzzard commented. "It looked like the reflection of Leda."

"I had to stay awake every minute," Bill continued, "for fear you'd come and fly right into the trap. And then I had to guard the Rocky Hole. I died up back there, didn't dare turn him loose, or he'd told Haskell where I was. If I'd ever got started dozing I'd have beaten this Rip Winkle fellow for long-distance sleeping. There was times when I got so near overpowered I had to stand on my head on a rock with the water up under my chin, where I didn't dare go to sleep or I'd been drowned."

Merely by looking at Bill, Alan knew that his former partner had left half his story untold. It was only afterwards he heard all the details of Bill's heroic siege.

"How about Joyce?" he asked "You've been to see her, Bill?"

"I ducked aside twice. Last time was a week ago. She's taken in a big rait of petiry. She's closing up the place to go out to Edmonton and be with her dad."

"A week ago," Alan thought. "Anything could have happened in a week." He asked, "Any news at Edmonton?"

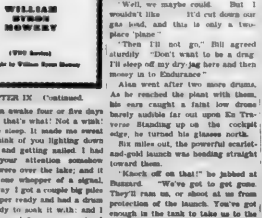
Just everyday things. Bill reported. Except for Larry Larry would cry, Bill said, whenever he looked at his shattered leg. Larry, who kept himself so young as men half his age, who prided himself on his wolf-lean body he was wasted away to a mere shadow of his former self.

Glancing out across Mr Traverse, Alan suggested Wed better be leaving here Haskell and his stiff pigeon over there probably saw us light They may take a notion to whip across the lake after us. Where's the oil and gas, Bill?"

"Right you by that rock jumble. The Monkey is just this side. I'll go along."

"I'm stay here you're about sure in Buzzard, you turn the plane and make ready for a quick getaway in case that launch shows up I'll get the drums."

He hurried to the tangle of jumbled rocks and boulders where he found the precious gas and oil which Bill had sworn to bring to the rendezvous. Alan's first thought was for the eliminating organs in healthy regular action Mischievous uric acid is then given no chance to collect.



Buzzard Kept Glancing at Him, Studying Her Intently.

Introducing her to Buzzard, he stepped down into the canoe, lapped the painter rope around a strut, and together he and she guided the plane sidward current to the landing. After mooring it securely and getting part of their personal duffle, the four of them with old Peter appointing himself guard over the machine, went up the path to the trading store.

Alan could fairly feel the doom eager questions Joyce would put to him Who was this new-found friend whom he called Buzzard? Where had they got this plane? How did they intend to use it against those bandits? But practical little soul as always, she asked no questions then. The three men, tired and hungry and desperately in need of rest, were her first consideration. Going back to the kitchen she heated them water to wash and shave, and set about getting a hot substantial meal.

Alan happened to notice that his picture which for two years had stood on Joyce's dresser was not there now. It flashed into him a blow Why had she taken it down? Was it some accident, entirely innocent? Or . . . ?

Back in the canoe Buzzard was outside washing away the grime and oil of five days' flight, he remembered the precious Hershey and Hazel it and brought it to Joyce.

"I thought of you, out in Edmonton," he said awkwardly, breaking the string I believed you might like this, Joyce. It isn't much, but I was short of . . . I was pretty near broke."

As Joyce unfolded the snak-belt and saw its exquisite beauty, an admiration leaped into her eyes. "Oh, it's beautiful! It's the loveliest I've ever seen anywhere

But then as she looked from the gift to the giver, something seemed to check her With an effort she forced herself to say quietly, "It was kind of you, Alan, to think of me."

Alan turned away in bitter disappointment. "It was kind of you . . ." How cold and distant those words sounded, she was talking to him across an abyss.

When Buzzard and he came back in, they sat down to their meal. As the pleased them food and the flow of them talked, Alan could not help noticing Buzzard's quick ardent admiration of Joyce Buzzard kept smiling at her, studying her intently evidently astonished to find a pretty, well-educated girl like her living almost alone here in this far-northern wilderness.

Later, when Joyce had insisted on their getting a few hours rest and had left them in her father's room, he remarked

(To Be Continued).

Picture Is Changed

Henry Movement From Farms To Cities Is Past Sixty Years

How great the movement toward the city has been in Canada in recent years is revealed by the Dominion census covering the period from Confederation in 1867 to the census of 1931.

At the time of the Dominion census in 1871 the population of Canada was 81 4 per cent rural and 18.6 per cent urban According to the census of 1931 there were 4,806,778 people in rural Canada and 5 572 068 in urban centres. Expressed in percentages this means 46 3 rural and 53.7 urban.

Thus in the sixty years the entire picture of Canadian life has changed. In 1871 there were 81 persons out of every hundred living in the country, while in 1931 there were nearly 54 out of every hundred in the cities and towns.

Even these figures, impressive though they are, do not disclose the whole story for the reason that persons living in small communities and unincorporated villages are recorded as rural dwellers Actually, according to figures compiled by the Canadian Government Bureau of Statistics, only 21 7 of the whole population of Canada live on farms There is, however, a noticeable return movement toward the farms now in progress.

THE RHYMING OPTIMIST

By Allen Mothersill

A CHILDLIKE HEART

Have you the gift of a childlike heart?
Then you are blest indeed!
In every gladness it plays its part,
In every joy it is need!

For a childlike heart has such faith and trust
That it questions not at all;
But takes as a portion wholly just
Whatever may befall.

It can see the wonder in common things,
Both dust-dust or neer at land,
The pledge where the arc of the rainbow springs,
The promise of sun-swept land.

It beholds a beauty that grows not old
In the light of love's ageing face,
And finds charms that with passing years express
New miracles of grace.

O, pray for the gift of a childlike heart
Which makes all things fair and true,
For every blessing it can impart,
Bringing heaven on earth to you.

SPEED!

These rooms when you're in pain! Insist on Aspirin, not only for its safety but for its speed

Aspirin tablets dissolve at once. They are many minutes faster than remedies that are offered in their stead.

If you new Aspirin made, you would know why it has such uniform, dependable action. If you have ever timed it, you know that it dissolves and gets to work before a shower tablet has any effect.

Stick to Aspirin. You know what you are taking. You know it is harmless; nothing in these tablets to depress the heart. You know you will get results. For headaches, colds, neuralgia, rheumatism, the safe and certain relief is—Aspirin.

ASPIRIN

Trade-mark Reg.

Little Helps For This Week

"Be teach us to number our days, that we may apply our hearts unto wisdom." - Psalm 90:12.

Our days are numbered let us spare Our anxious hearts a needless care; Tis Thine to number out our days; Tis ours to give them to Thy praise.

Every day let us renew the consecration to God's service, and day by day let us, in His strength, pledge ourselves afresh to do His will even in the veriest trifles, and to turn aside from anything that may displease Him. Leave the future in His hands, sure that He can care for it better than we Amen.

Finish the day and be done with it. You have done what you could. Some blunders and absurdities no doubt crept in, forget them as soon as you can. Tomorrow is a new day, begin it well and serenely and with too high a spirit to be cumbered with your old mistakes. This day is all that is good and fair. It is too dear with its hopes and privileges to waste a moment on the yesterdays.—R. W. Emerson.

Still in the Lead

No Other County Equals Great Britain in Aviation

For obvious reasons we in Canada hear and read a good deal about Unit. ed States airplanes, American fliers, their exploits and achievements Actually no country in the world has approached the intensive study of planes and their possibilities given by the United Kingdom. no country has gone farther or as far in developing the factors of speed, safety, and general utilization of aircraft. And in no land are there air pilots superior to those of the United Kingdom in experience, capability, and ingenuity. Ottawa Journal

The real need of the farmer, as Shakespeare or somebody else used to say is a better price per cow, per hen, per sheep, per hog per acre and per later.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Calomel Necessary

Do you to feel healthy and happy, your food must pass through and digest like it should, every day. Without that bile, digestible starts. Food decays, poisons in the body. Causes constipation. Then you feel sick, sour, gassy, headachy, dizzy, sometimes constipated. Your skin may sallow, pimply. Don't dose with salts, calomel, cathartic. Instead, try Carter's Little Liver Pills. Purely vegetable. Gentle, sure, dependable. Get them at any drug store. Only 25c.

FAMILIES GOING ON THE LAND

Movement of unemployed families i. farms has been considerably stimulated this spring in Alberta.

From Edmonton, the provincial committee in charge have accepted 100 families for placement, chiefly on farms north-west of Edmonton, and from Calgary some 60 families have already been accepted under the scheme, which provides for joint sharing of expenditures between Dominion, Province and Municipality.

Medicine Hat has also come in under the scheme and a number of families will be placed from there.

******

The reserved seat sale of Rajah of Rajahpore light opera is now open at Smith's Drug Store.

CANADIAN AUTHOR MAKES BIG HIT

The literary hit of the year has been made by Frederick Niven, an author residing near Nelson, B.C. whose novel entitled "Mrs. Berry" is described by Compton Mackenzie in the Daily Mail as a profoundly moving book, and is hailed as a classic worthy to stand beside Sir James Barrie's "Auld Licht Idyls".

Although Frederick Niven has a long list of books to his credit, he has always enjoyed a following among the critics, this is his first appearance among the "best sellers" He worked his way through Canada early this century, and at one time handled baggage and freight for the C. P. R. at Nelson, B.C. He eventually took up a small holding on Kootenay Lake twenty years ago, where he has secured excellent local colour for his western stories.

"Mrs. Berry" is a novel of life in Glasgow, where at one time Frederick Niven edited a newspaper.

May Lead to Better Conditions

It is fitting that such an ambitious undertaking as the World's Grain Exhibition and Conference should be held in Canada, the leading wheat exporting nation of the world, and it is also fitting that such an event should be held in the capital of Saskatchewan, which is the greatest wheat-raising province in Canada While wheat production has been a depressed occupation for several years its importance cannot be minimized and that it will inevitably return to happier economic days cannot be denied.

Fort School Board Hold Regular Monthly Meeting

Minutes of a regular meeting of Fort Saskatchewan School Board held in the Council Chambers on Monday, May 1st, 1928 at 7.30 p.m.

Present:—Mr. F. Atkinson, chairman, Trustees:—Mr. R. A. Brown, Dr. Calhoun and Dr. Turner.

The minutes of the last meeting were called for and read. Moved by Dr. Calhoun and adopted that minutes of meeting held on 3rd. April be adopted as read.

The Fuerst Service advised that the caragana trees were now available. The Chairman was authorized by the Board to make the necessary arrangements for planting, and also to arrange for such wire fence as would be suitable.

Dr. Calhoun advised the Board that it would be necessary for him to be absent for a certain period this summer. It was moved by Dr. Turner and adopted that Dr. Calhoun be granted 3 months leave of absence from 1st. June, 1928.

The Secretary was instructed to collect High School fees from non-resident parents of certain pupils who are, or were, attending.

The Principal was present and submitted Attendance and other reports to the Board. Mr. Anderson also brought up the question of the Musical School Festival to be held at Sandy Lake on the 11th. Instant and desired the Board's instructions.

After consideration the Board reaffirmed its stand last fall when a committee reported on the advisability of Fort Saskatchewan school taking part. It had then been decided that owing to the considerable distance that had to be negotiated, and the uncertain nature of the roads, it was inadvisable for the school to enter except for a small number of soloists who are attending with Mr. Handby. In case other pupils desire to attend, it was decided that their parents would have to take the responsibility. The Board stipulated, however, that, if application is made, anyone transporting children to the Festival, would be reimbursed by the Board for the gasoline used.

An application, with references, for position of public school teacher, should there be any vacancies, was received, and filed for the present.

The following accounts were passed for payment on the motion of Dr. Calhoun:—Imperial Oil for floor polish $17.35; J. Compo $1.50; Sask Branch Dept. of Education 60c; Calgary Power Co., $1.36; The Record $4.30.

The meeting adjourned on the motion of Mr. Brown.

St. Eugene Tennis News

A meeting of the St. Eugene Tennis Club was held on Saturday last in regards to building a new tennis court and election of new officers.

The following were elected—Pres. Mr. J. E. Holmes, Vice-Pres., Mrs. Nip LeClerc. Sec.Treas., Miss L. Boisjoli. Committee, Miss F. Belland Mr. J. Sench. Mr. Spencer Holmes and Mr. LeFaye.

Membership fees are $1.00 for adults, and 50c for children. New members welcome.

Josephburg News

The Josephburg students competing at the Lamont Festival on May 11th, will rehearse their numbers at the Josephburg school house at 8 o'clock on Friday, May 5th.

All interested please attend. Admission free.

Large Audience Enjoys Play "The Rajah of Rajahpore

The light opera "The Rajah of Rajahpore", presented in the Empress Theatre by the Fort Saskatchewan Choral Club under the direction of Mr. A. H. Watt drew a full house last Friday and Saturday evenings.

The chorus of 50 voices has been training for the past three months, and together with direction were congratulated on their efforts to furnish a high-class musical entertainment.

Full justice should be given to the excellent performance of Mrs. W. P. Roberts at the piano and Mr. W. H. Roberts at the organ, which contributed largely to the success of the play.

Choruses left nothing to be desired for beauty, and talent. It would be invidious to mention the various principals as each played their parts well.

The dancing was of a high order, and the costumes of the company were becoming, graceful, and appropriate. The lighting effects and encore were clever and artistically arranged.

The opera consisted of 3 acts, which held the large audience thrilled throughout, with no hitch, nor long intermission.

On the whole the performance showed that great patience and labor on the part of the director, Mr. H. A. Watt and Miss A. West, assistant director, had been employed to produce such splendid results.

A number of Edmonton and outside people were noticed in the audience.

FLOWER PLOTS NEED GOOD FERTILIZER FOR LUXURIANT GROWTH

Nature Requires Assistance For Beautiful Bloom Production

There is no greater pleasure to all who enjoy the beautiful in nature the world of growing flowers. We are all indebted to the developments of the past years by flower growers who have improved on nature's handiwork by producing more brilliant, larger blooms, and new varieties of flowers. The enjoyment of a home filled with beautiful blooms is the ultimate reward of all us who enjoy growing our own flowers. All homes should have a garden.

One of the difficulties often mentioned by flower gardeners is the fact that the blooming period of flowers is all too short on the Canadian prairies, because of the late cold springs and danger of early frosts. The need of speeding up the growth of plants to a maximum growth rate capacity is absolutely important if a longer blooming period is to be enjoyed. This can be done.

It is being done by hundreds of gardeners on the prairies who realize that plants require an abundant and continuous supply of plant food at all periods of growth, and they are assisting nature by furnishing at frequent intervals readily soluble available plant foods, in the form of chemical fertilizer. This is especially necessary in the early spring, when soils are low in readily available plant food, which greatly slows down the growth of plants.

By supplying the chemical fertilizer that have been proven to advance rate of growth in the prairie areas they are enjoying ten days to three weeks longer blooming period. Not only is this important, but at the same time they are enjoying larger blooms, longer stems more fragrant flowers with richer colorings.

There is a fertilizer for your needs, and once used it will never be omitted from your program. Nitrogen gives greener, larger leaves; phosphates give stronger root systems and earlier maturity, and larger blooms. Potash is also necessary when soils are low in this chemical. With prairie soils, fortunately potash is usually present in sufficient quantity for all the plants needs. For potted plants or greenhouse culture, where plants are repeatedly grown under a constant system, it is usually well to use a complete plant food mixture, including potash, although when soils are changed often, only nitrogen and phosphates appear to be needed.

By assisting nature in feeding the plant growth, one can greatly overcome some of the hazards that tend to make beautiful flowers and shrubs difficult to raise on the Canadian prairies.

Good Hope

A Junior U. F. A. organization meeting was held in Good Hope school on April 28th, with Miss Eva Meyer as convenor

Nine members were present.

The following officers were elected to office:—

President, Clara Ustarich.
Vice-President, Milton Meyer.
Secretary-Treasurer, Verna Johnston.

Those appointed for the program committee are, Edith Macdonald, Norman Cripps and Milton Meyer

Hilda Meyer was elected as editor for the "Echo" paper.

"The Echo" was chosen as a name for the local.

It was decided to have a meeting on the first Wednesday of every month, the next meeting to be held May 2, in the Good Hope school.

The meeting adjourned at an early hour.

*****

A Momentous World Event

A momentous conference is, at the time this article is written, taking place in Washington between Premier Ramsay MacDonald of Great Britain and President Roosevelt of the United States. That conference is to be followed by others between the President and the heads of other nations. All are preliminary to the World Economic Conference to be held in London in June, and the object of these many preliminary conferences is to find common ground of agreement so as to assure the success of the world gathering in July.

As Ramsay MacDonald said upon his arrival at New York, President Roosevelt and himself, who, he believed, were in harmony of spirit regarding all great world causes, were getting together to explore the problems that have to be dealt with and endeavour to find formulas for their solution That is, Ramsay MacDonald, a life-long advocate of peace between nations in the sense that there should not be piracy and warfare, is now striving with might and main to bring about peace between the nations in an economic sense, and to endeavour to overcome to the fullest extent possible, the economic damage done to the world as the result of the last Great War. In President Roosevelt he finds a man of the same spirit imbued with determination.

At the time of writing, newspaper despatches from Washington indicate that, although the conferences between these two great leaders of the English-speaking world are not finally concluded, it is further recognized that eventually satisfactory agreements have been reached on all the major problems, and common ground of action decided upon when the World Economic Conference assembles. Furthermore, that Great Britain and the United States will now unitedly endeavour to secure the acceptance of these views by other nations.

It is stated that these world leaders believe they have found formulas for the solution of existing world problems and the ending of the depression which has affected the world for the past three or four years. These solutions it is frankly recognized cannot be brought about by any one nation, or even by two or three nations, because the problems are international and world-wide in extent and in their application. It is further recognized that betterment of existing conditions cannot be achieved by relying one or two of the commodities of all lands; world conditions must be studied as a whole and effect on the one great problem, the basic cause of the world's troubles, and therefore the ultimate solution, is not to be found in any one of these things, but to a greater or lesser extent in all of them.

They are not approaching world problems as theorists, but as practical men of affairs, leaders of their people, world leaders of experience, determined, as Ramsay MacDonald says, "to clear the obstacles which block the highways of trade, both within our own countries and between the nations, and so restore the hope of employment to the workless millions who look to us earn their living in factory and field."

Therefore, to the end that existing monetary systems and international conditions of finance and exchange present obstacles along the highways of trade they must be altered; not destroyed, but improved so as to be inestimate greater freedom of exchange and render a maximum of service to the world. So, too, in regard to tariffs, quotas, embargoes, trade restrictions of all kinds. They are not seeking to bring about world free trade, which is presently impossible but to encourage and promote, rather than discourage and restrict, trade between nations without doing damage to the interests of any, in a word, to develop mutually advantageous reciprocal exchange of commodities Likewise, to deal with war debts, reparations, armaments in the same spirit and in order to achieve a like result. War debts cannot all be cancelled, reparations abandoned. In toto, complete disarmament effected, but the obstacles erected by these things across the trade highways of the world can be largely removed.

Bringing the leading statesmen and heads of nations together in this spirit, and with such an object in view, is, we repeat, a momentous event in the world's history. International conferences, world conferences, for the exchange of national views and the exposition of the needs for friendly examination and discussion of opposing viewpoints, policies and interests, and approaching problems which are the concern of all in a conciliatory spirit, in the same, sensible, businesslike and Christian attitude. It is constructive, not destructive. It is practical, not impossibly Utopian. It offers hope of success, because it is not narrowly selfish but records consideration and fair play to all.

Thirtieth Anniversary

Deer Colonists Celebrate Settlement In What Is Now Saskatchewan

From a mere handful on the banks of the Saskatchewan River to a city of 45,000 population in the 30-year history of Saskatoon that has been related by its benefactors of 1903, the Hon. Walter Scott, Premier, and Hon. Duncan Marshall, Minister of Agriculture, settled in Saskatoon on April 27, 1903, in search of a new life in the pioneer West. Most of the colonists remained, others pushed on to what is now Lloydminster.

An American visitor says he was greatly impressed by the soldiers at Whitehead and at the Bank of England. The changing of the guard and the guarding of the change.

Lonely Despite Vast Riches

He Have Thrills in Life For He Read Behind

Visitors from Monte Carlo tell stories, odd ones, of a man who is not welcome any more in a palatial automobile, taken on a brief drive in the nearby districts, and there is brought back to his hotel. This is just a bit of routine, but it composes a perfect setting for the withered, tired face of the man within the limousine.

For the face is that of Sir Basil Zaharoff, for more than a generation romanticized high-school lad over for his mysterious financial recollections, and his amazing genius to sell armaments—to sell them on a big scale, to equip entire countries for war.

He became a multi-millionaire. He always was, on a small figure, one of those European anecdotes created out o the blood of many nations, with intrigue in his veins, aristocratic charm in his features, and at least ten languages on his tongue.

But today, Sir Basil is just a tired, old man. Playing with the fates of nations, of entire populations, no longer has any fascination for him. That has become small. His fortune estimated at about $175,000,000 no longer buys him any thrills. He point out from his car upon the lovely promenade, singing in the field, and no one knows what thoughts pass within his brain.

The greater part of Monte Carlo belongs to him. But he doesn't visit the gambling Casino, and declares any interest in it.

He was born 64 years ago at Odessa, South Russia, of Greek parents. His grow up to know ten languages when still a boy, and then entered the armaments firm as an interpreter.

Quite Out Of Date

Modern War Moving From Chivalry To Chemistry

An article by E. M. Forster, in the Spectator, London, says: The sword, the bayonet, the rifle, the cannon are all anachronisms and will soon only survive in military tradition. The destruction they caused was local and so the sentiments connected with them were out of date. In the war of the future destruction will be universal. Bacterial bombs as well as poison gas will fall from the sky, the distinction between combatants and noncombatants will disappear, women and children will be as suitable a target as men, and it is not the civilized thing and country which will go down in the general catastrophe, but all things and all countries. War has moved from chivalry to chemistry, and unless we can get the into our heads we are doomed, huge insects of.

Mrs. Cornwallis—You're looking better than I had expected. I heard that your health was very poor.

Mrs. Norfolk—My health has been impaired, but there is nothing poor about us.

Nearly 1,500,000 tons of sugar were shipped from Cuba last year.

Legend About Aviatrix

Sarcasme Paper Tells Why Amy Johnson Commenced To Fly

When Amy Johnson made her famous solo flight to the Dutch East Indies on her flight to Australia, details of her adventures were published by a missionary priest in a newspaper in Java and they received wide currency among the islanders An early form of the Amy Johnson legend has been published by the Rev Father Laitey, a Jesuit priest, in the Times. Father Laitey derived his information from a Javan visitor to Heythrop College, Oxfordshire.

Translated into modern English, the Amy Johnson legend in its present form runs something as follows: "In a far-away kingdom lived a husband and his wife. They were immensely rich and they had one daughter They made her study under wise men so that she became very learned; but when she came home she did not understand household affairs, and she was scolded by her mother accordingly.

"Finally the daughter became angry herself and ran away and went to a skilful plumber, and the two together made a machine with fire inside to fly in the air. In this she circled above her f villages and landed there to the great astonishment of the people.

"Her parents, though still angry, were proud of her, and her father presented fragrances if she could fly across the sea and come back safely. So she had to fly across the sea, and came to this island, by which time the fire inside the machine had gone out and she had to put-in a new fire.

"Now she has still to cross one more sea, but if she succeeds and comes home again her father will give her much money and build her a house with a roof of corrugated iron."

Mansion Turned Into Flats

Former Home Of English Duke Cost Over Two Million

Costly dwelling mansions, once the home of the Duke and Duchess of Marlborough, is to be turned into residential flats. Known as Sunderland House, Mayfair, it was built in 1900 at a cost of $2,500,000 by W. K. Vanderbilt, American millionaire, when his daughter Consuelo married the Duke of Marlborough. It has famous ballroom, eighty-nine feet by twenty, and twenty-seven feet high, is chandeliered to the finest in Mayfair It cost $200,000 and has marble pilasters, a painted ceiling, and a musicians' gallery. It is recorded that 300 couples have danced there. The thirty-two bedrooms are to be divided into flats, ranging from single rooms for bachelors to suites of four or five rooms.

A Scottish landowner was complaining of the weather to a tenant. "Aye," said the tenant, "you're right. Only three fine days this month; and two of them snappit up by the bank-holiday."

West exports from South Africa last year were greater than in 1931.

Aiding Salvation Army

Dutch Indies Have Issued Stamps To Help Work

The new charity stamps of the Dutch Indies have attracted a great deal of interest, for they are the first stamps ever issued in aid of the Salvation Army in Java and other remote parts of the Dutch Indies, the Salvation Army is largely responsible for the care and education of the native children. The management of hospitals and work among the lepers. That is the reason why this great institution is represented on these stamps

The Dutch name for Salvation Army is "Leger des Heils." This appears on each stamp and also the Salvation Army crest in the two lower corners. The set consists of four designs, and each design depicts the various handicraft that are taught the natives. The central subject of each design is in brown, and the remainder of the design in the following colors; Two-cent, violet; five-cent, sage-green, twelve and a half cents, rose, fifteen-cent, blue.

Germany Training Troops

Out Of 770,000 Men 523,000 Are Ready For Immediate Action

Germany has at its disposal today 770,000 men trained for war, according to an estimate in the Czechoslovakia newspaper Lidove Noviny. Its figures follow:

The Reichswehr	100,000
The Navy	15,000
Regular Police	130,000
Auxiliary Police	45,000
Nazi Troopers	450,000
Stahlhelm	60,000
Total	770,000

Of these, the newspaper asserts, 362,000 are ready for immediate action and the others are being trained under high pressure. Special attention, it is declared, is being paid in Germany to military aviation and successful attempts are being made to adapt commercial planes to military purposes.

Royal Rest Anchors

Cheaper shining brightly under a protective covering of wax, the Royal Scot, Britain's fastest express train, arrived at Montreal aboard the freighter "Beaverdale." At the docks, a giant crane swung the cars from the ship's deck to the rails alongside the wharf. The engine was in two parts and had to be assembled.

MINARD'S KING OF PAIN LINIMENT

Extensive Mining Activities In The Great Bear Lake Areas Are Promised For This Season

Officials of the Department of the Interior are early on the ground for the resumption of mining activities in the mining district on the Great Bear Lake in the North West Territories, according to a statement issued by Hon. Thomas H. Murphy, Minister of the Interior. To facilitate the early starting of work the Sub-Mining Recorder for the district and his assistant were sent in on Chamron Bay by aeroplane on one of the last flights before the close of winter flying One of the leading companies has engaged a Bombay Bi Na mining camp and the Department of the Interior is co-operating by making him medical officer of health for the area. This means that a fully qualified doctor will be available and will also have power to take any necessary control measures in case of emergency The Department of the Interior has also decided to lay out a settlement at Cameron Bay so as to be able to deal with applications for lots, water frontages, and other privileges, and the work is already under way.

As regards the Great Bear Lake area, from reports at hand it appears that there will be more actual development of mining properties than in the preceding three years combined. Excepting one or two companies, most of those in the district up to the present have confined their efforts to prospecting or to preliminary work but this year will see all the companies concentrating on the development of their promising holdings. In addition to work on the properties about the east and west arms of the Great Bear lake, there is likely to be great activity both in prospecting and development in the new silver camp on Camsell River.

During the past winter, approximately one hundred men wintered at Cameron Bay and in its immediate vicinity. This population has been greatly increased in the past month by those going in by aeroplane by the Mackenzie River route, so it always does early in April. It is expected that Cameron Bay will be the distributing point for supplies, mail and freight due to its being located in the centre of a very active mining district and to its having a well protected harbour for boats and aeroplanes. At this point there are now established a fuel office, radio station, wireless recorders' office, Royal Canadian Mounted Police post, and headquarters of a number of trading, freighting and prospecting organizations. Three water-transportation companies are ready to carry heavy freight from the end of steel at Waterways to Cameron Bay, Great Bear Lake, and two well equipped aeroplane companies are carrying in passengers, mail and lighter commodities.

Last year Imperial Oil Limited at its well at Normans produced 11,000 gallons of gasolene and 21,000 gallons of fuel oil, of which 90 per cent. was shipped to Great Bear Lake. Four coal seams have been staked on the northeast shore of Great Bear Lake. The coal, which is lignite, is easily mined and the expectation is that it will be extensively used for heating in the area.

Another significant matter brought to the attention of the Department was that the report of finds of placer gold on the headwaters of the Liard River in Yukon Territory had started a movement of miners and prospectors into that country. As this is a difficult area to reach from the offices of mining recorders in the Territories, every assistance that the Department of the Interior has arranged with the Royal Canadian Mounted Police for the head of a patrol which will go through the district, to act as sub-mining recorder.

Class curtains, made by a secret process in which silk or cotton may be enclosed between two sheets of glass, have been introduced in Europe

Cuba may assist longer if cane syrup replaces some of the sugar in the recipe.

Operator Would Not Give Private Phone Owner His Number

A gentleman who recently moved into a new apartment had a private, unlisted telephone installed, but discovered after the phone man left that the little card on the phone which should bear the subscriber's number was blank. Fearing that his phone number, however private, should be known to his friends, he sought information. She told him the number he sought was a private line and could not be given out. "Can't I find my own number?" he shouted. "I'm sorry," she said, "but we are not allowed to give out that information." He finally went to pieces, screaming at the operator, and his wife took the apparatus away from him. She then called in person at the phone company's office and explained the situation, clearing the man's character. Several hours later, a tiny number was sent around by a messenger boy, and the husband slipped it in the little slot. He's still mad, though. —The New Yorker.

Dairy Conference Requests Federal Government To Establish Farm Produce Marketing Board

Transport in Olden Days

Everything Was Carried By Pack-horses In Early Days

In the early days of transport in England horses were used to carry rubber then to draw. As such they were called pack-horses, and the practice continued down to almost modern times. Roads were bad, wheeled vehicles were to all intents and purposes impossible Long trains of pack-horses might have been seen wending their way along the roads of the country, carrying their loads in various receptacles. Even coal had to be carried by this means. In the first half of the eighteenth century two gentlemen went from Glasgow to London, and wrote an account of their journey From Glasgow to Grantham they met from time to time strings of pack-horses from thirty to forty in a gang the mode by which goods were then transported from one end of the country to another The leading horse of the gang carried a bell to give warning to travellers coming in the opposite direction and the causeway not affording room to pass. They were obliged to make way for them, and plunge into the side of the road, usually of soft mud, out of which they often found it hard to get back again upon the causeway Had it happened when the train of pack-horses met the record does not say it must be left to imagination Until 1760 there was no road between Carriages between Liverpool; no coaches left the town, even the merchandise intended for Manchester had to be carried on pack-horses. And long lines of them travelled regularly with bales of wool and cotton over the hills to and from Yorkshire Some of the track-ways are still in existence, they are usually referred to locally as pany tracks.

A Marvellous Product

Manchuria Has Supplied All World With Soya Beans

Perhaps the greatest gift of Manchuria to the world so far is the wonderful soya bean Ask any English farmer how much this bean has been means to the development of guest stock, and then think that all the world's supply of this marvellous product comes from Manchuria. It yields food for man and beast throughout Northern Asia, and the export trade in yearly increasing Men isolated from centres of food supply for long periods find full nourishment for their arduous work, and struggle with the intense cold in chewing these beans.

A Long Chess Game

Played By Mail It Took Seven Years To Complete

The chess game between Walter J. Dodge, of Portland, Ore., has been playing tilt his brother, George F. Dodge, of Monticello, California, is finally played it. It took seven years to complete it Their first game started in 1932, took only five years They have more years to go to decide the series, each has won a game. Dodge predicts championship will be decided by 1

MACMAHON DICTATORSHIP OF CUBA MENACED

While Cuban exiles in New York are making plans for the overthrow of President Gerado Machado's dictatorship of Cuba, a sinister underground warfare is being prosecuted in the island paradise between the Machadistas, supporters of the President, and a group of socialists, opposed to the government, which have created the common air of acquiring control of the country. In New York, Dr. Carlos de la Torre, former Professor at the University of Havana, had been elected president of a new Cuban revolutionary junta, composed of prominent exiles, among whom are Dr. Miguel M. Gomez, former Mayor of Havana; Colonel Manuel Fernandez Supulveda, leader of the Nationalist Party; General Mario G. Menocal former President of Cuba. During the week before Easter he has been 36 hours by violence are reported to have occurred in Havana. It is charged that the government is using the secret service "de fuga" (law of flight) to murder political opponents. But the Cuban administration denies everything—even the existence of a revolutionary movement.

STOPS a Headache

There seems to be no safer way to end a headache—and there certainly is no *safer* way—than to take two tablets of Aspirin.

You've heard doctors say that Aspirin is *safe*. If you've tried it, you know it's *effective*. You could take these tablets every day in the year without any ill effects. And every time you take them, you get the utmost relief.

Stick to Aspirin. It's safe. It gets results. Quick relief from headache, colds, or other discomfort.

ASPIRIN

Your Bowels a sour, stagnant mass, but it's usually not all your digestion and you can be. Chiefly your stomach or bowels. Chiefly you're probably at fault. Chiefly you're probably at fault. Chiefly you're probably at fault

Indicates Mental Fatigue

Person Which Cannot Be Conditioned Seems To Specialize on Forgetting

If it happens to be a positive quality, and wonder why you hesitate with such vocal pressure as "or, ah, ahem," forgive. Perhaps we stammer. You're merely suffering from "delayed phrasia," which, translated, means mental fatigue.

This is the conclusion of Professor Arthur G. Bills, of the University of Chicago's psychology department, after many months of experimentation in order to determine just why people stutter.

And everyone, according to Professor Bills, stutters in some form or another. It may be entirely unnoticeable, merely a slight "or-or" or "ah-ah" now and then, to full-fledged stuttering.

Poor Bills has been studying the matter for years, and is getting up five years and now he declares:

"Every individual shows pressure in his speech which they sometimes call 'hot.' Pressure in this sense is the tendency to feel or to express emotion by means of tense muscles in connection with speech. Pressure is the tendency of trying to be delightedly and violently emphatic or hopelessly cold-hearted in the act of 'talking' on ordinary occasions like the remark of the 'talkative' person at the dinner table or the stammering of the orator."

Bills has discovered the origin of the stutter.

Most people of unmentioned sex early in life learn of certain words and phrases which they cannot use. Perhaps they are told by their parents to "shut up" when they hear these words. Then, they learn to refrain their mentality from uttering them.

"When persons who are confronted socially in their choice of words avoid such habits, or pressure. They are not prepared to control them when they are confronted with the necessity of the momentary pressure of the words' pronunciation. It is a mental case of mental fatigue."

The more dangerous a passage is, the more he presses while pronouncing it, give his mental condition away. Sometimes the tension is relieved by a very slight mental twist. Prof. Bills said, if those are present, there is a high degree of mental ability is implied, but rather indicates the presence of the individual's ability.

Prof. Bills said his tests have disclosed that regular stutterers show similar traits, although they are of a more pronounced kind in emotional persons.

A normal person, he said, who is strongly moved by some emotion will show the same symptoms as those of these persons. It will even be apparent that persons are being made if he is given to contradictions with his hands while speaking. The hands pause in mid-air, at the same instant the voice, he explained.

Prof. Bills has found that regular stutterers, unlike persons with normal speech, tend to show a rhythmic flow of speech. When engaged in emotion or excitement moves them. If the emotion is strong enough, the stuttering may even disappear temporarily, and in some cases, change more. It may be the means of diminishing it altogether.

In order to help him, the professor explained, he utilizes the subject's concentration on cards carrying colored lettered leveraged in turn. The lone colors of red, green, blue, yellow and black are used.

The subject's perpetual reaction to naming these colored stimuli gives him the answer as to whether they suffer from the "blocking phenomena," or mental fatigue.

Radio Stations For West

Belief that the Canadian radio conservation would build two high-powered stations in the west was expressed by Major Gladstone Murray, official of the British Broadcasting Corporation, addressing the Winnipeg Canadian Club. One station would serve the three prairie provinces and the other would be built in British Columbia, he believed.

Silver coinage is coming into greater use in many countries, including France, Germany, Mexico, Rumania and Peru.

A colony of ants in a cave near San Antonio, Texas, devours approximately 100 tons of live lizards annually.

Social Call Thing Of Past

Has Been Practically Abolished By the Automobile

Loafers are the elite of the motor car. Social calls are practically the enemy of youth in pleased at his gift conveyed door. In it the American Magazine is said to be declining in its popularity. Publication of that periodical, the parlor-payment plan, is attributed to it by those who study such things. That it is rapidly disrupting the once sacred social observances of the nation, have said lovers girls from the farms drive-in away in it in the city? Does anyone it of breaking the home circle? Is fast, where? Is there a definite end of today that this satanic spectacle won't lead a hand in?

If it is to keep that declaration by, brought to the upon humanity, it has come time something it has been something it has been. Of the commercial and social customs of the United call.

Those who have designed to find an old friend "at home" in the early twenties age comes abruptly to a realization that the possibility of trying to be delightedly and violently emphatic or hopelessly cold-hearted in the act of "calling" on ordinary occasions like the remark of the "talkative" person at the dinner table or the stammering orator.

Another, however, regards the change as the gleam.

Still younger of unmentioned sex early in life learn of certain words and phrases which they cannot use. Perhaps they are told by their parents to "shut up" when they hear these words. Then, they learn to refrain their mentality from uttering them.

"When persons who are confronted socially in their choice of words avoid such habits, or pressure. They are not prepared to control them when they are confronted with the necessity of the momentary pressure of the words' pronunciation. It is a mental case of mental fatigue."

The more dangerous a passage is, the more he presses while pronouncing it, give his mental condition away. Sometimes the tension is relieved by a very slight mental twist. Prof. Bills said, if those are present, there is a high degree of mental ability is implied, but rather indicates the presence of the individual's ability.

Prof. Bills said his tests have disclosed that regular stutterers show similar traits, although they are of a more pronounced kind in emotional persons.

A normal person, he said, who is strongly moved by some emotion will show the same symptoms as those of these persons. The Drum-Major Who Stuffed His Clothes

The Humorist, London.

Bed and Bed Plank

Accomplished Chefs Making Oil From Sands Of Great Pelican

Edmonton, Alta., Dec. 27.—Harrison Lake, Alta., has been discovered, and the wells eight days old. How at 50, the oil, the gas has been and plans to put down a test there appeared in public concert. His thrills of the sale of the and the thud of falling ball. His can call the 12 collapsed symptoms of "selling" invention for the idea.

Bobby Kelley has acclaimed her to be "the only girl who can blind a violin" and "the most accomplished deaf and blind person in the world." With no ordinary tin can concealed in her lap, she recently played a violin concert given by Paderewski and enjoyed every bit of it. Clapping the violinist's hands on the instrument, she knew by watching the vibrations.

Whenever a Hamiltonian breaks her heart, she rushes to the cable office in Montreal, she rushes to the cable in order to catch the vibrations in the air.

Her mastery of the piano was the result of great patience. A man who devised an extra four hours around the clock. When engaged to tend a telephone table, four hours a half note and one been a quarter note. Because she could neither see nor hear, the task was a hard one. Now she knows more than 150 compositions by heart and has a library of 6,000 pieces of music, which she reads in a system similar to the blind.

Practically every British newspaper, flying between Paris and Cracow, the London airport, carries a full load of passengers.

Sun-worshipping pagans used the Christmas tree in festivities to celebrate the winter solstice long before Christians used it.

So Much For Clothes

Social Gathering Thought Necessary Wedding Attire Made Of Paper

Poverty.

A story is now told of a banker who had to attend an early afternoon wedding. He went to his office in striped trousers and cut-away because he knew he would have no time to change after leaving work.

During the morning he had a chat with a customer from a rural district. The client started to tell the banker terrible business woe, but the banker tried to reassure him without success.

"Take yourself, for example," said the visitor, "you know very well that three or four years ago you would never have dreamed of coming to the bank in a pair of pants that didn't match your coat?" Financial Post.

Not Certain Of English

French Waiter Anxious To Improve Patrons Sometimes Mistaken

A smart restaurateur in a certain hotel has recently imported some very distinguished French waiters, through whom he observed that the French waiters the restaurant had to have. One of these newcomers, talkative, and country, whose manner is extremely solicitous, has, it is true, except for one flaw: he isn't absolutely certain in his English yet. The flaw seeming he got along splendidly with a table of four improving the party deeply until, the order taken he had slightly from the waist and announced impulsively: "Thank you, ladies and gents." —The New Yorker.

Exports through the port of Montreal last season totalled 3,867,782 tons, the highest export tonnage since 1930 and larger than 1931 by 900,897 tons.

Gardening Notes

By Gordon Lindsay Smith

There is no object to be gained, and often serious result, where one needy half way across the continent for plants shrubbery and trees Purchasing from the nearest reliable source is best as then one is sure of getting something adapted to his own section of the country When thus stock arrives, if not ready to plant immediately open the parcel, spread out the roots in a shallow trench and cover firmly with damp soil. Above all things do not let the roots be exposed to sun or wind and if the plants are very dry on arrival bury stems and all for a day or two.

Transplanting: Transplanting is actually beneficial to certain flowers and vegetables Anything running to the bedding group, that is, of the kind usually sold in boxes on started plants, comes to this class Transplanting cuts or tutes in the bed but, cold frame or "hot" on the window sill developes the roots, bushy and makes sturdier plants. When grown from seed outside, too, many things like Jasmine, Common Marigold, Portulaca and Calendula, to flowers, and head lettuce and such things in vegetables, will come all crowded together and must be thinned out or some of the plants moved. Operations of this kind should be done in the evening or on a cloudy day if in sun. It is well to shelter from the hot sun for a day or two and a pinch of commercial fertilizer around the newly-set plant will hasten growth along amazingly.

Extending Every Summer: Most flowers are of very hopeful pussy a flower of a very short blooming period. Such, however, is not necessarily the case. With liberally severe of varieties from which to choose one can, by selecting early, medium and late-blooming types, prolong the flowering season from late June to mid-fall. The whole varieties alone there is a period of almost a fortnight between the earliest flowering and the last effort, and there is practically no difference in the catalogues, noting particularly dates of blooming, as well as color, size and habit of growth. Of course, if one wants continuous flowering for a few weeks, when those flowers will be at their best. It is also a good plan to plant gardens and jot down the names of favorites.

Special Bed For Cut Flowers: — The beauty of the regular flower garden is often spoiled when flowers are cut for decoration indoors. To avoid this, a supply of flowers should be grown in the vegetable patch for cutting purposes. For this use, are produced these flowers such as Salpiglossis, Scabious, Sweet Peas, and Corn Flowers, when these are planted between but poor foliage. Planted in rows with vegetables, and receiving regular cultivation, these are more easily looked after and grow them in the regular flower garden and, of course, they may be cut freely without disfiguring any border.

Port Of London Piloted

Tube Connected When Ships Navigate the Dangerous Channels

More than half a million ships are guided up and down the Thames every year by the pilots stationed in the port of London. Pilots are taken on board vessels to steer them through the dangerous banks and channels, or to take ships in and out of harbor, and while on board they take command. Occasionally a pilot is compelled to take charge of a steamer when the weather makes it impossible for him to board the pilot boat. A few months ago a pilot, during a tour out of Queenstown had to go to New York because he was unable to leave the ship in heavy weather.

FANCIFUL FABLES

Canada's Young Population

Of the total population of 10,376,786 in Canada, more than half, or 5,331,000, are under the age of 25, says a report issued by the Dominion Bureau of Statistics. But 7½-year-olds of which there were more than of any other age, numbered 183,180 and 1 fewer of less than one year 293,622. Those 20 years old numbered 189,253 and those at 30 years 168,822.

Business failures in Italy are decreasing in number.

DOES OWN HOUSE-WORK AT 70

With the Help of Kruschen

"For nine years now I have used Kruschen Salts and could not do without them. I take a third of a teaspoon in a cup of water as hot as I can drink it. No sickness, no headaches now. I am 70 years of age in April, and just with taking Kruschen Salts am able to do all my housework during myself I recommend Kruschen to all my neighbours. Formerly I began taking it I was never away from the doctor, but now I never need him. I used to have such headaches and then was not able to do anything. But now it is different thanks to Kruschen Salts." (Mrs.) J.G.

Kruschen keeps the organs of the body working actively, cleanses all clogging impurities from the system, and sends clear vigorous blood coursing through the veins And the result? As said by all Life's minor ills and miseries No more headaches, tiredness, depression, "nerves," or constipation. Instead, a sensation of delightful freshness, high spirits, happy outlook—in short, sheer good health!

HEART OF THE NORTH

By

WILLIAM BYRON MOWERY

(1931 Series)

Illustrated in 5 Great Color Scenes

CHAPTER X Continued.

"There's one lucky devil in this world, Baker. The man that Miss MacMillan's going to marry."

Alan winced. He had never thought of Joyce marrying another man. The remark aroused a passionate unreasoning hurt in him.

Sitting at the edge of the bed, Bunnard smoked a cigarette and glanced nervously at his partner who had laid down and was trying to get a little rest to fit himself for the flight and battle just ahead. Something was wrong between Alan and this winsome, spirited Joyce MacMillan. There was, or had been, some passionate relationship between them, it had evidently gone on the rocks. Baker was engaged to some girl at Fort Endurance; and Miss MacMillan . . . Well, there was that incident which he himself had seen half an hour ago when he happened to glance through the window.

"It's a pity," he thought, "for them to bust up. A d—d shame, that's what She's a regular girl. Looks, personality and spunk. . . . Lord, I'd hate to ever quarrel with her!"

He wondered whether to tell Alan about that incident he'd seen. Alan was evidently brooding around in the dark about Miss MacMillan. He was a bit awkward and blundered in such matters. Bunnard thought.

"First chance I get, believe I'll tell him what she did. He ought to know. She either loves him or hates him, to do a thing like that!"

When Alan woke up late in the evening, Bunnard was still asleep and Bill Hardock was dead to the world. Hop'ng to find Joyce, he went out into the trading hall.

Joyce was not there. For a few moments Alan stood looking about. As Bill had told him, she was closing out the post. He hated to think of Joyce's girlhood home being sold to some utter stranger. Thinking of Lorry, came to be wrecked out of service and condemned to a life of inhabitable idleness, he wondered whether he might not get this post for his crippled patrol partner. It was well located, and Larry's knack of friends among the Indians would be sure to bring him their furs.

Still hunting Joyce, he went down to the landing where old Pence, whittling at his story-stick, was guarding the plane against any log floating down and damaging it.

"You rin up early, Alan sky."

"Yes. Got a couple things to do. Say, you've been on my mind. Where's Joyce?"

"She went down th' river bank. Some time ago. Then I saw her comin' out in timber, to wang some trout. We're shy on meat."

Alan stepped into Dave MacMillan's canoe laid in an extra paddle and started down stream. Circling around the first bend, he saw Joyce two hundred yards ahead standing on a jutting reef, beside a brook mouth When he came alongside and lifted the canoe prow out upon the shelving reef, she greeted him with a quiet friendly smile They and down together on the wolf-foot moss.

After his days in the plane with the smell of hurtling struts and the thunder of a motor droning his ears, it was incredibly quiet on the spruce-buried stream.

Very downcast, he severity stared at Joyce. She was looking past him at the far shore and woods. As he studied her features, it seemed to Alan that something profound had happened to her since he saw her last She had changed, she was hardly the same girl. There was some new strange spiritual quality about her, as of a person who has gone down into a ravaging sickness and has had to find strength to conquer and rise out of it, but at a terrible cost.

To break the silence between them he began telling her of these last weeks his trip to Edmonton, his providential luck in meeting Bunnard, the prison charges that stood against them, their flight back north, their escape from Haskell's trap, his gladness when he saw her running down the path.

A little later, after they had discussed plans for closing in upon the bandits, Alan rose up and gave her a hand to help her up, he said.

"I've got to go down river a few miles, Joyce. Bill cached some supplies near that creek where you fish. I got upset that day and had to swim for it. I want to bring them up here this evening."

He paused a moment for some hint that she might wish to go along with him. None came. He suggested:

"It'll take only a couple hours. If you care to, I'd like you to go."

"I'd better stay. Bill and Mr. Postlewait will be awake before long. I'll have supper ready when you get back."

"I can help you with that—if you'll go."

Joyce hesitated. She was aware that Alan deeply wanted her company. After all he'd done for her, it seemed cruelly ungrateful to refuse him such a simple request.

And she herself must know more than good friends; but she dared not presume too far on that new-born strength. To be alone with him two hours on a twilight river, with their talk inevitably drifting to former things, would be unbearable.

With gentle firmness she said: "I'd like to go Alan. But I'll have to run back to the post. There's so many things to do." She tried to smile. "I don't want to be a neglectful hostess to Bill and Mr. Postlewait."

As she started up the river trail, her thoughts brooded on several things Alan had said in the course of his story, especially on his concerned reference to Elizabeth. Not that he had said anything derogatory about Elizabeth But his tone, his manner . . . . Was he becoming a little disillusioned? Was he seeing Elizabeth Spaulding not as the mate of his dead partner Curt, not as a girl to be cherished and shielded, but as an selfish, calculating person? Was he dimly forseeing what his married life with her was going to be?

Joyce checked herself sharply from hoping or even thinking that Alan might break off his engagement, or from extending him anything more than grateful friendship. She was glad, profoundly glad, that his words had caused no resurrection of hope, no tremor of emotion. The discovery of her strength suffused her with a kind of pride But for all that, she felt a great sorrow for Alan. He was bitterly unhappy, and she knew it. Blind man Miss Elizabeth knew! Her work, his life in the North, comradeship with his old friends everything that he had cherished was stripped away from him, and he was going into a marriage reluctantly and forcing himself into a life that was alien to his whole nature. It was Joyce knew, all of all that, her sympathy tender and compassionate, went out to him wholeheartedly

. . . . . .

Returning at dusk twilight with the drums. Alan found Bunnard cleaning fouled spark plugs on the plane engine.

Candles were already lit in the trading store. Alan looked up the path, expecting to see Joyce's figure in the lighted doorway He hoped to have an hour to i alone with her this evening But all day the conviction had grown upon him that a talk would be worse than useless. If only God's truth didn't sound so preposterous; if only he could tell Joyce that he had become engaged to Elizabeth, had expected to marry Elizabeth, and yet all the time, in his deepest thoughts, had wanted not Elizabeth but her. . . . . .

"If we're going to get away from here first thing in the morning", Bunnard broke into his thoughts, "we ought to put in a couple hours' work after supper on those aileron bolts. They're pretty bad frayed around the pulleys."

"What!" Alan Whirled on Him, Gasping. "Burn Up That Collapsible Plasbes!"

Alan knew that Bunnard was seeking to help with that job. But he did not answer. He wanted this evening with Joyce. Unless he took Bunnard into his own hands for a night, he and Joyce would drift across a continent from each other in a few days more. Torn with uncertainty of his affections for him, he was debating about this evening. After the incidents of today his picture gone, his emotions her refusal to go with him—he was wavering, undecided.

He tossed his cigarette out on the water. "Maybe we'd better go up and help Joyce what we can."

Bunnard did not stir. For several minutes he had been glancing wistfully at Alan. Finally he screwed up courage to speak.

"It's strictly none of my business, Alan, but—but. . . . You're engaged to a girl there at Endurance, but you bought Miss MacMillan that rainbow scarf with your last dollar and you helped a lot about getting back here and helping her—"

Alan was loath to speak of Joyce, even with a partner. He tried to say quietly: "We've been a good friends for several years. She's one of the sweetest girls I ever knew. You've met her now You'd naturally want to help her, wouldn't you?"

"Of course. But—but . . . . She here, I may be imagining things; you can tell me to shut up if you want to—but it seems to me there's something wrong between you and her."

Alan repeated, rather shortly: we're good friends. There's nothing more than that."

Bunnard knew different. He had had a suspicion of it ever since Alan first mentioned Joyce MacMillan's name at the cafe in Edmonton. He remembered the incident of this noon, he wondered at the Spartan courage Joyce had shown and at the passion behind such an act. Surely there utter unhappiness My betrayed her and Baker.

He said reluctantly: "If that's true, if you're merely friends and nothing

"Wha!?" Alan Whirled on Him, Gasping. "Burn Up That Celuloss Plashes?"

more, what made her burn up that scarf you brought her?"

"What!" Alan whirled on him, gasping. "Burn up that celuloss flashes?" His half-rose. "You say that's what she did? You're sure about that? You didn't make a mistake?"

(To Be Continued).

A health expert points out that people who have cold baths throughout the winter seldom have the flu. He, but they have cold baths.

Designed Speed Engines

Sir Henry Royce Of Auto Fame Dies in England

Sir Henry Royce, 70, of West Wittering, England, whose brain was behind some of the world's fastest automobile and aeroplane engines, is dead after being bedridden for six months.

He was a joint founder with C. S. Rolls of Rolls-Royce, Ltd., motor car and aeroplane engine builders, of Derby and London, in 1907

He founded Royce, Ltd., mechanical and electrical engineers of Manchester, in 1884. When Rolls-Royce, Ltd., was formed he became its director and chief engineer.

He designed the engines which gained for Great Britain speed records on land, sea and air It was with his engines that Flight-Lieut. O. R. Stainforth established the world air record, Sir Malcolm Campbell standard the over land record and Kaye Don secured the speedboat record.

Mr. R. M. Ray has moved with his family from the Williamson Block to his house on Dowds Ave.

Here 'and There

Another sale of salmon angling licens is announced in New Brunswick for the famous waters of the Upsalquitch River which will be leased to the highest bidder at a sale to be held in Fredericton, April 27. The lease will be for ten years from March 1, 1933.

Canadian railway salaries have experienced severe cuts over the past few years. This has applied to officers as well as to workers on the trains and along the lines. The recently issued annual report of the C. P. R. announced that E. W. Beatty, Chairman and President of the C. P. R., had instituted a special cut of 15 per cent. for himself and the Company's directors. This makes a total cut of 25% for them since the decline in earnings began.

Nipigon River's famous speckled trout don't know it yet but the whole has gone forth that permissionets shall pay only $6.50 for an annual fishing license, or about half the charge hitherto. Further, Nipigon guides will offer their services this year for $22.50 a week as against $25.00 in 1932. These trout in the Nipigon pools and in lines off the islands at its mouth including St. Ignace, run to seven pounds and up.

Canadian Pacific Steamships of Japan recently hung up a new speed record when she travelled the 4,339 miles from Honolulu to Victoria in four days, eight hours and three minutes, slipping seven hours, 47 minutes from her best previous time for the voyage and soon establishing the best mark for any other Pacific liner except the Empress of Canada.

The history bit of the year has been made by Frederic Hume, Conservationist, Victoria, Brit. Col., B.C., whose "Hon. Barry" has been recently hailed by connoisseurs as one of the most profound, by months books ever written. Mr. Hume, who Gen Brooks into the ranks of best sellers, resides in the century handled baggage and freight for the Canadian Pacific Railway at Nelson.

H. P. Matthews, general manager, Canadian Pacific hotels in western Canada, with headquarters at Winnipeg, has been appointed general manager of the company's hotel system from coast to coast, with headquarters in Montreal, according to a announcement issued by E. W. Beatty, chairman and president of the railway.

Coming Events

The Brownies will present two short plays, "Silverlocks and the Three Bears", and "Little Pet", at the Empress Theatre on Friday, May 12, at 8:15 p.m. Admission: Adults 25c; High School Students 20c; Children 10c.

oooooo

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held in the Union Hall on Thursday, May 11th, at 2 p.m. Mrs. J. McCrae of Bardo, Alberta will address the meeting. Subject: "It's up to the Women."

Hostesses, Mrs. Ed. Graham and Mrs. Davis. New members welcome.

VO [illegible] No. 6 — FORT SASKATCHEWAN, ALBERTA WENESDAY, MAY 10th, 1933 — $1.50 PER YEAR IN ADVANCE

Business Done At Town Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Secretary's Office on Wednesday the 3rd. May 1933, at 8 p.m.

Present Mayor Montgomery; Councillors Magor, West and Neale.

The minutes of the last regular meeting were read and adopted.

An application for the Old Age pension was approved by the Council.

Report of Dr. Mason the Medical Health Officer for April was submitted and filed.

It was reported that much damage was being done to the grounds in the Cemetery by cars driving off the roadway, in contravention of the By-law governing the cemetery. The stakes were also being moved and knocked down. It was decided that the only vehicles which should be admitted to the cemetery grounds would be the ones conveying the clergymen, the pallbearers, the hearse, and the one with the chief mourners. No vehicle shall be allowed to leave the outside roadway round the cemetery.

The following accounts were passed for payment — A M Cameron $1.50; J. Larose, cost $7.50; W. G. Hunt, insurance $4.35; The Record $6.39; Union of Alberta Municipalities fee for 1933 $10.00.

HELD BUTTERMILK RIDES

The Girls' A. A. A. held a very enjoyable dance in the Memorial Hall last Friday evening.

The hall was gaily decorated with colored balloons, Pussywillows and colored crepe paper, which showed that a great deal of work was done by the girls preparing for the dance.

Monday members on the programme played by the Peppy Pals orchestra were thoroughly enjoyed by the dancers. At the thirteenth dance the balloons that decorated the hall were let loose amongst the dancers and the bursting of balloons reigned supreme for a short time.

At midnight tasty refreshments were served in the buffet room, after which dancing was resumed until 2 a.m.

WHEN TO STOP ADVERTISING!
When There Is No Competition, No New Goods, No New People

When to stop advertising? Here is the answer.

When every man has become so thoroughly a customer of hers that he will certainly buy this year where he bought last year. When young and frisker concerns in your line come starting up and using the newspapers in telling the people how much better they can do for them.

When they also think "it pays to advertise". When the population ceases to multiply and the generations that crowd after you, and never heard of you, come on. When you have convinced everybody whose life will touch yours that you have better goods and lower prices than they can get anywhere outside of your store. When you perceive it to be the rain that men who never do and never did advertise are outstripping their

Art Exhibit In Fort Sask. Tuesday, May 16th.

Many people will be pleased to know that, under the auspices of The Fort Saskatchewan Women's Institute, an Art Exhibit will be held in the Memorial Hall on Tuesday, May 16th beginning at 2 o'clock in the afternoon when Professor James Adam of the University of Alberta will show a miscellaneous set of colored reproductions from the Carnegie College art collection together with a set of about forty original colored block prints which are of a very attractive and unusual character.

Adults as well as school children should see these pictures. The school children will come to the hall in groups, beginning at 3 o'clock so that Professor Adam may talk to them informally and discuss the pictures. High School students will be interested to know that Professor Adam is one of the Examiners for Art which sets the Departmental Examinations in Art, Adult may come at any time.

In the evening promptly at 8:30 o'clock Professor Adam will give an illustrated address showing beautifully colored slides of famous English Art". The lecture will be held in the Memorial Hall. There will be no admission charge and the public is cordially invited to be present at this delightful illustrated lecture.

Taken From the Files
19 Years Ago Today
Wednesday May 13, 1914

A very serious accident occurred, when a company of ladies and gentlemen were going home from a meeting in the Presbyterian church, a loose plank in the sidewalk in front of Hamilton's building tripped the cause. It appears that one of the party stepped upon the end of the board which flew up with great force, striking Mrs. Dewar in the side, causing serious internal injuries.

Seven carloads of stock were loaded at the stock yards Friday.

Our readers are requested to note that we have removed to the building formerly occupied by the Bazaarley, between Geo. Kimball's store and the Masonic Hall.

Thos. R. McClellan of the brickyard here, wishes to return thanks to the many friends who turned out so willingly on Friday last to help stop the progress of the raging fire, which had obtained a strong hold in the bush just north of the brickyard.

ANNOUNCEMENT

From May 15th until further notice Dr. Colborn's dental office will be open on Wednesday afternoons only. Hours 1:30 to 6 p.m.

Good Hope

The Good Hope boys gathered at A. E. Moyer's field, at James Johnston's, to practice baseball, on Saturday evening, May 6th.

Owing to rain showers the practice soon broke up.

oooooo

An old Community Club meeting was held in Good Hope school on Saturday evening, May 6th.

Seven old members were present.

Mrs. D. Cranston was Secretary-Treasurer and Mr. C. W. Moyer, President.

It was decided to divide the remaining funds between Good Hope and Ypres Valley for their baseball clubs.

After the business meeting an enjoyable evening was spent by everyone.

oooooo

Miss Janet Webber spent the week-end, at her home in Wabamun.

oooooo

Mr. and Mrs. O'Gorman and family of Golden Spike, Alberta, have rented Mr. D. McCullough's farm.

A very enjoyable evening was spent in dancing at their new home, on April 28, to welcome the new comers to the district.

World Co-operation In Prospect

Events of the past few weeks have concentrated attention on the interdependence of the nations of the world, and, by their promise of a general attack on a world scale upon the major problems of the hour, have inspired anew hope in suffering humanity that at last a serious effort is being made to cure the ills which have prostrated the world economic system. Conversations of leading statesmen at Washington, definite assurances that the world economic conference will be held in London next month, the prospect that solution will be found in reciprocal tariff arrangements and adoption of an international monetary unit, have had immediate beneficial effect in the markets of the world, and appear to have removed some of the confidence lost in the month of the latter years since.

Canada, in particular, faces the task of committing its new crop to the fertile soil with a renewed optimism and a higher courage. Assurances from Washington and Citizens of reciprocal agreements in the offing that will lead to reopen channels of trade long made barren and unproductive by prohibitive tariff barriers, have produced a most welcome reaction in the Prairie West. Confronted with this bonne possibility of an easing of the general trade situation in Continental Europe where Canadian wheat has found continuity increasing obstacles to overcome—obstacles created by local fears and narrow prejudices. The movement toward world co-operation bears with it also the harbinger of such conditions as will more effectively beneficial the Empire trade agreements consummated at Ottawa, last year. With these auspicious circumstances encouraging him, no wonder the Prairie Farmer sows higher hopes with his seed this year!

The idea that an international problem can only be tackled successfully in an international way, was long in penetrating the minds of many world statesmen. This may have been due to the fact that statesmen are proverbially hesitant of moving in advance of public opinion and it is a fact that public opinion, since the war, nurtured on fears and desperations, has been notoriously nationalistic in sentiment in virtually every civilized country. In consequence, the nations have spurned advances to trade discrimination, despite the general abhorrence of war; and have erected tariff barriers in the futile hope of developing self-contained national economies, despite the fact that a customs post may be more provocative than a concrete fort. The resultant stimulation of competition has tended to retard concerted action upon the economic problems, but the strangulation of world trade with its accompaniment of widespread unemployment and almost universal suffering, has finally served to awaken general realization of the essential interdependence of nations, and recognition of the fact that the sure path to recovery lies through co-operation. Even France, with all her hoards of gold, has been forced recently to borrow $150,000,000 from England to buttress the franc, demonstrating that in this day and generation no country is so organized as to be able to live of itself alone.

Generally speaking, therefore, it may be said that the world at last has become internationally-minded; and that in a sign that common-sense is reasserting itself. In Germany alone would there appear to be a reactionary movement towards a narrower nationism, but the movement in Germany is capable of a dual interpretation. It may be true that Herr Hitler and his brown shirt army have resurrected some of the more subversive characteristics of Prussia "junkerism" in their so-called "Socialism revolution"; but it is also true that Herr Hitler has already defined a policy which aims to win for Germany the markets of the world not only in matters of trade and commerce but also in matters of armaments. The new Germany, therefore, while driven along intensionally in a narrow nationalistic regimentation by men himself, who personify the "autocratic blonde of a sergeant-major" (as Canada would say), is awake to the necessity of co-operation in the wider field of world politics and trade in the interests of world peace and world prosperity. That is to say, the rigors of the Nazi discipline would appear to be fundamentally protective, the rigors of the Nazi discipline would appear to be fundamentally protective, of the German commonwealth against the peril within the gates rather than aimed at any imaginary peril from without. In any case, the German internal situation does not necessarily impair prospects of a reasonable measure of world co-operation, nor weaken hope of a restoration of normal trade relations among the countries of the world.

Shave the Trendsetter

British Authority Says Clubsmith's Slipper Worn Far and Near

London.

Cinderella's slipper, popularly supposed to have been made of glass, really were made of fur, according to Sir Gerald Wollaston, garter king-of-arms and an authority on heraldry.

He told members of the Royal Society of Arts that the slipper was made of "vair," which is heraldic fur of white and blue. The other idea, he said, came from a confusion with the French "verre," meaning glass.

The Netherlands may restrict planted areas for agriculture.

Hold Meetings By Telephone

Post Office in London, England, Gives Unique Service

So that business men in widely separated districts can hold a joint conference without travelling, the general post office in London, England, has arranged for simultaneous telephone conversation.

The matter is arranged simply by informing the post office that certain telephone numbers are to be connected. Manchester, Leeds and Glasgow are required at a definite time. The general post office will then ring up and they can then each hear the voices of all the others and do their business as though they all sat in one room.

Brown—Could Not Sleep Tired Out All The Time

Mrs. Brown, Jonesville, Que., writes:—"I was so run down, I could not sleep at night, and felt tired all of the time.

A neighbor told me about Milburn's Heart and Nerve Pills, and so she sent them to me. I took two pills when I went to bed. I found they were doing me so much good I kept them up and my pound of condensed milk to me."

Price 50 cents per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Impressed By Visit

British Vice-Admiral Gives Account Of Trip To Canada

Vice-Admiral Francis Wade Caulfield given a hearty account of a six-week's visit to Canada in his report as president of the association of retired naval officers.

"A small property near Vancouver was recently turned over to me as Admiralty connected with this property or settlement, called 'Caulfield' after my father, who bought it as virgin forest and started to develop it at the end of the last century," he said. "On my trip through Canada to the Pacific coast, and, so, incidentally, gave me the opportunity of meeting A.R.N.O. members of whom, in Saskatchewan there were 94 scattered between Moose Jocks and Alaska. It was a strenuous, but splendid six weeks. The welcome given me everywhere was something not to be forgotten, and I should like to take this opportunity of thanking all my kind hosts and hostesses for their charming hospitality and the truly delightful and instructive opportunity interesting time they gave me.

"One member (working on a farm for his approaching university degree) offered to help me. Another was running a ferry, another was perched on top of a cart of Rifle Tower as 'look-out' in the forest area of Ontario. A fourth member owned and worked a 20 acre fruit farm. Apples! Why the Bramleys were bigger than my head, and I saw a tree but carried 2,000, some nearly 3,000 apples, whilst a fourth a J.P.' in the Rocky Mountains, and I lived and conversed to the whole of his little community in fact, his word went,' and little was done in his district without the knowledge and approval of 'The Commander.'

"Everyone who was dependent on pensions or English income was being badly hit, the pound sterling having dropped from 24.86 to $3.80 and 'Wall Street' was becoming a history. I was amazed, however, to find how comfortable and happy a family can be in a house and servants, but filled with an active appetite, cheap electricity, and a cheerful and obliging disposition.

Horse Had Cold Calling

Racehorse Of Former Chicago Bank Minister Sold By Auction

The famous horse with the 14-carat gold-collapsed smoking room, lined with morocco leather—a horse in fact urbanely furnished it would have done credit to a fabulously wealthy Indian Maharajah has gone on the auction block at Chicago.

It was the horse of Frank A. Mulholland, real estate operator and a former director in the defunct Union Bank, who was indicted with other officials of the financial institutions.

The horse, situated in exclusive Beverly Hills, was one of the show pieces of the section.

The horse's complete eleven rooms and cold along with it were the costly furnishings which included a humidor, hand carved ceiling, rose carpets of velvet, and French walnut love seats.

Fast Rockham Trip

Constable Travels From Chesterfield To Cheshold In Seven Days

From Chesterfield to Cheshold, a distance of 420 miles, in seven days is the accomplishment of Constable Yates of Yates. This is the shortest time on record. Constable Yates, accompanied only by an Indian guide, travelled by dog team.

The trip of the young constable was accomplished early in April. The trip to Cheshold in only made twice a winter to carry mail and necessities. Constable Yates was an escort to a western Canadian scientific expedition for a month. He was glad to get that time completely away from civilization, living the life of an Eskimo.

The Explanation

Wife—Henry, have you been spending about a few little bills for any bets, cigarettes and drinks? Do you know I could have married H. T. Reed, the telephone magnate—and he's a millionaire, but I didn't.

Henry—Yes, and explains why he's a millionaire."

LASTS 1/3 LONGER

Plug Tobacco smokes slowly in the pipe bowl. It lasts 1/3 longer and cuts the cost of smoking.

DIXIE

ONLY 20¢ A BIG PLUG

Head More Cattle Steamers

Western Brokers Claim Only Six Available For Trade

Neglect of the Dominion Government to continue ocean tonnage to enter the Canadian cattle trade is strongly resented at Winnipeg. Brokers point out that only six tramp steamers are available to this trade, that two British companies have chartered these boats and that the tramp steamer owners name months ahead and buy half the cost of fitting up the boats to carry cattle if the Dominion Government would pay the other half.

The Dominion Government was silent on this issue. Today as a consequence, the Canadian cattle export trade is limited only by the capacity of these steamers to carry cattle. They are scheduled to carry 450 each every three weeks to Britain all summer which will mean that a maximum for the year of 48,100 will be exported.

Canada could easily export 100,000 head if it claimed. The cost of fitting a boat to mount $12 per head of cattle capacity. A boat big enough to take 500 head would cost $6,000. A boat to carry 600 head would cost $6,000.

Support Land Scheme

Region To Participate In Provincial Back To the Land Plan

Decision to participate in the provincial government's back to the land scheme was reached by Regina city council recently, although some criticism was directed to two points in the scheme. Projected points were that the cost per family will be higher this year than last, and the change of policy of the government this year compared with that in effect last year.

Under this year's scheme the municipality participating in this plan is required to agree to undertake to contribute one-third of the expenditure per family up to $400 and, further, to assume one-third of an excess expenditure over $400 but limited to an additional $200.

Last year the cost to the city per family was $100 and some aldermen felt those who went out under last year's plan would have ground for complaint to ask advantages given to those going under this year's plan.

Completes Twelve-Year Task

Priest-Artist's Paintings Adorn Walls Of Gravelbourg Hospital

Msgr. Chas. Maillard, priest-artist, has completed twelve years' labor in painting religious pictures adorning the walls of Gravelbourg hospital.

His "Way of the Cross," just finished, consists of fourteen life-size paintings placed around the church proper. They are rich in coloring, beautiful and of esthetic value. In addition to beautiful contrasts of colors, symmetry, perspective and feeling, meaning of these are found in his work. They come from the mind of an artist, who has painted the apocalypse, dogmatics and moral doctrine of the Christian faith.

Coyotes have special places to meet and sing their weird songs after nightfall, but they never are the same meeting ground two nights in succession.

Dominion Drama Festival

Musgrave's Club Of Winnipeg Awarded First Place

The Musgrave Club of Winnipeg, in winner of the Dominion drama festival competition, with their play "The Man Born To Be Hanged," by Bishop and Hughes. The Winnipeg club received a marking of 83 per cent. of excellence from Rupert Harvey, Montreal adjudicator.

To the Musgrave Club will be awarded the Beaubrough cup, emblematic of amateur dramatic supremacy in Canada, as well as the special trophy given for the best play in English to be presented during the festival.

As the second best presentation in either English or French Mr. Harvey nominated "Les Rantzau," by Beckmann-Chatrian, which, L'Union Dramatique de Quebec Enr. Offered as their entry. This performance received a marking of 80 per cent. of excellence The Quebec dramatic organization will receive the special trophy awarded for the best play in French, although it is notable that "Les Rantzau" took second position in the whole competition.

The second best English performance during the competition was "Back to Methuselah," by George Bernard Shaw, which the Vancouver Little Theatre Association gave. This presentation received a marking of 79 per cent. From Mr. Harvey. Only Part I. of the first act of this play was presented.

Third in the English plays came "Will Shakespeare" by Clemence Dane, presented by the Ukiliem Drama League Group B). Its marking was 77 per cent.

In the French plays, "Le Baiser Dans la Nuit," presented by Le Cercle Dramatique des Etudiants de Laval, Quebec, was awarded second position. Its percentage was 68. This play is by Maurice Laval.

The third best performance in French was "Une Affaire d'Or" (Gold), by Marcel Corbeau, which Les Anciens du Cans de Montreal presented. It gained 65 per cent. of excellence.

Not So Good

A farmer's son once decided to be a lawyer. His father drove him into town and got him a job as office boy to a law firm. Three days later the young fellow was back home again.

"Well, Josh, how do you like the law?" his father asked.

"Aw, it ain't what it's cracked up to be," said the boy. "I'm sorry I ever learned it."

Federal Government Economies In Reduction Of Expenditures Results In Saving Of $81,000,000

Reductions in controllable expenditures over the last three years, compiled with the $14,000,000 provided in the last budget, have resulted in total government economies of $81,000,000, Hon. E. N. Rhodes, minister of finance stated in a circular letter forwarded to all Canadian Chambers of Commerce and Boards of Trade which recently united upon the federal administration to "cut a good example," in matters of economy.

"The government is in cordial sympathy with the objects you have in mind," Mr. Rhodes wrote. He expressed the opinion that all Feature of the problem, in respect to government expenditures had not been considered.

Even if every salary, pension and parliamentary indemnity were cancelled, there would still be a deficit of $30,000,000 in the non-controllable obligations, he wrote.

"Furthermore," the letter proceeded, "may I point out that the two years past, reductions of the Treasury board, promotions and increases of pay have been held in abeyance, and no vacancies have occurred in the government service the positions have been abolished. These and other restrictions have resulted in a reduction in the total charge for salaries and wages of $4,500,000 per annum, and a reduction of over 4,000 employees. This is in addition to the saving of $8,000,000 per annum effected by the 10 per cent. reduction when the project is completed, Kuffeler said.

The Zayder Zee is being enclosed by a dam about 20 miles long. Within the enclosure will be embanked "four parts called polder . from which the sea will be pumped The main dam already has been completed, and the first polder probably will be finished next year.

Decrease In Fish Sales

Catch In North Greater, But Price Lower Receipts

The value of fresh fish shipped out of The Pas district during the past season was $53,541, according to the report of E. H. Stevenson, fishing inspector. Last year the amount received by fishermen was $56,000. The decrease is attributed to the fact that meats and fish of the population districts are now low in price that northern fish, subject to longer freight hauls, and therefore increased cost basis, cannot compete with other markets.

The catch per man this year was greater than last year, but the receipts were less owing to low prices.

The total number of pounds shipped this year was 663,700, as against 920,440 last year. There were 138 licenses issued for the season of 1931-32, as against 93 in 1932-33.

Uses Of Wood In Canada

A Considerable Proportion Is Still Used For Fuel Purposes

According to figures compiled by the Forest Service, Department of the Interior, the use of wood for firewood still continues to be one of the main uses of wood in the Dominion. 30.7 per cent of the wood cut is consumed in this way. The volume of wood thus goes to the sawmill is still greater, by almost one-quarter, constituting 23.3 per cent of the total quantity of wood cut. Third in importance among the uses of wood, in respect of volume of wood used, comes pulpwood, 24.2 per cent. of the consumption of wood goes for this purpose. The quantity of wood used for railway ties makes a respectable total; lower than maybe up 2.5 per cent. of the total consumption of wood, amount ties 2.25 per cent.—a total of 5.75 per cent. for all ties. Fences still require a considerable proportion of wood—about one and one-half per cent. of the aggregate, and poles, piling, and similar products from one-half of one per cent.

Fashion

By Ruth Rogers

901

SPRING IS IN THE AIR!

It's as fresh and lovely in silk crepe print.

It's all puffed up about its sleeves! And isn't the buttoned wrapped bodice smart?

It's lovely 'neath the spring coat in a vivid red or blue and white print in crinkly crepe silk. And you can wear it right through the summer season. It's easily made and will cost so little.

Style No. 901 is designed in sizes 14, 16, 18, 20 years, 36, 38, and 40 inches bust. Size 16 requires 3¾ yards of 39-inch material.

Plain crepe silk in gray, dawn blue or the new orange shade is delightfully attractive in this model.

Price of pattern 15 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Reclaiming Zayder Zee

Work in Holland Will Take Twenty-Five Years

The work of reclaiming Holland's Zayder Zee will probably require 25 years, J. P. Kuffeler, a van Kuffeler, director of the project, said recently while in London. The new land will ultimately be used for agricultural purposes he said. It will at first be used for pastural purposes and later turned into crop-growing land.

Approximately 900 persons already live on the reclaimed land, and approximately one-third of the area is under cultivation. Work will be provided for 3,000 persons when the project is completed, Kuffeler said.

Decrease In Canadian Suicides

Canada In North Greater, But Price Lower Receipts

Spring Migration Of Birds From The South Heralding Return Of Warmer Weather

Of all the myriad voices with which Spring speaks to mankind none is more generally beloved or more widely recognized than the robin of the birds. Among our waterfowl the most conspicuous is undoubtedly the Canada goose or "honker." Travelling by day and by night over town as well as country in wedge-shaped flocks led by birds of ripe experience these birds of the wild are strikingly emblematic of spring. A few Canada geese winter in the southern coastal parts of the Dominion such as southern Nova Scotia and south-western British Columbia but most of them spend the winter in some part of the United States. There are large wintering grounds on the eve of the Carolinas around the gulf of Mexico and in California. From these areas the geese begin to move northward in February. They do not hurry on their way but pause at various suitable places in the settled regions of Canada in March and April and several thousands of the big bands of the more northerly waters along which they will nest.

In both Canada and the United States these splendid birds as well as all other waterfowl perform their spring migration in peace and safety from shooting because of the protection that is afforded at that time of the year by a treaty between the two countries known as the Migratory Birds Convention Act and regulations of which in Canada is a joint responsibility of the Department of the Interior and the Royal Canadian Mounted Police Even though the guns are silenced in the spring, the birds have a host of natural difficulties and dangers to meet, such as storms, food scarcity, and drought.

Of course the Canada geese are by no means alone as the feathered harbingers of spring. Equally eagerly forward to reclaim the land as it is freed from retreating winter are a great host of other birds, large waterfowl, such as ducks and gulls, and song birds or insect-eaters of a great variety One of the earliest and most luminar of the song birds is the robin, whose joyous carol is sounded from the top of some leafless maple long before the leaves have left us. Other early arrivals among land birds are the crow, the various flocks of sparrows, and the smallest song sparrow, whose simple cheerful song is undoubtedly most appreciated in early spring before it is drowned in the chorus of more gifted vocalist arrive later

Although the birds that in this way are most eagerly we are the messengers of spring and the first that the northward migration of bird life in southern Canada centre grow like a swelling tide. By the month of April and does it reach its height until about the middle of May Typical and conspicuous birds among these later arrivals are the swallows commonly seen as the circle about overhead in pursuit of their insect prey, the striking blue-gray colours and martial notes bring them to the attention of all and the bobolinks which fly like madcaps in ecstacy over the grassy meadows are drenching them with their wonderful songs Birds such as these, arriving in Canada when the weather has become more settled, generally return as a rather exact schedule arriv about the same time each year. It is interesting to note that the time of their return has a more direct relation to the state of development of vegetation and of insect life in the region than to the man-made calendar and mankind will never cease t wonder at the ancient but unexplained mystery which draws these birds from the south to their northern breeding grounds at just the right time to a April mover and starvation in the one hand and to help prevent an enormous increase in the numbers of weevil insects in the grasslands on the other hand.

Alberta Issues Tourist Book

Shows Beauty and Grandeur of Famous Rolling Country

"Mountain-ous of Nature" is the title of a new booklet of photographic reproductions of bits of grandeur in Alberta issued by the publicity commissioner of the Alberta Government, Calgary, Alta.

There are 11 photos of scenic Alberta in the booklet, bound in an attractive cover of black and gold.

The enchantment of Waterton lakes, the beauty of Banff National Park and the grandeur of Jasper, and a few words about the province itself are shown. The booklet, it states, "may serve to indicate to those of the outside world something of the beauty and the grandeur for which Alberta's holiday resorts are justly famous."

The black and gold color scheme is carried through the booklet, in border around the photographs. It was printed by the Alberta King's Printer, W. D. McLean.

Loads In Homicide Rate

Murder by Recording Ingenious Art In United States

"Murder more than ever in becoming an ingenious art, if not a trade in the United States, Dr. Frederick H. Hoffman, of New York, statistician, concluded, after a survey of 190 American cities. He found the United States led the civilized nations of the world in the homicide rate for 1932

Memphis, Tenn., had the highest rate of the 190 cities with 84.24 per 100,000 population, but Dr Hoffman pointed out that the high rate may be due to admission to Memphis hospitals of cases from outside the city limits. Other cities without had no homicides in 1932 The rate for the United States was 10.3 per 100,000 population, compared with 0.3 in England and Wales.

Expects To Reach Hundred

Seventy-Eight Year Old Texas Man Has Different Idea

Thomas Jaimo, 78, one-time pony express rider and resident of El Paso, Texas, lives on a diet of fruits beans and expects to live to be 100 years old.

"And if I reach that age," he declared, "I'm going to celebrate by riding in an aeroplane. I'd like to see how those pilots carry the mail."

Years ago Jaime rode the express trail from Fort Davis, Texas, to Roswell New Mexico.

Wu Smallman Fellowship

Award To Three Canadians Announced By Yale University

Award of five Smallman fellowships for the investigation of transpacific problems has been announced by Yale University, three of the fellowships being awarded to Canadians.

The recipients are Robert A. Emerson, Morden, Man.; S. Miller Gossage, Montreal; Palmer E. Savage, Montreal; Thomas M. C. Martin, Warsaw, Wis.; and Lyell R. Shallenberger, Hopkins, Minn.

Smallman fellowships were made possible by the bequest of Lord Strathcona. Identified with the pioneer days of railroading in Canada. All five successful candidates have had previous railroad experience, two of them being third generation railroad men.

Children Uprooted Trees

Sunday Storms They Were Left Out Of After Big Ceremony

Jubilee children who chose to plant trees in memory of the late King George V. in Arbor Day ceremony took their revenge at Lethbridge, South Africa. The trees were left and leading citizens assembled on the sports ground and entertained a number of school children. Lectures on trees were delivered and after the speechmaking the children were entertained with music and refreshments. The magic and illusions that were planted in trees, decided by certain children. Next morning the trees were found uprooted and stripped of their foliage.

Trip To West Indies

Summer Cruises On Fast Canard Liner Mooretania

Five summer cruises from New York to the West Indies have just been announced for the fast Canard liner "Mooretania," the duration of each cruise will be 12½ days, the steamer leaving New York on a Saturday and returning Friday two weeks later. It is considered this will make the cruise very suitable for those whose vacations occur only two month.

The itinerary for these cruises will be much the same as that covered by the "Mooretania" on successfully this last winter. The ports will include Port of Spain, Trinidad, La Guayra, Venezuela, South America, Willemstad, Curacao, Cuba, Panama and Havana, Cuba.

Two days and one day will be spent in Panama, allowing passengers time to cross the Isthmus to the old city of Panama and view the various points of interest. The same period will be spent also in Havana, with bathing, racing, basketball, golf and tennis to attract the visitor.

Practically a full daylight day will be spent ashore in each of the other ports.

Cruise sailing dates are July 8th, July 22nd, August 5th, August 19th, and September 9th.

Arrangements for this unusual cruise programme, Arthur Randles, general passenger manager of the Canard and Anchor-Donaldson Lines in Canada, said, "We have had so many requests this year for summer cruises to the West Indies that we have decided to undertake arrangements whereby a few days would have been impracticable. Apparently thousands of people who cannot get away in the winter and who would visit the places in the West Indies which they have read of and heard so much about, but unable up to now have not been accessible in the manner arranged for with our vacationists, that is, by cruises in huge Atlantic liners on the all-inclusive cruise system. Everything the transatlantic member of inquiries received at our office we decided to look into thoroughly. We obviously did not want to send pleasure cruises to the West Indies in summer if there was any doubt as to whether the voyage would encounter pleasant and comfortable weather.

"We have now obtained official weather and temperature reports for the entire year at various West Indian ports which the "Mooretania" touched at this winter. We found that these statistics here out completely voted our agents in these ports had represented that the variation in temperature between summer and winter was practically negligible.

"During the day the breeze was generally constant trade winds, so that a sultry day, such as we experience in New York is practically unknown. The nights are invariably cool and comfortable.

"Summer seas prevailed throughout the entire itineraries practically guaranteeing complete absence of motion, the highly desirable feature of cruising at sea without the discomfort of rough weather.

"The cost of sea cruising was never so economical from the passenger stand-point than it is today. The rate for these cruises is less than the cost of ordinary summer vacationist spends at home or in a Canadian or American resort."

Aircraft In Demand

There is practically no depression in the aeroplane industry, Major Hoy, Montreal, Minister of Transport, told aircraft have proved so popular that the De Havilland aircraft factory has been forced to work a full shift both night and day. The company's business has increased 40 per cent. in recent months and deliveries have fallen away behind orders.

SUNDAY SCHOOL LESSON

MAY 14

JESUS ASSERTS HIS KINGSHIP

Golden Text: "Behold, thy King cometh unto thee: He is just, and having salvation." Zechariah 9:9.

Lesson Mark 11:1-33

Devotional Reading Revelation 5:9-13.

Explanations and Comments

Jesus Publicly Claims To Be the Messiah, verses 1-10. We have come to the solemn entry of Jesus into the Holy City in a triumphal procession for which He deliberately planned. We have heard Him caution some one not to report a miracle He has wrought, or charge the disciples to "tell no man that He is the Christ." And after the feeding of the five thousand He escaped to the hills when the people sought to make Him king. He has constantly feared that popular enthusiasm would hinder His mission. Now, however, another purpose is impelling Him to seek publicity, to compel the enthusiastic worship of the people, to let the world know that He is the Messiah. He no longer evades interrogation to His work. His hour has come.

When in the neighborhood of Bethphage and Bethany Jesus sent two of His disciples to secure for Him a colt that had never been ridden. Should their right to the colt be questioned by the owner, all they would need to say was that the Lord hath need of him and would return him. It all happened as Jesus said. The colt was found tied in the street at the door of a house, the disciples were challenged as they unloosed him, and upon replying as they were directed they were allowed to lead the colt away. They threw their loose outer garments upon the colt as a seat for the Royal Rider.

Behind the procession descend the mountain bringing him," said the Egyptian in Ben Hur "I heard them singing. They were beautiful with palms in motion. I looked everywhere among them for a figure with a promise of royalty a horseman in purple, a chariot with a driver in shining brass, a stately warrior behind a veiled shield, rivaling the spear in stature. I looked for His guard. It would have been pleasant to have seen a prince of Jerusalem and a cohort of the legions of Galilee. Instead of a Cesar bolstered upon a caparisoned, I saw a Man, riding an ass' colt."

"The manner of His riding into Jerusalem was in keeping with all Jesus' aggressive manner and method. Beyonde of it was struck at the very beginning on that first Christmas morn, when the King came as a helpless Child, headed with disabilities of peace and family and position in the world The stable and the manger and all the other conditions of that birthday of Jesus in Bethlehem are only object-commentaries on the essential nature of His character and work. His life was consistent from the manger to the cross. He was the Prince Peace in His triumphal entry into Jerusalem in His humble entry into Bethlehem."—Hugh Black.

Quebec Town Lowers Taxes

Slight Increase Has Provided Needed Relief Suburb With Growth

Among the Quebec municipalities that have maintained balanced budgets through the difficult years of the current economic depression is the town of Mount Royal, a suburb of Montreal. Mayor T. S. Darling of that municipality is not only in a position this year to announce a balanced budget, but also a reduction in the tax rate from twelve to eleven mills.

Revenue for the year is estimated at $180,000 against estimated expenditures of $98,000. The estimated surplus and the tax rate reduction have been made possible, Mayor Darling said, through reducing the town's expenditures on non-essentials to keep maintenance costs to a minimum.

In its 21 years of existence Mount Royal has not wanted much money on election costs. Mayor Darling has been acclaimed by acclamation for 21 consecutive one-year terms.

Will Visit Grain Show

The Governor-General and Lady Bessborough will be visitors to Regina during the Worlds' Grain Exhibition and conference, it was learned unofficially recently. Word from an official Native quarter has been received by Regina in charge of the exhibition stating that their excellencies, on their forthcoming tour, plan to spend a day or two in Regina at the time of the exhibition.

Young radicals are the favorite diet of an insect, cha-quarter of an inch long, which has just invaded Maryland.

Holding Garden Contest

Undertaking Being Sponsored in Winnipeg By Women's Canadian Club

Designed to develop a spirit of self-help, and giving seed to the competitors a garden contest for the unemployed of Winnipeg will be staged this summer by the Winnipeg Women's Canadian Club. The city is divided into 12 zones for the contest and prizes will aggregate $250. Each contestant will also receive 12 tomato plants from the committee. Some canning centres will also be established to save the garden products.

Points will be awarded each month for the condition of the crop, co-operation, planning, arrangement and maturity; development of growth, when ready for eating, freedom from weeds and apparent yield; appearance, proper thinning and use of thinnings, freedom from insects and disease, care of surplus; straightness of rows, utilization of space, condition of crop and use of products in the home.

Cash prizes will be awarded in each district with a grand prize for the city title.

In a recent compensation claim case in Manchester, England, the judge ruled that a policeman is not a worker.

MECCA
THE HOUSEHOLD OINTMENT

U. S. CURRENCY INFLATION PLAN IS APPROVED

Washington.—With a roaring chorus of ayes, piling up a vote of 307 to 84, the United States House of Representatives approved the Roosevelt currency inflation plan

The inflation rider which now has complete congressional approval, will allow President Roosevelt, among other things, to expand currency and credit by as much as $6,000,000,000 in addition to altering the gold backing of the United States dollar by as much as 50 per cent.

Action came on the inflation amendment in the House after it disagreed to all senate farm relief amendments and sent them to conference.

The inflation amendment gives President Roosevelt broad powers over the financial structure of the government. Some powers apparently he will use alternatively or together, depending upon needs to meet the financial situation.

Briefly it permits:

The Federal Reserve banks to buy $3,000,000,000 in outstand ng government bonds, against which currency may be issued.

The president to issue if he sees fit, another $3,000,000,000 in United States notes.

The president to reduce, up to 50 per cent., the content of the gold dollar.

The president to change the ratio of the silver dollar and provide for the free coinage of silver.

The president to accept $300,000,000 in silver from other countries as payment on the war debts at the rate of up to 50 cents an ounce, against which currency may be issued.

Great Air Armada

Italian Aviators To Cross North Atlantic In June

St. John's, Nfld.—Italian aviation experts, busy preparing for the great air armada that will cross the north Atlantic in June, numbered recently that two submarines and two drifters would arrive here the middle of May.

These vessels will act as convoys for the 24 seaplane-warriors on the "flight of the round" along the northern route.

The airplanes, scheduled to leave Orbetello late in May or early in June, will fly to Chicago for the Century of Progress Exposition, touching at Amsterdam, Holland, Londonderry, Ireland; Reykjavik, Iceland; Cartwright, Labrador, and Shediac, New Brunswick.

Three advance planes arrived here last week on the liner "Rosalind," and as soon as weather permits they will fly to Cartwright to establish a supply base for the flotilla.

Re-Armament Men Is Disavowed By Germany

Delegate To Conference Says Opinion Is Wrong

Geneva, Switzerland. — Germany, through her delegate to the world disarmament conference disavowed the "opinion that Germany wishes to avail herself of disarmament to proceed with re-armament at the highest possible level."

Count Rudolf Nadolny, the German representative, proposed the British arms plan be changed to provide a maximum calibre of 165 millimetres for mobile guns and to abolish all tanks.

"There are still great difficulties but they are not insuperable," Count Nadolny declared after suggesting the amendment and explaining that if the German proposals are rejected, his nation should be allowed all land, naval and air armaments deemed necessary for defense by other countries.

Calgary Unemployed

Calgary, Alberta. Unemployed to the number of 370 reported at relief jobs despite the unemployed married men's relief strike, sponsored by workless organizations in protest against lower summer relief allowance.

Muskrats Bounce Free States' Hydro Scheme

Government Seeks Canada's Advice On Right Of Determination

Dublin, Irish Free State.—Canadian muskrats are believed to be threatening the Free State's great hydro-electric scheme on the river Shannon in an unguarded moment last year the Department of Agriculture gave permission for the importation of two of the rats from the Dominion.

After a short period in captivity the animals escaped from their owner and last week it was discovered the Free State was afflicted with a pest from which it had hitherto been immune.

Half a dozen of the rats were shot by a Tipperary farmer who observed them on a Shannon embankment and mistook them for otter.

The Department of Agriculture has ordered an investigation and experts from the Department of Industry and Commerce have arranged measures will have to be adopted to prevent the pests from damaging the hydro-electric scheme embankments.

The government has powers to introduce a bill in the Dail that which will make the rats illegal inhabitants of the Free State, however; for the present system of licensed importation is inadequate in the meantime the department of agriculture is to seek advice from the Canadian Department of Agriculture as to the best means of exterminating the animals.

Ramsay MacDonald Says Visit Was Successful

British Premier Pleased Over Talks With President Roosevelt

Southampton, Eng. A cheering crowd of dock workers greeted Prime Minister Ramsay MacDonald on his return from his economic discussions with President Roosevelt in Washington.

Mr MacDonald declared on landing that he was very pleased with all of his conversations with Mr. Roosevelt, which he described as most successful.

The prime minister said it was well that the world was discussed and taking world problems which were bound to yield to co-operative good will. It was also well that while he was in a striking way in Washington, he declared.

He denied inviting Mr. Roosevelt to come to London for the world economic conference which is to open June 12, saying that the matter never was discussed between them.

"I am very pleased with the whole of the transactions," the prime minister told interviewers. "I met a man who is eminently interested in the things to move in the world, and we found ourselves in most complete agreement. We had talks on how to do it of the most friendly kind."

Milk Probe Finished

Ottawa, Ont.—The parliamentary milk probe is virtually ended. Only in the eventuality of a desire for another session on the milk situation to be explained by some particular witness will any further evidence be taken. The 1930 sitting the committee gave out this official intimation. An immediate report to parliament is probable.

Ottawa May Erect Building

Ottawa, Ont.—A large office building in Ottawa is planned by the government to relieve unemployment. It would be west of the Confederation building on Wellington Street. It is proposed that the new structure, which would cost $5,000,000, would be paid for by "transient notes," to be paid off in annual payments, instead of the more costly plan of issuing debentures.

March Exports To U.S. Down

Ottawa, Ont. -Agricultural products exported to United States in March totalled $416,780, as against $483,823 for the corresponding month last year, according to a report issued by the Dominion Bureau of Statistics. For the nine months ending March, farm products exported to United States were valued at $3,517,760, as compared with $7,731,674 for the corresponding period in 1931-32.

CREATED BRITISH AIR FORCE

Great Britain has lost one of the greatest minds behind the creation of the British Air Force with the passing of Sir William Geoffrey Salmond, commander-in-chief of the Air Defence of Great Britain. He was to have become Chief Air Marshal this month, in succession to Sir Hugh Trenchard, who is to retire.

Obligations Will Be Covered By Debentures

Shareholders At Annual Meeting Of C.P.R. Approve Issue

Montreal, Que.—To permit the liquidation of short term loans amounting to $20,000,000 and other maturing obligations, shareholders approved the issue of additional consolidated debenture stock at the annual meeting of the Canadian Pacific Railway Company here.

In his address to the meeting Edward W. Beatty, chairman and president, said despite unfavorable conditions the operations of the company showed it had come through in satisfactory financial condition and with its financial structure on a conservative basis.

Working assets at the end of the year were $37,821,144, while current liabilities were $16,311,397, a ratio of 2.7 times.

Mr. Beatty, Senator Frederick L. Beique, W. A. Black and Lord Shaughnessy were re-elected to the board of directors. Their present term of office having expired. The address of Mr. Beatty was adopted without discussion.

Railway Making Profit

B.C. Road Announces Revenues Exceed Expenditures

Vancouver, B.C. The Pacific Great Eastern Railway is one of the bright spots in British Columbia industry, according to reports just submitted by Robert Wilson, executive assistant to the board of directors. Revenues will exceed expenditures for the first six months of the current year, it is prophesied.

Mr. Wilson declares this will "be the first time revenue has topped expenditure in the first six months of any year the road has been operated.

Statement for March shows a profit in operation of $678, as compared with a loss of $13,665 in March of last year.

PRESS PHOTOGRAPHERS HID MACDONALD BON VOYAGE

Here is an interesting photograph of Prime Minister Ramsay MacDonald with his daughter Ishbel, photographed on board the liner "Berengaria" just before he said goodbye to America. The press photographers gave him one of their typical "bon voyages," and a few of the camera men can be seen in the background.

Sortax On U.S. Goods

French Minister Of Finance Is Ready To Take Action

Paris, France. The ministry of finance has prepared to impose shortly a 15 per cent. sortax on U.S goods.

The decree, it was learned, is ready for signature, to be issued when the U.S. dollar approximates 30 cents, which officials expect.

This sortax already is effective on British and Japanese goods because of depreciated exchange.

It cannot be increased without parliamentary authority, which Premier Daladier was reported contemplating.

American residents in France and tourists, who already have lost a large part of their incomes, have been badly hit by the 15 per cent. fall in the dollar. Many of them, unable to hold out longer, are beginning to flock back homeward.

Movements of both the dollar and the pound sterling have been complicated by the weakness of the Franc, but it was hoped France will be helped by measures the government is considering to defend French commerce and further slashes of the budget by the 1 nate. This, the minister-ial press in ication, the cabinet suggests.

Weakness of the franc was attributed to concern over the repercussions of commerce of the unbalanced French budget and the necessity for borrowing abroad.

A general race to wind up pending commercial sports before the convening date of the world economic conference in London, England, June 12 was discussed in some quarters.

Prorogation Of House

Early Closing Of Ottawa Parliament Is Anticipated

Ottawa, Ont. Possibility of an early prorogation of the House of Commons was seen in the course of an interchange on the subject between Prime Minister F. B. Bennett and Rt. Hon. Mackenzie King, leader of the official opposition.

The question arose when Hon. E. N. Rhodes, Minister of Finance asked for a second interim supply of $ 12 of the total, in order to carry on day to day requirements of government, and meet the May 15 salary list.

Mr. Mackenzie King suggested that, as the opposition had no desire to further prolong the session, it might be possible to prorogue before the middle of May and that interim supply would not be necessary

Sugar Tax Passes House

After Liberals Made Demand For General Retrenchment Scheme

Ottawa, Ont. The two-cent sugar tax passed the House of Commons after demands from Liberals for a general retrenchment scheme to trim the cost of government. Official Ottawa said Hon. James Malcolm, former minister of trade and commerce, should take a lesson from private business and cut its overhead. He instanced the 34 research laboratories operated in various government departments and, at the same time a national research council equipped to handle the same work.

BAN OATH OF ALLEGIANCE TO BRITISH CROWN

Dublin, Irish Free State.—Hope that he soon would have the pleasure of proclaiming Ireland a free republic was expressed by President Eamon de Valera in a heated Dail during the closing debate which followed the enactment of a bill removing the oath of allegiance to the British crown.

The president added that he was resolved to wipe from the existing constitution everything inconsistent with the sovereign rights of the Irish people."

This utterance was the most definite of the kind de Valera ever had made.

"We are going to remove from the country this every badge of inferiority," the president declared. "The people will be consulted before the republic is declared.

Having shelt a copy of a draft constitution submitted by an Irish delegation to Great Britain in 1922 which was amended by the British, de Valera said the task before them at every clause Great British "forced" them to accept.

The abrogation bill was re-passed by the Dail Eireann by a vote of 76 to 56. Previously twice re-voted, it be came the first through invocation of article 50a of the constitution, setting a time limit on the upper chamber's veto.

The action was taken on the motion of President de Valera himself, made in Gaelic, the Irish national language.

Conviction that the British government would consider the Anglo-Irish treaty setting up the Free State of Ireland "settled" and that powers took his seat in the dail without subscribing to the oath, was expressed by Gratten Esmonde, supporter of Eamon President William T. Cosgrave.

President de Valera replied he did not believe the Irish people was a violation of the treaty and added it was his intention to continue pressing for removal from the constitution of any "symbols" regarded as inconsistent with the position of the Free State One of these "symbols," the oath, he declared, was being removed and others would disappear through legislation in the near future.

Thirty Professors Lose Positions In Germany

Dismissed From Berlin and Cologne Universities Under Reform

Berlin, Germany.—Opening of the summer semester at German schools and universities under the auspices of the Hitler regime was marked today by the dismissal of 30 professors from Berlin and Cologne universities.

Meanwhile the students' deputation of the former institution has inaugurated a boycott against Jews remaining on the staff, contending that "the Germans are entitled to receive the principles of knowledge and thinking set by Jews."

It is the duty of every German student, the federation declared, "neither to enroll in courses nor to hear lectures given by Jews."

Dismissal of the 30 professors, 21 from Berlin University, and nine from the Cologne school, was announced by Bernhard Rust, Prussian education minister.

To Prosecute Gold Hoarders

Time Limit For Surrender To U.S. Treasury Has Expired

Washington.—United States government has said it intends to prosecute against gold hoarders, but it has yet to reveal its course of action. Indications are that many hoarders are waiting for treasury officials to show their hand.

The time limit for returning gold has expired, and it is understood the treasury is checking a list of hoarders compiled by banks. Last week there was approximately $750,000,000 in gold and gold certificates still out, the bulk of it believed to be in hiding in this country.

Had Extraordinary Career

Solomon, King Of Babe, Was Most Powerful Native In Africa.

Solomon, the King of the Baba, of dead. He was only 54. He leaves 64 widows.

He was the most envied black man in Africa, and he had modern ideas.

The Government allowed him £7,000 a year, and this enabled him to indulge in his ruling passion — motor cars.

He was the first native to buy a motor car and after the joy of possessing one nothing could hold him back. He bought car after car. Rolls-Royces, Hispanos, Cadillacs, Packards. He finished on a white chauffeur and he loved speed.

He bought so many cars at one time that he fell in debt. That rather cursed his pleasure and he had only six cars at the time of his death.

King Solomon always held his court, dressed in an enormous cowboy's cap, a blue coat with gold braid trimmed with leopard skin and a leopard skin girdle. He carried a huge sword, and had hundreds of them. If he could not carry a sword he carried an umbrella.

Legislation was another great love. At the slightest excuse he would send for his favorite lawyer a white man — and open a lawsuit. He lost many, and when he won a libel action, he declared a national holiday among his people.

A favorite recreation was shopping in Durban. He had such a bad reputation among the white traders, however, that they always refused to give him credit. When he had enough cash he would first buy a car, then a garden uniform, and then a sword — or an umbrella.

On one of these shopping expeditions he met a pretentious lady. He had never seen a white woman, and he married her as explained to her. He bought her a car and it conveyed with great ceremony to one of his eight kraals.

There he was installed in the royal hut, and every night and morning thereafter servants took a bath, washed him and nutritionen wives.

Wherever he went the natives doubled around him, cheering madly — he was their king. Wherever he visited a town the natives would leave their work and run to his car. The palace at first diverted his procession of the king's retreats, but the congestion became so great that no one was able to move. After that the royal car was allowed to take the main streets, and his adoring subjects held up the traffic.

Solomon was the most powerful native in Africa. His dominions, the ways of his great ancestor Cetawayo, who fought the British, yet became one of his best friends he could have raised a great army in a week. He was converted by a missionary.

The death of this king, who hated the hairdresser and his fashions, and dressed himself in European musical comedy clothes signalizes the passing of the last industrial native ruler.

An Old London Paper

Issue Of June 1 1797 Found At Smith's Unrest

Copy of an old London semi-weekly newspaper, the St. James Chronicle, dated June 24-27, 1797, has been found at Scott Current.

The front page, centred by a cross of King IV., carries paragraphs of items regarding the royal family. Note is made that his majesty had been until 3 o'clock when he returned for dinner and that "the queen and princesses went out airing in post coach and four and returned in the lodge."

The issue also records a speech by President Adams to the United States Congress delivered in April, 1797.

The Survey Photographic Library

The photographic library of the Topographical Survey, Department of the Interior, contains approximately 850,000 air photographs and about 20,000 ground photographs indexed as to locality and subject.

Called a "tenderloin hormone," a new invention in Germany forces a thrill through a meat channel on pressure to applied with the aid of a button.

W. N. U. 1900

THE ITALIAN FLAME WHICH SMOKE THE WORLD'S RECORD

Here we see mechanics pushing the seaplane away to the hangar after it had been piloted to a new world's speed record of 437 miles an hour over Lake Garda, Italy. The Italian flier Agello, who achieved this remarkable feat, is the small man standing at the left. Many thousands of dollars and months of hard work during summers who have striven to capture the speed honors from Great Britain. Five of them have lost their lives in previous attempts. The British record set two years ago by Lieutenant Stanforth was 408 miles an hour.

Japanese Minister To Canada

Representative Of Mikado Is Very Popular At Ottawa

I. M. Tokugawa, for four years past, Japanese Minister to Canada, has gone to Tokio on six month leave of absence. Before being declared by the Mikado to Ottawa he served his country at its legations in China, England, Australia and New Zealand. Under fully years of age, short, sophisticated, courteous. He is a diplomat who wins his way into the hearts of foreign peoples by a quiet dignity, courtly manners and a ready wit.

Very popular among the diplomatic corps at Ottawa, of which he is the dean, he is popular also with the Canadian official world. Everyone from the Governor-General and Prime Minister down thanks out of line. He is especially welcome at social functions, and is justly celebrated for his own hospitality. At home in Japan he is an ardent sport of the aristocracy. The son of Prince and Princess Tokugawa, his wife is sister to Prince Tokugawa Iyemasu, sent by marriage to the Empress of Japan. Mrs. Tokugawa remained at home to supervise the education of three children. His eldest daughter, Miss Toyo, who has been with the Minister in Canada, accompanies him home. His son may return with him for a visit at Christmas.

For two and a half centuries, until 1867, says the Ottawa Journal, the head of the house of Tokugawa was the Shogun of Japan. Hereditary dictator, who fought the British, yet became one of his best friends he could have raised a great army in a week. He was converted by a missionary.

The death of this king, who hated the hairdresser and his fashions, and dressed himself in European musical comedy clothes signalizes the passing of the last industrial native ruler.

The King's Sons

Contrary To General Opinion They Are Always Busy

A very busy member of the Royal family these days is the Prince of Wales, who is taking a very keen interest in various schemes to promote employment and to alleviate the lot of the unemployed.

Charities for the unemployed are receiving his enthusiastic support, and he has recently undertaken a lengthy series of provincial tours to study unemployment relief schemes at first hand. His appeal to the public to help the unemployed by "personal service" is widely placarded throughout Britain.

Then there is Prince George, the King's youngest son, who is very enthusiastic about his new job as a factory inspector attached to the Home Department. In recent weeks the Prince has inspected several factories with the thoroughness of an expert.

Of King George's two other sons the world seldom hears about the Duke of Gloucester, the third son, who has taken up soldiering as a career, while the Duke of York, the second son, a married man, with two daughters, devotes a good proportion of his time to industrial welfare work.

How Times Have Changed

Scores Old Age Went Out Of Fashion With Arrival Of Jazz

Observing that "lovely, serene old age" went out of style with arrival of the jazz era, Dr. Louis Arapzacher, political scientist and economist, in a lecture at Chicago recently, said:

"Statistics prove that more dye and make-up were sold in the last few years than were used for house paint in the whole history of the republic."

Registration of private automobiles in Great Britain in a recent month were 63 per cent. greater than in the corresponding period of 1931.

Leads World In Fatalities

Accidental Death Rate Is Highest In United States

"The United States, according to reliable reports leads the civilized world in its accidental death rate," says Miss Dorothy Kalben, editor of the Baltimore Health News. The accidental death rate in the United States was 82.6 per 100,000 of population in 1930. For Canada the rate was 62.0, the next highest after pointed out, England and Wales, however, had a rate of but 47.6 just a fraction over half that of the United States.

"It is true," she continued, "our country has more automobiles, more machinery and more hazards of various types than other countries have, but apparently we have not made adequate preparation for safeguarding this equipment. Accidental deaths have increased from year to year, reaching their peak in 1930. The year 1931 showed a slight decrease from the year 1930."

Chinese Cults and Creeds

Address Of Islam Are In Majority In Nanking, China

The Nanking Correspondent of the Christian Science Monitor says it is not often realized how large a recommendation plays in China, but statistics compiled by the Nanking municipality show that many adherents of Islam are enrolled in the capital than those of any other religion. Professing Mohammedans number 20,760, whereas Buddhism, the predominant religion of China, claims only 23,316. Protestant Christians number 2,140, Taoists 290, Catholics 153. A majority of government workers in Nanking do not profess any religion, but are adherents of Confucianism, an ethical cult. A large number enroll themselves as "agnostics."

A dollar goes further now, but it doesn't come back so quick.

Gardening Notes

By Gordon Lindsay Smith

A supply of stakes of various heights will be found very useful in both the flower and the vegetable garden. Two dozen each the ground on either side of a clump of perennials with a wire passing the top will give splendid support to Delphiniums, Phlox, Pyrethrum and such fairly tall growing things which if not supported are almost sure to be tumbled about by a heavy summer rain.

Staking should be done early in the spring, just after growth starts. Gradually the upper foliage will grow and all such wires and stakes thus hiding them but at the same time being supported in certain cases where the stems are straight and the blooms very heavy as is so with Peonies, it may be advisable to make the joining wires in the shape of a hoop. Very tall straight stalked affairs like Hollyhock, Cosmos and Dahlias will be strengthened by one four or five foot stakes, driven down beside and tied loosely about every foot to the main stem.

Bundles of cedar pose or bamboo wood makes good staking material, and also very neat, galvanized wire. Something new in the line has recently appeared on the market. This is a steel stake with nobs about every six inches, like some Irish walking stick, which prevent the string from slipping. It is as rigid as wood and about as cheap but has the additional advantage of being more easily driven in owing to the small size of handle. Painted a brown or green, these hall inch steel stakes are very inconspicuous.

Some Flower Seed: Some hardy annuals can be sown outdoors where they are to bloom, writes Miss Isobelle Preston of the Dominion Department of Agriculture. The soil should be in good condition, well dug and raked, and quite free from weeds before sowing which should be done when the soil is rather dry. The depth of planting depends on the size of the seed. Small ones are sown on the surface and pressed into the soil with a flat piece of wood. For larger ones, remove an inch or two of soil and sow thinly, then cover with the fine surplus soil and press down evenly.

In a border, the seed should be sown in an uneven circle with stakes marking the place. When the seedling are a few inches high, thin them out to a distance according to the size of mature height of the plant. Do the thinning out when the ground is moist. Those annuals are broadcast or sown in the clumps are Alyssum, Candytuft, Calendula, Cornflower, Kochochlina, Sunflower, Matthiola Stock, Nemophila, Nasturtium, Poppy, Portulaca and Virginian Stock. These annuals which are best when the seed is sown where they are to bloom in rows and transplanted to their permanent position in the border as seedlings include Asters, Coreopsis, Lavatera splendens, Malope, Marabilis, Nemesia, Petunia, Phlox Drummondi, Rudbeckia and Scabious.

Different Kinds Of Lettuce: No garden is complete without lettuce, which is the basis of most salads, and yet too often one depends upon a few poor ones of the bad kind which a few weeks after using turns bitter and there is nothing to replace it. But this is not necessary. One can select two or three varieties of the leaf sort and if planted at intervals of a week from the first day that gardening opens until well on in May or June, a steady month's supply is secured. Include one or two good varieties of the Head type. Following this one can depend on Cos Lettuce. The latter is a sort of Head sort but is much narrower. It is self-blanching and will stay fresh and crisp for several days if sprinkled with water and stored in the refrigerator or cool cellar. All lettuce delights in rich, loamy soil, plenty of cultivation and Nitrogen fertilizer.

Steamship Line

Canadian National starts service mid-ocean

The first week in the month of agricultural machinery to Australia has touched. It is now worth $30,000,000. This business has enabled farmers and manufacturers to put themselves once load with at least 30,000 fewer farm workers.

◆ FANCIFUL FABLES ◆

How to get to SLEEP

When you can't sleep, it's because your nerves won't let you. Don't waste time "counting sheep." Don't lose half your needed rest in reading. Take two tablets of Aspirin, drink a glass of water—and go to sleep.

This simple remedy is all that's needed to insure a night's rest. It's all you need to relieve a headache during the day—or to dispose of other pains. Get these Aspirin tablets and you will get immediate relief.

Aspirin dissolves immediately—gets to work without delay. This desirable speed is not dangerous: it does not depress the heart. Just be sure you get Aspirin Tablets.

CHAPTER X Continued.

For a moment groping about to retrieve his blunder, Dunnard hardly knew what to say or do. There had been no mistake; he had seen that knife with his own eyes when he glanced through the window to find where Alan was. He debated whether it's direct from his statement or to plunge ahead and tell the rest of it Joyce's momentary battle, the slumber that swept her whole body when she put the scarf into the stove, and the quick blinding tears that she dashed away.

He thought: "Better not get any deeper into this. I'd only blunder again. Better back out entirely."

He stammered. "I might have made a mistake. I might — uh — it might have been the wrapping paper. I just merely saw her put up something into and I jumped to conclusions. Must have been the wrapper. Why would any person want to burn up a gift like that? Let's forget it."

His tone carried no conviction. He realized it himself. Alan disbelieved him; Alan knew Joyce had burned the scarf she gave her.

Cursing himself hotly, Dunnard looked out across the purpling river. He had meant only the best, and he had dealt Alan a savage pitiless blow.

After a little time Alan said to him:

"You'd better go up, Dunnard; she may be waiting for us."

"Aren't you going?"

"No - not now; I don't much care. . . . I don't want supper."

Something in his voice warned Dunnard not to urge him. As he turned away, Alan said, in the tones of a man who has made some hard and abiding decision:

"When you've had supper, come back down here. I'll help you with that work, we'll do it now, so we can get away early. I was thinking for this evening something else. But that's out now."

At three o'clock the next morning Dunnard lifted the plane out of the Big Alcohn. With Alan directing him, he headed due north.

One hundred and thirty miles away, nearly four hundred miles from Fort Endurance, a small tribe of Tinneh lived along the western fringe of the Thal Anna. They were a timid, shrinking, inoffensive band, shouldered into a region where other tribes scorned to live. Slave MacMillan had given their friend and they brought him their furs and Alan, during his years at Endurance, had sent a protective patrol to them twice a year.

Joyce had found out where they were spending this summer, and Alan had a mission with their old head man Big Kithan.

When the timber country began yielding to lakes and semi-muskeg he got on his glasses and started searching ahead for their camp. At a height of five thousand feet he could sweep a region of more than two hundred square miles. The eye of an eagle, the wings of a bullet-swift curlew, and that big-barreled Browning machine gun through luck and driving purpose and a faith in his dubious plan he had smashed through obstacles till now he held the power and knew it. Alan was his friend.

The sure knowledge of this was about all that was left to him. His work in the Mounted, his life here in the North, were both gone and Burnard's calculating words last evening had showed him that his secret hope treasured Joyce's least love — was hope, a fool's wistful thanking.

How low he must have fallen in her estimation, that she should burn the gift to her! At first it had seemed a little cruel of Joyce to do that But then he looked at the incident with relentless honesty, and he could not blame her. Once he and she had pretended to marry. People had spoken of it; it had been generally accepted along the River that Joyce had truly loved him. What must her feelings have been as she watched his ruthless hands tearing apart and mercilessly gagged to another girl and coming no more to the Big Alcohn." She must have felt shame, a burning shame, at his touch. Much as she had hated Alan's mistress, she could not blame her. Once he and she had pretended to marry. People had spoken of it; it had been generally accepted along the River that Joyce had truly loved him. What must her feelings have been as she watched his ruthless hands tearing apart and mercilessly gagged to another girl and coming no more to the Big Alcohn." She must have felt shame, a burning shame, at his touch. Much as she had hated Alan's mistress, she could not blame her. On the first one, nothing — in the second, nothing But on the third He started suddenly straight that sent the cold clean form. Below them on that center island, conspicuous to their sky patrol, stood a solitary dirty white tent.

After a few moments Alan had pressure of mind again. He leaned back and shouted instructions.

"Drop down to a thousand feet. Fly over that island again, slow. Want to study it carefully before we start things."

Dunnard dropped down, swung around. As the plane sailed over a second time, Alan drew the binoculars to him studying the tent sharply, he saw a movement of the flap-front and distinguished a man's face, upturned, peering at them.

One bandit there at least! But the others? . . . .

A grave look into his mind: these others had probably gone hunting for caribou over east of the basin.

As though that weakness there he now realized what this ominous circling meant and had become panicky, a puff of white, a single puff, burst from the tent. Concussion, the man was alone and the others were gone, Alan decided to take this bandit alive. He needed information about the others, and information about that pack of dogs to clear Dave Miss McMillan.

While Dunnard circled at a safe distance, he tore a page from a memo book and printed a message.

"If you shoot again, we'll splatter you and that island into the lake with our machine guns. Stand out in the clear. No weapons on you. Don't try any crooked move after we light."

He wrapped the message around a monkey-wrench and handed it to Dunnard. From wartime practice of dropping "eggs" on ammunition dumps and second-trench Flammenwerfer and camouflaged batteries of Krupp 77's east of Verdun, with no assistance except two sails and a string along the fuselage, Dunnard won a good judge of speed, altitude and the right split-instant to release. Whirling over the island, a few hundred yards up, he pointed the missile with — a dozen paces of the flap-front.

As they looked back they saw the bomb run red to it, read the message, hesitate a moment, and then raise his left arm, waving something white.

A pistol-shot off the island. Dunnard lighted. Dunnard stayed in the machine, Alan and Bill got out the canvas canoe, slipped automatics into their pockets, took rifles conveniently in hand and went ashore.

While Bill searched the bandit for a hidden revolver, Alan looked at him curiously. He was a white man, a traitor to find in this country. Stunned, his skin olive, he looked as though he had oriental blood in his veins The rag he had waved in token of surrender was a sling. His right arm dangled limp at his side.

Alan demanded, "Are you the fellow we hit in that fight?"

"Chink" Woolfey nodded.

"Are those other men out hunting?" Alan asked, "or where?"

Woolfey balled his eyes slowly, as though taking thought. "Huntin', mebbe," he mumbled.

"Which way?"

"North-east."

(To Be Continued).

THE RHYMING OPTIMIST
By Allan Mowbray

YOU HAVE COME BACK

You have come back: the garden ways
Are bright as in those other days
When what
And suggestion
And hunger flowered to win your praise.

You have come back; the old brown glows
Again as gracious as a rose.
Through every room
Old loveliness returns
The magic of your presence flows.

You have come back, and O, my dear,
The wonder of your being here
Brings back never
Old loneliness or fear
And love we lost in yesteryear!

Cause Of Suicides

Hamilton Vanity Said To Be At the Bottom Of a Large Percentage

A study of suicides in the United States on thousands of life insurance company statistics led Dr. William Mahlberg to conclude that masculine vanity was at the bottom of a large percentage of these tragedies in the last three years.

"The thing that drives men to take their own lives," he says, "is not fear, but "is their inability to swallow the pride they have enjoyed building during their prosperous years. It is not the haunting fear of seeing their children go hungry, or his wife weaken under the monotony of housework, so much as it is the agony of visualizing his neighbor's glee when his 13-cylinder super-sedan is sold, and the family withdraws from the country club.

Friendship Tours Organized

"Friendship Tours," organized overseas, will bring parties of British visitors to Canada and United States to attend the International Congress of Women and the World's Fair at Chicago in July, according to word received at the Canadian National Railways Passenger Department, Montreal. Information indicates that about 300 British women will join the tours.

NAS LOST FAT FOR THREE YEARS

56 lbs. Gone Altogether

A woman writes "For nearly three years I have been taking Kruschen Salts every morning in hot water and have lost 56 lbs of fat My weight before taking them was 196 lbs and it is now 138 lbs. Compare the difference — it is marvellous My mother and sister are also taking Kruschen and lots of our friends and think they are wonderful As regards diet, it is not necessary to eat too little but of course in my case I have never denied myself anything since I started taking Kruschen Salts. I walk every day and do not eat many potatoes or much sugar I don't think I shall ever be grateful enough to Kruschen Salts for the great help they have been to me, and shall never stop taking them, or recommending them to people I think need them." — Miss K T

Taken every morning, Kruschen effects a perfectly natural clearance of undigested food substances and all waste matter which would otherwise form into fat. Kruschen is regularly supplied, Nature will eventually store it up and of the way in the form of ugly fat.

old headman sprang his astounding news.

Two suns ago, he said, Tukeyli and another Indian who had gone to Fort Ward into the Land of Many Waters to locate rat colonies for autumn trapping. One evening they heard the sound of fire-sticks far away southwest flipping up timid, cautious. they saw some strange men with queer canvas for feet. They saw a tent, a camp on an island

For several minutes, fighting down a wild elation, Alan forced himself to think clearly, asking questions, getting that map and that spot unforgettably in his mind

At the sycamores he released Bill.

"Come on! Let's be getting into the air! An hour and a half from now we'll be saying it with a machine gun. Then we'll new up here we brought our luck along!"

From his height of three thousand feet he scanned the country spread below him. Alan could follow the crude finger map without once being in doubt. That should be the great lake-water lake which Big Kithan had described. It should have islands in the center of it On one of the islands near the north edge of the cluster the bandits should be camped, if they had not moved on.

"Swing north" he shouted at Dunnard. "Those lights there to themselves."

The machine swerved and throbbed over. One by one Alan started to count the fires On the first one, nothing — on the second, nothing But on the third He started suddenly straight that sent the cold clean form. Below them on that center island, conspicuous to their sky patrol, stood a solitary dirty white tent.

After a few moments Alan had pressure of mind again. He leaned back and shouted instructions.

"Drop down to a thousand feet. Fly over that island again, slow. Want to study it carefully before we start things."

Dunnard dropped down, swung around. As the plane sailed over a second time, Alan drew the binoculars to him studying the tent sharply, he saw a movement of the flap-front and distinguished a man's face, upturned, peering at them.

One bandit there at least! But the others? . . . .

A grave look into his mind: these others had probably gone hunting for caribou over east of the basin.

As though that weakness there he now realized what this ominous circling meant and had become panicky, a puff of white, a single puff, burst from the tent. Concussion, the man was alone and the others were gone, Alan decided to take this bandit alive. He needed information

DOCTORING YOUR DAIRY HERD

Cows aren't machines. They can get sick or hurt. But Hannah's Calmont makes it easy to cure the many ills. Mrs. Tom Hannah of Lorde, B.C., found one of her kind with a lump in her udder. She rubbed it with Hannah's Liniment, she says, "and it soon got better." Hannah's is best for Colic, Distemper, etc., and equally good in cattle as in horses. Ask about "King of Pain", at

Little Helps For This Week

"This God is our God forever and ever: He will be our guide even unto death." — Psalm 48:14.

Be still my soul; thy God doth undertake
To guide the future as He has the past.
Thy hope, thy confidence let nothing shake,
All now mysterious shall be bright at last. J. Borthwick.

He has kept and fielded us from ten thousand ills when we did not know that He was behind of our security we should have perished every hour but that He sheltered us "From the terror by night and the arrow that flieth by day" From the pravent of evil that walk in darkness, from snares of our own evil will. He has kept us even from ourselves and saved us from our own undoing Let us read the traces of His hand in all our ways, in all the events, changes and chances of this troubled state. It is He that feeds and feeds us, that makes us to go in and out, — to be faint or find pasture, to lie down by the still waters, or to walk by the way that is parched and desert.—H. E. Manning.

Age Of Technocracy

Machine Power Shown To Be Much Cheaper Than Man Power

The Montreal aldermanic relief committee has set out to determine just what are the differences between man-power and machine-power in labor, and here are some of the results:

One mechanical truck loader and operator equals 80 men.

2. Loader fills a truck in five minutes; the gang requires from 40 to 60 minutes.

3. Cost per truck, Loader, 40 cents; gang, $20.00.

4. Cost per truck, Loader, 12 cents; gang, between $3 and $4.

These preliminary data will be checked in a more extended experiment on a pipe-laying job next. The last grow out of the demand that labor-saving machines be done away with and unemployed laborers substituted.

Reciprocal Trade Agreement

Tariff Conversations Between Great Britain and Germany Over Reciprocal Trade

Reciprocal trade and tariff conversations between Germany and Great Britain were announced recently. The object for British coal exports to Germany has been nearly doubled and in return the United Kingdom makes concessions upon certain German goods.

The announcement of arrangements of increased trade with Germany follows upon an earlier statement declaring a new trade agreement with Denmark by which Great Britain's market in Denmark for her industrial products will be greatly increased in return for increased quotas granted to Danish dairy and agricultural products.

Sir Thomas Horder, distinguished Physician of London, England, has stated:

"The willing and happy worker will get more work done and do it better than the unwilling and discontented worker. It is in this direction that alcoholic beverages like beer make their great contribution to economic efficiency.

"Appetite is a function of the brain as much or even more than of the stomach, and its importance in the physiology of digestion and nutrition is very great. It is stimulated by a moderate use of such a beverage as beer, and at the same time zest is given to life which results in larger and richer activities."

Brownies' Plays Delights Large Audience

Those who had the good fortune to be present at the Empress theatre on Friday, May 18th, were unanimous in the praises they bestowed upon the skilful performances of the Brownies of Fort Saskatchewan.

Under the capable direction of Mrs. T.W.E. Henry, cheerfully assisted by Miss Roberts, they presented their talents in the form of two little plays, entitled "Silverlocks and The Three Bears" and "Little Prit".

The Brownies, eighteen in number, portrayed the various characters with the naturalness and abandon so charming in youth. It would be impossible to individualize or give praise to anyone in particular, as one and all were word-perfect.

In the intervals Miss Jones, Mr. Watt, as well as Wanda Kelterborn and Margaret Webb delighted the audience with vocal and dance numbers.

The able work of Tom Henry at the piano attributed largely to the final success of the performance.

His Worship Mayor Montgomery very kindly acted as chairman during the evening.

The evening and explained the object of the Brownies in the following manner:

"The object of the Brownie-Pack is to provide recreational training for small girls and to aid and further the work done in school in laundering the four necessary ingredients in children:

1. Character and Intelligence.
2. Skill and Handicraft.
3. Personal Health and Hygiene.
4. Service for others and Fellowship.

The method employed is that of encouraging the child's desire for active achievement and self expression, instead of forcing her to submissive acceptance of imposed instruction.

Brownies are not merely little girls who are being kept out of mischief until they are Girl Scout age; they are little people being trained constructively in the underlying ideals of Girl Scouting, in a word. They are quick, quiet, merry little people, fit in brain and body to be a real help; to be counted on in the home as seriously as the Girl Guide should be counted on in the community".

Cast of Plays

First Play—"Silverlocks and the Three Bears".
'Silverlocks'—Bernice Ashton.
'Children'—Isabelle Copeland, Dorothy Lamb, Hazel Pinsell, Phyllis Spallin, Ruth Thorne, Violet Chesbrok, Betty Watt, Gwynneth Hallam, Clori Chesbrok.
'Fairy'—Wanda Kelterborn.
'Witch'—Marin Grunert.
'Grandfather'—Jean Buchanan.
'Grandmother'—Faye Roberts.
'Father Bear'—Marie McLellan.
'Mother Bear'—Elsa Pinsell.
'Little Bear'—Marjorie Smith.
Second Play—"Little Prit".
'Little Prit'—Faye Roberts.
'Stylish Lady'—Ruth Thorne.
'Little Girl'—Betty Watt.
'Maiden'—Phyllis Spallin.
'Old Woman'—Isabelle Copeland.
'Bo-Peep'—Wanda Kelterborn.
'Marjorie Daw'—Marjorie Smith.
'Miss Muffit'—Bernice Ashton.
'Policeman'—Marie McLellan.
'First Fairy'—Marin Grunert.
'Second Fairy'—Dorothy Lamb.
'Fritz's Mother'—Jean Buchanan.
'Yellow Dwarf'—Elsa Pinsell.
'Red Dwarf'—Hazel Pinsell.
'Green Dwarf'—Violet Chesbrok.
'Blue Dwarf'—Clori Chesbrok.
'Lord Mayor'—Ruth Thorne.

The Fort Rsch. Community Tennis Club will hold a Tennis Dance on Wednesday, May 30th, in the Simmons Hall. Dancing 9 till 2 a.m.
Admission 50c each. Refreshments.

STOP GAS PAINS GENIAL HERBINE GIVES RELIEF

Acting on BOTH upper and lower bowels Alberta washes out all poisons that cause gas, nervousness and bad sleep. One dose gives relief at once. F. W. Smith, Druggist.

Josephburg News

The eight cars which left Josephburg at 9 a.m. on Thursday morning with 33 pupils and 16 adults for the School Festival at Smoky Lake returned early next morning with every member of the party thoroughly tired but well pleased with the honorable part taken by the school in the various competitions.

The success which gives the most general satisfaction is the winning for the third consecutive year of the Minhow Cup, presented for the best Two-Room Rural Chorus. This trophy is now the treasured possession of Josephburg School District.

Other gratifying successes were as follows:—

Marion Krebs, 3rd Rural Solo, Gr. 4
Warren Tone, 3rd Rural Recitation, Gr. 5.
Stella Dose, 1st. Rural Solo, Gr. 7
Margaret Mans, 2nd High School Solo.
Stella Dose and Ellen Krebs, 1st. High School Duet.
Margaret Mans and Mavis Ashton, 2nd High School Duet.
Mamie Romaghan and Hilda Frey, 3rd High School Duet.

The Senior Room, with a score of points, gained second place in the Competition for the Highest Rural Aggregate. The prize is a set of ten books, Children's Classics wisely chosen and kindly presented by the Women's Institute of Smoky Lake. For their success in this, the seniors are greatly indebted to the devoted training of Miss E. Gerlitz, who was ably assisted by Mrs. J. W. Dose.

Pupils and teachers wish to thank all who encouraged and inspired them throughout the busy weeks of preparation; the School Board and the Festival Committee for making all arrangements for the long journey and the following for the use of their cars:—Messrs. R. Krebs, A. Bailey, E. Hinz, Wm. Unterschultz, F. Romaghan, G. Krause and J. W. Dose.

Good Hope

The Good Hope girls have organized a soft ball team. Their first practice was held last Saturday evening, May 12. Times are hard but give them your support, they need it.

*****

Miss Ada Meyer spent part of last week at her home.

*****

Fields around the district would be looking green again, if it wasn't for May's snow flurries.

*****

Mr. Charles Thomas was an Edmonton visitor last Friday.

*****

Mr. Alex. Macdonald spent last Sunday with his wife and family.

*****

Miss Verna Johnston was an Edmonton visitor over the week-end. She was also the guest of Miss Marion Cranston.

*****

Many geese have been seen flying north, some of which have made their feeding grounds in fields about the district.

CASTLE FESTIVAL NEWS

Quite a few of the people from this district attended the Musical Festival held May 11, in Smoky Lake. The roads were rough, but passable, the trip being made in about three hours. The worst part of the trip was coming home in the wee small hours of the morning. The festival was a success and a large number of entries were ordered in each class.

The Home Castle S. D. was successful in were as follows:—

One-Room Chorus—First Prize-Dr. Archer Cup.
Action Song—Second Prize.
High School Duet—First Prize
Alma Clish and Alma Stanley.
High School Recitation—Third Prize Alma Clish.

It is estimated the American people spend more than $6,000,000 yearly on commercial amusements.

COURTS READY FOR TAPES

Brownie Tennis Club Plan Active Season; Officers Named

Four new courts are ready for the tapes and Brownie Tennis club is planning an active season. Officers for this year are, President, Mr. Clayton McClinn; treasurer, Mr. W. H. Foster; social, Miss Helen Latan and Messrs Ralph and Richard Armstrong, tournament committee, Miss Lowra Wilkinson and Mr. William Hecks.

Presented Badges

The Brownies, who have been preparing themselves for their second class badges, at their regular meetings in the past few months, were very fortunate in receiving them from Miss MacMahon, Dominion Field Secretary, of Winnipeg Mrs. Symes, Provincial Secretary, also visited them on the same day.

They were to have been inspected by Mrs. Hopkins, Provincial Guide Commissioner, who, unfortunately owing to illness, was unable to attend. She expects to visit them at a later date.

The following is a list of those who received their badges:—

Bernice Ashton; Jean Buchanan; Isabelle Copeland; Marin Grunert; Gwynneth Hallam; Wanda Kelterborn; Dorothy Lamb; Marie McLellan; Elsa Pinsell; Hazel Pinsell; Faye Roberts; Marjorie Smith; Phyllis Spallin; Ruth Thorne.

The Brownies were more than pleased to have so many visitors from the Town and hope they will come often.

At the last meeting Josephine Cary received her Bronze Pin and is now a Brownie.

From now on we shall be busy working on 1st Class Badges and the new ones on their second Class.

Women's Institute Hear Interesting Address

The regular meeting of the Fort Saskatchewan Women's Institute was held on Thursday, May 10th. Mrs. F. S Truby, Vice-President presided in the absence of the President, Mrs. C. H. Grunert.

The report of the Cemetery Committee was given and appears elsewhere in the Record.

In spite of a very busy week of daily demonstrations in Edmonton, Miss J. Macgregor Smith B.Sc. of Edmonton and formerly of the Household Science staff of the University of Saskatchewan and new Convenor of the Household Economics Committee of the Federated Women's Institutes of Canada took time to come at her own expense to address the Fort Saskatchewan Women's Institute. She was accompanied by Miss Margaret Doyle, B.A., B.Sc. of the Household Science staff of the University of Alberta.

Mrs. Macgregor Smith spoke on the topic, "It's Up To The Women", pointing out that as spenders of 85 per cent of the country's money they should understand values rather than price. She warned against being carried away by fairy-tale advertising and reminded that buying very cheap ready-made articles is not only wasteful but is also responsible for sweat shop conditions for workers, which conditions are more prevalent at the present time than for years, largely due to the cry for price rather than value. She told of the excellent results following the Home Economics Week observed in Edmonton last month. "The challenge to all women", she said" is the wise spending of the dollar."

Miss Doyle dealt with the quality of the merchandise in the newest of the textiles, rayon. She told of the processes involved in the manufacture of the four different types of rayon fabric now on the market. She showed various samples of these and told of their wearing and washing qualities. Her address included a very interesting demonstration on stockings when she showed the values of the various types as to appearance wearing and washing properties and explained the manufacturing process in each type. Linen also comes in for a brief discussion and various questions were exhibited and explained.

Mrs. Stanley Dennis very graciously expressed the appreciation of the members to the speakers of the afternoon after which a cup of tea was served. Mrs. Davis and Mrs. Edward Graham being hostesses.

It was very regretable that only a very few of the Fort ladies attended the meeting as it is not often such out of town speakers are available.

Several items had to be left out of this weeks paper on account of lack of space.

HAS FIELD CROPS ALL IN

Mr. Rudolph Hennig was a visitor at the Record Office Tuesday morning and reported that he had finished putting in his entire crop, including the vegetable garden on Monday, May 14th. Mr. Hennig started seeding on the 27th of April on his 320 acre farm and finished on the 14th. This is about ten days earlier than last year and we might say it is a record for around this district.

With warm weather, after the wet snow storm of Tuesday, crops will come shooting up.

The International Way

The mass extensively a person reads apparently authoritative articles and books dealing with present day economics; the more intensively he studies, investigates, and seriously ponders over political, economic and social problems with an open and discerning mind, the more such a person becomes convinced there is, after all, only one way by which solutions for existing problems and difficulties can be reached,—and that is the international way.

Consider the Canadian position as an example, and the situation in this country is in most respects similar to that existing in other countries throughout the world.

This Dominion is a land of great natural wealth; its people are intelligent, progressive, and anxious and willing to work. They have enjoyed a high standard of living in the past, and desire it to continue. They possess political and religious freedom, and have inaugurated and maintained social services for the benefit, not only of individuals but for whole communities and the nation.

Nevertheless, at the moment, the development of natural resources of Canada, our great reservoirs of potential wealth, is at a standstill, while hundreds of thousands of men and women remain unemployed and approximately one and a half millions of the population are subsisting on relief provided by the State. The standard of living is falling, not rising; social services are being abolished or curtailed; the burden of public debt is growing every day, and heavier and ever heavier taxes are being imposed.

What is wrong? Is Canada, and the Canadian people, alone to blame? Are they even chiefly to blame? Are our public men in Governments, Parliaments, Legislatures, Municipal Councils; our bankers and financiers; our captains of industry and transportation; our leaders in commerce and business and agriculture; our leaders in church and education,—are these chiefly responsible? Is it the system in vogue in Canada under which all our life activities and institutions have been operated and governed in the past, and under which great progress was made, responsible for the present breakdown?

Some short-sighted people will thoughtlessly say "Yes," and will try to convince others that the whole trouble lies in the system and that Canadians, if they will, can solve their own problems by their own action; that all they have to do is to change the present system, and create a new system which is entirely different not of principles. And the same thing is being said in other countries.

This, however, is a superficial view. Suppose Canada could tomorrow create within its own borders an absolutely ideal 100% perfect monetary, banking and credit system while other nations adhered to their present systems and methods, would that solve Canada's problems? Intelligent men and women realize it would not.

Suppose Canada tomorrow adopted absolute free trade with the world in an endeavor to again revive the exchange of commodities and once again set in motion all the great activities bound up in trade and commerce, while other nations adhered to their present policies, would that put Canada's unemployed to work and revive Canada's Agriculture? Again, the answer is most decidedly "No."

The solution for our present economic problems is not to be found in a complete change in the system now prevailing in Canada,—that would merely result in still greater unsettlement, in confusion ending in chaos, and more widespread loss and suffering. But it is to be found in international action. It is only so it can be found.

But what Canada and the Canadian people can do, and ought to do, and, we believe, are striving to do, is to encourage such international action, and to create those conditions and ideas in the minds of the people of other nations that will make such international co-operation and action possible. Little Dominion can assist to the whole world that it is ready and eager to join hands with any other nation, or nations, in order to put an end of breaking down narrow nationalistic ideas, suspicions and fears. Every opportunity that presents itself,—and where they do not present themselves Canada should make them,—no matter how small it may be, should be quickly grasped, and Canada should indicate, without reserve, that it is prepared to go a long way in the direction of meeting other nations and peoples in providing needed solutions to existing problems.

Organized labor had the germ of the right idea in its international labor brotherhoods organized for mutual protection, but, unfortunately, even within those brotherhoods a selfish nationalism existed, with the result that organized labor in one country proceeded to organize within trade unions designed to protect themselves but to do injury to their fellow workers in another country. The folly of this has been brought home to Man in Once years of depression, just as it has been brought home to the bankers and great trade leaders in all countries. Nationalism simply won't work.

That is what is fundamentally wrong with the prevailing system,—the attempt of each nation to save itself up in a watertight compartment away from all other nations, and in so doing to slowly but surely starving itself to death.

The tearing down that is necessary, in the tearing down of the whole network of wire entanglements and barriers of one kind and another that the nations have erected against each other; the destruction that is called for in the destruction of the narrow nationalistic ideas and fears of people. Let the nations get off the by-paths of narrow nationalism and on to the broad international highways of the world, and the depression will pass like a mist before the rising sun; unemployment will give place to industrial and business activity everywhere with the workers of one nation not begrudging ours to other nations provided they are busily at work themselves, as they would be; and the primary producers on farms, in forests, fisheries and mines will again enjoy adequate markets and remunerative prices for the things they produce.

The international way is the world's highway; the international method is the Twentieth Century Method.

Academy Selects Painting

A painting by Mary Symons, entitled "The Last Supper," and depicting Christ and His apostles in lounge suits, colors and crevats, seated at a modern table, has been rejected by the Royal Academy of Britain.

Old Roman ruins at York, England, are being furnished to accommodate late night visitors.

The oldest ski in the world is in a museum in Stockholm, Sweden. It is believed to be 3,000 years old.

Needle and Pin Industry

Little English Town Supplies Practically All World Requirements

At a recent banquet of the Needlemakers' Company the Master stated that last year Great Britain manufactured 150,000,000 needles. Most of them were made at Redditch, in Worcestershire. Nearly all the needles, all the pins and all the fish-hooks in the world are made at Redditch. Nearly everybody in Redditch is employed making needles, pins and fish-hooks, and their ancestors have done so for hundreds of years. The Redditch factories are the most efficient in the world and are in an impregnable position.

If they turn out 750,000,000 needles a year, that means that in two and one-half years they make enough needles to give one to every human being on earth. Query: where do the billions of discarded needles go? The ground of safety razor blades is an awkward problem. What about needles and pins? They must be put somewhere, but there is room for demand for hundreds of millions of new ones each year. In fifty years Redditch must have made needles and pins to carpet the earth and seven suns. Yet one scarcely ever sees a needle or a pin lying around. In fact a pin seems about the rarest thing imaginable sometimes when it is badly wanted.

Needles, pins and fish hooks are one of the staple lines of manufacture that Great Britain stands supreme in. There are hundreds of others.—St. Thomas Times-Journal.

New Fire Fighting Inventions

One Uses Only Water To Put Out Oil Fires

Some new fire fighting inventions were described by Commander A. H. F. Penrose, Divisional Officer of the London Fire Brigade in a lecture before the Royal Society of Arts. One is a method of putting out oil fires with water only. Another was was a Hungarian appliance which extinguishes quickly small fires by pumping on to them bicarbonate of soda and carbon dioxide gas—the gas obtained by purifying and treating the exhaust gases of the internal combustion engine which propels the appliance. The system by which oil fires are put out with water alone has been evolved during the last year. It has received the approval of the Board of Trade for ship installations and has been tried in many instances on shore, but so far it has only had a chance to prove its worth under test conditions. Water sprays are so fitted that every space, concealed or otherwise, can be bombarded with spray under pressure. The bombardment of the oil breaks it up into a multitude of tiny globules, each surrounded by a thin film of water. This emulsion, as it is called by chemists, will not burn, since the flame only reaches the water film surrounding the oil globules. The surface of the liquid being thus non-inflammable, the fire at once goes out.

Gasoline Tax Refunds

Will Be Subject To a Fine Cost Deduction In Saskatchewan

Gasoline Tax refunds in Saskatchewan farmers operating power machinery will be subject to a one cent deduction per gallon, it was demonstrated in the three prairie provinces, and most of this area is needed to the grain crops, with a view to demonstrated in Roughly speaking, the specialized wheat areas cover the southern sheetgrass plains from the Red River Valley of Manitoba to the foothills of Alberta and attain their greatest width in central Saskatchewan.

An evening air service between London and Paris has just been inaugurated.

2 EXTRA CORD PLIES UNDER THE TREAD

AT NO EXTRA COST

GET your money's Worth—buy Firestone—the tire that has everything to give you both long mileage and safe mileage. Only in Firestone can you get all three extra features which give you 25—50% longer tire life—at no extra cost:

1 TWO EXTRA CORD PLIES UNDER THE TREAD—make the tire safe at any speed;

2 GUM-DIPPED CORDS with 50% longer flexing life;

3 NON-SKID TREAD—wider, deeper tread to give 25% more non-skid wear.

Worn tires are dangerous—Replace them now. Equip your car with the safest tires you can buy. See your nearest Firestone Dealer today.

AMAZING NEW GUARANTEE

Firestone tires are now guaranteed for 12 months against blow-outs, punctures, bruises, and all other road hazards except punctures caused by glass. That's why you should buy Firestone

New Type Of Banana

Trinidad Planters Find Successor To Gros Michel

The discovery of a new type of banana at Port of Spain is expected to make economic history in Trinidad.

Thomas Potter, the secretary of the Agricultural Society, told an audience the banana was of the same family as the local Canary Islands banana, known as the "Poyuma Gros Michel," but was the same size and color as the Jamaica banana.

It promises to meet all requirements of the export trade and is described as the "banana of the future." A committee recently recommended a grant of £2,000 to develop banana exports from the colony. The Tropical College is now experimenting to find the best temperature for sun transport of bananas.

A Talkative Peninsula

The largest peninsula in the world is now on show in London. It was made in 1931, and has 1,001 blades, each of which can be opened. Each blade is a perfect peninsula. The knife weighs over three stone. An offer of £7,500 for it has been refused.

Poles Around Her Heart Bled Out After Being Discovered

Mrs. Henry Bench, Mantel Lake, Alta., writes:—"Last fall I had bad pains around my heart, and such smarting, after eating a little hovework, I seemed to get dizzy and had all blood out.

Reading about Milburn's Heart and Nerve Pills were good for these troubles I sent for a box, and after taking the Pills for a few days I felt a whole lot better. Since then I have had no return of the dizzy spells and pains around my heart."

Heart and Nerve Pills are 50 cents a box at all dealers or The T. Milburn Co., Ltd., Toronto, Ont.

MANY WAISTLINES

Use 4 hundred rows. Always have 4 box in the kitchen.

Quickfood queen crescent

EDMONTON, ALBERTA

Seed From Ponce River

Fur-famed world championship wheat of Ponce River will be needed in Newfoundland this season. Made up half of Reward and half of Marquis, a carload from Wembley, Alberta, has been forwarded to the Empire's oldest dominion. Much of the shipment came from the farm of Herman Trelle, world champion wheat grower.

The United States is the largest consumer of asbestos in the world.

Java has an extensive back-to-the-city movement.

Many Theories Advanced As To Why Sun Has Been Darkened Without Being Eclipsed By Moon

It is interesting to recall that the sun has sometimes been darkened without having been eclipsed by the moon, says a writer in TIT-BITS.

Pictorial records that in the first years of the reign of Augustus the light of the sun became so faint that it could be looked at with the naked eye. Here again, comments have been advanced as the cause, but it is extremely doubtful if they were correct in this instance, responsible for any interference with the light. Even the largest naked eye spots, it will be found, can be dismissed.

Still more mysterious is what the astronomer, Kepler, mentions in hearing occurred in 1547, namely, that the sun and for some time such a reddish light that the stars shone out at noon. The same thing apparently has been accounted for by the prevailing atmospheric conditions but the circumstances of the stars shining at midday seem to point to some cause of any mention of an eclipse.

Kepler thought that some dense cometary matter must have caused the redness, but when Halley's comet passed over the sun at its last return in 1910, nothing of it was visible on that body, nor was there the least fading of the light.

There have been in more modern times some non-happenings at periods when the sky was apparently quite clear. To all appearances, indeed, there was the full light from the sun and not have shone with undiminished splendor.

One can surmise, in regard to these cases, that a very fine volcanic dust may have been suspended at a great height in the atmosphere, as it was after the terrific eruptions of 1783, and the world-shaking outbreak of Krakatoa in 1883. In the latter case the sun for long afterwards had a mere dull, reddish aspect, whilst during the lunar eclipse of October, 1884, the moon practically disappeared from view. A ruby it has a coppery-red color when totally immersed in the earth's shadow.

While not favoring the idea of the passage of dense swarms of meteors partially cutting off the sun's light, it is not impossible that enormous flocks of birds might do something towards bringing that about.

Be that as it may, one is loth to believe that any such change takes place in the sun itself, such as can be observed in many of the infinitely more distant fixed stars.

Nor is it to be supposed that there is involved anything which goes outside the recognized power or laws of Nature; anything, in short, which is supernatural.

Preparing For Honey Flow

Manitoba and Saskatchewan Order Package Bees From South

Two hundred carloads of bees from the Scotsheck district of Manitoba have made the long trip to Maybees, Mississippi in a truck to secure package bees for themselves and neighbors. They are bringing back 300 packages or about 2,000,000 bees in time to stock up hives in Manitoba in preparation for the honey flow.

Last year the Saskatchewan Beekeepers' Association sold 1,700 packages but this year orders for more than 1,700 packages have been placed and the shipping season has hardly commenced. Packages are imported at this time of the year because conditions may double those of last year. Previously most orders received were for two or three packages, and few more than twenty-five. This year there is a surprising number of orders for twenty-five, fifty, seventy-five, and one hundred or more packages.

Wheat Silver Are Taxed

A campaign has been started against the sales tax in New Zealand on Bibles and prayer books. E. Miller, Australian representative of the Oxford University Press, opened the campaign in Wellington recently. He declared that New Zealand is the only country in the world, with the possible exception of Russia, where the Good Book is taxed.

Volume Of Trade Parallels

Buying Power Of People Is Over Pre-Long Feature Of Present Situation

While there is a great lack of money in circulation the volume of trade in farm products does not appear to be checked. The buying of farm products in Montreal is carried on quite largely by cash payments, as compared with the credit system in vogue in other parts of the country. The volume of business transacted in the Montreal Grain Exchange during the month ending January 31, 1933 had been on a strong upward trend, being 12 per cent. on canned fruits to two per cent. on hams and bacon, and 3.82 per cent. on fresh pork.

The buying power of the people of the United Kingdom is one of the puzzling features of the present trade situation. The output of coal in Canada differs where some of its industries are especially unaffected. Even Australia, in the midst of a disastrous drought, has reserves and a half to six months being received in Montreal at the end

Soldiers Of Japan

Are Issued To Fix-Ship and Have Reverence For Authority

The Japanese soldier has once more shown that he is a factor to be reckoned with in world affairs. It is difficult to compare him with his European confrere and, beyond the fundamental military virtues of discipline, courage in adversity and amenity to the pipe he bears little resemblance to the British "Tommy Bunt," bullet headed, fat-necked and deep-chested, the Japanese peculiarly from whom the majority of the recruits are drawn are inured to hard ship from childhood. The native qualities of cheerfulness, simplicity and reverence for authority are fostered in the elementary schools, where attendance is compulsory, and with the current results recognize of the special training on which the Japanese fighting services lay much stress, and which is the foundation of their strength.

By Ruth Rogers

CHARMING ACCESSORIES THAT WILL GIVE YOUR LAST YEAR'S FROCK A NEW LOOK

The dalatiest of collars and cuffs are putting in an appearance in Paris. They are fashioned in organdie, in organdie, in crushy crepe silk or in piqué, in white.

The delightful group included in today's pattern could be made up in almost any of these fine materials.

The collar and cuff set in the lower sketch is especially nice in crepe silk or in piqué.

The pointed frilled cuffs and the upper sketch is lovely in crepe silk or organdie.

Style No. 622 is designed in one size only.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Careful Drivers Wanted

Fewer Accidents Would Result In Lower Insurance Rates

The action of the Automobile Underwriters' Association in reducing rates and allowing the 10% discount to careful drivers, will meet with general approval.

It is no more than fair that persons who have never figured in accidents and consequently have never turned in claims, should receive special consideration in their insurance rates. The more there are of these careful drivers, the better for the insurance companies. Consequently every reasonable should be done to encourage them.

Every driver, of course, should use the utmost care, not only for the sake of his own life and limbs, but for others and for the sake of his pocket-book. For the careless driver is induced 50 per cent and this is quite possible—think of the reduction the insurance companies would be able to make in their premium rates.

Ancient Farm Implements

Some Old-Fashioned Things Sold Recently In England

Some of the implements offered at a recent farm sale at Brigg, England, were over a hundred years old, and included old-fashioned chaff-cutters and single-handed corn drills, and ploughs weighing over half a ton and having beams up to 16 feet in length, and some very old pole waggons, the wheel bands of which were still of hoop iron.

Air mail service across the Sahara desert is to be started shortly.

Indians Are Confident Curse Of Forefathers On Fernie Has Caused Disasters It Has Suffered

Market For Choice Lambs

Short Lambs and Heavy Lambs Will Bring Low Prices

The markets will continue this year to pay more for ewe and wether lambs and bunks of suitable weights.

Even early in the season before lambs take on their most salable features they are of good enough quality to sell at the stockyards and points, than for lambs over 90 to 110 lbs. and up to two cents per pound more than for lambs over 110 lbs.

Farmers are urged to meet the simple requirements of the market in order to secure top prices.

What One Acre Produced

Eight-Acre School Teacher Had Remarkable Results From Small Plot

A teacher in a school in the South of England had such an allotment of one acre. It was partly given over to growing fruit and vegetables and partly to the raising of ducks, chickens and rabbits. And this is what this remarkable woman achieved. I quote here from a printed report. "The raised vegetables enough to feed fifty people for nine months of the year, and 1,000 lbs of jams from the fruit in the orchard fed the boys on ducks, chickens and rabbits, and took the bones eggs to the hospital on Christmas Day, over and above what was needed for the school"—Overseas Magazine.

The Utility Of Garnet

Has Its Place In Assisting Farmers In Various Districts

Should success crown the present experiments of the Dominion Department of Agriculture in combating the outstanding quotation of Reward and Garnet wheat, says Mr Mowman, the Commissioner of Agriculture, he will be able to solve the value of such an accomplishment to Canada. Although Garnet is not considered quite the equal of Reward, the point is that quality many farmers report that Garnet is enabling them to carry on where they might otherwise have had to give up. Garnet however, is not recommended for any district where other Marquis or Reward thrives satisfactorily.

Rice stored in Japan on March 1 totalled 20,000,000 bushels or 20,000,000 more than on the same day in 1932.

I'M THE CHAMP AND DON'T FORGET IT

It may have been the typical John Bull spirit that won for "Jimps the Dip" the title of Champion Dog of the British Bulldog Champ Contest in London, or his good looks may have had something to do with it. Anyhow it knocks ill for any who try and take the trophy out of his sight.

Value Of Cooling Milk

Milk Should Be Cooled A. Promptly As Possible

It is a simple matter to prevent bacterial growth in milk. At 70 degrees F there is practically no growth, the number of bacteria at the end of 24 hours at 50 degrees the number is reduced one-third and at 60 degrees nearly a hundred times as many. At the start ages the Department of Agriculture at Ottawa could not promise to produce Grade A milk unless it could be promptly cooled to 50 degrees F. or lower. Many dairymen have been able to restrain bacteria for a certain period if the cooling is delayed. Effective pasteurization of milk is the most effective way to control it, 21 days or longer.

Canada is compelled to import figures of artificial fibers used in billboard bills.

IN TEARS WITH PAIN OF RHEUMATISM

"For six weeks," a woman writes, "I had rheumatism, mostly in my feet and wrists. In fact, I have been in tears with the pain. Owing to stomach trouble, I could not take any kind of medicine as it made me feel sick. So a lady said I should try Kruschen Salts. I am very thankful that I did so, for now I feel completely restored. I have not been taking anything else, so it must be Kruschen that has relieved me." Mrs. C.

The six essential salts of Kruschen have a direct effect upon the whole bloodstream, neutralising uric acid, which is the recognised cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation thereby checking the further formation of new acid and clear body of poisons which cause the trouble.

WORLD HAPPENINGS BRIEFLY TOLD

Twelve feet high and weighing two tons, a statue of Christopher Columbus was shipped from Milan to America as the gift of Italo-Americans to the Chicago World's Fair.

Publication of names of those in receipt of incomes of $100,000 per year and more will not be permitted, Hon. E. N. Rhodes, Minister of Finance, told the House.

Power to raise by way of a loan an amount not exceeding $750,000,000 will be sought by Hon. E. N. Rhodes, Minister of Finance, in a resolution of which notice has been given.

During the eight months of the present crop year ending with March, 19,676,775 bushels of Canadian wheat have been shipped via United States exports, said a report issued by the Dominion Bureau of Statistics.

Petitions containing 400,000 names as protest of banning Judge Rutherford's lectures by the Canadian radio broadcasting commission were presented in the House of Commons yesterday.

Creating what is believed a record in Canadian flying visit circles, Wallace Ostrom has completed tests at Winnipeg for his private pilot's license less than 33 days after he took his first instructions. He has completed 50 hours solo flying.

"China, my country, is now in great danger. It is my duty to help save my country and I am going home," said Dr. Kiang Kang-Hu, head of the department of Chinese studies at McGill University, in bidding farewell to a group of Canadian friends at Montreal. Dr. Kiang sailed for China from Vancouver.

Business in Montreal continued Toronto statements that a reduction of one half of one per cent. in the six per cent. interest rate on bank loans had been put into effect in a varying extent. Question of applying the reduction is left with the individual banks, it was explained, and banks are following action on individual cases.

Law For the Bird

Interpreted Queerly Spelled Word For Benjamin Franklin

Benjamin Franklin was always very keen about the correct spelling of words, and he used to maintain that the best story on bad spelling concerned a letter which ran: "Jest a line to let you know that I am now among to his yd." Mrs. Deborah Franklin, even, could not interpret this, so interpreted for and to her, by the chambermaid, who promptly replied: "I'll guess with: what else can it spell?"

Finance then isn't shared with another loose ball its power to please.

Where Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls do their own cooking and sewing and housework. Give your daughter Lydia E. Pinkham's Vegetable Compound for the sake of her monthly health but how to tell her and her mother is the question. Write to her mother in confidence, and tell her you have a daughter who is approaching womanhood. Ask her to write to Lydia E. Pinkham Medicine Co., Toronto, Ont., for free booklet.

W. N. U. 1894

A Forestry Policy

Conservation Training Steps To Deal With Drought Conditions

Hon. J. F. Bryant, K.C., Chairman of the Dominion Forestry Branch, Conservation and Afforestation, addressed the Canadian Club in Regina recently when he made many interesting observations regarding the work of the Commission and the development of forestry work by the Department of Natural Resources.

A portion of Mr. Bryant's speech is reproduced as follows:

In the year 1865, the late Archbishop Taché who was thoroughly familiar with the Western country east of that section of Saskatchewan, south of a line drawn between the intersection of the Manitoba boundary with the international boundary and Edmonton, said: "If properly handled, is one of the finest agricultural countries in the world." In the order that they should continue so it is the necessary for me to discuss our methods considerably if southern Saskatchewan is going to be a fertile agricultural area.

In any area where there is an absolute lack of moisture, and shortage of rainfall, long continued and steadily threatening drought, there is no natural vegetative growth. The frequency of occurrence of the normal-sized regions which is accommodated drought by the drying out of the sub-soil. In such regions small crops are grown, but the yields vary, in more than one-half of the years, to less than the normal requirement of rainfall. Several years of comparatively light rainfall are followed by successive years of light rainfall. In the moist years there are abandoned and settlement is pushed on into normally by regions. Then follows years of drought, crop failures, hardship and abandoned lands in the dry areas. This has been the history of many districts in the western United States.

In order to take stock and to make an inventory of the exact state of affairs to enable us to be able to effect basis for intelligently gauging the agricultural possibilities of the future in the future and to study the whole problem with a view to the effective conservation of the most effective conservation policies, the Dominion Government has appointed a Commission on Conservation and Afforestation.

The duties of the commission are to make such climatic conditions as affected by the conservation of existing and the absence of presence of trees; to ascertain and advise what steps are the question in the light of experience and information taken under the conditions elsewhere; making, recommendations as to possible legislation for the conservation of water; to make such proposals as to afforestation as may seem necessary and assist in permanently removing the dry and unfavorable conditions as they now exist in parts of Saskatchewan.

Reforestation Commenced

Reforestation commenced in 1907-10-20. A Better Farming Commission was established by the Government to study the situation. The Commission reported, after studying fifty years of weather and agricultural records, the most encouraging fact was that never before had there been three dry years in succession. Within ten years there had been a general belief that a succession, more disastrous than any recorded, was due.

While the drought through which we have passed was one of great severity, it is not the worst that has happened in these western province. The holes known were lower than any one remembered since 1885, but the settlement of the country in 1885 and on a result there is a general belief that they have to endure a succession of years and in an unprecedented condition, deforestation, or drying out, has been going on in Saskatchewan and Alberta by a progressive way since 1900 with a little set-back in 1907-8. Even from 1904 to 1907 when a slight raise in the levels of the lakes took place. Before 1885, the majority of the lakes in southern Alberta and Saskatchewan were lower than they were during the recent drought. Old wagon trails, fords and stumps of trees, now to be seen in the bottom of some of the lakes through the shallow water indicate that they were dried up. Over 1,000 lakes in Saskatchewan

Domestic Work On Farms

Many Girls Might Find It Better Than Offices In City

Frequently even in these times, there are positions offered to good farm or young women who will do household work, with comparatively two tasks in days gone by, the acceptance of a job in a factory was regarded as more or less degrading thing girls" were frequently spoken of with disparagement. The duties of the household were performed in the [illegible] The family [illegible] [illegible] [illegible]

LOCAL NEWS

Considering the stormy day the Art Exhibition held in the Memorial Hall by Prof. Adams on Tuesday afternoon and evening was well attended. In the afternoon, Prof. Adams showed forty original colored block prints taken from the Carnegie College Art Collections. In the evening, an illustrated Lecture of colored slides on "Best English Art" was showing.

The Women's Institute is to be congratulated in bringing to the Fort this instructive and educational exhibition. Which was offered to the public entirely without cost and it is to be hoped that if in time other lectures are to be available from this same organization it will be instrumental in bringing them to the Fort.

oooooo

Report of the Cemetery Committee Of The Women's Institute

oooooo

The committee in charge wish to thank those who turned out and made their seed party such a success, also those who have so kindly given their contribution although unable to attend. The grass proceeds up to date are $16.50. The expenses amounted to $5.50 for prizes and refreshments.

During the month the following contributions have been received. Harry Thoms, $10; A. E. Rogers, $10, and Dr. T.W.E. Henry, $5.

Copies of the annual Cemetery report have been printed and will be sent to out of town friends very soon. Anyone wishing to help will please give their contributions to the members of the Committee, either Mrs. J. D. McLean or Mrs. A. E. Rogers.

Mr. Masters the former caretaker has been re-engaged and ready to commence work as soon as required. Already he has cut out several clumps of perennials.

Coming Events

The Brownies have been requested to repeat their two short plays, namely: "Silverbirch" and The Three Bears" and "Little Pris" on Saturday evening, May 20th at 8:30 p.m. in the Empress Theatre. The prices are Adults 35c, High School Students 25c and Children 15c. Weather permitting.

oooooo

A meeting of the Red Cross will be held at the home of Mrs. Wilmsworth on Tuesday, May 23rd at 2 o'clock. Miss Pearce, R. C. Field, R.N. will address the meeting. All are requested to attend.

oooooo

FORT SASK. TENNIS CLUB DANCE

will be held on Wednesday, May 24, in the Memorial Hall. Dancing till 2. Admission 50c each. Refreshments. ....Come and have a good time.....

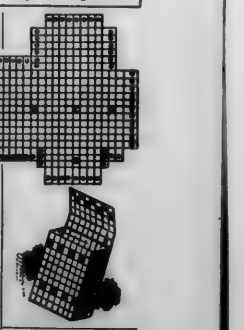
New Cigarette Case of "Cellophane"

"CELLOPHANE" from package wrappers, cut into strips and woven, can be made into a lovely cigarette case by following a few simple rules. Cut the strips one inch wide as follows: 8 vertical, 1 inches long; 14 vertical, 6¼ inches long; 9 horizontal, 6¼ inches long and 13 horizontal, 10 inches long. A few coloured strips will add to the appearance of the finished case.

Fold the strips in half lengthwise twice. Then fold the eight vertically to a board (a cardboard box will serve) lay and fasten. To the right, 2 inches apart, put three of the 6¼ inch strips. The rest of the vertical ones then added to the left. In weaving, the horizontal strips are passed over and under the upright ones one row at a time, starting with the 6¼ inch strips in the middle of the 6¼ inch length to the bottom, then continue weaving, using the 10 inch strips to form the bottom, and the rest of the case, or A B C, and D on the diagram. The last 2 strips at the top are 6¼ inches long.

To finish top and sides, cut off all but 1 inch of the ends and fold back over the outermost end itself in. At first remove only the top strip, then the second, and the upper right corner then every other strip down being sure the horizontal strip is crossed. Then fold the edges in, and turn the whole case right side out. Fold back the ends of strips and paste down. The tube set the edge inside and finish the edges the same way.

The top has 2 and side sections 2 and 3. It should have their long ends turned inward. Leave about half inch to fasten with gummed tape. Remove tacks from bottom of cover. A hinge is made from bottom of cover. A hinge is made from a piece of ribbon 1 inch wide and 2 inches long. Fasten ends of ribbon to cover and box with gummed tape. The ribbon should be folded over to hold cover open. Remove ends of ribbon A and B from bottom of cover. Fasten bottom of box.



On the cover with every other strip and every other horizontal strip. The ribbon should be left to cover each fastener. Some ends on the sides will be turned and can be turned under and over to hold cover open. Remove ends of ribbon A and B from bottom of cover. Fasten bottom of box.

Fort Saskatchewan Record

VOL. 12 No. 8 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, MAY 24th, 1933 $1.50 PER YEAR IN ADVANCE

Much Business Done At Town Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Secretary's Office on Wednesday the 17th. May, 1933, at 8 p.m.

Present, Mayor G. T. Montgomery, Councillors Lalonde, Fillmore, Watt, Graham and Neale.

The minutes of the last meeting were adopted as read.

A letter from A. J. Belcher of the Radio-Night-Hawks Orchestra enquiring as to conditions for renting Memorial Hall, also a communication from the Provincial Government, enclosing application form for an Entertainment Hall License, after being discussed by the Council a resolution was passed That a License of $5.00 be obtained for Memorial Hall, and that the rental rate be $15.00 per night, with the exception of local organizations when rate of $10.00 would be charged, payable in advance.

Mr. P. Moret was present and advised the Council as to the condition of fire hose. A motion was passed authorizing the purchase of two 1-gallon number two fire hose from the Gutta Percha & Rubber Co., Ltd. The purchase to be made by the Fire Chief.

Councillor W. A. Graham tendered his resignation from the Town Council. A resolution was passed That Councillor Graham be asked to reconsider his resignation.

It was decided that the issue of relief will cease at the end of May.

The following accounts were passed for payment:— Calgary Power Co., $117.50 for streets, $6.25 for Town Hall and $1.50 for Memorial Hall Telephone Account for April $7.18; J. T. Lalonde relief $80.00; Jones, Graham & O'Brien relief $78.00; Western Steel Products $111.79, surface roofing for Memorial Hall.

Coming Events

Ypres Valley Ladies Aid will hold their annual picnic at the Baseball Grounds on Saturday, June 3rd.

Tea ball games. Lunch will be served from 5 o'clock on.

Everybody welcome. Come and have a good time.

In response to the request of a large number of residents of the Town and District, Dr. W. H. Alexander of the University of Alberta, has kindly consented to address a meeting on the evening of the 31st of May. The meeting will be held in the Empress Theatre, Fort Saskatchewan and will commence at eight o'clock p.m. precisely.

TROUT FOR COLD LAKE

The experiment of colonizing Cold Lake, in the north-eastern part of Alberta, with speckled trout, is being undertaken this summer by the fisheries branch of the provincial lands department. About 100,000 of the fish will be introduced into the waters of the lake at the beginning of June, it has been brought from Jasper Park hatcheries. It is believed that since the trout have done well in the cold water of mountain lakes, they ought to have similar success in Cold Lake, where there is already a considerable fishing industry.

NEW DIET BOARD

Appointment of Alberta's new diet adjustment board was announced by Premier Brownlee Friday. The chairman will be William Lovee, of Calgary, director of the Diet Adjustment Act for some years, while the other members are: L. F. Cherry, K.C., of Calgary, master-in-chancery for many years, and Ben S. Plumer, of Pow Valley, director of the Alberta Wheat Pool. Lovey next week a committee court judge will be designated to handle appeals from the board, stated Premier Brownlee.

Provision for this was made in the Debt Adjustment Act passed at the recent session of the legislature.

Fort Pupils Win Fine Prizes At School Festival

The Fort Saskatchewan school was fairly well represented at the Lamont Inspectorate School Festival, held at Smoky Lake, Thursday, May 11. The day was ideal and the representation and attendance was the best since the inauguration of the festival three years ago. However the accommodations were as bad as ever and in one room even worse than any before.

Due to the distance and uncertainly of weather conditions only six entries were taken. In the grade 5 and 6 solo Nielsen McPherson took first place amongst a field of 20 voices. In the evening she took first in the elimination for the best public school solo and consequently won the C. H. Robinson Cup.

In the grade 5 and 6 recitations, Jean Graham won first place in a field of 20 competitors. Margaret Glover also is to be commended in winning first place for the open High School recitation.

Saralie Oxley, Sofia Lanseuren and Gilda Bacon did very well also. Miss Gertie Perrin, Inspectress this year is short and the weather conditions so uncertain that very little enthusiasm could be inspired in so short a time.

Miss West and Miss Dickson are to be congratulated for the results they obtained. Mr. Watt deserves much praise. The School Board, the parents and the children, who participated, are also to be commended for the part they have taken in making us to be represented this year.

The teachers and pupils wish to thank Mr. F. Baker for the use of his car for conveying them to Smoky Lake, also to Mr. C. Glover who so kindly drove the car.

The school Festival will be held here next year and it is hoped that when that time comes the Fort will back it to the limit. Which all helps to make a successful Festival.

St. Eugene News

Mr. Albert Boisjoli is a patient at the General hospital this week.

oooooo

Mr. Berry, Mr. and Mrs. Coleman were dinner guests at the Trotter home Sunday last.

oooooo

Mrs. A. Tetreault is visiting her daughter, Mrs. D. Hood.

oooooo

Mrs. Gordon Lachapelle and children are spending the summer with Mrs. Lachapelle's brother at Mayerthorpe, Alberta.

oooooo

Mrs. McShane who has been visiting her sister Mrs. LaChoe returned to Calgary on Monday.

oooooo

Mr. and Mrs. A. Lamoureux were dinner guests at the Yanch home on Sunday last.

YPRES VALLEY

The Ladies Aid held their meeting at the home of Mrs. H. Armstrong. Mrs. Pearce, Vic-Pres. presiding.

Look out for announcement about June 3rd.

oooooo

Bobbie Gunn smashed Stanley Dennis's windshield while playing ball out here last week.

oooooo

The Simmons family who have been in quarantine for Scarlet fever are free now. The children being back again at school.

oooooo

The Ladies here have organized a soft ball team with Mr. Jot Irwin as manager and Mrs. Seymour as captain.

oooooo

Miss Clara Dittrich was a visitor at Sunny Plain last week.

oooooo

The national convention of the I. O.D.E. of Canada, will be held in Alberta this year, taking places at Edmonton during the week of May 29. Best.

Good Hope

Mr. and Mrs. A. Mynd, Mr. Jos. Calvert and Gerald Magee were visitors at Mr. and Mrs. Brant's last week.

oooooo

We see Miss Ethel Brunett is back in the community again.

oooooo

Mrs. D. Cranston was an Edmonton visitor last Saturday.

oooooo

We are sorry to hear that Miss Edith MacDonald is unable to attend school for the rest of the term owing to illness.

oooooo

Mr. Gillison and Mr. A. E. Moyer made a flying trip to Chipman on Sunday.

oooooo

Miss Dora Johnston spent Sunday at her home.

oooooo

We expect to start planting tomorrow (Tuesday) if the rain is over.

The rain of the past week will delay the seeding of oats and barley in this district, also may have a tendency to cut down the acreage in this part of the province.

Municipal District Hold Regular Meeting

The regular monthly meeting of the Council of the Municipal District of Clover Bar, No. 51, was held on Saturday last with all members in attendance.

The question of relief, maintainance of sick indigent residents and hospitals accounts took up the major portion of the time of the meeting. Representatives from the Lamont Public Hospital Board were in attendance in an attempt to get settlement of a number of accounts incurred by supposed indigents. Although urged to accept responsibility for a number of the accounts, the Council declined to make any decision until next meeting so that each councillor could have an opportunity to make enquiries concerning accounts outstanding in his own division.

The Alberta Assessment Commission submitted its judgment in regard to the appeal of the C. P. R. against the assessment placed on the water dam at Elk Island. The Commission ruled that the improvements did not constitute a building and were therefore exempt from taxation.

The following mill rates were struck for school taxation:—

Clover Bar 6 mill. Agricola 7 mills, Partridge Hills 8½ mills, Good Hope 6½ mills, Mansfield 6 mills, Pleasant View 8½ mills, Bolton 18 mills, Brookville 20 mills, Silver Lake 10 mills, Parkside 8 mills, North Clover Par 6½ mills, Ypres Valley 12 mills, and Radcon 18 mills.

The mill rate for municipal purposes was left in abeyance until the next meeting.

Messrs. Henderson & Kinsaird, Chartered Accountants, were appointed as auditors for the District.

Frank Hennig was appointed weed inspector.

With the reading of correspondence and the passing of accounts the meeting adjourned at seven o'clock.

oooooo

ANNOUNCEMENT

The Rt. Rev. A. R. Sargent, D.D. Bishop of Edmonton will make his first official visit to the Fort, as Bishop of the Diocese, on Sunday morning next at 11 a.m., when he will administer the ancient and Apostolic Rite of the "Laying on of Hands" to a class of 9 or 10 persons.

The Bishop was well and favourably known as Archdeacon before his election, and has served the Canadian Church faithfully and well for many years, both in the West and in the East.

Taken from the Files

19 Years Ago Today

May 27, 1914

With 250 commissionaire on board the Honour City of Edmonton, on its way to the Fort last Monday, struck a rock while misbehaven seven miles from the Fort. The boat was headed ashore, where it was made fast with ropes to the trees, and the passengers waited until help came from Edmonton. The boat was towed back to Edmonton, where the hole is to be repair in the bottom.

G. T. Montgomery is attending the Sovereign Grand Lodge, I.O.U. at Regina, where the order convenes this week.

Empire Day was observed at the Fort, last Monday in the usual way, when a good day's sport was enjoyed by some twelve hundred people.

Mrs. Moret of North Edmonton, formerly of the Fort, has opened an ice cream parlor next to the post office. She will also handle confectionery and home bread.

A naturalist in Europe claims to have found a bird "who lies in bed all day".

CONSTIPATED 30 YEARS AIDED BY OLD REMEDY

"For thirty years I had constipation. Sour, gassy food from stomach caused me illness taking Adlerika. I am a new person. Constipation is a thing of the past."—Alice Burns. F. W. Smith, Druggist.

A Warning To All Nations

In this column recently it was emphasized that the only effective and permanent way out of the existing depression, and the only method whereby world peace can be maintained and assured, is through international action. The fact was stressed that no one nation can, through its own policies and efforts, bring prosperity to its people. Furthermore, that the solution of world problems today, or the domestic problems of individual countries, is not to be found in the overthrow of existing systems and institutions, but in the removal of the abuses which have been allowed to creep in and destroy.

That is why we emphasized that the basic cause of the present depression, in the greatest dread of war, the social unrest prevailing, was to be found in the narrow nationalism which has afflicted the people of all countries like a universal plague; that it was this narrow nationalism, born out of suspicion and fear, which had destroyed the trade of all nations, weakened their monetary systems, led to the maintenance of excessive armaments, and resulted in the suspension of hundreds of banks and beyond the ability of people to pay.

Possibly some of our readers said to themselves: That is all very true, but what can we in Canada do about it? We are only 10,000,000 of people; we are not regarded as a world power, although we are a not unimportant part of a great world power, the British Commonwealth of Nations; as a Dominion, however, we can be influential in public opinion and action. Moreover, therefore, continue to suffer until other nations forget their suspicions and fears and make up their minds to be sensible; is there nothing we can do to help ourselves?

There are, of course, many minor matters of policy to which Canadians can direct their attention and bring about certain domestic readjustments and improvements. But the basic cause of the trouble is beyond our immediate control. It is international in its causes and cure, and can only be dealt with internationally, and by one but by all nations. For example, Canada has just negotiated a new trade treaty with France in an endeavor to improve trade relations between the two countries. Above all things Canada desired to secure a larger market in France for wheat, the greatest single item in our export trade. We could not get it. Why? Because, as Hon. C. H. Cahan, who negotiated the treaty on behalf of the Canadian Government, "came to see the significant intention on the part of the French Government to allow foreign wheat to come into France wheat with interior with domestic production." And the reason is France's fear of war and her determination to be in a position to feed her own people. And what is true of France is true of Germany, Italy, Spain, and many other European countries to which Canada formerly sold large quantities of wheat. Canada cannot change this attitude, but it can be changed by international accord which will remove the threat of war.

It is because our chief hope lies in the international arena that we in Canada, as a great trading nation, have reason to rejoice because of the message addressed by President Roosevelt direct to the heads of all governments throughout the world, kings, presidents and potentates of the forty-four nations to be represented at the World's Economic Conference in London in June, a message that has been hailed as a great document.

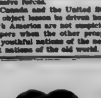
We would like to reproduce that message in full, but space will not permit. Having already succeeded in bringing about a world truce period pending the assembling of the London Conference, President Roosevelt in his message called for a further truce providing that no armed troops whatsoever should hereafter cross any frontier save when a neighbor had offended by breaking her armament agreements. As an immediate goal, the President asked success for the Geneva arms conference and the London economic conference. He called for an agreement that no nation shall increase its existing armaments; he advocated the abolition of all offensive weapons of warfare. Concluding his message, President Roosevelt said:

"Common sense public out that if any strong nation refuses to join with genuine sincerity in these concerted efforts for political and economic peace, the one at Geneva and the other at London, progress can be obstructed and ultimately blocked. In such event the civilized world, seeking both forms of peace, will know where the responsibility for failure lies. I urge that no nation assume such a responsibility, and that all the nations joined in these great conferences translate their profound policies into action. This is the way to political and economic peace. I trust that your government will join to the fulfillment of these hopes."

Canada will be represented at the London Economic Conference by Premier Bennett and he will have the united support of 10,000,000 Canadians in standing unitedly with President Roosevelt and Premier Ramsay MacDonald in their great effort to save the world. That Mr. Bennett will take such a stand there is no question. He can be depended upon, as any Canadian prime minister could be depended upon, to throw the whole weight of this Dominion's influence into the scale for world peace, economic and political.

In this great effort the United States and Canada must unite. There will be no dividing lines between them. For over a century neither country has maintained any offensive force against the other, and because such offensive forces did not exist there was no need for either country to erect fortifications along the boundary or maintain defensive forces. Remove the danger of offence, as President Roosevelt says in his message, and no need exists for defensive forces.

Canada and the United States offer an object lesson to the world. Let that object lesson be driven home to the nations of Europe. The countries of North America are not suspicious of each other, do not fear each other. One prospers when the other prospers. The same can be made true of Europe. The youthful nations of the new world are showing the way to the more ancient nations of the old world. May they succeed in their great task.



Was So Short of Breath Could Not Lie Down to Sleep

Mrs. P. J. Cornell, Greenacres, B.C., writes:—"I had been so troubled with shortness of breath I could not lie down to sleep.

I couldn't do my hard work, or climb the stairs, and was getting very discouraged, tired and lonesome very much.

I tried all kinds of medicine, but could get no relief until after I had taken Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

Price $1.25 at all dealers and stores, or sent direct on receipt of price. Manufactured only by The T. Milburn Co., Ltd., Toronto, Ont.

Lake Freight Situation

Order Fixing the Maximum Rate Is Suspended

Pending further consideration of the lake freight situation, the board of grain commissioners suspended the order fixing the maximum rate for carrying wheat from the head of the lakes to Montreal, Boston and Quebec, at six cents per bushel. The order was issued on May 8.

The order was made to offset discrimination between a six-cent rate to Boston and Quebec and 6½ cent rate to Montreal. The discrimination has now been removed, the board stated.

It is understood the board is making progress of legislation now before parliament in respect to the Canadian coastal laws, passing of which would prohibit United States vessels from the all-water route to Montreal. When this has been dealt with it is understood the whole freight situation will be gone into.

RUNS UPSTAIRS AT 82

Daughter's Prize In Rainbow Contest

"I find it a delightful habit," writes Mrs. A. J. W. "to express my gratitude for the marvellous results my daughter obtained from Kruschen Salts. They should really be called 'Miracles,' as in my own case down-and, and in as fit as a fiddle. No constipation, and no more headaches or dizzies. His friends marvel why it is he is always alert, and never looks tired. I tell them it is Kruschen, the reason, "my regular daily dose of Kruschen Salts every morning" and Kruschen results in good health. Enough in all my opinion, To my idea the family should be without it."—Mrs. A. J. W.

Most people grow old long before their time because they neglect one or other of the five daily duties of internal cleanliness. Eventually they start the healthy Kruschen habit. Then they start getting rid every day of those poisons which are sapping New, healthy blood goes coursing through the veins. And almost insensibly they feel their youth returning; they feel young, energetic and happy in a word, they've got that famous "Kruschen Feeling."

Rely On Prairie Wheat

Great Indian Of Agricultural Future Of Canada

"While it is true that all agricultural prices are still away below the figures of a few years ago, may I remind you that the prairie farmer received its greatest influx of settlement in the pre-war decade with wheat prices ranging from 40 cents to $1.00 per bushel," declared John M. Imrie, managing-editor of the Edmonton Journal, in an address to the annual convention of the Canadian Press Association, "to which the Canadian division of the Canadian Manufacturers' Association, "to which the Canadian division of the Canadian Manufacturers' Association, "to which the pace of gold at the end of the rainbow. It is true that costs were low, but during the past three years there has been a tremendous reduction in production costs.

Canadian Coal Society Holds Annual Meeting

Regulation Received Authority Good Report From Prairie Provinces

The Canadian Coal Society held its 10th annual meeting recently in Victoria, B.C., with representative members in attendance. It was announced that the membership of the society, which has been quiet during the past year, registrations and transfers of properties of pure coal mines had been very satisfactory and membership showed a slight increase.

The chief business of the meeting was the adoption of a new constitution embodying the requirements of the new Live Stock Pedigree Act.

The report of the committee received from the prairie provinces there is a good demand for grade, but the prices offered are so low that there is little in the business.

Russia Out For Record

The society for air and chemical defence in Moscow, Russia, is planning an ascent into the stratosphere. Members hope to better the record of Professor Auguste Piccard, who has attained heights of more than ten miles in two ascents.

Automatic machines being installed in about men of Edinburgh, Scotland, enable cigarettes to be sold tickets as they are needed.

Summer Cruises

Intriguing Sea Voyages Planned By Clement and Another Lines

No less than 23 summer cruises have been scheduled by the Canada and Anchor Lines for this season. These cruises will all sail from New York and the services will use eight of the Lines' steamers.

The "Franconia," celebrated for her World Cruises, will make three cruises to the Canadian North this season and to the South, the first sailing from New York on July 29th The itinerary includes the Saguenay River, Quebec, Murray Bay and Bermuda. This cruise will be repeated on August 26th in each case calling at Boston both ways. The southward cruise leaves New York on August 12th for Cuba, allowing three days in Havana, a full day in Nassau and two days in Bermuda.

The "Mauretania" will make four fast cruises to the West Indies this summer, sailing from New York on July 8th, 22nd, August 5th, 22nd, and September 9th. Each cruise will last 17½ days and cover 7,300 miles The ports visited will include Port of Spain, Trinidad La Guaira for Caracas, Venezuela, Willemstad, Curacao, Colon, Panama, and Havana, Cuba. The "Mauretania" plies the Leeward and Windward Islands on her way to Trinidad.

The annual North Cape cruise sponsored in connection with Raymond and Whitcomb, will sail from New York on July 1st, calling at Iceland North Cape, Spitzbergen, Norwegian fjords, Bergen, Oslo, Copenhagen, Keppel, Elsinore, Stockholm, Leningrad for Moscow, Berneamunde in Germany, and Cherbourg. The cruise lasts 42 days in the "Antonia."

The "Aquitania" is also scheduled for a couple of week-end cruises to Nova Scotia, the first being on the week-end of the 4th of July and the second for the Labour Day week-end. Another cruise leaves New York on July 1st for a 23-day cruise to the Baltic, calling at Cork, London, Hamburg for Berlin, Rotterdam for Holland, Havre for Paris, and back to New York.

Other summer cruises of Canard and Anchor Lines include six 12½-day trips to the Bay of Fundy, Murray Bay and Bermuda, covered by the "Transylvania" and "Caledonia"; two cruises to Nassau and Havana by the "California"; the Labour Day cruises to Nova Scotia by the "Transylvania" and "Caledonia."

In addition the "Tuscania has been chartered by the Bible Conference Association for a cruise to Nassau and Havana, leaving New York on June 24th Although the cruise is open to the general public it will differ from other cruises in that there will be no dancing, no sports, and no theatrical entertainment. Bible class sessions will be held three times a day. It possesses many ideal features for people who do not care for the livelier type of cruise. Go and other Canard-Anchor cruises will be concerts, night clubs, bridge contests and all that goes to make a vacation cruise something to remember.

C.P.R. Official Dies

Missionary To The Fatal Settlement On Devil's Island

P. W. Peters Was the Oldest Official (Mail Matter in Canada)

P. W. Peters, 73, the oldest official of the Canadian Pacific Railway still in active service, died at his home in Vancouver recently.

From 1906 until 1926 he was assistant freight traffic manager of western lines, with headquarters at Winnipeg, and in 1926 became assistant to the vice-president of western lines. In 1912 he returned to Vancouver as general superintendent of the British Columbia division.

He is survived by his wife, the former Gertrude Wyngaert Hood, of Toronto, whom he married in 1894; a brother, T. L. Peters, of Victoria, B.C., and two sisters, Mrs. H. G. Hunnington, of Quebec, and Mrs. W. Morse, Ottawa.

People Prefer Pork

Popular Preference Does Not Prevail In Canada

Pork is the Canadian staple in meats, according to a report issued by the Dominion Bureau of Statistics for our calendar year consumption was 91 pounds, which was greater than the consumption of all other meats combined, including poultry. Beef consumed amounted to 38 pounds per capita, mutton and lamb 5½ pounds per pounds, and poultry 11 pounds.

Total consumption of eggs was 297,000,000 dozen, or 26 dozen per capita, compared with 29 dozen in the previous year.

Practically any wild grass will serve, in one stage or another as food for stock.

Trinidad exports any change in trade activity is to ignore.

The Birth of Elation.

Ah! Now you're smoking! You're pipe happy. You've discovered Ogden's Cut Plug, a tobacco that's made for your pipe, made to pack right, to light right, to burn sweet and cool to the very last puff.

You said it . . . a mighty likeable pipe tobacco . . . Ogden's Cut Plug. And every pipeful will be just as good as the first one. Ogden's quality never changes.

OGDEN'S
CUT PLUG

If you "roll your own", use Ogden's Amo cut cigarette tobacco and Chanticler cigarette papers

A Lonely Parish

White-haired Father Gontray is on the Way From France to Be the Head Bishop of French Guiana, which includes the dreaded Devil's Island, the penal settlement. The bishop's flock will include about 4,000 murderers and habitual criminals serving long terms. His own merge head a female slave at Cayenne. Father Gontray, who has spent 35 years as a missionary, says he will live the same hard life as his flock, and he plans to know each man individually.

Italy is boosting taxes on matches.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up Your Liver Bile

When your bad liver, Gentlemen, your on the fritz and you're feeling rotten, don't pamper it with pills that only act on the bowels. Get to the cause of your trouble. Your liver is the largest organ in your body. It should pour out a pint of bile into your bowels every day. If this bile is not flowing freely, your food does not digest. It just decays in the bowels. Gas bloats you. Your whole system is poisoned and you feel sick all over. Then you need something to start the bile flowing—you need Dr. Chase's Liver Pills. Dr. Chase's Liver Pills have been used for over forty years to relieve constipation, biliousness, sick headaches, dizziness, and all sluggishness.

Greatest Reindeer Trek In The History Of The Arctic Regions Is Now Nearing An End

Greatest reindeer trek in Arctic history nears its end

Its story is a thrilling saga.

Lapp and Eskimo reindeer punch are battled cold and hi anards and starvation and ordeal for three and a half years in a merry feat which will mean permanent food supplies for dwindling Eskimo population of the northern rim of Canada.

It now basin as if 3,000 reindeer, a sturdy animal easily domesticated, will be successfully delivered at the government's new reindeer reserve west of the Mackenzie delta early next year.

Back in 1926 the plight of the Canadian Eskimos reached a point where Ottawa decided the northern native must have permanent food supplies. Hideous fiasco decimation. Curious migration had taken heavy toll Percival brothers, two Arctic biologists, were employed to survey Canadian reindeer ranching prospects. They finally recommended an area on the Kamarvirtuk Peninsula, just east of the Mackenzie's great northern delta. There deer moss abounds and many other natural advantages were reported.

Three years later, when investigations were complete, Ottawa contracted with Lomen brothers, Alaska reindeer pioneers, for delivery of 2,000 Alaskan deer. The Lomen firm was offered 500 each for deer delivered on the Arctic coast.

Within six months a herd of 2,000 healthy animals had been rounded up in the Buckland Valley on the west coast of Alaska, fully 1,000 miles by coast line from the northern Canada border The herd started its three-year trek, with "native herders and sturdy shepherd dogs following a route fixed by an aeroplane survey. They thought they could reach Canada in a year and a half. Already three years and a half have passed and it will be another year before the herd is delivered at the reserve.

Sit-ing reindeer numbers more than once faced death.

They lost their wives and children with them.

One child died.

They had 2,000 adult deer when they started.

Wolves, storms and pressing food needs cut 1,000 from that total. But sturdy skins reached Canada intact. A tory this spring with 2,000 of the original herd and 900 young deer.

Wolves frequently cut into the big herd, killed off 1000 animals in one winter. Wolves would raid the herd, kill six or seven animals, stop to devour what they wanted and come back for more.

Two years ago more than 500 reindeer were lost in a storm. Herders pursued them, ran short of food and subsisted for a week on a cup of flour and bits of hard dough scraped from their equipment. It was six months before the last deer were finally returned to the herd.

Tom Wood, Eskimo camp manager, was lost for three days in a storm. In this year's storm Wood's wife and white explorer Allie Wood fared death. He is a man of intelligence who had been to a mission school in Nome. His strength and the Eskimo fell to his knees in the storm.

He prayed to God.

Today he says that, through the storm, he saw the dim figure of a woman.

He struggled to his feet pressed on, found a white trapper's igloo. The trapper's wife, by chance, had stepped outdoors for a few moments and the Eskimo had seen her. She had not seen Wood.

But the Eskimo had seen the woman and feels it was God who answered his prayer.

Eskimos were reindeer skins throughout the long journey. It is almost impossible to freeze in such clothing They were forced to ski rapidly to round up straggling deer. found themselves perspiring in subzero weather. Their double parkas were damp with perspiration for days but the Eskimos and Lapps pulled through.

It was a terrible trip. Two crews of herders were forced to quit Nome near Herschel Island the herd is in charge of Andrew Bahr, veteran Lapp boss, and Tom Wood, Alaskan Eskimo, camp manager There are three other Lapp herders and three Eskimos, besides families of Eskimos and Lapps When they arrived there the Mackenzie asked only for hymn books and Bibles. They were glad to be alive

When the deer reach the new reserve next year the government plans to domesticate the animals, teach Eskimos to take care of them, let farmers would care for stock herder or milk cows The Eskimo has both animals in use, for the reindeer ran feed a 200-pound burden and provide a milk supply for the natives as they do in northern Europe and Alaska.

Supervision will be strict so that Eskimos will not kill off the precious herd and, in time, it is expected that farms in the Canadian Arctic will equal those of Norway's far northern Lappenderp.

Canadians Are Healthy

Record Health Year In Canada In 1925

The year 1925 was a record health year in Canada, in the face of increasingly unfavorable business conditions. This is indicated by the very favorable death rate for that year among nearly 1,250,000 Canadians insured in the industrial department of the Metropolitan Life Insurance Company. This large cross-section of the Canadian population gives a true health picture of the population in general, it was said. The death rate of these insured Canadians last year was 7.7 per 1,000, a decline of 4.3 per cent. from the previous minimum recorded in 1921.

Amateur Broadcasting

Simplified Method Of Sending Messages Developed In France

An automatic radio, imminently simplifying the process of sending messages, has been developed in France.

The apparatus can be operated by anyone knowing how to read, obviating the necessity of a trained wireless operator. It works by means of knobs, which are turned like those on a radio receiving set. The letters of the alphabet and various signals are printed on a dial turned by a knob, messages thus being spelled out.

Vegetables Preserved

Vegetables are being dried by a process known in Sweden to preserve essential vitamine contents.

The pineapple will not grow where the frost bites.

More Ships From Churchill

Volume Of Traffic Exported To Exceed That Of Last Year

At least three as many ships as last year will load at the port of Churchill during the present season, according to information received by the Saskatchewan Trade, count I at a meeting held in Saskatoon

Last season 10 boats visited the port. It was announced that the Dominion Steamship Company had now arranged for the first boat the S.S. Pennyworth to load at Glasgow July 17, November 1st Time July 25 and at Antwerp July 30. The company expressed willingness to open that season, and, should navigation last year if the underwriters were willing to extend the open duties to hull and machinery insurance in the same manner as Lloyd's were willing to underwrite import and export cargo.

Regarding ocean freight rates Churchill announcement was made that the Dominion Government was prepared to grant subsidies on Lloyd's list the development of export traffic at Churchill. Grain, cattle and packing houses and dairy products was considered by the Council

Import tonnage of various commodities during the coming season was considered in detail The opinion of the meeting was that the total import traffic would not considerably exceed the 1925 tonnage.

George H Smith, traffic representative of the Hudson Bay Route, who acted as secretary of the meeting, also reported that arrangements were being completed to take care of manufactured goods, west of Brandon, through Churchill to Birkenhead and Cardiff markets.

How Light On Evolution

Discover Brain Of Gorilla Of Very High Type

Discovery in a gorilla of a brain of higher type than ever before found in an animal nearer the human brain weight than any number of ape brain on record was announced by the Smithsonian institution

It sheds new light on the evolution of the animal from upward toward the human level, thought giving the direct evidence of relationship of men and monkeys. This discovery in Otero, little three-year-old baby gorilla, that died several months ago at the Lincoln zoo at Lincoln, Nebraska. The letters of the alphabet and various signals are printed on a dial turned by a knob, messages thus being spelled out.

Right Cause Changer

"Your teeth are in bad shape," said the dentist. "You should have a bridge put in at once."

"How much will a bridge cost?"

"About seventy five dollars."

"Say, doctor, can't I get along with a small culvert?"

Rather Confidence Suggested

Suggestion that a conference between Canadian and New Zealand representatives of affected interests be held in New Zealand in an attempt to iron out difficulties concerning the importing of butter from the southern dominion into Canada, was made in a resolution adopted by the annual meeting of the British Columbia division of the Canadian Manufacturers' Association in Vancouver

Russia estimates that its present population is 127,000,000.

Aeroplanes Will Be Used In A New War To Be Waged In Effort To Exterminate Locusts

Old Pestics Become New

Need Of Hard Coins In Poultry Business Again Stressed

Some inner old practices become new again That can be said of the use of insectivore girls in the poultry raising. For a time there was a swing away from the use of insectivore girl, authorities claiming that because it did not dissolve in the crop grained or intestines of the chicken it had no value and should be omitted from the ration. Only certain stones that furnished lime or other minerals were recommended.

Now it has become evident that chickens must have a hard grit or they are to do well That does not mean that minerals are not needed in the ration, but it does mean that a hard grit must also be provided That is especially true with chickens raised in confinement where they cannot possibly pick up stones and rock fragments from the soil of the range.

The insoluble grit acts as tools for the chickens in the gizzard. It helps to grind up food and therefore has a tendency to prevent crop bound conditions. The presence of the grit makes the gizzard hard and muscular insuring healthy action of the entire system.

Strange Coincidence

Wheat Loader Gets Same Car Twice In Different Directions

K H Johnson, Alberta wheat po t agent at Camrose, is wondering what it is going to happen again.

On August 28 1927 Johnson loaded a railway car, No 504457, with No 1 wheat for Vancouver On September 27, 1927, he was loaded No 2 wheat for Vancouver when he noticed it was car No 504457

Coincidence it might have been, but now Johnson is talking about his "double" He loaded car No. 504457 with No. 2 wheat for Vancouver January 4 And a few days ago car No. 504457 came back again to be loaded with No 2 wheat for Vancouver.

Odds against the same car returning to the same shipping point to be loaded with the same wheat for same destination in the same crop year are in the thousands.

Result Of Old Feud

Sanctioned Forest Dwellers In England Blessed For Five

It is said that the constantly recurring fires in Ashdown Forest are the result of a feud that dates from the time of Henry the Eighth, who granted the peasants grazing and other forest rights for lending the deer he hunted.

The feud is being waged, according to many people who have been spoken to, by embittered forest dwellers.

These men feel that the forest is their heritage and that property owners are gradually taking it away from them They are fighting for it with fire.

They have lit fires in Ashdown Forest for many years, but recent shortage of rainfall has given the fire-raisers greater opportunities for destruction this year.

Nearly 2,000 acres belonging to wealthy people have been set alight during the past few weeks Ashdown Forest covers approximately 7,500 acres.

A reporter discussed the matters for each fire and discovered psychic reasons in each case.

One of the Ashdown Forest conservators who spoke of the feud declared:

"In the olden days many smugglers hid in the forest and spit their lives defying law and order. The same spirit seems to live on.

"These fires are being lit through sheer viciousness. The head of conservators reported that the gentlemen of Ashdown Forest and retainers of law and order It is there on the cultural enemy of the men of the forest and is defied."

Inquiry From Jamaica

A letter was received recently by the Regina Board of Trade from Kingston, Jamaica, asking if any Saskatchewan factories could quote prices on orange crates knocked down into bundles "If they make egg boxes they can surely make orange crates," says the letter.

The rat population of the world is estimated at 10,000,000,000 as compared to some 2,000,000,000 human beings.

Soviet Trade Delegation Leaves England

Two hours after the British engineers from Russia reached England the Russian Trade Delegation in London left for Moscow without being able to arrange a new trade pact with the British Government. The group above shows the Soviet Ambassador to England, M. Maisky, on the extreme left, while the head of the delegation, M. Conrad, is shown holding a bouquet of flowers.

WORLD HAPPENINGS BRIEFLY TOLD

Orange juice produced in the British West Indies and imported direct is to be admitted into Canada free of duty

Recognition by parliament of the services of Captain J. E. Bernier, veteran Arctic explorer, was suggested in the senate by Hon. J. P. B. Casgrain, of Montreal.

All German ships have received orders to fly the swastika flag of the Nazis, and the fleet vessel to do so in Vancouver harbor was "Ms. Oshland."

The immigrant resident population in Canada at the close of the census of June 1, 1931, numbered 2,307,555, of which more than 51.15 per cent. was found west of the Great Lakes.

The United States air mail service was 10 years old May 15. The government observed the anniversary by plotting to use a fleet of new triplemotored "nine-mile-a-minute" planes on its coast-to-coast service.

An 88-foot totem pole, one of the finest of its kind, has been presented to the Queen's zoological gardens at Chorlewood by the Zoological Society. It comes from the Nass Valley of British Columbia.

Robert Avery Chipman, Winnipeg, now doing post-graduate work in engineering at McGill University, has been awarded the McGill Dunn Upsall Memorial scholarship. The scholarship is worth $900.

With a view to encouraging commercial fur farming on a large scale in Manitoba, an area of 22,000 acres between The Pas and Lake Winnipeg, with rail line passing through it, "becomes the property of the province for the prospective fur rancher.

Commercial shipping between France and Canada, and the travel and business agents between the two countries, will be facilitated by a convention signed recently, as a companion piece to the Canada-France trade agreement.

Proof that a goodly number of art patrons are still able to pay substantial prices for coveted works is provided in the Royal Academy sales to date. One hundred and forty exhibits brought a total of £5,430 this year as against £4,720 to the same date last year.

C.P.R. Chief Praises Bennett

R. W. Beatty, President Of the C.P.R., Looks For Early Upturn Of Trade

Toast was

R. W. Beatty, president and chairman of the Canadian Pacific Railway, has praised the "courageous and vigorous leadership" of President Roosevelt and of the congress of the United States as well as the recent trade conversation between the president and Premier R. B. Bennett.

In an article contributed to the "Boston Transcript," Mr. Beatty eulogized Canada's railway problem, expressed hope in the forthcoming economic conference, and said he looked for an early upturn in the volume of trade between Canada and the United States. Mr. Beatty wrote:

"I have no doubt that the economic situation will steadily, if slowly, improve and that a more or less free interchange of commodities between various areas will commence to make itself felt over the next few months.

"It is reasonable to suppose, also, that it will not be long before we see the start of an upturn in the volume of trade between Canada and the United States.

"I am one of those who look hopefully towards the world economic conference, having something more than a small faith in the common sense of the men now in positions to direct the struggles of the great nations towards economic salvation, and I am then assured that our serious economic difficulties will soon be observed to take on a less formidable aspect, the troubles of our railways will be accordingly lightened, but we shall then be faced with the still hardly less though provocative matter of competition in transportation. Railway executives have already directed much consideration and effort to this direction, and results have not been without considerable encouragement.

Premiers Welcome Bee

Herbert J. Hardie Was Well and Favorably Known To Western Canada Printing Industry

The best known personality to visit from time to time the publishing houses of western Canada, from the Great Lakes to Victoria, B.C., Herbert J. Hardie, known as Merry to his many associates, died suddenly Saturday afternoon, May 6th, age 63 years. Death occurred at the family residence, 939 Grosvenor Avenue, Winnipeg.

Mr. Hardie had been confined to his home for a few days with a heart affection. He had never been sick a day in his entire life and the ailment was not considered serious. He had been in the room of a daughter who has been ill for some time, and carried a loop to her with her evening meal. During the afternoon on a chair in his own room Mr. Hardie had shown on the bed and died in two minutes. Mrs. Hardie made the tragic discovery.

Mr. Hardie was born in Caledonia, Ont., but when quite young location in Toronto. He served his trade at Tilsonburg, Ont. There he received his education in the public and high school.

On Christmas Day, he was married to the bride being Miss Nellie Barker, and shortly after the young couple came to Winnipeg. Mr. Hardie having a position in the Free Press Office as accountant in the business office. He remained with the newspaper for six years. At the end of that period he joined the staff of the Toronto Type Foundry Co., succeeding J. E. Crome as manager of the branch, and for 30 years with the company in the same position for the past 30 years.

He traveled extensively and was known from Sault Ste. Marie and Port Arthur, Ont., to Vancouver Island. He was married to Miss Ethel Mansbridge, daughter of the late Rev. Albert Mansbridge, founder of the Workingmen's Institute and Mechanics' Institute. He was a member of the Kildonan United Church. At Sunday school he was for 25 years under Rev. Dr. Bentley, the minister, referred feelingly to the loss sustained by the congregation.

PUBLISHER PASSES

Manager of Toronto Type Foundry Co. Western branch, whose death occurred in Winnipeg

Surviving are a widow and five daughters, Minnie Lucile and Rose, living at home; Mrs. Jackson L. Rutherford and Mrs. Chester Stovel, Winnipeg; three brothers and one sister, Arthur and Percy Hardie, Toronto; Dr. R. A. Hardie, United Church missionary at Seoul, Korea, W. A. Hardie Vancouver, B.C., and Mrs. H. Hardie missionary of the United Church, at Marshalland, India. Mr. Hardie had been a resident of Winnipeg for the past 43 years.

George H. Smith, secretary of the Graphic Arts Association of this city, said: "Mr. Hardie will be long regarded as one of the most successful of the young men who had come from Ontario to the West and succeed. He had a wide acquaintance with the publishing business from Port Arthur, Ont., to Vancouver Island. He served in the capacity of publishing office a that wide stretch of country which did not know Mr. Hardie personally, and on which he had not made from year to year a favorable impression. He was a charter member of the Weekly Press Association from the inception of the organization and attended all their conventions. In the early days he was an active member of the Western Canada Press Association. He never restricted his activities to his own line of business, one might say he lived in harness. His motto was 'Do unto others as you would be done by.'

"They could always help the poor for the poor would never be lacking, but Himself they would not always have. Jesus reminded them. Jesus was not uttering a prophecy about the poor. He was merely stating a fact that was, and still is, very conspicuous to His land.

"Our Lord and Master.

"Also He departed, left us in His will

As our best legacy on earth, the poor.

There we have always with us, but we us not.

Our hearts would grow as hard as the Lenten stones."—Lenthen.

Sunday School Lesson

MAY 28

JESUS AND HIS FRIENDS

Golden Text: "Ye are My friends if ye do the things which I command you." John 15:14

Lesson: Mark 13:1-14:9

Devotional Reading: John 14:15-27

Explanations and Comments

Plotting Of Priests and Scribes. 14: 1, 2. Two days before the Passover Feast which lasted also for seven days, and of unleavened bread, the chief priests and scribes had also discovered how to put Jesus to death. Yet Him The deed would have to be done quickly, they decided, before the feast began for they feared a tumult among the people if they should do so. Then it must be postponed until afterwards. They thought. The providence which guides Bible thoughts knows, verse 10 was a safe one which would avoid the uproar.

The Anointing At Bethany. 14:3-9. In Bethany Jesus was the guest of one named Simon of whom we know no more to distinguish him from other Simons. Though he must have been cured of his leprosy, for his guests would have been made ceremonially unclean. Similarly Matthew was also called Matthew the publican after he had left his tax collecting. To the host came a woman whom we know from John 12:3, was Mary, the sister of Martha and Lazarus who brought with her an alabaster flask filled with very costly ointment pure nard like unto the flask which was in the dust a stopper she poured its contents over the head of Jesus. John tells us that the anointed His feet and wiped them with her hair and the house was filled with the odor of the ointment.

The disciples, and especially Judas, as John tells us, were indignant calling it a useless waste They said the money should have been used to feed three sufferings and that sum given to the poor. The word in the Greek which is translated shilling denotes a coin worth about eight pence, or twenty, or nearly seventeen cents. The margin of the Revised Version tells us that it was the wage for a day's labor Dr. A. R. Bruce explains that it was a woman's act, and that it was men, that she was a poet, and they were somewhat prosaic They were incensed against Mary, spoke harshly to her, but Jesus praised her for what, why trouble ye her." Let her alone. "She hath wrought a good work on Me."

They could always help the poor for the poor would never be lacking but Himself they would not always have. Jesus reminded them. Jesus was not uttering a prophecy about the poor. He was merely stating a fact that was, and still is, very conspicuous to His land.

"Our Lord and Master.

"Also He departed, left us in His will

As our best legacy on earth, the poor.

There we have always with us, but we us not.

Our hearts would grow as hard as the Lenten stones."—Lenthen.

Ceremony Long Delayed

Boer Roads Burial Service Over Grave Of Shackleton

A burial service performed over the grave of Sir Ernest Shackleton the famous Antarctic explorer in the South British-South Atlantic island of South Georgia more than 10 years after his death there is described in a letter received in London recently from the Very Rev. Hardwicke Dean of Stanley, Falkland Islands.

Shackleton died on board the Quest at South Georgia, on January 5, 1922, four months after sailing from London on his fourth expedition to the Antarctic.

Mr Lumsdaine took up his present post in February 1932, and has duties extending from South Georgia, South Shetland, South Orkney, and South Sandwich Islands and say Mr. Lumsdaine southward to the South Pole He writes

In December I crossed the South Atlantic in a trawler some 850 miles to Shackleton in South Georgia

No priest had visited there before, and since Shackleton had only been buried a layman I felt it my duty to say the office for the dead, and added the words of committal

On Sunday December 11 at five in the afternoon, we set out for the grave Large numbers of whalers Norwegian as well as English, took part.

The sun was shining brightly on the lofty brown mountains, which were surrounded with snow on the sides and capped with snow for hundreds of feet for they are 6,000 to 8,000 feet high.

The little cemetery lies at the foot of three mountains, and Shackleton's grave with its stone stands out from the rest.

Among those who attended the service were Commander W. M. Carey, R.N. (retired), of the Royal Research Discovery II., which recently returned to Cape Town after cruising for a year in the Antarctic and many of his officers and crew.

Polar Bear Rugs Fashionable

Many Inquiries Come From East To The Pas

Churchill polar bear rugs are the vogue in the east. Since the Hudson's Bay Railway opened there has been an increased interest in white bear floor coverings. Most of the enquiries about the white bears come from the east. Taxidermists, collectors, and representatives of museums are seeking specimens of the big bears.

A number of persons have written for buyers in The Pas regarding shipments of live bears, especially cubs Recently H. Kerr, for buyer, shipped one bear skin eight feet three inches in length, to a taxidermist who is mounting it for the Brandon, Man., museum. Another six foot bear was shipped to H. S. Cruikshanks, Truro, Nova Scotia. Another went to Dr. John Boland, Providence, R.I.

Hundreds of wild animal rugs have been manufactured in The Pas in the last few months.

Many Students Enrolled

University Attendance Reaches Highest Figure On Record

Enrolment of students in Canadian universities reached the highest figure on record at the end of the academic year, 1932, the Dominion Bureau of Statistics reports. As an explanation the report quotes the Ca negie Foundation for the Advancement of Teaching as saying "persons above high school age are just the group which unemployment throws back into schools in the largest number."

Universities had 43,143 students at the end of the year, in June, 1932. This, compared with 40,500 in 1931, was an exceptional increase and the 1931 figure compared with the 1930 enrolment of 31,388 is still more remarkable In 30 years from 1901 when enrolment was only 9,628, the increase was 330 per cent.

Hop growers in Fraser Valley, British Columbia, average about 1,200 pounds per acre, but in some instances the yield has reached a ton per acre.

All grain feed for poultry should be ground as finely as possible.

Income Tax Changes

Applies To Cheques Issued For Milk, Cream Or Eggs and Poultry

Further exemptions to the tax on cheques, under orders and regulations were approved by the House of Commons at Ottawa, when the special War Revenue Act was put through its final stages. Hon. E. N. Rhodes, Minister of Finance, moved an amendment exempting cheques issued in payment for milk, cream or eggs, and cheques issued in payment of eggs or poultry by egg or poultry producers. He also moved that a simplified cheque issued by co-operative associations of wool growers in payment for wool to producers, and cheques issued by municipal corporations in receipt of unemployment relief.

"At the same time," he added, "there is a similar exemption in the case of money orders, and also a similar exemption in the case of postal notes."

The minister also added a clause to the bill which makes it clear that the Canadian National Railways company has, which have been segregated from the provisions of the act insofar as the five companies through the national long winter strike night. Instead they were in and the reception is as close as a test. No clambering trolley cars, no inconvenience from the interminent door.

Col. Jim Cornwall is a pioneer of the Canadian Northland. Known as "Trees River Jim," was given him when the Peace was weakin' travel between the rim of civilization at Edmonton. He was the first man to see white man to realize the possibilities of the country.

Fur Auction Foiled

Jewish retaliation to Germany's anti-Semitic movement took a formidable form in London when the removal Leipzig fur auction proved a complete failure as a result of an international boycott arranged by Jewish buyers.

Teachers of Scotland are fighting further salary cuts.

Relief Is Great Demand

Need To Floor They Constitute Big, Most Important To Settle

Relief continues to be the chief argument of people, next to flour only, sent into the arctic and traders now buying their stocks in Winnipeg to go north are purchasing all the hunting radios, new and used, they can get their hands on.

"The husband," said Col. Jim Cornwall in an interview at Winnipeg, "is going radio-mad. Every last Indian in the lonely country and every Eskimo in the barren lands wants a radio. They will pay any price for them and some of the traders, I fear, are profiteering.

"I know one trader who sold a radio for six white fox skins. Those fox skins are worth about $100 and he is employed to 12,500. The work is to be finished on June 30, according to the plans.

Last fall an order-in-council authorized expenditure of $750,000 for this purpose, but it will be the laying out of emergency necessary building fields in the more isolated regions across Canada.

Future Of China

Frederic Nathan Will Be Split Up Into Two Great Regions

Possibility that China would be split up into two great regions, a Nanking Communist government in the north and the present republican administration in the south, was foreseen by Professor Kiang Kang-Hu, chairman of the department of Chinese studies at McGill University.

Deep down in their hearts, Professor Kiang believes, northern Chinese desire the return of their old ruler emperor, Henry Pu-Yi, president of Manchukuo. He thinks that the Chinese of this section are making use of the Japanese invasion to bring about their dreams of a re-established empire.

Alfalfa has been grown from time immemorial in Persia, and in perhaps, the oldest forage plant in the world.

GERMANY READY TO CO-OPERATE IN PEACE PLAN

Berlin, Germany Chancellor Hitler trumpeted Germany's demand for equality in armaments and underlined Germany's readiness to co-operate with other nations in guaranteeing international security and tranquility in a pronouncement before the reichstag

"There is but one great task before the world, namely to secure the peace of the world the Nazi chieftain asserted in an address which while strongly reaffirming Germany's right to live" on equal terms with other peoples, was marked by obvious moderation.

The German chancellor roundly scored the Versailles treaty but pledged his government to abide by it until some better instrument should be found to replace it

He said he considered Prime Minister Ramsay MacDonald's arms plan a starting point for solution of the arms problem.

Hitler, in a speech of peaceful intentions, declared that Germany's colonies which probably would be broken at 2,000 miles of distance from Russia he plans to fly 2,000 miles over water and ice to Fair banks, Alaska, and then 1,450 miles to Minneapolis and 2,100 miles back to New York

The rebuilt plane will have a cruising range of 7,000 miles and a normal top speed of 225 miles an hour.

Former Inspector Sentenced

Crime Career Of C.N. Employee In England Is Revealed

London, Eng. An astonishing career was revealed at Old Bailey, when Arthur Hay, aged 45, former inspector of the Canadian National Railways was sentenced to three years penal servitude when found guilty of thefts of suitcases from railway trains in all parts of the country, containing property valued at nearly £10,000.

It was stated Hay was followed 2,000 miles by a railway detective. Among victimizations Hay was stated to have been convicted of stealing in 1906, in England, after which he went to South America and worked his way back to England. He joined the Royal Northwest Mounted Police and later served in the Dardanelles during the war.

In 1927 he went to Australia, where he was sentenced to jail for thefts in Melbourne, Sydney and Brisbane. He was also sentenced to six months' imprisonment in Manchester in 1931 for stealing $10,000 worth of jewelry.

Says No Election

Premier Henry Says No Appeal To Ontario Electors in June

Toronto, Ont. Brief announcement that there will be no general election this year that the Ontario Government would not appeal to the electors in June or this year, "No, we are not going next month," was the Henry declaration.

Notwithstanding the Henry statement, the newspaper says there is every indication around parliament buildings, however, that the wheels of preparation for an election are beginning to gather speed.

Got Jail Term

Denison, Iowa. Twelve men arrested at a farm auction here April 29, pleaded guilty in district court recently, to charges of contempt of court in defying orders of the court process. Judge Homer A. Fuller sentenced each defendant to one year in th state penitentiary on the resistance charge, but issued bench paroles.

Alberta Farmer Killed

Carmangay, Alberta. Frank Hubka, 68, pioneer farmer of southern Alberta, and his daughter, Miss Mary Hubka, were killed instantly at Peacock, Alberta, five miles south of here when the car in which they were driving was struck by a northbound Canadian Pacific Railway passenger train.

Plans World Flight

Wiley Post Will Make Solo Attempt To Circle Globe

Oklahoma City Wiley Post, comrade of the round-the-world flight record endowed that he would take off about July 1 in a solo attempt to lower the mark

A stop is planned at Edmonton Alberta.

The flight Post said, will be made in the Winnie Mae, in which he and Harold Gatty flew around the globe in eight days 15 hours and 51 minutes in June 1931 The plane will carry a new motor

I am simply going out to set a new record, my personal ambition was Post's only comment I will have no helper, no manager, and no partners

Instead of a human companion, Post will be piloted by a robot which he has been testing for several weeks. Post expects the robot to relieve him of much of the strain of flying leaving him free to navigate and rest

Under plans announced the route would be much the same as that followed by Post and Gatty. It calls for a leave from New York with the intention of making a direct non-stop flight of 2,000 miles to Berlin. From there would make a 4,000-mile jump over Russia which probably would be broken at 2,000-mile intervals. From Russia he plans to fly 2,200 miles over water and ice to Fair banks, Alaska, and then 1,450 miles to Minneapolis and 2,100 miles back to New York

Will Not Resign

Premier Bennett Says Government Will Not Resign Over Senate Defeat

Ottawa, Ont. The government will not resign because of the defeat in the senate of the bill to amend the Judges' Act, Prime Minister R. B. Bennett said in answer to S. W. Jacobs (Lib., Cartier) in the House. Mr. Jacobs harked back to the statement in the House some days ago by Mr. Bennett in respect to the railway bill, when he said that the government dismissed any of the proposed Canadian National trustees, and the senate refused to co-operate in a joint address to make the dominion statutory, he would resign He asked if the action of the senate would have the same effect

"I have no such intention," the prime minister replied, nor would ever intend it should be so, except in the case of a joint resolution.

Uniform Federal Relief

Premier Brackin Would Have Provinces To Make Joint Representations

Winnipeg Can the provinces persuade the dominion government to adopt a uniform federal relief policy, is the hope of Premier John Bracken of Manitoba

Mr Bracken following a conference between the provincial premiers and the dominion government in which a uniform federal relief policy was discussed, declared he would urge the premiers of Alberta and Saskatchewan, suggesting the three provinces make joint representations to the Dominion Government.

Reviewing relief work since 1930, Premier Bracken said 60,000 people now are on relief in Manitoba More than 60,000 of these were in Winnipeg and Brandon, the province's two largest cities. Number on relief had increased 40,000 in the past year, he said.

Mentioned For Board

Justice Charles P. Fullerton who is mentioned as a possible choice for the new Canadian National Railways Board of Trustees

Unemployment Relief

Premier Brackin Says Province Will Do Its Share

Premier John Bracken of Manitoba, speaking in the legislature, declared that the province would do its share in the matter of unemployment relief.

"We have not been unmindful of the situation," he said, "and have been doing what we could to relieve it. We have done our share and will continue to do so."

Rum Ran Tides

Claim Rule In Not Binding On His Majesty's Government In Canada

Ottawa, Ont. It is the considered view of the government that the decision which with respect to honey adopted by a majority vote of the members of the House of Commons only of the 13th parliament, is not binding upon his majesty, or his majesty's government in Canada, or even suggesting the three provinces make joint representations to the Dominion Government.

Reviewing relief work since 1930, Premier Bracken said 60,000 people now are on relief in Manitoba More than 60,000 of these were in Winnipeg and Brandon, the province's two largest cities. Number on relief had increased 40,000 in the past year, he said.

New Labor Minister For British Columbia

W. M. Deanbo Takes Office In Premier Tolmie's Cabinet

Victoria, B.C. William Middleton Deanbo of Vancouver, president of the National Labor Council of the All-Canadian Congress of Labor, has been sworn in as British Columbia Minister of Labor in the Government of Premier S. F. Tolmie

Appointment of Mr. Deanbo to the British Columbia cabinet is the first step taken by Premier Tolmie in the reorganization of the executive council

The new minister has been a resident of Vancouver for 25 years, and is well known in British Columbia labor circles as a member of the Amalgamated Carpenters of Canada. In 1915 he enlisted in the Canadian Engineers and served overseas throughout the duration of the war Upon his return to Vancouver Mr. Deanbo was appointed instructor for the soldiers civil re-establishment board. He has had many years experience in the labor movement and has always taken a keen interest in it's problems Mr. Deanbo was born in England

Acreage Cut To Solve The Wheat Problem

Geneva, Switzerland The wheat conference held here during the past week attended by delegates from Canada Australia United States and the Argentine has adjourned.

It is believed representatives of the four great wheat exporting countries agreed in the principle of a 10 per cent reduction of a reaping and regulation of exports. The official communique issued however merely states the committee hopes to frame definite proposals after its second meeting in London a few days before the world economic conference.

The communique goes on: "As the wheat crisis grows worse it is being realized more and more clearly that it can only be combatted by international understanding."

Referring to measures taken by the main importing countries to maintain wheat prices, the communique states prices in certain of these countries are, in some cases, three and four times as high as world prices.

"Judging from the disastrous price level it might be thought," continues the communique, "that such enormous over-production but a comparison and analysis of figures of production and consumption shows that real surphuse do not represent the difference in quantity which might be expected in view of the remarkable drop in prices.

The experts thoroughly examined the question of limitation of production and agreed that together with liquidation of stocks, and will reasons conversations in London. May 19th Order of Ex. Michael and St. George, the premier said, was in accordance with established constitutional practice.

Among parliamentarians the general interpretation of the government's reply is that Canadians are not precluded from receiving titles in the New Year honor list, the king's birthday or similar occasions.

The answer was in reply to a question by Joseph Mercier (Lib., Laurier-Outremont). Mr. Mercier asked: "Do the recent decorations granted in the Order of St. Michael and St. George and in the Order of St. Gregory the Great, mean that Canadians holding titles in any order may now accept promotions in the same order as such promotions do not carry any rank or title."

Manitoba Defeated

Move To Ban German Goods From Britain Is Rejected

London, Eng. A move in the House of Commons to combat the entry of German goods into Great Britain under the international sanctions clause of the League of Nations covenant was defeated after an eloquent appeal by Sir Austen Chamberlain.

Geoffrey Mander, National Liberal in Commons, requested a bill to authorize the prohibition of German goods and spoke for five minutes in defence of the proposal.

Sir Austen arose in a tense atmosphere and to the accompaniment of approving cheers appealed to Mander to withdraw the measure, telling him that such steps should be taken only in an emergency and that it was the government's province to decide when an emergency existed.

Mander withdrew the bill.

Business Is Improving

Change According To Report, Most Noticeable In West

Toronto, Ont Employment and business have been gradually on the upgrade throughout Canada in the last month if expansions reported to the Canadian Press by leading firms reflect conditions.

The most general pick-up is noted in the west where a moderate expansion of staffs has resulted mainly from activity in the food supply and wearing apparel industries.

Duties On Straw-berries

Ottawa, Ont — Two cents per pound will be added to the value for duty of strawberries imported into Canada from May 25 to July 31, in lieu, when entered under the intermediate or general tariff, it was announced by th department of national revenue.

Rehearsing For The Royal Tournament

Here we see members of the Royal Navy and Royal Marines rehearsing the field gun display at Whale Island in preparation for the Royal Tournament to be held at Olympia, London. Our picture shows four of the team swinging the gun first outwards on lowering thirty-foot chasm.

Where Dogs Are Important

Only Domestic Animal Of Unknown Name In Siberia

An unknown race of white people, four hundred strong and almost isolated from the rest of the world, live in the farthest north of the frozen land of Siberia on the shore of the Arctic Ocean.

They are possibly descendants of marooned Arctic navigators of the sixteenth century who were lost while searching for the northern route to India.

To the north they are hemmed in by the Polar Sea. Behind them on all sides is a barren snow-bound, trackless domain, as vast as a continent.

The people can neither read nor write. They have no bread and no means of baking it. They have never seen milk butter or beef for cows and cattle are unknown. They have never seen deer horses, or fowl not even a cat.

Potatoes and vegetables are utterly unknown, and only those who have travelled to barter their white fox furs have ever seen a living tree.

They have never heard metal. In the dog however one on earth is the one more important or held in higher regard. For without the sled-dog, life would be utterly impossible to these people.

In the white wilderness of the tundra of the coast even rotsdeer cannot live. But the dog can be fed on the fish caught in the Indigirka River, along the course of which the settlements extend.

Dogs are the only domestic animal. They are the only animal they know, except reindeer, which are wild. They have never seen a horse, or fowl not even a cat.

Each dog has a name of its own, and knows it. It will come when called by name, and will not answer to any other name.

The dogs are driven in teams of four dogs, and the better-off have teams of from ten to eighteen. They desire the sleds which carry dunderwood for food and ice from the river and without them, hunting and trapp..ng would be impossible.

A team usually consists of eight or twelve dogs, in pairs, with a single leader, harnessed to a light sled put together with straps and without a single nail. The leader of the team must understand all orders, and knows how to play the part of captain.

Should a white partridge or a white fox rise from the snow and go away by the sled approaches, the sot ry string of dogs, hearing and barking, will start in chase. The leader dashes in the opposite direction, digs in his claws, and pulls the team back.

At the same time he barks loudly, as if to assert that this hard work is really want the other way. A good dog leader is worth a fabulous sum to those poor people—fifty roubles, or five pounds.

No whip is used in driving, but the driver keeps his team keen by continuous cries "Horakh-horakh!" — to the left, "Pon-m- pon-m!" — forward.

The dogs have greater endurance than the reindeer, and can travel a sled fifty miles in a day. Races are sometimes held and a team will gallop a short distance at to'ally-five miles an hour.

Once the dogs have been over the ground, they will never lose the t'ail.

Nothing in Old Stories

"Last Spike" Lisiting C.P.R. Was Probably Plain Iron

The "last spike" that was driven at Craigellachie to mark the linking of the east and west construction of the Canadian Pacific Railway was probably just plain iron—the same as a million other spikes used in the construction.

R. C. Boyce of Craigellachie heard stories about the "last spike" being of gold and being removed after the ceremony. Boyce asked the C.P.R. about the spike and what happened to it.

As far as railway officials could learn, Boyce said, the spike was just an ordinary spike. It wasn't even removed immediately after the ceremony but probably disappeared as scrap iron years later when repairs were being made.

It has been decided in court that birds have a legal right to nest in trees. This must be a great relief to the birds.

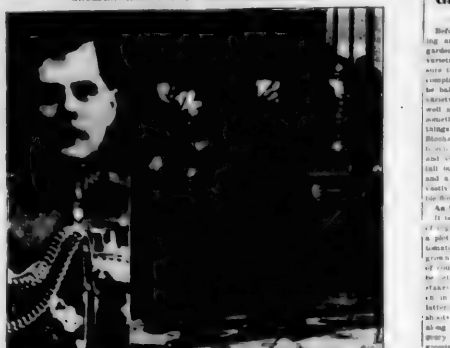
SWEEPING REFORMS TO BE MADE IN LONDON POLICE



According to a white paper on police reform published in the British capital, sweeping changes in administration and composition of the London Police Force are planned. A period shortly Publication of the paper followed serious disturbances by Police Commissioner Lord Trenchard of widespread agitation and "insubordination" within the force. The proposals include drastic curtailment of time which police officers will be permitted to spend as members of the police federation, the Police Trades Union. This organization was severely criticized by Lord Trenchard. One of the cartoons above Lord Trenchard on the left, and a group of London "Bobbies" standing under the Marble Arch watching unemployed demonstrations.

Busted With Military Rites

Gallant Old War Horse Was Favorite Of U.S. Men

The end in grave over a new grave at the navy yard in Portsmouth, New Hampshire. When the gallant warrior lying there was laid to rest, eight rifles cracked a military salute and a eagle rent the morning air.

It is the grave of "Old Tom," gallant and war-horse which died at the venerable age of 45.

Old Tom, favorite many years with the United States marine corps, was born in New York city in 1880, on New Year's Day.

Two years later he "enlisted" with the marines.

During the Spanish-American war, he boomed the ranks of one and bored the whine of bullets, for "Old Tom" was wounded in a battle.

He recovered, and again saw active service, particularly at Guantanamo and San Juan Hill, where Theodore Roosevelt and his Rough Riders won undying fame.

At Ol' Tom's burial 50 marines rigidly stood at attention; it was these marines who since 1920 paid for his apples, sugar and fine hay that kept him contented and happily ended his last days.

Greater Than the Ring

Abbott Of Westminster Once Took Championship Of Superb

Dr Joseph Armitage Robinson, who once dared to turn his opinion with King Edward is dead.

As Dean of Westminster Dr. Robinson had been largely responsible for the arrangements of King Edward's coronation. King Edward is said to have had some differences with Robinson over the coronation plans and said "Please remember I am King of England."

To this Dr. Robinson replied "Remember, Sire, I am the Abbot of Westminster."

This instance was a reminder that in earlier times the Abbot of Westminster was practically superior to the King.

Most Thoroughly Fleyed

Husbands who have been deserted by wives for bridge parties all winter, remember St. Theodore Times-Journal, will now get their own back by deserting their wives for golf all summer It may be noted, says the Kingston Wing-Standard, that quite a few husbands play bridge and that many wives also play golf.

Neighborliness cannot be standardized. Giving until it hurts is not a true measure of charity. Some are easier hurt than others.

Scotland is to have an air fleet.

Two Hundred Years Old

Surprisingly In spite Of Great Age Still Active Tree

A music-maker of undisputed genuineness, despite great age, was recently taken to Montreal. Eight feet long, more than four feet wide and nearly two feet deep, the musical instrument weighs 670 pounds, but for all that finds no difficulty in moving around. Normal heat is required for its well-being and there should be no sudden changes of temperature. When it is added it is 200 years old, the further information that it is a harpsichord will occasion no surprise. It is found on research, and is the property of the Society of Amateur Instrumental, National Broadcasting Company. It is travelling with five Frenchmen with Henri Casadesus in charge. They play on the harpsichord, supported by virginals, pandorins, bass and a number of other 17th century instruments.

An Inexpensive Sport

Wallenburg College finds girl students going for the less expensive sports, riding and golfing declining as tennis takes a sport Some pedestrians will contend that if dull times continue long enough a golden discovery must come that trained walking is one of the most satisfying and rewarding sports of all.

A model of a honeycomb nearly six feet wide has been installed in the Institute of Bee Research in Berlin, Germany

Just Two Times Two

Farmer's Contract Looked Good But Was Impossible To Fulfil

Early in the eighteenth century a farmer made a contract which he thought was a good one for him. He undertook to deliver for the sum of 12 two grains of rye on the following Monday, four grains a week later, eight grains the week after that, and so on for a year. All went well for some weeks, but presently he found that his final delivery at the end of the year would require more rye than was sown in the whole of England A lawsuit took place over the contract What the farmer had not realized was that though twice two are four, two multiplied by itself fifty-two times comes to nearly ten thousand billion The number of grains of rye would represent about 8,000 million bushels. An acre of rye produces about ten bushels, so one can work out just how many acres would have been required to fulfil the contract. Another famous "two times" case was that of the blacksmith who undertook to shoe a horse for a payment of one farthing for the first nail, a half-penny for the second, a penny for the third, and so on. At first sight this seems quite a reasonable charge but try working it out!

Hothouse strawberries picked at Warnsch, Hampshire, England, have been sold for $6.00 a pound.

London paid an average of $1,000 to its policemen last year.

◆ FANCIFUL FABLES ◆

Gardening Notes

By Gordon Lindsay Smith

Before finally disposing of the sowing and planning end of the flower garden, it is well to check over the vertexes and types in order to make sure that all requirements have been complied with this a garden should be balanced That is there must be shrubs of colors shades, tones as well as hot, dry ones, planted with something suitable, plenty of tall things some planted behind the Hooks and Mountains, continued in front by low and short forms and vegetable garden screened with tall sturdy things and annual climbers and a fair showing of the bulb and plants improved both single and double for flowers

An Intensive Vegetable Garden

It is really remarkable the amount of vegetables that can be produced in a plot twenty-feet square Sufficient tomatoes for a small family will be grown on six or eight plants These of course should be staked and may be set at eighteen inches apart The stakes are set facing east are driven in close to the plant when the lateral shoots which off all side shoots starting from ought must stem along the pole and tying it about every foot Much work during the growing season the plants should be inspected and all side shoots nipped off in between where the tomatoes are going to be planted, grow lettuce, using an early and late type, and also the Cos variety which will supply the table during the late summer and early fall One or two rows of beans are advisable as these yield very heavily for the amount of space taken up Make two plantings about two or three weeks apart. Fifteen inches is sufficient space between rows. Carrots and beets will give very good returns and should have from twelve to fifteen inches between rows Spinach is also a heavy yielder and as it matures early is out of the way before the later vegetables require full room. On this account it, as well as lettuce and radish, can be planted in the same row of onions, house boots and tomatoes. Swiss Chard will supply a huge quantity of greens by Mid-June

ECONOMIZE . . . . . But ADVERTISE

Protect Your Clothes from Moths

We have everything necessary to give complete protection to your winter clothes—

CEDAR GARMENT BAGS 75c
RED CEDAR FLAKES per package 25c
MOTH BALLS per lb. 25c
LIQUID SPRAYS of all kinds (with sprayer) ..... 35c to $1.25
NU-ODOR DEODORIZER per package 35c

Prepare now for summer storage, and keep your winter clothes in good condition.

Smith's Drug Store

Well, Folks! Spring is Here Again

Make necessary repairs—tidy up your property. It takes a little work—not much—just a small application of rake, hammer and saw. The leaky roof should be re-shingled immediately, before the rains come, and a few boards and sawdings to repair the odd jobs about the place.

We can supply your needs to do these repairs at the lowest prices in years—so—do it now.

Simmons' Lumber Co.

Town of Fort Saskatchewan

Notice is hereby given, that under the provisions of The Tax Recovery Act, 1930, the Town of Fort Saskatchewan will offer for sale, by public auction, at the Town Hall, Fort Saskatchewan, on Thursday, June 22nd, 1933, at 2 o'clock in the afternoon, the following lands—

Lots	Block	Plan	Lots	Block	Plan

The Record is always pleased to receive and print news items from any of its readers. The doings of your district interest other localities and keeps the district you represent in the live wire class.

The delayed visit of the Governor-General, the Earl of Bessborough and Lady Bessborough, in the Peace River district in Alberta, will be made this summer, according to word received from Ottawa.

To those who have not paid their subscription, we make an urgent appeal, we need the money.

oooooo

According to reports, two planes of the McKenzie Airways, Co., of Edmonton will land on the field behind the Provincial goal buildings today (Tuesday).

They are of cabin type, and will fly from town with wheels, making the change to pontoons near Fetherstone's old saw mill site.

It is the intention of the Company to see if the river at that point could be used for planes taking off and landing.

It would be quite a boost for the Fort if a suitable landing spot could be found on the river here.

ALBERTA'S EXHIBIT FOR GRAIN SHOW

Space of 120 Feet Frontage Will Feature Tourists' Attractions

Extensive, elaborate and artistic are the terms justly applied to Alberta's exhibit now in course of preparation for the World's Grain Exhibition and Conference to open at Regina, Canada, in July next.

Emphasis will be put mainly on the tourist attractions of the province, it being recognized that Saskatchewan and Manitoba are the great tourist market from which Alberta may most naturally expect to draw. For a similar reason, the coal resources of this province will be displayed also.

A space of 120 feet has been allotted for the Alberta exhibit, the position being near the first entrance of the big fair building opposite the Canadian National railway exhibit and backing that of Ontario.

An exhibit in the center 40 feet will feature the tourist attractions of the province. A 16 foot cabinet into which will be built two mountain scenes with special lighting effects will be the main unit. In the central panel a transparency, operated by an automatic electrical appliance, will present a realistic impression of one of Alberta's beautiful waterfalls. In this section too an elaborate, illuminated map will indicate the highway routes to the many tourists' summer resorts, game areas and fishing grounds.

On one side of the tourist section a special exhibit and demonstrator of Alberta's coal resources will be shown in the preparation of which the Coal Operators' association and the trade commissioner's office are co-operating.

To all this will be added a picture gallery of the province, made up of photographs, enlargements, transparencies and maps.

A new tourist booklet is being prepared for distribution at the congress, in connection with the exhibit and otherwise.

COMING EVENTS

The Ladies Aid of the United church will meet at the home of Mrs. Guy Armstrong on Thursday, June 1. Ladies kindly meet at the church at 3 p.m. where cars will be provided.

HARD WHEAT SOLD 1754 BUSHELS OF No. 1

Mr. John Mohr, of Beaver Hills, recently sold, at Josephburg 1754 bushels of wheat, which graded No. 1 hard. This is something exceptional but then Mr. Mohr is one of the most successful farmers in the district.

He also has room nearly 60 acres with the same fine grain. We wish him every success.

POLICE COURT NEWS

It is not useful to beat up a roadhog even if he "baits" your car for a 30 mile stretch, according to a ruling made by Col. Primrose when he found Leo. Dittrich guilty of assault upon E. Lawrence and bound him over to keep the peace.

Evidence disclosed that Lawrence had worried the accused all the way to from a lake resort Saturday night last. Speeding up and passing the accused, Lawrence would then slow down and refused to let others pass. At other times he speeded up, cut in on Dittrich, and eventually forced him into the ditch. Accused stopped his car and when he tried to argue with the complainant a fracas started and ended with him being chased to his car by Lawrence wielding the floor board of the car.

Ends claimed the other struck the first blow.

The Fort Saskatchewan Community Tennis Club held a very successful and enjoyable dance in the Simmons Hall on Wednesday, May 24th.

Considering there were no other attractions in town during the day, a large crowd attended the dance. The music was supplied by the Peppy Pals Orchestra.

At midnight a light luncheon was served by members of the club, after which dancing was resumed until 2 a.m.

MAN'S HEART STOPPED, STOMACH GAS CAUSE

W. L. Adams was blasted so with gas that his heart often missed beats after eating. Adlerika rid him of all gas, and now he eats anything and feels fine. F. W. Smith, Druggist.

UNEMPLOYED BECOME GOLD HUNTERS

Equipped with well-constructed "grubsiles", for washing gold, some 70 unemployed of Edmonton will enter the gold-hunting business along the Saskatchewan River within the next week or two.

The equipment has been constructed under supervision by the men themselves.

One outfit will require 50 men to operate, and there are other units requiring six men each. The new equipment is much advanced over the old-fashioned "grubsiles."

SUPPORT THE ADVERTISERS

BROODING AND REARING TURKEYS ARTIFICIALLY

At this season of the year many farmers are wondering how to raise their turkeys. They have plenty of turkey eggs on hand and no broody hens with which to incubate them.

It is not uncommon for large numbers of eggs to be wasted waiting for chicken hen or turkey hens to go broody. Artificial incubation and brooding are entirely satisfactory states the provincial poultry commissioner and in the end usually in many more turkeys being raised than if done in the natural way.

It is true that in incubators one does not get as large a percentage of poults, but breeding artificially seems to give better satisfaction, with less loss and quicker growth than when the poults are brooded with hens For incubation, a temperature about one degree less than for chicken eggs gives good results, with the moisture slightly increased. As soon as the hatch comes off, and the birds are thoroughly dry, the young poults should be removed to a colony brooder, or where battery brooders are available, into the battery brooder. As most turkeys are hatched in May and June, an oil burning colony brooder will usually provide sufficient heat and is more easily controlled on warm days than a coal burning brooder, although either will give good results.

Special each 98c

MEN'S FLANNELETTE NIGHT SHIRTS
—Boys' Flannelette night shirts. Sizes 12½, 13, 13½, Special sale price. 98c

MEN'S MESH UNDERWEAR
—Men's Merino Combination Underwear. For the working man, nice summer weight with long sleeves and long legs. Sizes 36 to 42.
Special sale price each 98c

MEN'S BORSEHIDE WORK GLOVES
—Men's Genuine Alaska Horsehide work gloves.
Sale Price 98c

MEN'S SILK COMBINATIONS
—Men's White or Colored silk Athletic style combinations.
Each 98c

MEN'S CAPS
—Men's Fancy wool tweed caps in light and dark shades, silk lined, unbreakable peaks. All sizes each. 98c

BOYS' CAPS
—Nice assortment of Boys' Caps in tweeds, well lined.
2 for 98c

MEN'S SILK TIES
—A wide variety of patterns of Men's ties to choose from. Regular 50c.
Sale Price 3 for 98c

MEN'S FANCY DRESS SOX
—Men's Fancy Dress Sox in all new patterns. Also all the new shades in plain colors. Sizes 10 to 11½
Special Sale Price 3 pairs for 98c

MEN'S COTTON DRESS SOX
—Men's Cotton Dress Sox in fancy patterns and colors. All sizes.
Special Sale Price 5 pairs for 98c

MEN'S HANDKERCHIEFS
—Men's fine white cotton hemstitched handkerchiefs, good size.
Special Sale Price 15 for 98c

Summer Shoes

MEN'S OUTING SHOES
—Men's cool brown canvas running shoes. Best quality rubber soles, ankle patch. Sizes 6 to 11.
Special Sale Price 98c

BOYS' BROWN CANVAS RUNNING SHOES
Special per pair 98c

WOMEN'S WHITE CANVAS OXFORDS
—Women's White canvas tennis oxfords. The canvas and rubber in these shoes are of the very best quality. Sizes 3 to 7. Special sale price 98c

CHILDREN'S SHOES
—An odd lot of children's shoes and slippers on Sale at 98c

—There is a variety of styles in patent, black kid, and some colored leathers all of good high class makes. Special price at 98c

Scores of seasonable articles specially priced for this Sale are on our tables.

The Leader for Forty Years

"Fresh from the Gardens"

Shall Broadcasting Become a Monopoly?

Canadian policy regarding radio broadcasting is a very live subject for discussion and naturally so because the radio has become an intimate thing in the homes of Canada. It is to its ranks that many people, and more especially those in rural parts or where a daily paper is not immediately available now look to supply them with the correct time, weather forecasts, latest market prices, outstanding news events, the best of available music for a little chance, religious services, and entertainment of all kinds. It is, therefore, only natural that policies and regulations governing radio broadcasting are of interest and moment to Canadians as individuals as well as to Canada as a nation.

Following investigation of the subject, a Royal Commission reported unanimously in favor of nationalization of broadcasting in Canada. Later a Parliamentary committee endorsed the policy, and finally, by a non-partisan vote in the House of Commons it was adopted. There was almost complete unity on the subject and Canadians everywhere were prepared to welcome and assist in the development of a great national undertaking and service. That was only a year ago, but that unity has disappeared and dissatisfaction is being voiced by the press, numerous organizations, and individuals everywhere. It is more indeed to hear of any person who is satisfied. This growing dissatisfaction has been noted in Parliament and Premier Bennett has promised further study of the whole subject by a special Parliamentary committee next session in an effort to bring back the old unity that prevailed a year ago.

What caused such a complete change in public opinion in a few months cannot be discussed in detail, but from the very beginning the Radio Commission appointed seems to have had a faculty of antagonizing people out of being too dictatorial. It first inaugurated a series of orchestral and symphony concerts. At first these were appreciated by many, but when no variety in programmes was provided forthcoming, nothing but symphonies and orchestras from Toronto and Montreal, people who desired something else began to criticize. Then followed a series of restrictive regulations and prohibitions imposed on all stations. But the final act of the Radio Commission which does not appear to have pleased anybody was the alteration of the three lengths of stations throughout Canada in such a manner as to shut out many of the most popular programmes from United States stations in an apparent effort to compel Canadians to listen in to the Canadian Commission's programmes whether they desired to do or not.

The Commission being a national body, and in an official sense Canada being a bi-lingual country, the Commission is perforce required to present programmes in French as well as in English. Thus many of its programmes are quite un-understandable to thousands of people in the Provinces, other than Quebec, and while they do not object to programmes being broadcast for the French-speaking portion of the population, they do resent the action of the Commission in so changing wave lengths that they cannot listen to other programmes. Furthermore, many people feel that these French programmes might well be confined to Quebec and not carried from coast to coast.

Arrangement is now made that the Radio Commission purchase or build two high power broadcasting stations, one in Saskatchewan and one in British Columbia, and that with the erection of these stations at a cost of approximately a quarter of a million dollars all present stations will be limited to 100-watt power, thus reducing them to a range of a few miles, and a small local district. The result must be the closing of all such stations because they cannot maintain the commercial support necessary for their maintenance and operation.

So, in other words, it is not merely public control or radio broadcasting in Canada,—which the vast majority of people favor,—that is now contemplated, but the creation of a Government monopoly of broadcasting, which is quite a different thing, and a proposal which has aroused strong protest.

What is the intention back of this latest decision? It seems to be stated by W. A. Reynon, M.P. for Moose Jaw, who, in a letter to a radio association, signs in part: "If the principle of national broadcasting is going to be carried to its logical conclusion, it means the ultimate wiping out of all small stations. This, it seems to me, is inevitable, and the whole question is—shall we continue the policy of national broadcasting or go back to the individual, privately owned broadcasting stations." That statement is significant in that it recommended there can be no doubt. Whether it will, or will not suit the public better, or even whether it will or will not serve them better is another question.

More is a question in regard to which the people most concerned,—the listeners-in,—should make their views and wishes known to their local M.P. in order that so many protests their views in the matter that they cannot be longer ignored. And in the meantime, it would appear that the proper policy for the Radio Commission to pursue would be to stop the wholesale changing of wave lengths of public broadcasting stations until that Parliamentary committee conducts its investigations and reports its findings.

The colors of the king of England's racing stable are purple, gold braid, scarlet sleeves and black velvet cap with gold braid.

Many new small factories are being started in Japan.

Tens of gold bullion placed in a secret "war chest" before Japan went off the gold standard are said to exist in Tokyo.

Bandsmen and Sissy Spells Serve in Bad Condition

Mr. Bell Overland, Hanna, Alta., writes:—"My nerves were in bad condition. I found it almost impossible to get a good night's sleep. I was also bothered with headaches and sissy spells.

"I tried many different remedies, but they did not seem to do me any good. Then I read about Dr. Miles' Nervine and three bottles I took restored me to health. I can highly recommend it for nervousness."

Dr. Miles' Nervine is sold by druggists everywhere, and on sale at the Alberta Co-operative Drug Store.

To Salvage Gold

Italian Vessel Engaged In Raising Treasure From Sunken Liner

The Italian salvage ship "Antiglio" has sailed for a final attempt to raise approximately $1,500,000 in gold still in the strong room of the sunken P. and O. liner "Egypt," lying 10 fathoms deep off Point de Hac.

In four previous summers of work the Italian divers recovered $2,500,000 of the total cargo of $5,000,000 in gold and silver which the liner carried to London on her last voyage, May 30, 1922. The "Egypt" sank in 20 minutes after being rammed in a fog by the French freighter "Seine." Of the 64 passengers and 191 crew, 86 lives were lost.

After finishing with the "Egypt," the "Antiglio" probably will be engaged by the Egyptian government to raise the treasure chests of Napoleon's ships which were sunk by Lord Nelson off Aboukir Bay in 1798.

NOT A PAIN AT 78

She Feels Like 48

Aches and pains are not inevitable in old age. When they do come, there is always a cause for them—a cause that can be overcome. Here is a little lesson on growing old, by a woman of 78:

"For the last five years I have had Rheumatism, but I tell you truthfully I could not live without Nuga-Tone. I'm past old. I have not a pain in my body, and I feel as young as I did at 30. I give the credit to Dr. Chase's Nuga-Tone. No one knows my age."—(Mrs.) C. M.

Most people grow old long before their time because they neglect one vital point in health. They tend for internal cleanliness. Eventually they start the healthy Kruschen habit. Then, probably for the first time in their lives, they start getting rid of every day all waste matter from the system. And almost immediately they feel better, they are refreshed, they feel energetic and happy. In a word, they've got that famous "Kruschen Feeling."

Earned Gratitude Of Indian Mohammedans

Lord Lothian Arranged Return Of Koran Which Was Taken To India

Lord Lothian, former Under Secretary of State for India, has earned the undying gratitude of members of the Mohammedan faith by arranging for the return to India of a holy relic on which is inscribed the words of the Koran. The Koran is the holy reverenced Mohammedan Bible. The relic was taken away from India at the time of the mutiny of 1857. It has been kept in the India Office, London, for a score years. Through Lord Lothian's intervention the owner has made a gift of it to the Muslim University of Aligarh, where the relic has been placed in a prominent position in a showcase and is venerated by the faithful. Lord is known abroad the history of the race.

Child Prodigies Barred From French Stage

Any Under Thirteen Are Not Allowed To Appear

France has definitely banned child prodigies from the stage. Legality no one under thirteen is allowed to appear, but special licenses have been issued. The Cabinet has decided that no more of these will be given. Children playing for the films are not included, and many child stars are affected. The decision followed the receipt of reports by the Ministries of Health and Public Education that children on the stage are made to work long hours without sufficient time for study.

The Prairie Crop Average

Two-Third Of Field Crop Acreage Of Canada In Three Western Provinces

Over two-thirds of the field crop acreage of Canada is concentrated in the three prairie provinces, and most of this area is needed to the grain crops, with wheat predominating. Roughly speaking, the agricultural wheat areas cover the southern short grass plains from the Red River Valley of Manitoba to the foothills of Alberta and attain their greatest width in central Saskatchewan.

The natural neighbor of the Riverine Islands is Chinatown, 2,000 miles away.

Plan Long Flight

New York To Bagdad Is Also Of British Fliers

Some time this summer James A. and Mrs. Amy Mollison, famous British husband-and-wife aviators, will hop from Roosevelt Field, New York, on an attempt to set up a new long-distance record by flying non-stop to Bagdad or beyond.

If they make Bagdad they will have beaten by some 700 miles the record of 5,340 miles established in February of this year by the British airmen, Hinchliffe and Gayford, when they flew from England to South Africa.

Roosevelt Field was chosen by the Mollisons as the starting point for their first dual aerial adventure because it is the only suitable airport having a concrete runway.

The laden weight of their machine will be such that experts have advised the flying couple that there is no aerodrome in England having sufficient length and firmness for taking off purposes.

Their machine, now in process of construction in England, will be shipped in parts to New York and will be re-assembled at Roosevelt Field. It is a twin-engined monoplane of the De-Haviland "Dragon" type, and would normally accommodate six passengers, pilot and baggage.

Three vast cylindrical tanks, placed so close together that they resemble the bodies of a great locomotive behind the pilot's seat, replace the passenger's seats.

Only one pilot's seat is provided in the forward cockpit, with just enough elbow room for the Mollisons to change over the controls of the airplane when it is necessary for one foot in height to enable them to crawl from the cockpit, underneath the tanks, to the cabin in the tail of the machine.

The gasoline capacity will enable the machine to fly for 5,000 miles in average conditions. With a tail-wind during parts of the journey the 8,000-mile limit should be exceeded.

Other details of the machine, its engines and its equipment are being kept secret, but it is not believed that the aeroplane will carry radio.

Records Carefully Kept

Family Of Bonnaventia Ahmet Bedouin's Boy Company Trading Posts

"Never has the frontier life of any country been as carefully recorded as is thoroughly documented that of the journals of the fur trade posts of the Hudson's Bay Company in Canada," said Dr. Douglas Mackay, speaking to the Kinsmen's Club of Montreal.

"Under the terms of the original royal charter, granted to the head office of the Hudson's Bay Company remains the repository for all the company's archives, and the gathering of these from the posts of the reports a few years ago resulted in an accumulation of nearly six tons of documents," Mr. Mackay declared. The work of organizing and cataloguing this material has been proceeding under the direction of the company's archivist in London.

At the present time, this vast quantity of historical documents which is in reality the richest source of material of western and northern Canadian history, is in better shape for the use of accredited historians than ever before.

Within His Rights

Man Considered Dead By Courts Objects To Paying Income Tax

How can a man who is officially dead be made to pay an income tax? That is what Jean Baptiste Auger, fifty-seven-year-old resident of Montreal, France, may ask the courts. He served through the World War, but when he applied for papers to prove that he was an ex-service man, he was told that the records showed that he had died when he was only a few days old. He appealed, unsuccessfully, to the courts, and is now considering refusing to pay his tax on the ground that dead men cannot be taxed.

A Heavy Responsibility

The city council of Chicago, by resolution, has given Alderman John Coughlin, the Boss Brownell and dozen of that body, the sole responsibility of designating the date when Chicagoans may put on their straw hats.

Merrily

They Roll Along

No wonder they're merry—rolling their own with Ogden's Fine Cut. It's so easy to roll a smoother, more satisfying cigarette with this fragrant cigarette tobacco.

. . . And they're using "Chantecler" papers, of course. Ogden's Fine Cut and "Chantecler"—that, Sir, is the finest combination you men can use for rolling a really better cigarette.

Your Pipe Knows Ogden's Cut Plug

Modern Home in Sweden

Finished Four Will Have Every Convenience and Comfort

Sweden is completing constructions of its new home for the disabled poor at Nynashamn, near Stockholm, and it is declared to be the most modern in Europe. Latest equipment for curing rheumatism, nerve diseases, asthma, and other afflictions has been installed by the State Pension Board. Five experienced physicians and a large staff of assistants and nurses will be in charge of the medical work. The new home has several hundred rooms and wards, laboratory, terraces and galleries for outdoor cures and a well-equipped gymnasium. There is also a large assembly hall for lectures, stage performances and movies. Success at rehabilitating the disabled guests may lead to encouraging in Sweden, as about 40 per cent. of the patients treated have regained ability to earn their own living.

The office bachelor says the difference between an animated doll and a modern girl is that the latter doesn't bother "Mamma" when squeezed.

Nearly 1,500 new manufacturing plants were opened in Osaka Japan, in the last year.

It floats—so it cleans—so it polishes.

Winning World Wheat Honors Was Result Of Hard Study And Work By Herman Trelle

When Herman Trelle of Penna River reached the top of the world agricultural heap he realized that to stay there would require the best tricks he could produce. He did his helper, who at times has taken a major part in the act and at others remained behind the scenes.

Together they doped out a brand new wheat number for the Chicago 1931 show. It clicked and it clicked again in 1932. Now Herman and Beatrice Trelle are the undisputed champions of the agricultural world. They won the world wheat honors in 1928 and then in 1930 and 1931, which gave them permanent possession of the coveted trophy, for the first time in history. It now belongs to the Trelles and rests in Penna River, in Canada, where it would have rested even without the fourth 1932 victory.

It took a mighty faith and cash device to switch over after the 1931 victory to a species that has been generally ruled below four other wheats, and to boost Durum into the lead. But the Trelles live in a territory noted for its faith and their confidence comes from study, knowledge and work.

In November 1926, the world first heard the name of Trelle, when the couple returned from the Chicago Show with two World's Champion-ships—to whom and in what field the world was skeptical. By many it was pronounced a fluke. That theory won, however, disproved by the Trelles the following year and in 1928 when they gained more championships. Within those years they captured over 300 firsts at the various fairs, East and West.

No more people were surprised. Settlers began to pour into the district and prosperity followed. Government and public opinion began to take a modest interest in the district. Long-deferred rail extensions were gotten under way Representatives of American and European powers found their way into The Peace and to the Trelle homestead.

The climb was not easy. The short growing season due to the far-north location was a big obstacle and it took an enormous effort to make wheat growing general in the district. After executing a microscopic study of the people congregated no less than twenty-one distinct species of wheat and then they began to which the number that they served with most important things in mind. There was grain-flour in their mind, but even more the environment of an early-ripening wheat, which would focus the attention of a sceptical Dominion and dissipate the idea that Peace River must forever remain a trapping territory.

Every wheat plant was inspected at various development stages, carefully marked, preserved and tabulated. It took years of examining, choosing, crossing and breeding until the dreams and visions of the Trelles began at last to take form.

During the winters of 1931 and 1932 the couple returned world wheat as guests of the Canadian Pacific, returning each time with renewed faith and zip that spud them on to their record successive World victories in wheat, as well as in oats, flax, timothy, and field peas.

Canada may well be proud of these young frontier pioneers. They have been instrumental in presenting to her a new and wealthy province and the value of their inspiration to other pioneers is incalculable.

No Ice in Iceland

An uncertain winter has been enjoyed by Iceland. Rain fell in January and spoiled the ice skating. Now permanent citizens of Reykjavik urge that funds be raised for the construction of an indoor rink. It may seem incredible in a city so far north, but the only way Icelandic shakers can enjoy the sport throughout the winter is by the use of artificial ice.

Old felt hats are being made into bedroom slippers in England.

Profits From Pennies

British Royal Mint Makes Guess At Cost Of Two Pence

The British Royal Mint cares little about profits from the actual making of money states a writer in Pearson's who adds that of course silver and bronze coins are not worth anything approaching their face value. Bronze coins are made of an alloy containing ninety-five per cent. copper and existing today about sixty-five pounds per ton.

A ton of bronze will make 107,520 pennies or four hundred and forty eight pounds. So pennies cost about twopence a piece.

A shilling contains silver worth about three halfpence.

Work at the Mint is naturally carried out under strictest supervision in order to avoid waste of "money." A given quantity of metal supplied at the beginning of a day has to be accounted for in the evening either in coin or metal. A certain allowance is made for loss in melting and this, however, is carefully recovered, as the old pots used are used for melting, and other appliances, are said for a good price owing to the amount of silver which they contain.

When the temporary furnaces at Woolwich Arsenal were dismantled a few years ago, it was found that the bricks and fuses contained traces of silver. These were sent to the Mint for treatment, and as a result two thousand, four hundred and fifty ounces of pure silver were recovered in one small again.

In fact, the annual profit from the Mint during the past fifty years has been over six hundred and thirty thousand pounds although in the abnormal war year of 1915 it was nearly forty four and three-quarter million pounds.

Nowadays financiers make money from money by adopting the quicker methods of aerial transport. For gold is international money, and while in transit it earns no interest for its owners.

Therefore, even an hour or two gained in a journey may mean the saving of a whole day's interest. For example, gold taken from London to Amsterdam by air can be lodged in the Netherlands Bank on the day of despatch, while that sent by land has to wait until the following morning.

Rival Economy Tour

An "economy tour" of the Orient cost Theil Schultz, prominent former University of Utah athlete, less than $2 per day. Collect spent a year touring Hawaii, Japan, Manchuria, China, French Indo-China, Java, Bali, Siam, Burma, India, Iraq, Turkey, Syria, Palestine and Egypt.

Nearly 3,000 men are employed at present in London's street cleaning department.

Freighter Runs Aground

Steamer Is Refloated After Being Stuck On Rocks For Two Days

The Canadian Pacific freighter Beaverbrae, which ran aground on the rocks at the entrance to Pipestone Bay, Georgian Bay, on Wednesday, was refloated on Friday morning and proceeded on her way to Fort William. The Beaverbrae was loaded with 4,000 tons of coal when she struck the rocks. Her bow was damaged and a number of plates were buckled.

SHOW ABOUT ANOTHER NEW BLOUSE

Have your way about it—tailored or more dressy.

The pattern provides for both styles pictured.

The tailored sportsy blouse is so simple you could almost run it up before breakfast on the sewing machine. It is red and white striped linen-finished cotton with white piqué collar.

The little pleated blouse is cotton tex. For it seems to be the most popular thing in blouses these days. It is red and white organdie. The collar is plain white.

You can make both of them at the cost of one ready bought one.

You'll be amazed at the small expenditure.

Crinkly crepe celine and taffeta are other new mediums.

Style No. 748 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 1¾ yards 39-inch with ¼ yard 35 inch contrasting.

Send 15 cents (coin is preferred) in stamps or coin (coin is preferred). Wrap coin carefully.

Carnegie Institute Astronomer Says Simple Rotation of Earth Gives Evidence of Strange Agency

New Hay Drying Device

Invention Of Gentleman Tried Out Already In England

A new method of harvesting is the invention of a Scotsman Captain Alexander Proctor, of Shotgreaves near al Harlsey Bailey, Yorkshire It has been tried out mostly in England The construction of the tripods is inexpensive The grass is stacked straight from the under on to the tripods and so on with foreign crops These are scientifically stacked in Bails (built around the iron tripods) which carry from 400 to 120 stoheves. Ventilating passages are left in the "bails" so that the air can dry the grass As soon as the grain is ready for thrashing a new "bail" or rick left, or is taken into the field The after is an arrangement of long wooden lines running upon wheels and it is hauled under the "bail." The crop is then drawn across the field to the threshing mill where the sheaves are fed straight into the machines. In like manner hay can be conveyed direct to the storing shed

An important feature of the new device for harvesting fodder crops, such as hay, clover, lucerne, sainfoin, etc., is that these are all delivered in a beautiful green condition, with their vegetable juices and weight preserved to an unusual degree.

Moon At London Zoo

Many Peculiar Things Necessary To Food Companion

The Zoological Gardens in London are still a very favorite attraction, 25,000 visited them on Easter Monday.

The moon, in order to supply the necessary sustenance, variety and vitamins is both extensive and peculiar. During last year the number of staple forms of the dietary included 200 tons of meat mostly horse flesh, 6 tons of bread, 15 tons of biscuits, 45 tons of fish, 25 tons of potatoes, 7 tons of apples and smaller quantities of sugar, cocoa, margarine, etc.

Certainly crops celine and taffeta are other new mediums.

Style No. 748 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 1¾ yards 39-inch with ¼ yard 35 inch contrasting.

Send 15 cents (coin is preferred) in stamps or coin (coin is preferred). Wrap coin carefully.

A Model Village

Beer and cigarettes are not on sale in Rome on Ohio village of 260 population. Though the town is 150 years old, they have never been sold there. The last general stores, a garage and a church. There is no law against the sale of these commodities, but it just never has been done with the likelihood of it starting.

Be Chief Stromberg and other of the Carnegie Institution's Mount Wilson Observatory, declared the simple daily rotation of the earth gives evidence of a "mysterious agency which affects everything about us."

Discussing a paper of his on the subject, just published by the Astronomical Society of the Pacific, Dr. Stromberg said:

"We all learn in school that the earth turns around on its axis. But does the earth really rotate relative to the stars around us. Scientists have lately begun to realize that even such a simple thing as relative motion has no actual meaning without a system of connecting links between the observers and observed objects. These links form what is technically known as a metrical field. It is relative to this field that the earth really rotates.

"When we see the sun, the moon and stars rise in the east and set in the west. It is not directly a relation relative to these objects we observe but a rotation relative to a certain structure in the space around us. This field of structure may be detected in other ways than by looking at the stars. If we send radio signals around the earth and receive them after they have made the complete circuit, they will take a longer time when traveling eastward than westward. The reason is that the earth is moving with the earth, while red is against are unaffected by the earth's turning.

"There is something which governs the motion of such a pendulum." Dr. Stromberg concluded, "and like mysterious something affects everything about us from the atoms in our bodies to the most distant stellar system. Whatever real nature is beyond our comprehension, permeates, unites and transcends the whole universe."

Easy To Repair

New Sport Shoes Have Soles Lined on Inside Thereof

If the feminine sole gets worn out that spring or summer it can be changed That is if the wearer has on those clever new hand laced leather sport shoes in which nearly all the various parts including the soles are held together by constructing cotton and leather cords.

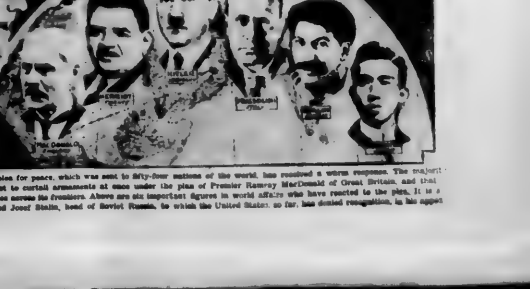
Thus, when the sole get worn, it can be untaced, discarded and replaced by a new one.

The footwear is light in weight and excellent for active sports. It comes in Oxfords, sandal and T-strap models.

Willie "Pop, what is discretion?" Pop "It's something, son, that's what comes to a person after he's lost all for it to him any good."

Large cotton mills in Italy are to be on big orders.

ROOSEVELT'S PLEA FOR PEACE RECEIVES WARM RESPONSE



President F. D. Roosevelt's plea for peace, which was sent to fifty-four nations of the world, has received a warm response. The majority of nations have accepted his request to curtail armaments at once under the plan of Premier Ramsay MacDonald of Great Britain, and think itself against sending armed forces across its frontiers. Above are six important figures in world affairs who have reacted to the plea. It is a that President Roosevelt included Soviet Russia, to which the United States so far, has denied recognition, in his appeal

WORLD HAPPENINGS BRIEFLY TOLD

Canada's net debt (Dominion) was placed at $2,292,000,000 with the annual interest $121,667,000.

An aluminum observation and camping car, will be in the Pullman Company's exhibit at the century of progress, Chicago.

Gregory M Shemitoff, twice expelled from the Communist Party for oppositionist activities against Joseph V Stalin's leadership has condemned his sins and pleaded for reinstatement.

A payroll increase of $100,000 a month in the Douglas Fir Paper Company's exhibit at the century of progress, Chicago.

Hudson Bay Mining & Smelting Co. has declared a dividend of 75c per share, payable June 30 to shareholders of record June 15.

The Hon James P. Bryant, K.C., Minister in charge of Insurance, has announced that as a result of prolonged negotiations carried on by the Saskatchewan Government, the new and effective Marine Insurance rates in respect to exports to be forwarded by the Hudson Bay Route have been obtained by the Saskatchewan Government.

The new Marine Insurance rates on traffic through Hudson's Bay mean a saving of 35½ per cent. on the general Marine insurance rate into the Bay, quoted last year, and a saving of 30 per cent. on the lowest rate quoted last year for a favorable period by a New York firm of underwriters. Last year the Marine insurance rate covered a period of seven months. Under the new agreement the period of navigation with Marine insurance has been extended to three months and ten days with provision for a further extension to October 31st at a rate to be quoted.

Taking advantage of the presence in Canada just last of Lieutenant-Colonel Sir Malcolm Stewart, Commander Bastard of Lloyds, London, the Hon. James P. Bryant and Arthur E. Fisher, Superintendent of Insurance for Saskatchewan, had a conference with them in Winnipeg and opened up negotiations with Lloyds for a review of the Marine rates into Hudson's Bay. Following this the government submitted a brief to Lloyds and later had an Agent the government carry on negotiations for reduced rates in London.

Following the loss of the "Bright Fox" in 1931 the Marine Insurance writers were nervous about writing marine insurance on the Hudson Bay Route and were at first not disposed to give any concessions until more successful results could be shown, raising the objection that the Hudson Bay route was subject to the two great dangers to shipping, namely, ice and fog, and that the season was too short. There have been but few losses to date, only a few voyages in a season, the underwriters figured that a single commodity might quite likely carry the whole or more than the whole of the money received by way of premium. Last year the underwriters were in fact

Gardening Notes

By Gordon Lindsay Smith

Roots require fairly deep cultivation and heavy fertilizing up until the first of July in order to push growth and produce flowers. After this, however, it is advisable to slow down so that the plants may get hardened to face the cold weather soon. To aid in this process, which takes ten or more months, it is a good plan to plant a few late-growing plants such as pansies, calendulas, violas or desert nasturtiums around the roses, which will brighten up the bed and lessen the burden by absorbing moisture. At this time a good quick acting fertilizer is advised. After July, however, a slower fertilizer, such as liquid manure or bone meal should be used.

Pests and Diseases: Control of insect pests and common diseases is not difficult where prompt measures are taken just as soon as the common appear or better still before it is very important, however, that something is known about the habits of those you are trying to control. Roughly speaking, insect pests are divided into two groups, those that take their food by biting holes in the foliage and those that simply suck out the juices. Where are corn cheerworms, while the others make their presence known by wilting or dying foliage when something like this happens in a garden nearby, one should take precautions immediately. For the eating insects apply poisons such as Paris Green, or Arsenate of Lead, while the "suckers" are controlled by a spray that will burn them but not damage the foliage. Under this heading comes Nicotine Sulphate or more commonly known as "Black Leaf 40." Whale Oil Soap, Lime Sulphur or any other repellent recommended by nurserymen. Often one can get a combination of burning and poisoning in a special mixture and this is usually the best to procure for small gardens as it is prepared especially for the purpose. Cut worms are attracted by poisoned and sweetened bait. Fungus diseases are usually controlled by dust powders like special, finely ground sulphur in the case of the black spots which appear on beans during a wet season very little can be done except to keep out of the patch when the foliage is damp and to plant this vegetable in a different place next year.

Celery Out Now: Contrary to somewhat general opinion, celery is not a difficult plant to grow and a large quantity can be produced in a very small space. The first ones for early use should be set out any time now, with the main planting about the first week in July. Plants may be purchased from almost any store at this time. The ideal soil is a very rich, well-drained muck, though practically any combination will do so long as we fertilize well, have good drainage and apply lots of water. Give the plants from six to eight inches each way and rows may be at once together so we like, after making allowances for cultivation. Keep the ground thoroughly worked up all the time. Light applications of commercial fertilizer just after the plants are set and again in two or three weeks will help growth along wonderfully. The simplest way to blanch celery in the fall is to place boards close up against the plants on both sides of the row and bank with earth in the fall plants may be lifted without bleaching, and stored if tightly placed together in humbel baskets in some dark place they will be white and tender in a week or ten days.

Live Right To Live Long

Advice Given By 75-Year-Old Retired Sea Captain

To live long, "live right," says A. E. Johnson, 75-year-old retired ocean captain, of Cleveland, Ohio, who has visited every country on the globe.

Johnson declared as daily exercise to rode a bicycle 20 miles or else to walked the same distance.

"Growing old comes from the transgression of natural laws. Age should have nothing to do with a person's vitality. If you live according to nature you will not grow old," he said.

London women are taking up wrestling.

Strange Church Offering

Mentioned Pride Are Placed On Collection Plate

Fifty mankrat skins on a collection plate in church!

This was the unusual sight witnessed by persons who made up the little congregation of the Anglican mission at Moose Lake recently. Moose Lake is a trading post about 65 miles down the Saskatchewan River from The Pas.

The rats were placed on the plate by Indians upon their first attendance at church following the spring rat hunt.

At present, rats are the medium of exchange in the remote outposts. They range in value from 20 to 60 cents, according to size and condition, and for market quotations.

The Moose Lake mission is presided over by a lay reader from a theological school. There are two families of whites at Moose Lake, besides two more Indian families. They send $100 per year to the Church of England, and keep the mission building in repair.

No Municipal Election For Fourteen Years

Mayor Of North Carolina Town Considers This Foolish

A political oligarchy reigns in Caryaberry Hamlet, North Carolina, boasting a population of only a few hundred. There hasn't been a municipal election in 14 years and the reason is that the mayor will not consent to such foolish things.

The mayor is W. H. Joyner, senior citizen from Northampton county. He contended elections cost money and everyone seemed to be satisfied "as long as things are going along all right."

If an alderman dies or moves or gets tired of his job, Joyner appoints another. Joyner said a lot of people in Caryaberry were relatives of his and they'd just as soon "have me for mayor as anyone else." Asked how much the job paid, he said, "Not a cent. Maybe that's why nobody wants it."

Oxford Group Wedding

Winnipeg, Man.—First marriage among the Oxford Group in Canada will take place in Quebec June 3, during a house party at the Chateau Frontenac, it was announced here. The bride, Ruth Lambert, is from South Africa, and the bridegroom is Jack Brain, of Boston, Mass. Invitations are from all parts of Europe and the guests will be from all parts of the world.

Slow Legislation

Winnipeg, Man.—The net for maintenance of paternity by their children is now legislation of the session of the legislature just ended, providing that parents who are indigent shall be assisted by their children, when the latter in the opinion of a court or magistrate are in a financial position to do so.

Bank clearings in Mexico have been increasing for several months.

Can Keep On Rocking

Since No Storm To Batter Station Unsafely Professor

Harassed parents torn between a desire to rear their infant along scientific lines and an urge to keep the child contented, may welcome this.

Dr W C. Bentley professor of psychology at the Johns Hopkins University, has placed his stamp of approval on one long recognized as a means for restoring rocking their children. Opposing that group which has held that under no circumstances should the infant be rocked, Dr. Bentley said actual experiments had proved it does not harm the child.

Dr Bentley even went further He went that age-old habit fathers have of rocking their babies high in the air does no harm, provided, of course, the baby is not dropped.

Old Medical Practice

Leeches Are Still Used By Hospitals In London, England

Those who believe that the ancient medical practice of "blood-letting by leeches" is auto-dated may be surprised to learn more than 1,000 leeches are imported weekly by air mail from France for up-to-date London hospitals.

These leeches are gathered from ponds in the south of France. They are packed in light wooden boxes containing mud and damp moss.

When they reach their destination they are placed in a tank of clean water, where they remain, untouched, until their use is required.

The Irish Free State will not issue permits to new companies unless half of the capital is owned by Free State nationals.

Britain has a higher wages campaign.

United States First Circus

Originated In Year 1792 In Philadelphia Riding School

The first circus in the United States originated in Philadelphia in the riding school started by John Bill Ricketts in 1792.

The riding school had as its distinguished patron George Washington, of whom it is recorded he put aside cares and worries and went to Rickett's Riding School to seek enjoyment and pleasure."

As part of his plan to draw clientele, Ricketts employed a man by the name of McDonald to act "the clown." Later he hired Signor and Madame Spanacuta, the former a tight rope walker and the latter an equestrienne to entertain his customers.

Later another Philadelphian started a circus, eight years before P. T. Barnum opened his "Greatest Show on Earth," in New York. He was Adam Forepaugh, a Civil War horse trader.

Leprosy Not Inherited

Disease Never Contracted By Healthy Person, Wades Doctor

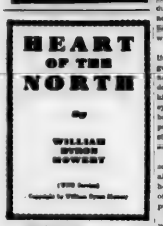
Leprosy is not inherited and children do not contract the disease if separated early from their parents. So said Dr L. Whitaker to members of the Mission to Lepers in London, England Pointing out that a healthy person would never take the disease, Dr. Whitaker said that there was very little of it in Canada and that there was no need for fear when an occasional case was discovered.

As a rule the disease occurs between the ages of 10 and 30, although it may be contracted in middle life, Dr. Whitaker said.

At a meeting of the London Women's Institute, on Dartmoor, Mrs. Fraser won a competition for eating jelly with knitting needles.

FANCIFUL FABLES

Our picture was taken at the opening of the conference of the International Postal Executive Committee at Ottawa where delegates from sixteen countries are attending meetings which will extend over six weeks. The conference was opened by Hon. Arthur Sauve, Canadian Postmaster-General (second from extreme left), while the President of the Committee, Brig. General H. F. Williamson, C.B.E., director of British Postal Services, is shown on the extreme right.



CHAPTER XI—Continued.

Haskell saw that his own real difficulty lay in overcoming Williamson's carrier prejudice and winning his personal liking. That called for shrewd psychology, but on that point he knew he could make Alan Baker look like a stammering farm boy.

The evening when Williamson arrived, Haskell first of all took him on an inspection tour of the post. Finished with that, they stopped and talked together on the slope, a little distance from the barracks. A respectful distance behind them Corporal Whipple waited, note paper in hand, ready to scrape and salute if they glanced his way or asked for any figures.

Haskell was elated, he was secretly exultant, at his success so far in "working" his superior officer. Williamson was openly pleased with the inspection. Barracks, cabins, dog teams, canoes, guns—everything was in capital shape.

This suspicious beginning was all well enough. Haskell felt, but his trouble with Baker was the all-critical thing. It was going to make or break him. The whole outcome depended on Williamson; depended on whether the division commander would believe his story or Baker's. As yet he did not know what Williamson thought. The superintendent had heard a few of the bare facts on his way down the Mackenzie, but he had left headquarters before Baker's buying-out papers had reached there for his signature.

Haskell decided that the old officer had been favorably prepared for the story now; and he led into it gradually, shrewdly. Starting with the hindsight that would have gave a detailed account of this last month, down to the hour when Pedmonit stole the launch and joined Baker's venture.

"What hurts me the worst, sir," he added, with a consummate show of real sorrow, "is the refusal of these men to co-operate with me or let me help them. Maybe I'm at fault; I don't know. But by way of example, sir, if Corporal Hardnock had lost over about needing gas and oil, he could have had every drop at the post. But he wouldn't let me; he or I mean, he took it. An Indian brought me word about him waiting at Ea Traverse Lake for Baker. I figured Baker might need extra supplies or help, so with Whipple I went down there right away. We tried desperately to get in connection with Baker. Even shot signals for him to wait. But he scorned our offer.

"When we got back here, Hardnock, even on, I planned to go up the Akeshen and take him supplies. I wanted to put everything I had at his disposal. He's the best man-handler in the country, and I felt he would get those remnants if anybody could. I didn't give a d—n if you'll pardon me sir about him being so hostile to me personally. All I cared about was to help him run down those bandits. If they escape, it will be a blot on the superior record here at Endurance. But, as I explained, Pedmonit told me a lie about some trouble at an Indian camp, and ran off with the launch."

As he watched his superior's reactions, Haskell smiled to himself. His generous praise of an enemy was only the calculated effort. He was no doubt giving Baker by praising him. He was gaining Williamson's sympathy, his approbation. He had broken down the old officer's former prejudice against him and had instilled a subtle hostility against Baker and the Yan Mountains.

His [illegible] Williamson seemed made no comment. Surprised and alarmed at discovering this bad blood here at an important post, the old officer gazed silently down upon the purpling river.

His gray eyes, which through forty years of self-searching service, had looked upon human weakness and hardships and heroisms, were filled with a new understanding. He could put himself in the quick was the blow at his

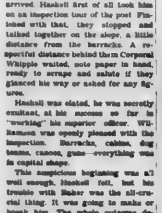
When Cut Him to the Quick Was the Show at His Faith in Alan Baker.

faith in Alan Baker. He had always liked Alan, had trusted him as he trusted few men; and he thought for his promotion. He, who had given forty years of his life to the service at a miserable salary; who with his brother officers of the old guard had unselfishly watched other men of their generation carve out fortunes for themselves, had real admiration for the developing West—he had thought of Baker as of one to carry on that traditions and spirit of loyalty to the Yan.

Now, according to Inspector Haskell's account, Baker had quit because he was always carried, and had not come. At the back of a higher salary he had tossed aside loyalty and his invaluable work here in the North. He had deserted, had cost Haskell a patrol, had imbued the other men with insubordination, and then bought off.

Stern and impartial, Williamson could not help feeling that Haskell, though a newcomer and not fully experienced, had been fair, even more than fair, in this trouble with Baker and these other men. Baker had certainly had a fearful moral lapse from the man he used to be. Without doubt his failure to get commissioned had set him brooding and had worked a pernicious harm on a once-superlative man.

As he looked thoughtfully at Haskell, Williamson considered it very creditable of him to praise a man who had done him so much injury. And he thought it showed exceptional stuff in the inspector to remain in service, to stick with his hard theft-less work here in the North, when he had come into a large inheritance and might be leading a pleasant life in



Ottawa. Playing no favorites whatever but trying to give every man his due, the old officer felt that his former subordinate guilty of slandering Baker by prising him. He was gaining Williamson's sympathy, his approbation. He had broken down the old officer's former prejudice against him and had instilled a subtle hostility against Baker and the Yan Mountains.

His [illegible] Williamson seemed made no comment. Surprised and alarmed at discovering this bad blood here at an important post, the old officer gazed silently down upon the purpling river.

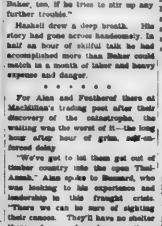
Now, according to Inspector Haskell's account, Baker had quit because he was always carried, and had not come. At the back of a higher salary he had tossed aside loyalty and his invaluable work here in the North. He had deserted, had cost Haskell a patrol, had imbued the other men with insubordination, and then bought off.

Stern and impartial, Williamson could not help feeling that Haskell, though a newcomer and not fully experienced, had been fair, even more than fair, in this trouble with Baker and these other men. Baker had certainly had a fearful moral lapse from the man he used to be. Without doubt his failure to get commissioned had set him brooding and had worked a pernicious harm on a once-superlative man.

As he looked thoughtfully at Haskell, Williamson considered it very creditable of him to praise a man who had done him so much injury. And he thought it showed exceptional stuff in the inspector to remain in service, to stick with his hard theft-less work here in the North, when he had come into a large inheritance and might be leading a pleasant life in



across Ea Traverse Lake to destroy their [illegible] and stop their venture.

It's Haskell. He's coming to smash us. He didn't quit until that one attempt. I don't think even if he knew that you and I are all that stands between Joyce and a horror—I don't think he'd hesitate a second. Bunnard, you stay here. I'm going down by the landing. I don't want you to be involved in—I suppose it'll be called murder.

He went out through the trading hall and down to the landing, and crouched there behind the machine-gun. With his hand on the spade grip, training the weapon down river, he waited.

That, as he listened to the launch roaring wide open up the treacherous Akeshen to give command of them Whipple never would or could drive it at top speed through a city. Frank Pedmonit was not even behind that wheel.

Uncertain, in a dilemma, he recommend: "Haskell might have forced him to make the trip. But Fred would never know Kenneth is like that. He'd never risk his life that way, unless it was something he felt like putting all his heart into."

Leaving the binoculars, he fastened them on the first bend below. When the launch came tearing into sight Bunnard pounced on up toward the post. He saw at a glance that it contained but one man—a man with his hat jammed low on his eyes and a dead pipe in his teeth.

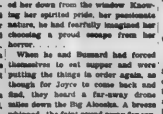
Swinging the launch around in mid-stream like a toy, Pedmonit gently [illegible] it beside the plane. "Thank God, you're here, Alain. . . . Was afraid you'd be gone—"

"Fred! What are you doing up here? Where's Kenneth?"

"Patrol h—l!" Pedmonit panted, breathless and excited. "I brought Kenneth down. Haskell told me about it, too. She's nothing for you to win out. Larry and I talked it over. I said, 'By Lord, I'm going. Larry! I'm going to be on that with Alain and Bill!' So I cushred the launch away from Haskell, pitched off, and Kenneth stayed for here. Brought you some extra gas if you need any."

Alan was staggered.

(To Be Continued).



DEFINITIONS

Hope is a door which, swinging with Lets glowing sunlight flood inside The darkened chambers of a life Where shine only its fast and strife.

Love is a veil of rosy hue Which changes every dreary view, From barren hills of Heart's Ease, Into a fair, enchanted place.

Peace is a clock which ticks away In changeless rhythm, hour and day; Unwound, it's carried, rewound, It sounds, insistent, very sweet.

Faith is the boy which sets afar The gate to where all treasures are, And he who gives it in his hand Holds all of good at his command.

Compassion is the little light Which glows from dancing through the night, And only cold and hungry men Know how it quickens hope again.

Veracity Of Women

World's Greatest Prevaricators Said To Be Men

History's accounts of Captain John Smith being saved by Pocahontas and of Washington's love for veracity — the cherry-tree incident included— are attributed by Dr. A. B. Rosenbach, noted bibliophile, to the imagination of American historians.

"They are, in fact, two of the finest pieces of lying ever furnished for the readers of American history," Dr. Rosenbach said in an address before the Pennsylvania Literary Association.

Dr. Rosenbach's topic was the "Great Liars in History and Fiction." He said Casanova and Benvenuto Cellini should rank "among the greatest."

"You can count the really great liars on the fingers of one hand — and there's not one woman among them," he declared.

Army tanks make good snow plows, British army post bosses found recently after a convention.

Little Helps For This Week

"The Lord shall preserve thy going out and thy coming in from this time forth, and even for evermore."—Psalm 121:8.

Lord Thou hast been our dwelling place in all generations."—Psalm 90:1.

With grateful hearts the past we trust,
We fix our hope for future days,
We to Thy guardian care commit,
And peaceful leave before Thy face.

We are like to Miss with whom there is no past or future, with whom a day is as a thousand years, and a thousand years as one day. We have to do our work in the great present, leaving both past and future in Him to whom they are ever present. Pressing nothing because He is to our future as much as He is in our past, and as much and far more than we can feel Him in our present. He takes time of the divine nature, resting in that perfect All-to-Come, which is to us Eternity. All is where our present stands, so we walk without fear, full of hope and courage and strength to do His will, trusting for the endless results which He is always giving us fast as He can get us able to take it in.—H. MacDonald.

Ban On Bishop's Words

Sermon Created By Circumstance Was Censored By London Editors

The words of Charles Dickens are enjoying what is described as a modified unprecedented boom in sales in London, the result of a circulation war now being waged on the Fleet Street front among four popular London dailies.

Recently the Labor to Daily Herald had the inspiration to improve its sales by "giving away" 6-pennies each of Dickens' 12 novels, plus coupons. The response was enormous. Almost immediately three other papers of the Daily Mail, the Daily Express and the News Chronicle—announced simultaneously similar offers for 10 shillings and 6 coupons.

The printing presses are working night and day to cope with the demand for the works of Dickens. It is impossible to estimate accurately the number of copies sold, but it is believed it must run well into the millions. Too bad Dickens is not alive to enjoy and reap the benefits of this boom.—St. Thomas Times-Journal.

Find Grave Of Composer

Long sought by musicians and historians, the grave of Cristian Lavalle, composer of the national hymn, has been discovered in the Mount Benedict Cemetery, Boston, it was announced. Steps are being taken to have the composer's remains transferred to his native land.

Mr. U. F. A. Ally Will Speak At Josephburg Saturday

Mr. Norman Priestly, Vic.-President of the U. F. A. will speak in the Josephburg school house on Saturday evening, June 10th, at 8:30 o'clock.

On Sunday morning, June 11th, Mr. Priestly will speak at the Josephburg Reformed Church at 11:00 o'clock a.m.

The Junior U. F. A. held their regular meeting at the home of the president, Rudolph Rippel.

The Roll Call was answered by a Pet Hobby.

There was much discussion about the Farm Young People's Week and further arrangements were made for the members who will attend, namely Lorna Krebs, Dorothy Willis, Carl Unterschultz, Walter Frey, Ernest A. Mohr and Fred Hennig.

The Secretary was instructed to buy a book for Mrs. Ashton who is ill

Carl Unterschultz gave the speech which he will give at the University.

The hostess served a dainty lunch and then a local dance followed.

The next meeting will be held in the school on June 24. The meeting will be taken up by reports on the Junior Conference. The Roll Call will be answered by the Pet Aversion.

We regret that a member of the ladies had chose without heels due to the softball game which preceded the meeting.

******

The Josephburg Ladies held a softball meeting and the following were elected.

Coach—Mr. W. E. Griffin,
Manager—Emma Hennig.
Captain—Elsie Gerlach.
Sec.-Treas.—Lorna Hennig.

The girls practice Tuesdays and Thursdays and are ready to play some games.

COMMERCIAL GRADS LOSE TWO OUT OF FIVE GAMES

We suppose by this time all our readers are aware of the fact that the Commercial Grads, World's Champion Basketball team of Edmonton were defeated by the Dunsel Laddies team from Oklahoma, U.S.A., in two games of their five game series, by a large score, on Saturday and Monday evening.

This series is to decide the team to represent the North American Continent at the Women's Olympic games held in Europe next year.

This was quite a shock to stund after our Grads having held the unbeaten record for the past ten years to be swamped under like that.

But after seeing both games we must admit that they were a much more superior team than the Grads showed up at either game.

There is still three games to be played, one tonight and "if", the Grads win, then another game will be played on Friday. We still have hopes to the last, and know that the Grads will go down fighting all the way.

Edmonton and the surrounding district basketball fans demonstrated that they can and will support the Grads when the occasion arises. On Monday evening, both teams came in for plenty of applause, by the thousands that witnessed the game.

The Grads have many strong supporters in this district, those were noticable at the games.

Little Boy Drowns In River Here

Victim of Accident

Robert Axtel, Three-Year Old Son

Falling from a small boat which he had entered and which drifted a few feet from shore, Robert Axtel, three-year-old son of Mr. and Mrs. Al Axtel, 11120-96 st. was drowned in the Saskatchewan river at Lamoureux, just across the river from the Fort.

Pulmotor resuscitation applied by Dr. T. W. E. Henry was given for 2½ hours, but failed to revive the child. The pulmotor equipment was rushed to the scene by District Chief James Macgregor and Fireman A Lander of the city department, when an urgent call was received over the department lines at 1:50 p.m.

The funeral of the child was held at Lamoureux on Friday, with Rev. Father Cartier officiating. Interment took place in the Lamoureux cemetery there.

Partridge Hill

Mr. H. F. Priestly of Calgary, Vice-President of the U. F. A., will be the special speaker at Partridge Hill on U. F. A. Sunday, June 11. Service at 3 p.m.

******

Messrs. Earl Allen and Wilson Gordon are delegates from Partridge Hill Junior U. F. A. attending the Farm Young People's Week held at the University of Alberta this week.

******

We are getting our share of the much needed moisture in this district during the past few days.

Fort School Board Held Regular Monthly Meeting

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Council Chambers on Monday, June 5th, 1933.

Present, Mr. F. Attkinson, Chairman, Trustees, Mr. S. A. Brown, Dr. Ormsrt and Dr. Turner.

The motion of the last meeting were called for and read, Moved by Mr. Brown and adopted That minutes of meeting held on May 1st., be adopted as read.

The Chairman reported that he had carried out the instructions of the Board regarding beautifying the grounds; that the carpenter bees, with the help kindly furnished by Mr. Warden McLean, had been planted, and that a substantial wire fence had been erected. The Chairman also reported that the High School Inspector had interviewed him, after his recent inspection and favourably reported upon conditions in the school generally.

Mayor Montgomery had been invited to attend the meeting, but sent a letter regretting his inability to be present owing to a previous engagement. He however outlined fully conditions in town and pointed out that considerable had been satisfactorily redressed, that the assessment on farm lands had been cut in half to bring it in conformity with Municipal values.

The Board considered the estimates for the current year, which were reduced from previous years, and it was finally moved by Dr. Ormsrt and adopted That the amount required from January 1st to December 31st, 11:33 from the Town of Fort Saskatchewan for the School District No. 91, be $7000.00, and that demand therefore be made from time to time.

It was moved by Dr. Turner and adopted That in accordance with recommendations of teachers all grade 4, 7, and 8 pupils with suitable recommendations and years marks, be promoted to the next grade without writing; and that, as a further reward, be dismissed when final examinations start.

The question of the expiration of the teachers' contracts was taken up by the Board and considered at length when it was moved by Mr. Brown and adopted That our teachers be notified that their present contract with the Board expires on June 30th, 1933. If they wish to continue on our teaching staff, they are asked to re-apply for engagement, stating salary expected.

The Principal was present and submitted attendance and other reports pertaining to the school. Miss West was authorized to arrange for the resurfacing of the blackboard in her room.

It was decided to hold a special meeting of the Board at 7:30 p.m. on Monday the 19th instant.

The following accounts were passed for payment the motion of Mr. S. Brown. Fort Hardware $60.30; F. W. Smith $85.75; P. Shaw school house $60.60; E. N. Moyer Co., $1.80; Jones, Graham & O'Brien Mc; Gas allowed for trip to musical festival at Sundry Lake $6.30; Beaver Lumber Co., $18.09; J. T. Lokenda for chemicals $1.00.

The meeting adjourned on the motion of Dr. Ormsrt.

Saturday, June 10th.

MEN'S OUTING SHOES

—Men's cool brown canvas running shoes. Best quality rubber soles, ankle patch. Sizes 6 to 11. Special Sale Price 95c

BOYS BROWN CANVAS RUNNING SHOES

Special per pair 95c

WOMEN'S WHITE CANVAS OXFORDS

—Women's White canvas tennis oxfords. The canvas and rubber in these shoes are of the very best quality. Sizes 3 to 7. Special sale price 95c

CHILDREN'S SHOES

—An odd lot of children's shoes and slippers on Sale at 95c

—There is a variety of styles in patent, black kid, and some colored leathers all of good high class makes. Special price at 95c

Scores of seasonable articles specially priced for this Sale are on our tables.

Sale Continues until Wednesday June 14

Enjoy This Finer Quality

"SALADA" TEA

"Fresh from the Gardens"

Vacation Days.

Schools all over this western land will soon close their doors for the summer months and tens of thousands of boys and girls will joyfully welcome the "holidays."

In offices and shops week by week employers and employees will for longer or shorter periods relinquish their tasks to enjoy their hard earned summer vacations.

Work on the farms will ease up a bit following spring activities and during the period while the crops grow and ripen for the harvest.

In a word, Western Canada is a short playtime period is at hand.

It is a time to forget, as far as that may be possible, the worries and difficulties of the months of depression, and for the younger generation in particular every reasonable effort should be made to make the next two or three months as happy and health-giving as possible, with life lived largely in the open.

There will not be much money to spend, and vacation plans will have to be made upon a cheap scale by most people, and that is no reason why these holidays should not be just as enjoyable as if planned in a much more elaborate and expensive way.

Long journeys may be out of the question, but fortunately Western Canada has been blessed by nature with an abundance and variety of lovely summer resorts and camp sites which can be reached easily and at little expense, and where the daily cost of living is extremely low. Such a vacation will serve to remove the strain and worry of school studies and exams which youth has been undergoing, and blow away the fogs of the depression in which all people, young and old, have been living. It will mean renewed mental and physical vigor.

Fortunately, too, in this year when money is not a plentiful article wherewith to make trips to other Provinces or countries, opportunity is being afforded right in the heart of Western Canada for a holiday which combines all the essentials of an enjoyable, worthwhile respite from daily toil,—a holiday that will provide relaxation, entertainment and thrills combined with educational features and opportunities never before offered in this Western country, and all at small expense.

Reference is to the World's Grain Exhibition and Conference to be held at Regina during the last week of July and the first week of August. This will be a truly wonderful exhibition, a magnificent enterprise. Over Forty nations, states and provinces will be represented in the specially constructed quarter of a million dollar building, having a floor space of 140,000 square feet, and certainly miles of exhibits. It will be not only a sight worth seeing, but a great education.

A vacation visit to this great exhibition, which will be the result of three years of intensive preparation, will not be a costly one. For the people of the prairie provinces, the distance to be travelled is short, and especially low rates on the railways will make the journey within reach of most people, even in these days of restricted finances. A huge city of tents will be built adjacent to the exhibition grounds, with modern facilities provided, where groups and families can stay at the very minimum of expense, and will constitute an ideal outing for motor parties from all over the land.

Western Canadians, old and young, need not deny themselves a real and enjoyable vacation this summer. They owe it to themselves to take all the enjoyment and recreation they can from the opportunities afforded them. They will be better for it, whether it be the spending of a long time at some camp or summer resort, or in a visit to the exhibition at Regina. In any event they can get to know their own Western country better than ever before, and to appreciate it and its possibilities, and many of them can combine with it the obtaining of a glimpse of the world, and more especially of these nations which are engaged in the same major activity as the people of Western Canada, namely, agriculture.

So,—have a holiday. Push the family in the old car and take away to some new scene. Live in the open, something over the summer days. Go fishing. Let the boys and girls paddle and swim, enjoy out-of-doors games, gather around the bonfire at night for an old time sing-song. Everybody will be the better for it.

Long-Lived Mascots

Nine Have Occupied Throne As Long As Queen Victoria

King George recently attained the 33rd anniversary of his accession to the throne. He is surpassed with the nine years' reign of his father Edward VII. Counting from 1154 when the House of Plantagenet was established by the first monarch in length of occupancy of the throne by twelve others: Queen Victoria, 63 years; George III., 59 years; Henry III., 56 years; Edward III., 50 years; Elizabeth, 44 years; Henry VI., 39 years; Henry VIII., 38 years; Charles II., 36 years; George II., 33 years; Henry VII., 24 years and Charles I., 23 years.

Existing Reserve Plan

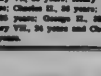
U.S. Navy Recruitment Advantages With System

The retaining reserve plan by which Admiral William V. Pratt, chief of naval operations, hopes to build up the navy's ranks through keeping one-third of the United States fleet in reserve ready to be manned by the navy department becomes a reality when the savings would be only $6,000,000.

Secretary Claude Swanson of the navy, Pratt and their aides declare that recruitment now on if existing reserve plan would be held up at any time.

Distance delighted in ornamenting himself with costly jewelry.

Palpitation of the Heart Nerves Bad - Could Not Sleep



Mrs. Fred Hopkins, South Cayuga, Ont., writes: "I was troubled with palpitation of the heart and my nerves were so bad I could not sleep.

"I was getting desperate and decided my trouble to a friend, who recommended me to try Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

Price 50 cents a box, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Raising Ten Million Yearly

Figure Given As Forest-Fire Loss In Canada

Figures compiled by the Forest Service of the Department of the Interior show that the annual forest-fire loss in Canada for the ten year period 1923-32 was $10,000,000. It is something that appeals Canada's forests are among the richest of her heritages, and the fact that we, the trustees of that heritage should be sending it up in smoke at the rate of $10,000,000 a year is a blot up a our capacity as a people. The melancholy aspect of it all is that most of this fire-loss is the result of indifference, of a carelessness that will not heed warnings or educational propaganda. We talk loudly about the exploitation of pioneers and about the failures of the newsprint industry yet all the time we permit or cause a condition which is doing as much or more to ruin our forests than all the capitalists and newsprint companies combined. It is one of the discreditable things in our whole scheme of national economy.—Victoria Times.

NURSE LOSES 7 LBS.

"I weighed 14 lbs." writes a nurse, "when I bought the bottle of Kruschen Salts but I have just finished. I have taken a good half-teaspoonful in a glass of hot water every morning. Now I weigh 130 lbs., a loss of 7 lbs. I am very glad to have lost weight, especially without trouble." M.M.K. (Trained Nurse.)

Unlike most salts Kruschen is not simply a laxative. When you take Kruschen Salts you not only stimulate your liver and kidneys to function assiduously and perfectly, but you supply those vital elements, iron, phosphorus, lime in the body with Nature's own reconstituting salts. Why suffer indigestion?

Get a bottle of Kruschen Salts today, and take one half a teaspoon in a glass of hot water every morning before breakfast.

Before the bottle is empty you'll feel years younger; eyes will brighten —dog pimply complexion carves disappear—you'll sleep sound, enjoy your meals, and after a hard day's work you'll be ready for wholesome recreation—one million women already know all this.

World Meat Reserve

Experts Believe Refrigerator Will Add Greatly To Supply

Experts believe that a great world meat reserve can be established in northern Canada, and that the millions of acres hitherto regarded as waste lands may yet prove to be a useful and cheap addition to its meat supply. They expect that a vast business will eventually result, and that plant and transport installations will result from the successful marketing of a large herd of Canadian reindeer.

When the herd has developed sufficiently, tamed reindeer meat and reindeer leather—held to be a great delicacy—are to be exported. The animals will be of the greatest use, as they provide their own food, even in mid-winter. They are generally regarded as the most widely versatile animals in the world.

Tanks Eat Little Meat

Questions Of Men, Breed, and Fuel Are Important Ones

One of the best ways of getting to know a man or a nation is to study what he eats. The inhabitant of China, for instance, is a big eater, though not a tremendous one eater. Strangely enough, considering what a fighter he is, he does not go in for meat very much. He will devour at a single sitting huge quantities of boiled corn, boiled rice, stewed barley, haricot beans, lentils, and other vegetables, and cooks in olive oil and will eat fish at any freshness—just out of the sea or in the last stages of decomposition.

What He Wanted

"I don't know about getting you another divorce, Mrs. Gwenn," the lawyer said. "You've had three already and if I grant you another you'll simply go and get married again."

"Oh, no, judge," Mrs. Gwenn protested. "I don't figure on that part—I just want you to put me out of misery."

"Did you sleep well, sir?"

"Wonderfully! Yesterday I dreamed the night before that I was positively given the 5 bid 20 more? Well, last night I managed to spend it."

Background For Exhibit

Map Of Canada Will Be Flood-Lighted At Chicago Exposition

History was made in Montreal when Gordon Hammond, internationally famous scenic artist, saw his latest effort, the largest map in the world, a map of Canada in colors, 30 by 130 feet, leave for the Century of Progress Exposition in Chicago where it will hang, framed and flood-lighted, as a breath taking background for the Canadian exhibit in the great hall of the travel and transport building, in which the Dominion Government, the Canadian Pacific and the Canadian National Railways are participating.

The Canadian coat of arms in color, measuring approximately seven by eight feet and surmounted by the word "Canada" in huge cut-out letters, will hang from the centre of the map at the top and constitute another record achievement in that it is the largest photographic enlargement made to date in the Dominion. The third record is that the complete map, models, dioramas, etc., have been completed in about three weeks, when ordinarily the job would have taken three months. The result has been a real triumph for Canadian artists, Canadian material and Canadian methods.

The huge map, of course, will be the main attraction, containing as it does farming and mining areas, national parks, both trans-continental railway systems on general lines, principal resorts and cities, and three large cartouches or inserts in which information concerning Canada as a land of opportunity for settlers or tourists, is presented in condensed form. Its message is easy to grasp. Its huge size immediately impresses one with the vastness of the Dominion, and as one stands back from it, it is then that Mr. Hammond's ability as a colorist evident. One has the sense of being high above the earth looking down at a scene stretching from the Labrador Islands in Baffin's Bay to Iceland and from the Arctic to Southern Illinois, in which every detail appears.

Solves One Problem

New York Church Receives Choir With Record Music

The problem of maintaining a choir when economic conditions prohibit has been solved by the Presbyterian Church of the Covenant at New York.

Phonograph records of choir singing are now played and amplified at the Sunday evening services. The congregation sings to the accompaniment of electrical transcriptions of the choir music from famous churches all over the world. It has been demonstrated how elaborate programmes can be offered in this way and it could present with its own rehearsal choir.

Employer: "You say I suppose, strictly honest?"

Applicant For Office Boy's Job: "Yes, sir—but at the same time I understands that business is business!"

Nearly ten million hectares bulk very grown in British Columbia in 1931, while an equal number of bulk of other species were also grown for the Dominion market.

Stamp Fraud Laid Bare

Clever Machine Discovered In Bottom To Defraud Government

Infra-red ray, the remarkable scientific discovery which enables the camera to penetrate fog and darkness, has been the means of unmasking an astonishingly elaborate fraud on the inland revenue.

It is understood that Scotland Yard has been investigating the matter secretly for many months past, and it has now become evident that many thousands of pounds are involved.

The conspiracy to cheat the exchequer has been worked with commendable ingenuity, and by a clever gang, who have found a means of obliterating the cancellation marks on the stamps issued by the post office for the payment of income tax.

Thousands of the stamped cards tendered by weekly wage-earners in payment of income tax have apparently been obtained by some means.

The stamps have been steamed off, subjected to a cleaning process which has removed every mark of cancellation, and then sold at half their original face value.

The inland revenue authorities had not the slightest cause for suspicion until months ago, when someone noticed that the stamps had peeled off one of the cards sent to Somerset House.

It was at first surmised that the gummasher must be at fault. The cards and the stamps were sent to the firm concerned. The gum was analysed and found to be different from that they had applied.

Even then the fraud was not suspected, but when more and more examples of re-gummed stamps came to light, experts were consulted. They declared the stamps partially genuine, and the authorities rumbled at mystified until some one suggested taking infra-red photographs.

Then the secret came to light.

Numerous confessions have been obtained from income taxpayers who have admitted the purchase of stamps at half their face value from mysterious brothers, and one after another of these brothers have been found and interrogated, but the police have not been able to trace the ruthless clique to their original source.

Question of "super sheep," giving more and richer wool, has been made possible through glandal transplantation, Dr. Serge Voronoff declared at Orbassiti, Italy.

Wholetone is not bone at all, but an elastic substance found in the mouths of whales.

Johannesburg, South Africa, is to have modern streamline street cars.

National Research Council Reports On Relative Value Of Various Feeds For Livestock

The pressure of the disastrously low prices of grain now being experienced has driven many members of the farming community to seek more profitable returns, by feeding their produce on the farm and marketing it in the form of livestock. This in turn has caused increased interest in the relative utility and value of the different grains for various classes of farm animals. The information contained in the recently published Report No. 26 of the National Research Council "The Comparative Feeding Values for Livestock of Barley, Oats, Wheat, Rye and Corn" should therefore be of considerable practical value to farmers and stockmen at this time.

In a foreword to the Report Dr. R. Newton, Director of the Division of Biology and Agriculture of the National Research Council, states that the lack of authoritative published information on this question, and the desirability of summarizing the results of feeding experiments, particularly with regard to barley, a homegrown grain, and corn, a product largely imported, was brought to the attention of the Associate Committee on Grain Research of the Council by officials of the wheat pool. Having ascertained that Professor E. W. Crampton of MacDonald College and already had some work along this line, the Council made a grant to assist him in reviewing all the modern published literature conveniently available on the comparative values of barley, oats, wheat, rye and corn for feeding horses, cattle, sheep and swine. In this Report Professor Crampton makes available the results of his inquiry.

For the purpose of his survey Professor Crampton has assembled data published accounts of feeding experiments conducted in 7 provinces of Canada, 15 States of the Union, and 8 overseas countries. Whenever possible quantitative data respecting gains and food consumption have been extracted from these accounts and tabulated according to the grain comparison and class of stock involved. It has thus been possible to arrive at average figures for rates of gain, gain per 100 lbs. feed eaten and other measures of efficiency, representing the combined experience of numerous different investigators. A statistical method has been employed to test the significance of observed differences between the grains compared.

An encouraging feature of the findings is the indication contained that in general the Canadian feeder is not handicapped by the lack of corn for fattening steers. Repeated results appear to be more efficient than corn for hog fattening. The other grains however, suffer somewhat by comparison with corn in this connection, and for sheep fattening all, including wheat, appear to be inferior to corn. In general the difference in efficiency seem to be roughly proportional to the amounts of fibre contained in the various feeds. Special characteristics, particularly in the case of rye, also limit to determine the usefulness of the several grains for special purposes or for certain feeding classes. The value of the Report to investigators is increased by a section in which Professor Crampton discusses the planning and reporting of stock-feeding experiments in the light of the lessons to be learned from the numerous trials contained in the course of this study.

A comprehensive summary of the findings which are discussed in detail in the body of the report is provided. Whilst it is anticipated that the report as a whole will probably be of interest mainly to investigators, this summary (which is being reprinted separately) contains in brief form much information of value and interest to practical stock men.

The report or the summary may be obtained upon application to the National Research Council or the Federal Department of Agriculture, Ottawa.

Transportation By Air

Aeroplane Makes Possible Industrial Development In Hudson Bay Area

It is now about seven years since aircraft of a type which could be considered at all efficient were made available in Canada for the transportation of equipment and supplies into the mining areas.

Since 1928 the year of the Red Lake rush a steadily increasing use of aircraft has resulted in yearly mounting totals of mileage hours flown and freight carried.

Despite the fact that the eastern mine-utility and pesterie air mail services were discontinued in March, 1932, a comparison of the yearly totals for 1931 and 1932 shows that Canadian Airways alone carried nearly 20 per cent. more freight and express during the latter year and more passengers despite the fewer hours and mileage flown.

This increase is largely accounted for by the activity in the Great Bear area and whatever the future of Great Bear may be, it has at least served one purpose well economically, in that it has now become evident that many thousands of pounds are involved.

The conspiracy to cheat the exchequer has been worked with commendable ingenuity, and by a clever gang, who have found a means of obliterating the cancellation marks on the stamps issued by the post office for the payment of income tax.

Thousands of the stamped cards tendered by weekly wage-earners in payment of income tax have apparently been obtained by some means.

The stamps have been steamed off, subjected to a cleaning process which has removed every mark of cancellation, and then sold at half their original face value.

The inland revenue authorities had not the slightest cause for suspicion until months ago, when someone noticed that the stamps had peeled off one of the cards sent to Somerset House.

It was at first surmised that the gummasher must be at fault. The cards and the stamps were sent to the firm concerned. The gum was analysed and found to be different from that they had applied.

Even then the fraud was not suspected, but when more and more examples of re-gummed stamps came to light, experts were consulted. They declared the stamps partially genuine, and the authorities rumbled at mystified until some one suggested taking infra-red photographs.

Joint Commission On Conservation and Afforestation Hold Meeting at Regina

The Joint Commission on Conservation and Afforestation of the prairie provinces of Canada, held its inaugural meeting in the Parliament Buildings recently in Regina.

There were present the following members of the Provincial Commissions on Conservation and Afforestation Representing Saskatchewan: Hon. James F. Bryant, W. D. Cotton, M.B. M.P. Professor C. J. MacKinnon, Dean of Engineering of the University of Saskatchewan and T. A. Patrick, M.D. Yorkton Representing Alberta Hon. R. G. Reid Provincial Treasurer and Minister of Natural Resources for Alberta. Representing Manitoba C. H. Attwood, Deputy Minister of Natural Resources and Industries Col. H. J. Stephenson, Provincial Forester and Professor J. M. Ellis, Professor of Soils, Agronomy Department, University of Manitoba.

It was agreed to establish a Joint Manitoba - Saskatchewan - Alberta Commission, with the provincial commissions collaborating under one chairman It was distinctly understood that the joint commission functions in the matter of consolidating and organizing data in a co-operative way only and does not bind the respective provinces to any individual action but retains only for the purpose of making recommendations.

Hon. James W Bryant, Chairman of the Saskatchewan Commission was elected chairman of the joint commission. The Commission then drew up an agenda and discussed the following matters in relation to the work to be undertaken.

1. Climate. 2. Afforestation. 3. Conservation, under the following heads: (a) Water; (b) Forests; (c) Soils, (d) Scenic beauties; (e) Game, (f) Fish, (g) Bird life, (h) Fur bearing animals. Discussed problems and how to meet them.

The following programme was adopted as the aims and objects of the joint Commission.

Aims 1. To institute a scientific research of climatic conditions in the prairie provinces.

2. To apply the results of such research to the problems facing each individually in the western provinces with particular reference to provincial administration with respect to industrial development, as it relates to agriculture, forestry, game, fur bearers, fisheries, land settlement and water resources.

The objects of the joint commission were are: (a) Conservation of water. (b) Prevention of erosion and soil drifting; (c) Soil survey and land utilization studies; (d) Shelter belts, location and types, (e) Reserving for forestry purposes all areas suitable for agricultural purposes; (f) Forestation of areas unsuited for agricultural purposes; (g) Conservation of forests and thereby providing shelter and protection of game, fur bearers, recreational areas and industries depending on the forests and forest products.

Stress was laid on the importance of the soil surveys in relation to settlement, and also to pest under with regard to the type of tree species to be recommended for each locality

The joint commission made several recommendations which were passed on to the provincial commissions for study and experimentation, among them the removal of different species of trees on sandy soils where the water table was low and also species suitable for soils where the water table was high and alkali.

The following among other resolutions were passed

"That areas which are not suitable for agricultural purposes be withdrawn from settlement and reserved for forestry purposes, and that the several provincial Commissions be urged to study the feasibility of forestation of such areas as means rehabilitation of those being especially suited to the desirability of planting or continuing to favour the headwaters of the streams.

"That this joint Commission on Conservation and Afforestation desires to place on record its appreciation of the splendid work carried on by the forestry farms under the Federal Government. The Commission recognizes with appreciation the headship in the matter of tree planting in the prairie provinces given by Norman M. Ross, of Indian Head, Chief of the Forestry work in Western Canada. The joint Commission also desires to express appreciation of the splendid educational work in the matter of tree planting carried on by the Canadian Forestry Association through their tree planting car."

"That this joint Commission appreciates the co-operative effort in the matter of soil survey between the Dominion and Provincial Governments and urges that this work be continued and extended as much as possible."

The following joint sub-committees were formed to study, assemble and exchange information on the following subjects

Committee on Soils Professor J. M. Ellis (Manitoba), Professor Just (Saskatchewan) and Professor F. A. Wyatt (Alberta).

Committee on Forests Hon James F. Bryant (Saskatchewan) Col. H. J. Stephenson (Manitoba), and T. A. Patrick (Alberta).

Committee on Water Dean C. J. MacKinnon (Saskatchewan), C. H. Attwood (Manitoba), and Dr Rutherford (University of Alberta).

It was agreed that as work was carried on and results obtained, all data should be made available to the central Committee so that the provincial Commissions can keep in touch with one another and obtain all data available.

Some Truth in It

European Women Old-Fa.hioned and Thoughtful

Therefore May Be Better Wives

Mlle. Andree Colin, one of the few women executives on the League of Nations staff, believes her European sisters are better off than their United States women because they are less independent. These women in Europe have kept so very much to the old fashioned woman's way of life that are much less affected by certain economic conditions than you women here," she said. "The young women of Europe looks to get married as a goal in life, and in preparing jobs and homes, they make young mothers for office work. One of two things suffer, the home or the job."

Register other marriages if more popular in England and there being 160,000 such couples.

It takes up from two or three gallons to make a gallon of gaso-

WORLD HAPPENINGS BRIEFLY TOLD

The Bank of England recently bought £343,000 in new gold.

Flying time of the London-Cape Town air mail has been cut from 11 to 10 days for the 6,000-mile trip.

Prohibition has been issued by the Dominion government embodying the Canada-New Zealand trade agreement for six months from May 24.

Forty-three cases of material for the national exhibit of the kingdom of Siam at the forthcoming World's Grain Show, has reached Regina.

The Manitoba Government is thinking of municipal ownership in the matter of hay cutting privileges on crown marsh lands of the Red River delta, north of Selkirk.

Allan C. Fraser, of Calgary, has taken over his new duties in Ottawa as managing secretary of the Dominion Dairy Council of Canada. Mr. Fraser succeeds W. F. Stephens.

The Germans broke all records for rail mail from Europe when the Graf Zeppelin's mail was delivered at Buenos Aires four and one-half days after it had left Friedrichshafen, Germany.

After an absence of three years, super advertising is to be permitted in Manitoba. The Manitoba government legislature recently passed an act repealed the order banning billboard advertisements, it was announced.

Unless certain interests decide to cut into the commercial fishing in the Churchill basin this summer, no catches will be made this year, according to fishermen of the Pas, Man.

Any German desiring to visit Austria must pay 1,000 marks ($270) for a visa hereafter. This is a retaliation by the Hitler Government for reprisals recently against Nazis in Austria.

A Single Locomotive

Needs Can Divert Banks Formed and Railway Problems

A simple resuscitator which crushes compression in newly born babies and restores breathing is the object of the simple process of reading the patient in a double can device has been developed at the Norwegian Chimney Hospital in Arendle, Louisiana.

The head end of his double can is a hole which allows rubber to allow the patient's head to protrude. The outer cylinder is an air chamber while the inner forms the inner and outer is provided filled with water between them. The upper side of the inner can has a hole that allows passage of air which is measured or decreased by pressure of the water as the can is raised.

As explained, the air is compressed into the air channel as the can is lowered water and the opposite motion causes a partial vacuum. The pumping of the air pressure has the same effect upon the chest, as hand pressure applied and by rendering artificial respiration.

Additional advantages over the old method are many fold claimed the air and the blood circulation is stimulated by the rocking.

Cannot Lower Rates

Railway Board In Call Of Board Told Why Freight Rates Are Not Lowered

So that their business might be lowered, in accordance with new principles, a religious sect known as the Doukhobors, has purchased 15,000 acres of land in the province of Saskatchewan, Canada, for $3,000 to cut off the overhead which during the provincial regime of the Doukhobors. The farmer is 60 feet high and allowed inside their settlement, and shall never be dipped at any time or any manner by the Canadian Government. The name in Canada is known for its many interests.

Might Use Rubber Ship

The United navigation department of a large industrial concern received this letter from a customer: "I have a pet dog which insists on chewing the electric lamp cords. If he ever bites through a cord and any of the wires leaks out, will I get a shock if I step it up?"

Surprise in European Tours

Chicago Banker Thinking To Purchase Five Thousand Tickets For Free Trip To Old Country

(By R. L. Chismore)

A group of many Canadians who all their lives have thought and talked about of going to Europe some time and who have year by year postponed this expedition to an indefinite future, this summer realizing their ambitions. This is the conclusion of the travel agencies after attending early departures of Canard liners from Montreal and analyzing the bookings for the season. A surprising number of those who will sail down the St. Lawrence river and Gulf of St. Lawrence to the centre of the present summer are making their booking of the Atlantic for the first time.

Despite the continuances of unsettled international conditions, reduced incomes, and restricted luxury purchasing, the realization has come home forcibly to many people that this is the year to make that European trip if it is ever to be made. Not since the war has it been possible to tour Europe so cheaply. It is considered by better present economic troubles are straightened out it will be years if possible to do it at such low cost. And so these are the people who are many and able to do so are seizing it.

Imagine being able to bid a carefree farewell to this country for thirty-one entire days, enjoy a luxurious ocean voyage, see sights, and all that is loveliest and most interesting in Europe for as little as $365.50! Thirty-one delightful summer days of tranquil sailing between the comforts of the luxurious liners of the St. Lawrence River, of comfortable ocean liners, of comfortable trains, and of touring in commodious motor coaches through the choicest sections of Europe! Round trip Montreal to France at $0.50 a day.

The remarkable feature of the arranged tour, in Montreal as in the country, to the amount of actual travel time spent in Europe. The ocean trip to the United extent of time. With in Europe of the month at the disposal, the trans-Atlantic traveller can have the surprising amount of luxury and visit virtually all those romantic and historic localities of which he has dreamed, which he would probably but if he were making a trip on his own account, at heavy expense. Certainly by motor coach—photos satisfied, with reference to the practices of the countries he has visited, satisfied that he has spent his time to the best advantage.

For the traveller wanting some of the comforts of civilization it is possible to be completely selective. A glance at most satisfactory is possible in the time at sea. Steamer, the Duchess of Bedford, the Duchess of Richmond, the Duchess of Bedford, the Duchess of Richmond. Either by boards the little steamer which takes them a few hours later to Gaspé. Then, the continental journey begins with its fine meals and comfort.

Then, the Gaspé Bay, Gaspé's new lodge its name through hollowed to the Gaspé Bay, Gaspé's new lodge its countless quaint old villages and the charmingly distinctive Dutch countryside. Antwerp, Brussels, Waterloo and in to Bruges, the back century city, Ghent, the City of Romance, Versailles with its more than fifty royal bridges, Paris, the city needing no introduction, and its many historic and world interesting and its many historic and world interesting and its many historic and world interesting

Rescue By Radio

Sinking Of the Steamer "Evangeline" Completely Described

It was on the night of the 5th of last month that the "Evangeline" (chartered on Lloyd) crossing the Bay of Biscay on our way from Tangier to Southampton.

The weather was glorious, the sea as smooth as oil and flooded with moonlight.

At about a quarter to eleven we were dancing in the saloon when my partner (an ex-naval man) suddenly stopped.

"Hello, what's up?" Dora, my EX fiancé, what's up?" he said, "we've altered our course." I of course, had noticed nothing, but on his suggestion I went to my cabin, got a cloak and went up on deck with him. One look at the stars was sufficient for him. "Yes, we're going back," he said. Before we found a ship's officer, who, however, told us, was willing to give information.

We had received an S.O.S. A ship about thirty miles back was in distress and we were returning full speed to her assistance. It was a three-thousand-ton Latvian steamer the "Evermere," whose leaky had exploded.

In what seemed to a very short time our searchlight picked up the vessel. Her decks were already awash. The crew were all asleep in their beds we learned.

Slowly, slowly, the "Evermere" sank, and our passengers, many of them roused from their sleep by the clanging of the telegraph, and in their various states of undress—some and wrinkled her go. The silence was broken by nothing except the low humming of the engines and the occasional shouted order from the bridge.

For over three hours we watched till at last her stern dipped, and quickly, quickly she sank, bravely, it seemed, displaying the water round her.

The wireless crew climbed the rope ladder into the deck of the "Evergreen." There women fled, then twenty-four men, one of them carrying what at first we thought to be a baby—but it was only the ship's cat. And all of the capsule of the "Evermere," wireless-crew, with his ship's papers very carefully tied up in a bundle his teeth as he clambered up.

I think we all felt as though we had been watching by a human death-bed.—Sheffield Pages. Evergreen, May 6.

Time Well Invested

Motorists Lose Nothing When Slowing Up For Children At Play

It can soon be admitted that children are curious, very curious. The parent of a ball which rolls out on the road is to the child more important than anything else. The idea of danger being there does not register in the mind of that child. That is a lesson in quantity and drivers of cars are aware of it.

If they are careful they will cut down the speed of the car on streets where there are children, they will even more along at a man's pace, but by so doing they save lives. It may take them an extra three or four minutes to reach their destination, but what of it? It is time well invested.

Discovery Of Wealth

The public debt of Canada, of the nine provinces and of municipalities and corporations amounts to $3,500,000,000, with an annual interest charge of $225,000,000. Canada in the past two years borrowing. It would require years to have been a warning that the depression did come.—Ottawa Journal.

Man-Made Lightning

Man-made lightning of 3,000,000 volts shattered an 18 foot 6 x 6 timber of redwood in a spectacular demonstration of a new high-voltage machine at Stanford University recently.

Hotel Guest—"Do you know if the changes here are reduced if one stays by the week?"

Hotel Porter—"Couldn't tell you, sir. Nobody ever stayed a week!"

W. N. U. 1207

Parishioner Was Sleepy

Congregation Of Hundred Years Ago Had Slow Cut Off

Modern counterfeiters ought be a bit chary about passing their spurious product were they subject to the punishment meted out to offenders in News Scotia a century ago. In those days of the 18th century, the law of an ear was considered a not too heavy penalty for the person detected passing counterfeit money.

The earliest recorded effort at circulating this form of coinage took place in Nova Scotia in 1738, when a large amount of £1 and £2 English notes were discovered in bad fair and current other provincial centres.

Investigation soon resulted in the arrest of one of the counterfeiting band, in whose shallow brain the award money of £40 proved overly dangerous. The £1 bills resembled the originals so closely as to defy detection, but those of the larger denomination showed clumsier workmanship. It was these that had aroused suspicion, leading to the arrest of the unfortunate Kelly.

He was quickly convicted and it was ordered that one ear should be cut off while he stood in a public pillory. Sentence of one year in jail also was imposed.

Using Canadian System

New Zealand Operates Railways For Benefit Of Country

A railway system under the most advanced breeds of poultry in Canada is being operated by the general use in New Zealand for the public benefit. Poultry raisers will be urged to purchase fattening equipment and search their registration numbers on the under rail, circular "Poultry of the Islands" a special pamphlet just issued which has been finished with lettering ink.

Dr. J. H. Grisdale, deputy minister of agriculture, points out that the fattening unit in return for the owners of chickens found in the ports of the state, in clustering barns and coops, to markets in New York and Philadelphia and in rapid communication with Canada from Montreal.

Personal Train Wreck

People Viewed In Wheel Assume Stand a Split Hat

Mr. and Mrs. Henry Brunell prevented in train wreck at Wheat Valley, Mississippi because they were train-ed by 10 years of listening to the "Human Voice" broadcasts of Central Station which pass their home.

Recently, Train No. 32, fast steam-ferry express passed over a defective rail, causing the "off-boy" engine, being the difference in the sound of the wheels rolling on the rails, the engine went to the track and found a split rail, which miraculously had remained in place as the train sped by.

They stopped on the spot until the arrival of the train dispatcher, who, in the distance, then flagged it until it came to a stop. Restored officials of the train within prevented a disastrous wreck.

Keep Mentally Active

Old Heads In Busy Nervous Although Mentally Feeble

Mental exercise is prescribed as a cure for the fears of depression by Dr. Charles H. Dodsel, superintendent of the Royal Edinburgh Hospital.

Keep mentally active, he urged, and adds that "the mind, if over-worked, will break down from over-use of the body." If you haven't work enough to keep you mentally occupied, adopt a hobby, whether it be raising chickens, stamp collecting, planting a garden, or learning constant bridge.

"I found the memory is lost in bed," he said.

"Oh, I don't know. Take away the mosquitoes and the bite and it's just like anywhere else."

"Don't worry any more about him, dear. There are plenty more fish in the sea."

"I know," said the plaid cat, "but he was a goldfish."

Hostess's plan of entertaining result in forecast is declared to be a success.

Mrs. Helen Wills Moody

Despite rumors that she would not compete in championship tennis this year, Mrs. Helen Wills Moody has declared her victory for the XII England Lawn Tennis Championship at Wimbledon in June and July. It was learned from London, Mrs. Moody announced the will not defend her French title.

Died Sixty Years Ago

David Livingstone Was One Of the Greatest Missionaries Of All Time

David Livingstone, the great African explorer and explorer, was born March 19, 1813, at Blantyre, Scotland, was ordained a missionary November 20, 1840, and embarked on the ship "George" for Cape Town, and proceeded to the Cape and thence to Algoa Bay. He died May 4, 1873. He proved himself one of the greatest missionaries of all time. He found the slave trade the most powerful and most deadly agent that could possibly operate against the spread of Christianity. From that time on not his face deadly against what he termed "the open sin of the world."

Live Animals For Advertising

Show Shops In Paris Have Adopted Unique Method

Live advertising comes by way of three little lambs to be seen gamboling to and fro at the windows of a tailor's shop, along the Grands Boulevards. Wool from their backs, the beloved animals, will one day go to the making of suits of the best cloth ordered in another window.

Two leopards are also installed in a cage in a fashion furrier's window.

If such methods become popular the streets of the capital will soon resemble a farmyard plus zoo.

Governor His Shooting

A youth who never heard a lecture on the theory of shooting in his life has been awarded a certificate in architecture by the University of Cincinnati. Gilbert C. Cusumano, 23, a lad made since birth, won the certificate in three years of evening study.

Costs of maintaining the British Royal Air Force are estimated at nearly $300,000 a day.

The Temperate Man

Is One Who Does Everything Strictly In Moderation

The virtue of temperance doesn't consist in doing without it consists in moderation. And it isn't limited to the use of alcoholic beverages.

The temperate man is one who does all things in moderation.

He drinks, if he is so inclined, but he doesn't get drunk.

He enjoys food without being a glutton, or limits his diet without risking his health to please his vanity.

He believes in himself and respects himself without assuming that he is made of finer clay than other men.

He respects other men without being servile.

He feels a friendly interest in others without meddling in their affairs.

He works when he must without thinking leisure an evil, or enjoys his leisure without accusing those who work.

He scorns the things that are vile and degrading without being a self-righteous prude.

He stands up for his convictions without being an opinionated ass.

His gentleness and practices the religion of his choice without becoming a fanatic and a nuisance to others.

He feels a decent patriotism without being blind to his country's faults or the virtues of other lands.

He expresses a natural preference for the region of his birth without necessarily thinking all other countries are inferior or rogues.

He supports any candidate or cause of his choice without assuming that all who disagree with him lack sense and honor.

He makes all the money he can without losing his sense of values and sacrificing everything to get money.

He is thrifty without being a miser and generous without being a waster.

He is kind and generous to his family without being a self-made martyr or an over-indulgent Santa Claus.

He praises when praise is due without descending to the level of a yes-man, and criticizes without being a common scold.

He demands his due of respect without continually watching for opportunities to be offended about.

In short, he does all things that nature and reason prompt him to do, but imposes upon himself the restraints dictated by good taste and the rules of civilization.

And if he doesn't do them things, he isn't a temperate man, though he finish his days without knowing the taste of alcohol.

Speed and Beauty

Wonderment Of a New Idea In Motoring

Speed and beauty will be the watchwords of a new era in railroading if an experiment just completed by the United Pacific System proves successful. W. A. Harriman, chairman of the Union Pacific stated in New York that by substituting a set of gas motive connection an order would immediately be placed for the construction of an entirely new type of passenger train, featuring speeds of 110 miles per hour, light weight and full streamlining.

The Promise Of Springtime

Brings Hope Anew To a Discouraged World

It is not for nothing that normal man has always loved the spring time and the season of growth. We may make our jokes about the spring poet and his raptures as we like, but it needs no poet in language to feel the stirring of satisfaction at the sight of the overturned earth in the springtime fresh and fragrant with that early but distinctive aroma of the good earth yearning to be worn that it may in its season bring forth the fruits that man needs for his sustenance and delight. The sight of early growth the sprouting of grain and the green of garden and lawn and budding trees, brings hope and even in times when hope has had its struggle to be restricted to the hearts of men.

The poet, alas—so tradition in regions that have suffered drouth in seasons past—has refreshed and renewed the earth, have quickened a better faith and given encouragement to farmers who badly require a good measure of that commodity. All sections of the community in recent years have been grievously sheary and drastic reminder that these practic communities, whether of larger or smaller size, depend upon the bounty of Nature and the work of the primary producer to live and to enjoy a reasonable measure of comfort.

It is well that that been many sow be forgotten when brighter days dawn, and that every phase of the community will desire, not merely in self-interest, that the man on the land, the "dirt farmer" whom Martin Shall receive once again his full share of the comfort and reward that his effort ought in reason to a civilized world — Regina Leader-Post.

Doctor Describes How Extra Energy Originates

"Cheering" Of An Automobile Is Result Of A Compression

Extra energy is receive mechanically in energizable comes from the quick chemical breakdown of explosive mixtures, according to Dr Jacob Sachs of the Department of Physiology of the University of Michigan.

Addressing the American Physiological Society, at Cincinnati, Ohio, Dr. Sachs said this fast breakdown is similar to the "cheering" of an automobile to give it that quick response from the vacuum tank and carburetor—the fuel is mixed at the case of the human body—tankis down to their job.

Muscles are nameless do their work by burning lactic acid with the oxygen in the blood stream, he said. Unfortunately the body must move very quickly during a period of exercise, requiring energy faster than oxygen can be carried to the muscle by the blood. This energy must be said, glycogen, or animal starch stored in the muscles, undergoes two quick chemical breakdowns.

One gives lactic acid to large amounts. Another gives hexosephosphate, a glycogen and phosphorus compound. And it is this explosive for short but violent exertion to the by-product of both processes. But, if the muscles cannot keep up, the heart has time to increase its rate of beating, and to pump more oxygen-charged blood to the muscles so that they may carry on with the work imposed on them.

Wide Complex Life

The complexity of life in these strange times was impressed on us the other afternoon when a motorist of by the name of Rockefeller were standing on a Fifth Avenue corner. Along. One of them, as we passed, said to his friend, with a frown, "What business has it that you're not in my name?"—The Nation Visitor.

This world need necessity is a much and entertaining world without the necessity. One of us has discovered after painstaking research, that a frog is not found under the sand.

HEART OF THE NORTH

By

WILLIAM BYRON ROWSEY

Published by William Byron Rowsey

CHAPTER XI.—Continued.

"Good Lord! And you've deserted, too, Ped."

"But I couldn't miss out on a trick like this, could I?"

Alan winced. Here was Pedmenit mixed up in his trouble. Like an eager wolf-hound whom his master had left behind, Ped had shoved his collar and come along on the hunt.

"Where's Bill and Joyce?" Pedmenit's face grew long, his eager excitement sobered down. He decided it was better to say nothing just now about Dave's suicide. Alan had enough anxiety preying on him.

"I'm thankful for that gaseline," Alan said. "And for you throwing in with us, Ped, at the price you'll pay But I don't see how you can help. We can't carry a third person on this trip. I'll have to have room to work the machine gun—"

"Then I'll go in the bunch."

"You can't make it. Above the Akmoka forks there's twenty miles of low water that you can't get through."

"I can make it now. I know what the bunch can do. After all these heavy rains, dashing down that left fork from the Thel-Annah . . . Look here, I've packed at the worst stage on a pier—"That's eighteen inches higher than when we made our first patrol after them. I can get through, and I'll be in front. Good water channels of the Thel-Annah—"

"All right," Alan agreed. "You'll be a mighty big help. If they put us out of it, you'll be in position to carry on with them. Let's go up to the post and make our arrangements. You'll be taking ahead of us."

Meeting Buzzard in the trading hall, he introduced Pedmenit and explained. They went on back to the kitchen and worked out their plans.

Pedmenit was to leave at dawn in the launch. Then the plane would leave at ten o'clock. Passing Pedmenit just inside the Thel-Annah, the plane would fly ahead, locate the rapids and bring them to bay. The two craft would then close in together for the battle.

There was but one hitch in the plan. All three men were aware of it, but no one mentioned it. There bandits had Joyce with them; they could

SIMPLY WORN OUT?

Take Lydia E. Pinkham's Vegetable Compound

Can anything be more discouraging than to feel that you are simply worn out, that you have no ambition, no energy, no desire to do anything? Why not take Lydia E. Pinkham's Vegetable Compound and see how much it will help you? Thousands of women have written to Lydia E. Pinkham Medicine Co. telling how they were helped by this famous medicine. Why not you?

W. N. U. 1207

and would use her for protection. How could they be swept with a machine gun? How deadly spray when she was with them?

It was something which had to be left to luck or fate.

Alan gave final instructions: "If anything happens to the plane, don't try to fight them five men by yourself. Pedmenit, during wide of them, go on east to that big lake I mapped for you, and join Bill there. Then the two of you fight them to a finish."

"One other thing. I don't want Buzzard or myself to be charged with murder. You're in service, Pedmenit, you'll not only be on a legitimate patrol, but you have the power to deputize on an special constables. We'd better put that down in black and white."

It caused strange to Pedmenit. Accustomed to half-breeds and Indian scouts and dog-team drivers on emergency occasions, to be scouring in his former officer commanding he was merely a cipher. He would act the formal authoritarian: "Corporal, Constable Smith, private, special constable McCloud Baker; status, special convicial constable temporary; capacity, scout and dog-team driver."

At the earliest hint of dawn they went down to the landing, imported the launch and hoisted Joyce's light canoe on the stern half-deck. They mount shook hands with them, stepped into the wheel cool, and set out on a solitary figure, up the Big Akmoka.

Waiting, nervous and jumpy, as both had waited for more hours in Flanders, Alan and Buzzard talked about the unutterably lonely post.

At nine o'clock, drawn down to the last drop, Alan poured out the plane for the third time, and Alan mounted the machine gun in the cockpit. When their nerve bore came, he bowed the craft out into windstream, held it there while Buzzard warmed the spluttering motor, and then mounting the pilot's cockpit, with a kick, he sprang up into his seat.

Buzzard fitted the plane out of the river, climbed to five thousand feet, and headed into the northeast.

CHAPTER XII.

The Down Nest

Thirty miles down the Akmoka forks, they caught up with Pedmenit. When he saw that all was going well with him, Alan turned his glasses ahead and began searching the low waterways within vision. He picked up two tiny black objects creeping up the main channel ten miles on into the Thel-Annah.

Signaling Pedmenit that they had sighted the canoes, Buzzard slowed down the motor to sixty miles an hour, swerved back that he understood and they saw him open out the throttle to a long narrow V wake of white foam stretched behind it. Then, waging on ahead, they closed in for the battle.

As they drew near and Buzzard dropped to a couple thousand feet, Alan began to make out figures in the two canoes. Their heart leaped as he counted six persons. Nearer still, he distinguished a slender girlish figure in the prow of the last canoe. They had found her! They had got her! Joyce or she the Lod clung to her faith that he would save her.

Half-raking, Alan glanced back unstirred to find how near Pedmenit was. A parched expression crept over his face as he failed to glimpse the launch in either the Akmoka or the broad blue channel. With a premonition of disaster clutching him, he swept the glasses, frantically, over the connecting creek, and caught the big boat in clear vistas.

The launch he now brought a cry into his throat.

The craft was not moving. It lay on its side, half out of water, hopelessly stranded. Either from careless piloting or from an accident no one could have averted, Pedmenit had struck a sand bar hidden under the treacherous muskeg water; and now the scarlet-and-gold launch, lodged solidly in the muck by the middle third of its length, lay out of the battle for good and all. Pedmenit could not even go and help Bill.

Alan bore his gaze away from the disaster. It was all up to him and Buzzard now. Pedmenit was out, the launch was out; Bill was a hundred miles away, and alone.

He lifted the Browning muzzle downward and steadied himself to run a burst at the rear canoe. But that craft darted up alongside the leading boat and hovered there, protected against his machine gun by their nearness to Joyce. With canoes three upturned, the bandits reached the unsuccessful plane, waiting for Alan's next move, defying him to touch them.

Buzzard had headset in a next junction turn, had dropped down to six hundred feet and was flying back past, a hundred yards off the water, on that Alan could fire down on them diagonally and double his concentration by rendering bullets off the water. It was a superb position. Alan could have killed those five bandits and sunk their canoes in half a minute. But he dared not fire a shot.

It was in that space of hopeless deadlock that Joyce came through. Alan saw her make both nose sleight signs, a more gestures which the bandits, leaving up at him, did not see. He read the meaning of that gesture. Joyce was preparing for some sudden action; she was signalling him to be ready!

Without a whisper of warning, so swiftly and neatly that the bandits looked around in dazed bewilderment, the girl rose in the canoe, seized handlong over the gunwale, and disappeared.

It came so suddenly that for moments Alan thought Joyce had actually leaped into the cold water. Then he saw her head and shoulders above the gunwale, her figure lightened on the trigger and the Browning jumped into play.

For twenty seconds till there was danger of Joyce compromising, he held and swept the two canoes with a rain of bullets. He marched one man, then another, and yelled. The dazed, bewildered men pulled in terror of their lives, into shelter of the nearest bags.

Fifty feet from where she had dived, Joyce reappeared a moment, cast a frightened glance back, then struck out for the shore. She was open, swam a stroke or two, and then flipped under again like a young otter, making for a soggy reed bed on the other side of the lake.

"Low! Fly low!" Alan shouted into Buzzard's ears. "Sweep low over 'em. They'll try to get her again, if we don't force the fight now!"

With rides mar ng at them from the bandits' boat, with white puffs of smoke driving away at the launch, the plane banked and dived; and banking four hundred feet high, it soared over the bandits' fat filled them, lot and fatal time

Nearly flung bodily by the quick wrenching manoeuvres, Alan leaned over the gunwale and, being grilled to the Browning and ran a burst at the flags that the bandits were firing from. His first swung, sat-sickened, and Alan flung up his arms and staggered and fell face downward in the reeds and water. With another burst, enfilading from front to rear, he killed the man next joy in reedsedy fragment hunt, and killed the remaining rubbish mirth!

Champion Jig-Saw Puzzle

Blind Man Claims Inability To See Is An Asset

Stanley Warrington, 26, of New York, blind since childhood, is a champion jig-saw puzzler, and he claims that his inability to see is an asset in putting the puzzle pieces together.

According to Warrington, color is the first thing he considers in the landscape to their rapid assembly.

His method is to first turn all the pieces either face up or face down and then sort out the border pieces, and then the other sections according to their shape. A remarkably trained memory is also a great asset. With its left-hand he explained the corner of the pieces already assembled and with the right seeks their mates.

Warrington is industrial advisor to broom and mop makers in the New York workshop of the Association of the Blind. He has invented many pieces of machinery used by blind workers.

Portraits Of His Majesty

Five portraits of His Majesty the King were presented to Inspector Dunlop Veitch, of the Royal Canadian Mounted Police, by Miss M. F. MacKenzie, regent of the Municipal Chapter of Montreal, I.O.D.E. These portraits are intended for five detachments of the Eastern Arctic sub-division of the R.C.M.P.

Divorce In England

Seven Thousand Persons Divorced In Great Britain Every Year

One out of every 32 marriages in England ends in divorce.

There are now about 30,000 divorced persons in England and Wales—and 25 per cent. of them live in London. These are some of the facts revealed by the latest divorce records given in the registrar-general's annual report. Because divorce is now easier to get, more unhappy marriages are being terminated. As a result there are now five times as many divorces in a year as there were twenty years ago.

Men are petitioning for divorce in greater numbers. For years the records showed that it was the wives who got most of the divorces. But for the coming term of the law courts at which divorce cases will be tried there are 191 petitions filed by husbands and 351 by wives.

Although 7,000 persons in Great Britain were divorced every year, 64 per cent. of them re-marry. Two out of every three divorced men contract second marriages. And so do three out of every five divorced women.

But when they marry again they choose partners who have had no previous experience of matrimony. Only on one case out of ten do divorced men marry divorced women.

In these cases out of ten divorced men marry spinsters. The spinster brides are usually under 30 and the bridegrooms between 30 and 40.

In two cases out of three divorced women get bachelors for their second husband. Most of the divorced women are from 30 to 35 and they frequently marry bachelors about five years younger than themselves.

About one-half of the divorces occur within the first ten years of married life, although the general tendency is for divorces to take place later in life.

THE RHYMING OPTIMIST

By Allan Mackenzie

VILLANELLE OF SPRING

I saw the nesting robin light
Upon the branch, with twig in mouth,
And noted the feather thing's delight
In end of barren winter's drouth,
And watched the mating bird and wingling knight
And warm wind blowing from the south.

The winnting farm lay with his
The furrows deep and straight and
Long
Cold debtors on the green hill's brow.
The rainbow butterflies that throng
Were many-colored as a rainbow,
All blend with nesting robin's song.

Anew the old enchantments pass
And loud brief bright magic to the earth,
Fair every sight and loud and
Most joy in rosebuds' fragrant birth,
And thus the nesting robin's mirth!

Champion Jig-Saw Puzzler

Blind Man Claims Inability To See Is An Asset

Stanley Warrington, 26, of New York, blind since childhood, is a champion jig-saw puzzler, and he claims that his inability to see is an asset in putting the puzzle pieces together.

According to Warrington, color is the first thing he considers in the landscape to their rapid assembly.

His method is to first turn all the pieces either face up or face down and then sort out the border pieces, and then the other sections according to their shape. A remarkably trained memory is also a great asset. With its left-hand he explained the corner of the pieces already assembled and with the right seeks their mates.

Warrington is industrial advisor to broom and mop makers in the New York workshop of the Association of the Blind. He has invented many pieces of machinery used by blind workers.

Portraits Of His Majesty

Five portraits of His Majesty the King were presented to Inspector Dunlop Veitch, of the Royal Canadian Mounted Police, by Miss M. F. MacKenzie, regent of the Municipal Chapter of Montreal, I.O.D.E. These portraits are intended for five detachments of the Eastern Arctic sub-division of the R.C.M.P.

Little Helps For This Week

"Thy servants are ready to do whatsoever my lord the king shall appoint."—2 Samuel 15:15.

I love to think that God appoints My portion day by day;
Events of life are in His hand,
And I would only say,
That in Thine own good time,
Add in Thine own best way.

If we are ready and always ready to do whatsoever the King appoints all the trials and disappointments arising from any change, great or small, simply do not exist. If I mount up into His mind the message the morning shall I grumble that His sends interrupting visitors, rain or poor, to whom I am to spend the morning or to whom I am to show kindness for His sake. If all my members are ready at His request why should I be put out if things are postponed to some simple work for my hands or errands for my feet, instead of some delightful work planned for doing of head or tongue.—Frances R. Havergal.

Hunting For King's Baggage

Bank In North Sea Over 700 Years Old Keeps Royal Secrets

Fen Research, Limited, London, England, is the name of a company formed to hunt for the famous baggage and regalia of King John lost in the waters of the Wash a little more than 700 years ago.

This is a change from the usual treasure hunting organized with an eye on Cocos Islands or the Spanish Main, and many think it probably will prove more successful. Tradition says King John's baggage and regalia were lost in the Wash, and the company mentioned, appears to think tradition is right and is about to start digging for the lost treasure. It proposes to locate the treasure by "electrical divination." The Wash is a shallow bay of the North Sea, on the Lincolnshire and Norfolk coast of England.

Many Protest Against Plan

Arms Between In Greece Do Not Favor Restoration

Greece's new cold-or-even note because him is arousing much protest. The plan is to feed the army by the members of the navy and the streets on certain days of the week and those with odd numbers the other days. The idea was to reduce imports of gasoline, but in Athens reliable notes of "gas" have dropped less than 10 per cent. since the rule was enforced. One-car owners do not relish having their machines idle half the time. They seem to think the plan that now there are not enough gas.

Many Named Passengers

Glasgow, Scotland, believes that it has many named street-car passengers. Every morning and evening many fares in the rush hours citizens of the longest tramway line—from Govan to Baillieston—board the cars, and a sign asked those who had not paid to drop the penny in the box as they left. Since the plan was started more than $100 a week has been collected by the boxes.

OFF COLOUR?
HOW IS YOUR LIVER?
Wake up your Liver Bile
—Without Calomel

Nature intended your liver to pour out two pints of bile juice into your bowels every day. If this bile is not flowing freely, your food does not digest. It just decays in the bowels. Poisons from this decaying matter are absorbed into the blood. You get constipated, bilious, sick, headachy, sour, gassy, sleepless, and feel all run down.

You don't completely correct such a condition with mere bowel movements. You must get your liver working right again. Then the bile will flow freely and you will feel like a new person.

Carter's Little Liver Pills will make your liver pour out two pints of bile juice into your bowels daily. You will know they are working by the way you feel.

LOCAL NEWS

Mr. F. W. Smith and Mr. Jack Westover motored to Calgary last Sunday where the former attended the three-day meet of the Alberta Pharmaceutical association, which opened Monday.

An elaborate banquet of the Calgary Stampede has been mentioned at this office.

"Watch for the big point special advertisement coming soon.

After a few days of midsummer weather a shower of rain visited the Fort and district Sunday afternoon continuing off and on all night. For the past three days rain has been falling intermittently, and no doubt it will be untold benefit for the growing crops. Garden crops will greatly benefit by the rain, as the ground was in a terrible dry state.

LADIES ATTENTION

Second hand clothing is much needed by the Fort Red Cross Society. Please send any articles you can spare to the President or Secretary.

A large number of Masons motored to Vegreville on Monday evening, where a district meeting was held. They report having had a very enjoyable evening.

Mr. Gordon Burton, of the Bank of Commerce staff is relieving at Stony Plain for the next six weeks.

Mrs. Chas. Magor is spending a few days with Mr. and Mrs. Stan. Whitson at Alexander, Alberta.

Don't overlook astounding bargains offered by Craigs' 10c sale. Buy now and save money.

ALBERTA NEWS BULLETIN

Production of oil in Alberta for April has just been announced by the petroleum division of the lands and mines department at 74,505 barrels, of which 69,447 was naphtha from Turner Valley.

The new date adjustment act of the province, passed at the last session, came into force on June 1. The announcement was made by W. Lovell chairman of the new debt adjustment board just set up.

YPRES VALLEY

The Ypres Valley ladies aid picnic held on Saturday, June 3rd was a very successful affair. A good turn out was recorded.

The Ypres Big Hill Girls baseball team defeated the Brookville Girls to the score of 19 to 16.

Ypres Valley boys ball team defeated Josephburg team after a lively contest by a score of 11 to 8.

Born to—Mr. and Mrs. Cecil Simmons of Ypres Valley, A son.

Mr. Adams of New Sarepta was a week-end visitor at the home of Mrs. Dietrich.

The Ladies Aid will hold their next meeting at the home of Mrs. Dietrich, on the third Wednesday of the month.

Church service will be held at Ypres Valley school house on next Sunday, June 11th, at 1:00 p.m.

Good Hope

A very exciting baseball game was played at Good Hope on Monday, June 5th, Josephburg and Good Hope being the players, Josephburg won with a score of 16 to 7.

Mrs. D. S. Whitson left with her sister Mrs. E. Magee on Thursday, June 1, for the east. Mrs. Frank Reid was also a traveller.

Mr. and Mrs. Clancy were Sunday visitors at the home of Mr. and Mrs. D. Cousins.

Mrs. H. Fluehs and big son are in the community again. Mr. Fluehs spent Sunday with her.

Mr. and Mrs. Hignite were Sunday visitors at Macdonald.

Women's Institute Visits Provincial Gaol

The regular monthly meeting of the Fort Saskatchewan Women's Institute was held on Thursday, June 8th, when a good attendance of members were present to welcome the Edmonton Women's Institute who were guests of the day.

The meeting convened at the Union hall where the business was transacted. Mrs. W. A. Graham was the speaker and she gave a bright and interesting history of the Fort, illustrating her address with photographs of old timers and old scenes The hope was expressed that this address should be preserved as these local histories are a feature of W. I. work.

When the meeting adjourned all went on a trip though the Gaol. The visitors were greatly interested in all they saw. Mrs. J. D. McLean very kindly lent her home for the tea which closed the afternoon program Mrs. F. E. Murray, Mrs. Ed. Barnett, Mrs. G. Neale, Mrs. Arnold Carscadden, Mrs. T. W. E. Henry, Mrs. R. G. Fraser and Mrs. H. Looker, were Joint hostesses with Mrs. McLean.

The house was fragrant with a profusion of illiacs while variegated Iceland poppies centred the tea table where the Vice-Presidents, Mrs. S. Truby and Mrs. C. Ashton presided. Mrs. W. C. Short, President of the Edmonton Women's Institute, in a neat little speech, thanked the Fort Institute and Warden J. D. and Mrs. McLean for their kindness and hospitality.

Josephburg News

The Josephburg Ladies Aid will hold a picnic on Thursday, July 6th, on Johnny Mohr Jr's. farm, (6 miles east of the Fort). There will be two baseball games, races and sports.

Chicken supper from 6:30 to 8 p.m. Admission 25c and 15c.

Everybody welcome.

YPRES VALLEY

The pupils of Ypres Valley school with their teacher Miss Lemke, and their friends spent a very enjoyable time on Monday, when they motored to Edmonton, visiting the Government Buildings and Woodland Dairy in the morning, then to the King Edward Palm Room where they had lunch

After luncheon, they resumed their tour of sightseeing, visiting the Edmonton Journal, Pavey's Candy Co., McGavin Bakery, then to Borden Park, where some indulged in swimming while others looked the zoo over.

When at the Woodland Dairy the visitors were treated to as much ice cream as they could get away with, and at the Journal everyone was given a paper right off the press.

Miss Lemke wishes to thank the following who so kindly helped to make the day successful;

Mrs. O'Gorman, Mrs. D. Cranston, Mr. Bill Pearce, Mr. Wm. Gillison, Mr. Bert Davis and Mr. Dave Gunn.

Mrs. N. Latimer has returned home with her baby boy.

Good Hope

Mr. Charles Thomas and Mr. P. Mohr left for Banff on Wednesday, June 7th.

Many Good Hope young people enjoyed the ball games at Josephburg last Monday.

After the recent rain, crops are looking very good.

A crowd of Good Hope people enjoyed Mr. Priestly's speech at the Josephburg school on Saturday evening June 10th.

Town Council Holds Light Business Session

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Secretary's office on Wednesday the 7th. Instant at 8 p.m.

Present Mayor Montgomery, Councillors Fillmore, Magor, Watt, Neale and Graham.

The minutes of the last meeting held were read and adopted

A communication was received advising that the Union of Alberta Municipalities convention would be held in Calgary on the 28th and 29th of June.

A letter was received from the Supervisor of Relief regarding paying rent for L. Bourasso and after consideration, a motion was passed that we refuse to pay rent on any relief cases.

The following accounts were passed for payment W. A. Graham, $11.50, A. M. Carscadden $4.75; Jones, Graham & O'Brien Relief $49.50 J. T. Lalonde relief $25.00. Hillcrest Hospital $18.50; Denver Lumber Co., $2.80; Simmons Lumber... $7.40.

Several matters were left for consideration a the next meeting.

St. Eugene News

Mr. E. Lepage returned this week from a business trip to Bonnyville.

Mr. J. Holmes and staff, Messrs A. Lamoureux, N. LeClerc and O. Boisjoli were busy on the new tennis court last Saturday.

The district extend their sympathy to Mr. E. Morin in the loss of his nephew.

Mr. Albert Boisjoli was in Edmonton this week consulting his doctor.

Messrs Nip LeClerc and George Holmes made a business trip to Josephburg last week, where Mr. LeClerc purchased a registered Belgian Stallion.

Seeding is practically all finished in this district. The wheat looking fine and plenty of moisture.

Mrs. A. Yanch, Mrs. W. Lamoureux and Mrs. Smith were visitors in Edmonton Tuesday.

Mrs. R. Normandeau was a caller at the Nest home Friday.

HOW WATER FARMER LOSES CHICKENS BY SKUNK

Mike Matavinsky of Red Water, came into town this morning and reported that a large sized skunk had killed 130 of his chickens last night, leaving a few chicks to tell the tale. He came in to try and get some eggs for setting. The owner heard the racket in the henhouse and went out with his rifle and the skunk got "him".

The hide is hanging on the fence and anyone can have it on making application in due form.

Controlling Motor Boat Traffic

Special regulations controlling all motor boats, on lake resorts in Alberta have just been made effective by the government. These require all motor boats to be licensed, to have mufflers save in recognized races, to have proper lights, and they make operation also against the reckless or negligent operation of motor boats, and against speeding save in racing.

BEAVER LUMBER (INCORPORATED) LIMITED

Spruce Culls ..... $10.00 per M.

Municipal District Hold Regular Meeting

The regular monthly meeting of the Council of the Municipal District of Clover Bar, No. 917, was held on Saturday last with all members present.

Mr. A. T. Cushing, Chairman of the Lamont Hospital Board was present to press for a settlement of accounts owing by indigent residents in the District. Mr Cushing submitted as soon as a basis of settlement that would be acceptable to his Board. The Council submit d a counter proposal providing for a payment of two hundred and twenty five dollars with the understanding that this payment was to relieve the District of any further liability in connection with the accounts rendered on the statement. Mr Cushing advised that he would take the matter up with the Board on his return to Lamont and telephone as acceptance or refusal before the Council adjourned. The offer was accepted.

Mr. Montgomery, Accountant, of the Royal Alexandra Hospital, submitted a huge list of accounts due to his hospital by residents of the District. The Council felt that it was out of the question to attempt to arrive at a settlement with him at this meeting, so it was accordingly agreed to call a special meeting, for this purpose on Saturday next

Three applications for Old Age Pensions were approved and recommended.

The twelfth of August was the date set for the holding of a court of Revision to hear appeals against the assessments for wild land tax

Approval was given to the sale of Lots 21 to 32, Block 7, Ardrossan, to R. Buckley for the sum of $50.00

With the reading of correspondence and the passing of accounts the meeting adjourned at 6:15 to meet again on Saturday next.

LOCAL FARMER HAS HARNESS STOLEN

We have just learned on going to press that Logan O'Brien had all his harness stolen last night. The R. C. M. Police are investigating.

The Fort Community Tennis Club have entered the intermediate interclub tournament this year, with ten other clubs taking part.

The following is the schedule:—

June 27—Glenora vs. Fort Club.
July 4—Eastwood vs. Fort Club.
July 11—Civil Service vs. Fort Club.
July 18—Bronnser vs. Fort Club.
July 25—Fort Club vs. C. N. R.
August 1—Fort Club vs. Alta. Ave.
August 8—Fort Club vs. Scona.
August 15—Garneau vs. Fort Club.

There are two country teams and eight city Clubs entered the league this year.

The first mentioned team in each case is considered the home team and five of the nine events will be played on their courts.

Watch for the next games and turn out if you care to see some real snappy tennis.

The People Must Pay.

First, if any, subjects are engaging the attention of people in Canada, as in most countries, as closely as the subject of taxation. The rising burden of taxes is a matter of deep concern to all. Fortunately, it is receiving serious consideration, not only by those responsible for the administration of public affairs, but by individual citizens.

Taxation in our modern democracies is by no means a simple problem. It is cumulative in effect, and its control is extremely difficult. Every governing and administrative body set up imposes a measure of taxation upon all of us, and, in addition, there are many calls made upon people which, while voluntary in one sense, constitute, in the final analysis, a form of taxation.

First, we have Federal taxation, direct and indirect, and levied to a great variety of ways through such agencies as the tariff, excise duties and income taxes, income taxes, stamp taxes of various kinds, license fees. Provincial Legislatures follow with a second income tax, land taxes, succession taxes, license fees to be paid for this, that and the other almost without end number. Then the municipalities place another tax on land, on improvements thereon, some levy a third income tax, some an additional succession tax, all of them have more income fees to charge. The school boards impose further tax to meet the costs of education.

Hospitals have to be provided for, to some extent this is done through taxation, Provincial and municipal, but often this form of taxation has to be supplemented by voluntary contributions, for which, in reality, are a tax on business and incomes. Charities have to be maintained, even though the law may not compel us to do so, and then people are in effect again taxed if they are willing to be, and most of them are Philanthropic and charitable organizations exercise of all kinds are maintained in the same way.

The cumulative effect is to produce an almost impossible burden, until now we find articles appearing in magazines financial journals, the daily and weekly newspapers recording the hundreds of millions of debt that have been created, and the scores of millions that must be annually raised in taxation, while organizations of all kinds are conducting investigations and studies with a view, to arriving at some means whereby the burden can be lightened, and higher harvested if it prevented.

Prevention of any further increase is an easy matter if the people, who are the sufferers, determine there shall be no further increase. Individuals know they must keep within their incomes, or they are headed for trouble and disaster. Private business knows it must keep within itself to its income, or it will end in bankruptcy. What individuals and business must realize is that what is true in their respective cases is likewise true in public business.

Many people, possibly a majority of them, who are fully aware that they must live within their income have considered that it was the belief that it was not necessary for the governing bodies created by them, and supported by them, to follow the same course. Rather, people have insisted that their governments, Federal, Provincial, Municipal, should provide this and that service, and as the people made and un-made governments, the latter have naturally done what their creators demanded they should do. But these same governments have no income except the power to tax people, and this they have proceeded to do.

What people must realize is that if they demand of their governments certain services they must be prepared to pay for those services. They cannot have them otherwise. And if they cannot afford to pay for them, then they must do without. And if they cannot afford to pay for them, and must be prepared to do, and that is what they are doing they can do, and must be prepared to do, and that is what they are doing without them. That is, in their collective capacity they must govern themselves by exactly the same rules as they are forced to recognize and govern individuals, if they cannot pay they must do without, or they must do without what they would like to have and would have if they could afford it.

It is being predicted that the worst of the depression of the last three or four years is over; that things are once again on the up-grade; that better times are slowly but surely developing; that, in a word, the world is beginning to turn that corner around which it has been said prosperity is hurling. Let us all hope so. But when we have reached and turned that corner, and are once again compelled to demand something of our governments we would like to have, and think they ought to supply, it will be the part of wisdom to pause and consider whether, after all, we can afford to have it, because, no matter what it may be, it will have to be paid for, and paid for by us,—the people,—and paid through the medium of taxes in one form or another.

Many glowing promises are frequently made, and are still being made notwithstanding the bitter experience of the past few years, of what the State can, and ought, and will do for all the people if certain principles in administration are adopted. And if these wonderful things are done, they will be done for them in name. And every dollar that people have to pay over to the State in name but a dollar less left in their own pockets to spend in securing their individual tastes and desires and needs. Either they are going to do certain things for themselves or they desire to do them and pay for them themselves, or they are going to have the State do them things for them, or the State may determine they should be done, and then pay the State in taxes for the services so rendered.

In any event, and under all circumstances, the people will do the paying. They, too, can do the ordering. They can order beyond their means, and get into trouble. They can order for themselves and pay for what they themselves order, and pay for what they order. Or they can order the State to do the ordering as the State may see fit to do, and then pay the bills incurred by the State. And the decision, whether it may be, will be the decision of each and every man acting in his or her capacity as an individual free citizen.

The main point to remember is that there is nothing—including the resources of the world, nothing free in this world. Everything has to be paid for, and it is the people who have to foot the bills. Therefore, the day and the manner of settlement should always be kept in mind before the liability, whatever it may be, is incurred.

At the present rate of its increase, the glaciers of Mount Rainier National Park probably will disappear in a few thousand years.

The parrots, lorrises, reptiles and birds of prey are found to be the largest lived inmates of the London zoo.

All the gold mined in the world since Columbus discovered America, would amount to about $50,613,000,000.

Sixty per cent. of the public school buildings now used in the United States are one-room structures.

Her Heart Was Weak Seven Baby, Eight Dollars

Mrs. A. Hamilton, Wetherbee, Ont., writes:—"I suffered from heart trouble, baby vomit, and nervous spells.

"I got your Advertisement for Milburn's Heart and Nerve Pills, and decided to try them although I did not have much faith in any medicine. I took in all six boxes from yourself or druggist, and I am now feeling well and strong.

"I am now among our well spoke, but am more satisfied with it than by the bottle."

Price 50 cents per box, 3 boxes for $1.25, at all dealers or post paid from the T. Milburn Co., Ltd., Toronto, Ont.

Scientific World is Hearing Judgment

As To Wireless Living Hatreds Is Not Successful

No successful refutation has yet been put forward of the claim of Professor Charles R. Lipson, Professor of Chemistry of California that he has found living bacteria in meteorites, according to Professor F. R. Lloyd, of McGill University, president of the Royal Society of Canada.

While making it clear that he was not claiming himself to be convinced of Professor Lipson's theory, Professor Lloyd, who has been in communication with the California scientist, declares that all who know Professor Lipson recognize in him a careful and exact observer who is not given to rushing into half-baked theories. Professor Lloyd declared that Lipson's account seems to indicate that he had taken every precaution to be sure he could think of to guard against the accidental transplanting of bacteria into his samples.

The McGill professor also informed the Toronto Star Weekly that an earlier theory of Professor Lipson concerning discovery of live bacteria in coal seams is supported by a Gorman scientist, who, working independently, came to the same conclusion as Professor Lipson.

Like Professor Lloyd the scientific world is still withholding judgment on both theories. Professor Friend Lipson's announcement as to meteorites is criticized by some who assert that the bacteria may have got into the meteors after they had reached the earth.

Harnessing Sea Power

May Operate Water Power As a Source of Power

Opening conversations of the fifth Pacific Science Congress at Vancouver were featured by the radio address of Lord Rutherford on Atomic energy, scientist, speaking from Cambridge, England.

Harnessing the sun's power may supersede water power as a source of energy in the future if large scale development of a power plant at the Smithsonian Institute, Washington, D.C., proves practical, Dr. C. G. Abbot, secretary of the institute, believes.

Dr. W. S. Adams, director of the Mount Wilson Observatory, Cantornia, outlining the theory that sun spots occur in regular cycles of 22 years. At present, the sun is comparatively exposed to the earth, he said, and the coolness, whatever it may be, will be at a maximum, especially as an exception between weather on the north and sun spots.

Colonization Plans

Calgary Proposes To Re-Settled On Land In Six Month

Under a plan proposed to Calgary city council by Rev. O. F. Brown, president of the Land Association of Calgary, 20 families on unemployed relief in Calgary would be settled on the land at St. Paul de Metis, north of Edmonton.

The 20 families have made application for the transfer and others are being sought, it is understood. Dominion Government back-to-the-land schemes are being made, as the colonization railways can go through.

The second crop of herbage from the Cleveland pasture is about 10 inches.

A diamond, worn absolutely pure, is a supreme safety of the diamond cutter.

During Burglar Skill Is Puzzling Detectives

"Cimiet" Jimmy Reported To Have Made $100,000 in Clothes Robberies

"Cimiet" Jimmy, the most daring and elusive burglar in England, whom detectives have been trying to capture for 11 years, carried out two robberies involving £1,300 in cash, early on a recent morning with lightning swiftness.

The problem facing the police in their hunt for Jimmy is that they have no notion of his appearance.

Nor has he ever left behind him a single glue which, in the event of his capture, would definitely establish his identity with his previous crimes.

Only once has a glimpse been caught of him. That was seven years ago when, in carrying out the greatest coup of his career the raiding of a Deansgate, Manchester, bank the night watchman saw Jimmy for a fleeting instant as he ran past a door in making his escape. Since then Jimmy, who usually always combines his activities to the north of England, has one impenetrable mantle of opaqueness.

For weeks he watches and learns the habits of his intended victim, usually a wealthy shopkeeper.

Then comes the night when Jimmy begins work.

First a visit to his victim's house on the days of the shop and say valuables in the home safe.

Afterwards, armed with the keys, there is the rush to the shop.

On the latest occasion, Jimmy entered the home of W. Smith, of Ashton-on-Mersey, and, without waking the owner, took a bunch of keys from the bedside and opened a safe in the house, from which he took £300 in cash. Later Jimmy had taken another £1,000 from the safe of Mr Smith's shop in Gorton.

Jimmy, whose name of "Cimiet" comes from his peculiar method of entering a house through a window, is estimated to have secured more than £100,000 by his burglaries.

A Long Session

Last Session Of Parliament Extended Over 202 Days

The session of Parliament just closed extended over 202 days including the adjournment from November 29, 1932, to January 30, 1933. Only two sessions since Confederation in 1867 have been longer, the longest being the third session of the 11th Parliament which was from November 17, 1910, to July 30, 1911, or 255 days. The next longest was the seventh session of the 19th Parliament, which ran from January 20 to July 30, 1926, or 192 days. The shortest session was the fourth of the 19th Parliament which met on August 16, 1924, and prorogued on the 22nd of the same month. There five days, however, were among the most momentous in Canada's history for it was then the Dominion decided to act on the policy to be adopted in connection with the Great War.

British Built Aircraft

Have Been Sold To Other Countries Notwithstanding Ban

British-built aircraft have been granted an official distinguishing mark—a fan trapezoid in gold within three rings of red, white and blue. Within the white ring are inscribed the words, "British Certificate of Airworthiness." The mark has been registered under the Trade Marks Act.

The air ministry announcement of the new mark recalls will at once distinguish German-built flying machines, no matter what nation's registration markings they bear, states that the mark is authorized to apply to any aircraft, whether fighter or heavier than air. No fee is required for the certificate.

The first aircraft mark authorized was called at the London air station, Croydon, by Viscount, one of the Imperial Airways fleet.

"James Hilton, your father helped you with this essay?"

"Yes, sir."

"Did he write it all?"

"No, sir. I helped him. I corrected his spelling mistakes."

Put Ogden's Cut Plug in your pipe and join the parade! Step along with those who've discovered the pleasure that only Ogden's Cut Plug can give to a pipe smoker.

There's only one way to prove that Ogden's Cut Plug is the kind of tobacco you're looking for —put it in your pipe and smoke it!

OGDEN'S
CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chanticleer cigarette paper

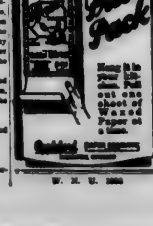
Not Affected By Depression

New Zealand Has Steadily Increased Volume Of Exports

The effects of the depression upon New Zealand have been felt to some extent modified by the success of efforts to counter-balance falling prices by increasing production. While other countries have been afflicted by rapid contraction of their export trade, in volume as well as in value, New Zealand has steadily increased the volume of her exports. In 1928 exports were 12 per cent. greater than in 1928, the official estimate for 1931 show an increase of 30 per cent. in five years, and the volume must have been again substantially greater in 1932, for, in spite of a much lower range of prices, the total value was larger than in 1931.—Auckland News.

"In those bad times you can still travel first-class?"

"I have to. I meet my creditors in the third class."



World Famous Scientists Throw Some Light On The Mystery Of The Gulf Stream

River since the Gulf Stream was discovered, it has been a source of speculation among oceanographic those of its mystery has been established the impress Where does the Stream start? Where does it end? What does it do? The recent return to port of "The Atlantis," the Hamburg research laboratory of the Woods Hole Oceanographic Institution, after a several months' cruise in tropical waters, enters much of the deep veil die of the Gulf Stream.

According to data collected by world-famous natural scientists from various institutions who made up the expedition's personnel, the Stream is not, as is popularly supposed, a vast current flowing from the Gulf of Mexico through the straits north past the coast of Florida out into the Atlantic among the British Isles, and spending itself in far northern seas.

It is really a huge dynamic current, moving following the above route, sweeps to Spitsbergen and then circles back south via the North Sea and the British Channel to the east Atlantic until it strikes the west coast of Africa. At that point, the Trade Winds between Cape Verde and the equator cause the Stream to deflect westward until it finally reaches the Caribbean Sea.

From there it moves to the Gulf of Mexico, and so completes a long dynamic circle. This current is powerful, carrying very little according to the season of the year. No age is unknown, for it cannot be calculated just when the innermost water of the circle stopped to the point where the Stream began to flow. And its position future is unpredictable, for no one has been able to calculate more than could the waters in its circuit must become hotter if will no longer be able to move.

As a matter of fact, there is considerable to whether the Stream is caused by competition currents, whether the current born of the earth on its axis plus the centrifugal thing in opposition to the mighty pull of the moon and sun, or both Atlantic and neighboring seas.

So, even if the voyage of "The Atlantis" does not definitely determine that the Gulf Stream circles the Atlantic, touches four continents and returns, there is much of the mystery yet unsolved.

Yukon Telephone Club Have Excellent Showing

Mayor Bolduc, Addlestone, and Shaw contribute all balances.

Dawson, Yukon, has no more 20th James, please."

"He's not at home right now, but I can connect you with Jack Scully's house, where he has just gone."

That's the kind of Utopian telephone service there is today in Yukon, out in the South East, where the system connects with Alaska and Dawson, and addresses of all the telephone owners and speak their language — English, French and Yiddish.

There is no directory, no numbers to bother with. You just call central and give her the name of the person you want to talk with and have you are. It is quite a feat of memory, however, for there are about 300 telephones in the system.

In the old days, only French and Yiddish were spoken, but since Yukon has become a paradise for Americans, the latter now vie to vent. The salary paid the telephone girls is around thirty dollars a month. At present, there are two operators employed.

Film Magnate (entering theatre): "Who's that sitting next Hamlet?"

Director: "Why, that's Napoleon."

Magnate: "Why did you get such a little man to play such an important part?"—Passing Show.

A combined telephone booth, mail box and stamp-vending machine is to be tried in Denmark, Scotland.

Steam from volcanoes runs factories and trolley-cars in Italy.

Live Fowl Is Hot Meat

Montreal Lawyer Proves His Point In Law Suit

Do love chickens constitute fresh meat? Such was the problem involving points of zoology which was left with Recorder C. H. Semple, of Montreal, for a decision when he took under advisement in the recorder's court a case in which a firm of wholesale dealers, sues much of the dogs "fit" die of the Gulf Stream.

According to data collected by world-famous natural scientists from various institutions who made up the expedition's personnel, the Stream is not, as is popularly supposed, a vast current flowing from the Gulf of Mexico through the straits north past the coast of Florida out into the Atlantic among the British Isles, and spending itself in far northern seas.

It is really a huge dynamic current, moving following the above route, sweeps to Spitsbergen and then circles back south via the North Sea and the British Channel to the east Atlantic until it strikes the west coast of Africa. Rising Bones

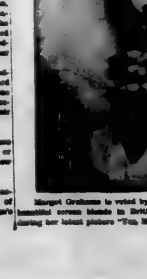
Giant Tenon Of Western Prairie Rises Once To Life

Ghost towns of the old west: Tombstone, Virginia City, Leadville and Aspen's Camp Carbonate, and others which reddened and gilded American history a few pages back—may be clothed again with the flesh and blood of a coming revival if metal prices continue to advance.

Signs of resurrection appeared recently in an Associated Press survey of the mining areas of California, Washington, Nevada, Arizona, Utah and Idaho. In each state operations of established firms are stirring now-to-injected life.

CHARMING BLONDE CAPTIVATES MOVIE FANS



Margot Grahame is voted by England's fleeting enthusiasts as the most beautiful screen blonde in British movies. The above picture was taken during her latest picture "Two Mr. Wrens."

Eighteen National Parks In Canada, The Three Largest Being In Alberta And Saskatchewan

Canadian Coal For Coke

Research Work Shows Suitability Of Canadian Coal For Producing Coke

Until recently the coke produced in Canada was made exclusively from imported bituminous coals. The annual Canadian bituminous coal operators no little concern, and on solicitous the Department of Mines undertook to carry out extensive tests, in Mt Pest Research laboratories, on coals from both eastern and western Canada. A single unit of a commercial size, horizontal coke oven was erected for the purpose and the same coals were mixed and blended both with Canadian and with foreign coals. Efforts were then made to interest operators of coking plants in proximity to suitable bituminous coal supplies, in a greater utilization of these commercial plants. Results proved beyond doubt the suitability of Canadian coal for the production of a satisfactory coke. At present a number of plants are using Canadian coal exclusively, for the production of gas and coke, with others operating under more favorable conditions, or using proportions varying from 25 to 50 per cent. It is likely that these proportions will be increased eventually.

An Old Indian Custom

Little Stone Built Over Graves In British Columbia

Under the towering peaks of "Falling Rocks" mountain range near Hazelton, B.C., of native graveyard is a blend of paganism and the new faith. Though many of the Indians have been Christianized, their pagan burial customs have been built over many of the graves. Clothes and belongings of the departed are placed inside.

In one sixth, about covers and mirror, brush and comb are hung on the walls. In another an enlarged photograph rested against a trunk filled with garments and toilet articles. Over chiefs' graves stone poles symbolical of chiefs' rule, are carved.

Food is placed in the houses almost daily. It is immediately carried away by wild animals, which are squirrels and rabbits, but the Indians explain the spirits get the food through the wild life.

Remedy Lasted Years

Tiny medals of saccharine constitute the latest craze in London. King Albert's Library.

Although only a few inches long they are exactly to scale, and all well known types are represented. To lend realism, model hangers, with established firms are stirring now- and clothes pegs complete the collection.

Eighteen National Parks In Canada, The Three Largest Being In Alberta And Saskatchewan

A total of 646,215 persons visited the 14 national parks of Canada in the fiscal year 1931-32. These gross reservations cover an aggregate area of 16,000 square miles. Each has its own attractive characteristics. There are three scenic and four national parks in Alberta, four scenic parks in British Columbia, one scenic park in Manitoba and one in Saskatchewan, one historic park in Nova Scotia and one in New Brunswick, one recreation park in Ontario and two inland park units. The last out of the parks is Jasper National, which has an area of 4,200 square miles. It is described as an immense mountain wilderness with numbers of unclimbed peaks, glaciers, lakes of wonderful coloring, hot springs, and the most picturesque part of the finest golf courses in North America. More than 11,000 persons visited Jasper last year. Banff park is the most important park, has an area of 1,585 square miles. It is situated on the eastern slope of the Rocky Mountains. The Lake Louise district, in which the internationally famous Lake Louise is located, offers unsurpassed facilities for climbing, swimming, golf, tennis, in the summer and a variety of sports in the winter season. It is the most visited of the national parks in Canada. Last year 102,500 persons visited this park. Prince Albert Park in Central Saskatchewan is the third largest park with an area of 1,869 square miles. It is situated in a district very well known for its abundance of moose, which there are protected by law, fishing, and has inland camping grounds for motorists.

All the national parks in Canada are easily accessible by motor car and within the borders of the parks there are 1,000 miles of motor roads, 1,314 miles of trails and 1,555 miles of telephone lines. The smallest of Canada's national parks is at Point Pelee, in Essex county, Ontario, and Detroit, Michigan. This park, only 6.04 square miles in area, is on Canada's southernmost latitude. Next is Banff it attracts the largest number of visitors. Last year over 150,000 persons came. Elk Island park, with an area of 35 per cent. being from the State of Michigan. This park constitutes one of the finest bird sanctuaries in Eastern Canada. It is one of the principal routes of migration for birds to and from their northern breeding areas and in one of the most attractive places in Eastern America.

All the national parks in Canada are open to visitors and have every facility for enjoying the recreation al advantages to offered

Indians Are Learning

Hold Out For Better Deal On Lease Of Lands

After some years of negotiation on the Cadejo reserve the Indians finally have made their p ses with the white man.

Today's Indians, better versed in business than their forebears, thought $400 was too small a sum for surrender of a lake and the Lornette of Carlyle on a 99-year lease. Now the tribe has received a 35-year lease and $600 a year for the first 25 years and an added $50 per cent on all rentals after the five years.

New Mail-Carrying Plane

High-Speed Machine Built For British Air Ministry

The newest high-speed mail carrying aeroplane built for the air ministry by a London concern is an all metal biplane, with two Rolls-Royce "Pegasus" engines. It has a cruising speed of 172 m.p.h. with a top speed of nearly 200 m.p.h.

It will pitch up and drop small a flight. The pitching up gear, it is expected, will be similar to that used by the Royal Air Force a delight line with trailing hook.

Eighty-eight elements are now generally recognized by chemists. Claims have been made for the discovery of four more.

WORLD HAPPENINGS BRIEFLY TOLD

Two dogs were all that was necessary for the people of Ontario to absorb comfortably an issue of $20,000,000 provincial bonds.

It is estimated Chinese lost 10,000 men and the Japanese 16,000 in the intermittent warfare in North China, Shanghai and Jehol during the past 20 months.

Single workless from Edmonton and Calgary have gone to British Columbia in construction airports under the unemployed relief scheme of the Dominion Government.

Since the beginning of the current crop year, August 1, 1935, Canada's exports of wheat are 97,000,000 bushels in excess of the figures for the corresponding period last year.

Immigration to Canada for the first four months of 1936 totalled 4,363, a decline of 39 per cent. from the number noted a year ago, according to figures issued by the Department of Immigration, at Ottawa.

Lieut.-Col. D. M. Ormiston, Calgary, was elected vice-president for western Canada at the Canadian Army Service Corps annual meeting at Ottawa. Lieut.-Col. F. Hyndman, Vancouver, was chosen western representative on the reserve of officers.

Montreal celebrated the centenary of the foundation of the city council with the unveiling of a plaque to the memory of Jacques Viger, Montreal's first mayor, and a commemorative meeting of the members of the city council.

The King has approved the appointment of Lord Stanmore, distinguished barrister, as governor-general, succeeding to the late Lord Bessborough, whose term of office expires in December. Sir Fred. Lugard has occupied the post since 1910.

The Canadian butter trade has more to fear from over-production of butter for the British market than it has from imports of butter from New Zealand, Russ. H. H. Stevens, Federal Minister of Trade and Commerce, told a delegation from the Okanagan Valley Co-Operative Creamery Association.

Seeking Market In Canada

Denmark Agriculturists Investigate Need Of Canadian Dairy Products Market

Organization of a regular service of Canadian butter from Montreal and Quebec city to Esbjerg, Denmark, by W. A. Riddell, assistant director of agriculture in Denmark, who came to Canada on the eve of a record shipment of cheese to the Scandinavian country on the S.S. Cassandra from Montreal to the food markets of the eastern capital.

The cargo of the Cassandra was the first consignment of Canadian vegetable products ever unloaded at Quebec.

According to Mr. Hans Hansen, Dane's vegetable season dovetails that of Canada.

Old Books Again Used

Bible and Prayer Book First Used In America In 1782

The first Bible and Prayer Book used in the Americas were used at the recent anniversary service in St. Philip's Church, Sydney. The books were carried by the Rev. Richard Johns. when he landed, 168 years ago. Johns was the first clergyman ordained by the Church of England to serve in the New World.

The Bible and Prayer Book were used in the service by the Rev. Canon Simpson, rector of the parish. The Bible bears the inscription "February 28th, 1782," but as the sailing of the fleet was delayed they were first used in Australia on January 27, 1788. Ten years later they narrowly escaped destruction in a fire which burned down the first church.

Horse Stealing Revived

Horse stealing is not a lost art, according to James Chartrand, who has requested authorities to trace twenty horses missing from his 4,000-acre ranch on the Saskatchewan-United States boundary. An intensive search of the huge ranch was made for 100 missing horses, but only 20 were found.

Dead Sled Guard's Courage

Attempted To Walk From Italy To North Pole Alone

Guard's courage was rewarded at Aston Clittinghoe, a desert of Milan, Italy, so he decided to walk to the North Pole alone. He went to Norway and got a Polar outfit and dogs, then went to Greenland. Eventually his supplies gave out and he killed and ate his dogs, only the last one escaping by running away. He was left stranded on the icefields starving to death. There he was found by the explorer Rasmussen, lying in the snow and his tent to walk. The exploring party adopted the tiny man and nursed him back to life. They kept him with them for the two years of their exploration. At present he is planning a return trip to Africa, and may later set off for the Himalayas.

Class Mounted Police Posts

Reported That Seven Have Been Made In North

There R.C.M.P. posts in the far north will be closed under an economy measure, it was announced by Major-General J. H. MacBrien, commissioner of the force.

The posts to be closed are at Lloyd. ter Bay, and Herschel. It is planned to handle the Bay River post from Providence, while Herschel will provide patrols to the Lloyd district and Wrigley.

General MacBrien plans to go to Herschel Island in August for a trip of inspection as far north as Aklavik.

SUNDAY SCHOOL LESSON

JUNE 14

JESUS RISES FROM THE DEAD

Golden Text: He is risen. Matt. 16:6.

Lesson: Mark 16:1-20.

Two optional Reading: Psalm 30.

Explanations and Comments

He Is Risen.—Verses 1-3. It was often asked on Saturday when the Jewish Sabbath was over that three women, Mary Magdalene and Mary the mother of James, and Salome, bought spices for the anointing of the body of Jesus. His body had lain in the tomb but a days, according to Jewish reckoning, for part of a day was counted as a whole day. Nicodemus had brought a hundred pounds of myrrh and aloes at the time of the entombment, John 19:39, 40, but at this the women were evidently not present.

It was very early on the first day of the week, that they came: Dr. Gaye says that, with the exception of the Sabbath, the Jews gave no names to the days of the week, but called them only the first day, Monday the second, and so on.) It was when the sun was risen, Mark adds, and yet it was "very early." It has been suggested that a "not" has dropped out of Mark's words and that he wrote "when the sun was not risen." Luke says it was "early dawn," and John writes "while it was yet dark."

Looking up, suggestive of heavy hearts and downcast eyes on the way thither," they saw that the great stone was rolled back.

They entered the tomb and saw a young man clad in a white robe sitting there, and they were amazed. Luke says they were affrighted, and bowed down their faces to the earth, Luke 24:5.

"The woman came to the sepulchre and found an angel." Not at all; they saw a young man sitting. We are accustomed to the accounts in the other Gospels, in which they do see angels, that we may never have noticed Mark's expression. We have much simpler it makes the story. No wonder the women fled. Put yourself in their place. They steal out to the tomb in the half-darkness, casting furtive glances about to make sure no one is watching. On the way they hold a whispered consultation as to how they shall move the stone—only to find it has already been moved. Very cautiously they venture up to the open doorway and peer in. Instead of a kindly angel, but a human being, dressed in white, jumps to his feet, with a startled expression on his face—and the women do the inevitable thing: they scream and run, paying no attention to the explanation. He calls after them." —The Holy Cross Magazine.

"He not seemed," the young man added, "Ye seek Jesus the Nazarene, who hath been crucified: He is risen; He is not here."

And with Him hope arose, and life and light.

He rose!

Men said, "Not Christ but Death died yesterday!"

And joy and truth and all things with Him rose.

Jesus whom He rose.

Silent Witness Questioned

Almost 300 of the blind ex-service men in St. Dunstan's Institution for the Blind held positions as telephone operators. A St. Dunstan's man, Thomas Dunstan, has been appointed telephonist at the new Hull electricity showroom.

That its 'planes have flown 10,000,000 miles with only five accidents involving injury to passengers, has been announced by a British aviation company.

Mlle Sandra Ratti, niece of Pope Pius, who is pursuing the career of a film actress in Rome following her winning of portrayals from her illustrious uncle. However, the Pontiff specified that his niece change her name to Record. Her first film was a success.

Keen Interest In Silver

Public Wants Everything To Remain Closed Pending Coinage

Silver, subject of many conferences and plans for boosting its price, has taken by storm the mining camps of British Columbia. Silver is everything the people in the northern districts and in the mountains of their talks and thoughts.

Reports that the white metal would be the solution to all their problems. Just as the price of wheat is the universal topic of farmers on the western prairies, so is the price of silver the bob around which these miners live their lives. They talk silver and dream silver.

Their hopes raised by the advocacy of bimetallists for its remonetization, they read every word on the subject of silver and listen eagerly to lectures and discussions. If the price would rise to 64 cents they say, a dozen mines would reopen; if silver should advance to 66 or 70 cents no camp in the country agreement would be a hive of industry.

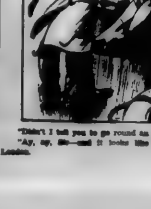
Railway Registers Increase

Minister Of Railways Sees Signs Of Improved Conditions

It was only $1,500—one grain of sand on the seashore—but it brought a wide grin of satisfaction to the face of Hon. R. J. Manion, Minister of Railways. That sum represented the gain in the revenue of the Canadian National Railways for the 30-day period ending May 31 over the preceding 365 days.

It was the second time since July, 1935, and the first since October, 1931, that one of the government road showed an increase and was outlined by Dr. Manion as another step that old man depression boldly was being forced to fall.

A new war tank has been developed in Baghdad which can run on water at six miles an hour and 45 miles on land.



"Didn't I tell you to go round an re-answer the manoeuvre?"

"Ay, sir, Sir—and it looks like being a long job. The Bystander, London.

Work of Daughters Of Empire

Distribution Of 300th To Under-Nourished Children One Of Many Efforts

If the Independent Order of the Daughters of the Empire did no other work in the past year, its contribution to the well-being of the Dominion in supply of milk to undernourished children would in itself constitute a worthy record.

"It would be impossible to estimate even the quantity or the sum to which this would run," the national convener of child welfare, Mrs. A. T. de Pencier of Vancouver, said in an interview at Edmonton "But it is safe to say that nearly every chapter in the Dominion has participated in this form of relief work," she added.

In one instance in British Columbia, $937 was spent by three chapters; one of these gave 1,000 quarts a month to three of the poorest. Of chapters heard from in the province of Quebec, $3,364 was expended, one chapter spending $600. In Nova Scotia $1,000 was raised of $3,647 having been spent on milk.

"Clinics are supported in many centres by chapters, and expenses for vaccination and dental work borne where people are unable to pay for these health services. Preventoriums, sanatoriums and convalescent maintenance and summer camps are other noteworthy efforts to which the order has devoted itself in the past year," Mrs. de Pencier stated.

Thirty-five cots are maintained in the preventorium in Toronto, and Montreal chapters donated some $1,600 to preventorium work and have supported innumerable clinics. Seven Vancouver chapters have established the solarium on Vancouver Island, supplying layettes and other clothing and boots and shoes.

Edmonton and hospital cars are other phases of child welfare endeavory which have held the attention of chapters across the Dominion during the past 12 months," Mrs. de Pencier concluded.

Mrs. J. H. Helmer, of Saskatoon, a vice-president of the national executive of the Independent Order of Daughters of the Empire, and former provincial president of Saskatchewan, was elected Dominion Regent by the only member to receive a national Imperial membership this year.

Ratification of this late membership was made at a session of the annual chapter, meeting at Edmonton.

The Lighter Side Of Life

A Little Shower Helps To Make Life Sweet and Brighter

It is not recorded who first said, "A little nonsense now and then is relished by the best of men." But whoever it was, he might with equal truthfulness have observed that a great deal of nonsense is relished at any time by most men. In business or pleasure, a laugh is its longevity caught on anything else that may be on the programme. The business of living is perverted in so many hardships and worries that the occasional nonsense helps to make life brighter and better. It has been said a cheerful heart is a saving grace, but no two people seem to have the same sense of humor. Perhaps the best is that remark sometimes one to see enough of the funny side of the experiences of life; tragic as some of them are, to laugh his way through difficulties and to perceive the laughable side of the thing when fate drives him through the briar patches.—Moncton Transcript.

Intentions Were Good

Jones was at a dinner party. He was shy and could never summon up courage to speak because of his inability to say anything neat. So the evening he had been trying to think of something nice to say to his partner. At last he thought he now his chance.

"What a small appetite you have, Mr. Jones," said his charming hostess with a smile.

"To sit next to you," he replied gallantly, "would cause any man to lose his appetite."

Some of the clothing he wore as a captain to outnumber those of a year ago.

MUSSOLINI PACT IS SIGNED BY FOUR POWERS

Rome, Italy.—The Mussolini four-power pact, the aim of which is to assure European peace and open the way for world economic recovery, was signed by the Italian premier and the ambassadors of Great Britain, France and Germany.

In an address to the senate announcing the adherence of the four great European states to the joint draft of the agreement, Premier Benito Mussolini hailed the accord as a 10-year guarantee of peace and security in Europe.

The Duce's announcement was cheered enthusiastically by the senate and by the diplomatic representatives of the other three participating governments who occupied seats in the gallery.

Asserting that negotiations for the pact had met greatest difficulty over the article dealing with disarmament, Signor Mussolini declared the agreement as finally approved assures disarmament of the four powers in case of partial or complete failure of the Geneva arms conference.

Alluding to fears of smaller states that the new agreement constituted a great-power directorate which would impose its will upon others, Premier Mussolini asserted that parties to it have no intention of forcing their decisions upon nations which are non-parties.

"The pact is intended to protect the interests of all rather than of single states," he declared, to open the way for world reconstruction. Collaboration is intended for all states, great or small," Signor Mussolini declared.

The agreement, which in its original form was submitted by Premier Mussolini to Sir John Simon, British foreign minister, was signed immediately after the address to the senate.

The Duce was smiling broadly in beaming on the scene from the senate to Palazzo Venezia, where he was joined by Sir Samuel Cohen, British undersecretary for foreign affairs, French Ambassador, and Ulrich von Hassel, ambassador of Germany.

Dressed in formal afternoon clothes, Mussolini received the diplomats at the Duce's desk in a far corner of the huge office room to affix their signatures to the pact.

Each of the signatories received a handsome reprinted copy of the pact, bound in handmade gold and leather covers.

The agreement now awaits ratification by the parliamentary bodies of the four countries.

Crude Oil Rates

Regina, Sask.—Saskatchewan's Independent Oil Refineries and the provincial government, may send a freight representative to St. Louis to fight the proposed increase in freight on crude oil entering Saskatchewan from Okalahoma and Texas. A delegation from various points in the province waited on the cabinet urging that such action be taken. An application of the Saskatchewan Freight Association is slated for hearing before the assistant freight bureau in St. Louis on June 20.

Cotton Pool Renewed

Cobalt, Ont.—In a simple ceremony of quiet quality, the memory of Canada's famous habitant poet was honored at Kerr Lake when the Hart of Northland, Governor-General of Canada and patron of the arts, unveiled the bronze plaque which reveals to the world the pioneer-by that here Dr. William Henry Drummond, M.D., Wrote—Died."

Within Index Of League

Paris, France.—The Mussolini four-power pact, accepted by Great Britain, France and Italy, keeps within the framework of the League of Nations and confirms the obligations under the Locarno accords and the Briand-Kellogg treaty, a semi-official analysis of the text revealed recently.

Ontario Swept By Storm

Two Persons Killed and Heavy Damage Is Estimated

Toronto, Ont.—Two persons were killed and scores injured as violent electrical storms accompanied by some points by severe hail, swept Ontario. Damage was placed at hundreds of thousands of dollars, but positive estimates were unavailable. Communication by telegraph with numerous western Ontario points was disrupted for hours.

Fireman Robert Calhoun of Toronto was killed when he and four companions plunged from a broken aerial ladder as they fought a blaze started by lightning in the dome of Our Lady of Lourdes Roman Catholic Church. Condition of two survivors was described as serious. Lukas Mijkowich, Bolshevik immigrant, was killed by lightning at Walkerburg.

Hospitals and many other small buildings were demolished throughout western Ontario.

Hamilton reported streets flooded when brought down by falling trees and numerous buildings in the district wrecked. Highways were blocked through the Niagara peninsula as trees crashed across them. Electrical services were disrupted from Niagara Falls to Windsor, and orchards and garden stuff on the Niagara peninsula and through western Ontario was reported extremely heavy.

Damage estimated at more than $100,000 was caused by a sudden hail storm that struck the suburban districts of Ottawa, particularly at Cyrville, where some 150 market gardeners were left penniless. Greenhouses and hot-beds were destroyed and over hundreds of acres, the young plants flattened.

Upturn In Business

Sir Thomas White Sees Every Sign Of Improvement

Toronto, Ont.—"I am happy to say from what and reliable sources of information that within the past few weeks there has been marked improvement in business and industrial sentiment prevailing and a new light of hope in the future of men," said Sir Thomas White, noted financier and former minister of finance, addressing the final meeting of the Canadian Manufacturers' Association here.

"Unquestionably in the United States, with whose prosperity our own is always closely connected, and in Canada there are higher prices, increasing employment and better general prosperity. The wheels of our great manufacturing plants are beginning to hum with accelerated speed."

Coupled with his words of optimism, however, was a solemn warning. "I fear," he said, "the recent sudden upturn in prices and in business activity may be artificial and not adequately reflect the measure of the world confidence. The danger is that the inflationists may be encouraged to believe that conditions are now so far healed for that there is not the same need for international co-operation."

Rules To Follow

Sir Eric Drummond Tells Of Lessons Learned At Geneva

Geneva, Switzerland.—Here is the decalogue which Sir Eric Drummond of Great Britain learned from 18 years as head of the League of Nations secretariat:

First, never make a threat; second, tell the truth; third, place all your cards on the table.

Sir Eric, who is retiring as secretary-general, explained his views at a farewell luncheon given by the international press.

"I said that I would "applies to individuals as well as to nations."

Restoration Fund Growing

Toronto, Ontario.—The restoration fund of the Church of England in Canada has reached a total of $395,468 in cash for all Canada, Rev. Canon H. Cassil, director of the fund, reported to the Anglican synod of the Toronto diocese. In addition, he said, there were four dioceses which had collected a great deal, but were not making returns until all was complete.

Sir Daniel Hall, of Rothamsted Experimental Station, Surrey, who has been appointed one of the delegates to represent the British Government at the Empire Marketing Board meeting from June 3 to 5 at 4

Empire Marketing Board

Work Is To Be Co-ordinated— Narrowed

Ottawa, Ont.—Reorganization of economic and scientific research units within the empire with the contributing provinces by the member dominions, is recommended in the report of the imperial committee on agricultural education and research, made public here.

The empire marketing board, set up by the United Kingdom government in 1926, in lieu of empire preference which the government considered unwise and great at that time will have its scope considerably narrowed, the conditions prompting its establishment having disappeared with the granting of reciprocal preference at the imperial conferences last summer. The board will continue to operate until the end of September next, and will then disappear as such.

Take Drastic Measures

Endeavor To Make League Fully Effective In Manchukuo

Geneva.—Drastic measures to make effective the League of Nations policy of refusing recognition to the new state of Manchukuo, established in Manchuria with the assistance of the Japanese, were set forth in a report adopted by the league advisory committee on the Far-Eastern question.

The report sets forth that Manchukuo may be excluded from international conventions such as those dealing with postal questions, communications, chemistry, weights and measures, sanitation, opium, and the Red Cross.

Potatoes For Texas

Calgary, Alta.—A Calgary taxpayer on relief has been paid with potatoes. Plenty of seed potatoes on hand but no money led the taxpayer to make inquiries at the city hall where he heard the city was exporting a seed-body plan for jobless. The deal was completed.

FAMOUS FLYING COUPLE ATTEND AIR DISPLAY

Almost on the eve of their flight across the Atlantic to New York in a last hop but for hours, Mr. and Mrs. James A. Mollison are shown interested in a display at the annual civil air display at Brooklands, Hugh Campbell Mollison and his wife, former Amy Johnson, attempted to take off on their Atlantic trip, but their aeroplane crashed when the under carriage collapsed. Repairs will delay their departure.

Empire Trade

Large Increase Shown In Exports To United Kingdom Of Canadian Products

London, Eng.—Striking evidence of the tendency of the people of the United Kingdom to demand products of the overseas empire is afforded in 1932 figures the empire marketing board examined.

An increase from 6,000,000 pounds to nearly 11,000,000 pounds in imports of tobacco from Canada last year is only one of 24 new "records" in quantities of empire foods and tobacco imported by the United Kingdom from empire countries.

Other "records" are the increases in imports of wheat from Canada and Australia, and wheat flour from Australia. The wheat record from Canada of nearly 47,000,000 hundredweight (of 112 pounds) has never been exceeded by any other country except the United States in the war years of 1916 and 1917.

Fewer Unemployed

Decline In Registered Jobless Reported In England

London, Eng.—Ministry of Labor figures reveal 114,735 fewer unemployed registered on May 23 than the preceding month. The decline in the number of registered unemployed from the same date a year ago, was 158,427. In four months the number has been reduced by 320,186.

The improvement in May extended to almost every industry it was reported, marked in building, public works, contracting, brick and tile manufacture, the iron, steel, and engineering industries, metal goods manufacturing, shipbuilding and ship repairing, textiles and clothing, boots and shoes, pottery, the distributive industries and dock and harbor services.

Communists Issue Manifesto

Irish Party Calls For Mass Struggle Against British Imperialism

Dublin, Irish Free State.—The Communist Party of Ireland, launched at a week-end conference here, issued a manifesto to working classes of the Free State in which it said the "hour of liberation is near" and called for a mass struggle against "British imperialism."

The party sent a message to the Irish Republican army urging its members to become Communists.

The manifesto alleged President Eamon de Valera's government was conducting its "struggle" against the United Kingdom along lines of "compromise, capitulation and betrayal."

Red Cross

Quebec.—After a visit to Canada and United States lasting several months, the touring members of the Oxford Group ended recently on the "Empress of Australia" for England under the leadership of Rev. H. Allen Viney. Their Canadian visit ended with a house party at which 800 members were present.

Fewer State-Owned Armament Factories

Private Manufacture Should Be Abolished In Canada's Stand

Geneva, Switzerland.—Canada is convinced the manufacture of arms should eventually be restricted to state-owned establishments, the disarmament conference has been advised.

This stand was announced by Dr W. A. Riddell, Canadian representative, in answering a question put to all governments as to whether the private manufacture of arms should be abolished.

Great Britain, Germany and Japan opposed the abolition of private arms factories and announced themselves in favor of control.

Dr. Riddell asserted that Canada believes eventual state ownership is necessary in order to remove one of the dangerous factors in international relations, manufacture of arms and the trade in arms.

He declared that Canada regards the International Air Traffic Association as wholly impractical.

Want Woman Speaker

Winnipeg, Man.—Hector Charlesworth, head of the Canadian radio commission, will be asked to appoint a women's institute speaker on one national radio program to discuss distinctly Canadian ideas of community development, it was decided by the executive of the United Women's Institutes of Canada here.

Japan's Trade

Japan's foreign trade in the first quarter of this year was greater than in the corresponding period of 1935.

WHEAT EXPORT QUOTAS MIGHT SOLVE PROBLEM

Saskatoon, Sask.—Agreement on export quotas of wheat between the wheat exporting countries of the world is the first step to be taken if the world cannot use the volume produced stated L. C. Brouillette president of the Canadian wheat pool, interviewed in Saskatoon

Canada's crop was practically seeded, Mr. Brouillette pointed out and any agreement for acreage reduction would be ineffective for 12 months. The first step was therefore an agreement on export quotas in order that exporting nations would not deliver an amount in excess of the world's import requirements. This was an obligation that would rest on the federal government as far as Canada was concerned.

Then, should increased surpluses continue, it would become the responsibility of the prairie governments to formulate a plan, which would probably require legislation to bring production in line with the export quota plus domestic requirements.

Finally it would be up to the producer to be responsible for carrying his surplus above his quota. This would be more effective to deal wisely with acreage reduction.

Mr Brouillette added that there were of course a number of complications that would be dealt with at the London conference that might have the effect of depressing markets.

Barriers that reduced the requirements of wheat by exporting countries might be reduced or removed

It would be desirable, therefore, to have some body representing the exporting countries to maintain contact.

Mr Brouillette wished to point out that the point of view of the pools differed from that of companies engaged only in the handling of grain. Were they concerned with that only they would place volume of business as the first consideration. The interests of the farmers might differ from those of the grain handlers.

Commenting on the point of view expressed by some speakers that some alone could heal the difficulties of the farmers, Mr Brouillette suggested that this was evidently not the opinion of the leaders of the nations of the world.

Training Farm For Boys

Established By Dominion Royal Association At Cobourg, Ontario

Forty-two unemployed and homeless boys left Montreal from the Windsor station, using the specially-arranged tourist train for the Unemployed Boys' Training Farm at Cobourg Springs, Ont. The boys, whose ages range from fourteen to twenty-one, follow the schools' quarter of twenty-five who left on May 16th to get everything shipshape at the new training farm established at the site of a former summer resort. Financed by the Montreal Boys' Association, this training scheme will provide occupation and the rudiments of farm training for some four boys who filled and boarded the boys this summer.

A. C. Holland, president of the Montreal Boys' Association, reported that the first 7 months' boys have already made excellent progress in preparing the buildings for occupation, and the needed farm work. The boys are under the supervision of capable trainers, the supervision of these farm instructors. The farmers of the district have been very helpful in the training. Plans for the way it is followed at the Training Farm with a maximum capacity of 160 at any one time, may be made to accept a total of 400 boys for the whole season.

A Valuable Silk

Cocoons on Shade Trees From the 18th Century.

The story of the silk worm is told on a shade tree bough from a cocoon, which had just been spun by the Victoria and Albert Museum, South Kensington, London, England.

It is regarded as one of the most valuable acquisitions for a long time, for the carvings on the shell or "crib" appear to coincide with the Elizabethan period, and to date from the 12th Century.

Guests from the Old Testament are worked upon it with meticulous regard, along with the Creation (at the base) and ending with the fall of Sodom and Gomorrah (at the top).

The Christian Year

Scientific Service Between Seed Time and Abundant Fruits In Utopia

Inauguration steamship services between Port Churchill and eastern Atlantic ports of Montreal, St. John, Halifax and Newfoundland is the aim of the Saskatchewan Trade Council.

According to the official record of a recent meeting of the council at Saskatoon, the inauguration of such steamship service would react largely to stimulate the freight rate situation, huge suffered by Saskatchewan in the Fort William rate structure.

Sold For Large Amount

Cattle Weights Mug Brought $1,500 at London Abattoir

All animals weighing over 900 lb. brought to Chas Foley the Crown brought $1,500 at all abattoirs in London sold in early June although the top was under a full figure of the Old Country in early youth. It was forcibly in the Halpin Abattoir of Brixton and Miller in the Shrewsbury, the slaughterhouse of Hoddleton. The purchaser of the Silvered Coat, a London collector.

Went to the Stamps

Publisher Never Invests in Supplies Until to ride in Postage. The Star Weekly says, will he, should wouldn't think did not difficulty for they went to supplies until, at it from. If given a chance, can believe they can signal the record made at Tipperary two years ago, when cannot ride with fifty of his five cents.

Subscription to the world over today costs $1.00 and for one year, and it is cheap.

W. N. U. 1066

The unusual photograph of Their Majesties the King and Queen was taken at the annual Royal Command Variety Performance at the Palladium, London. Judging by the interested gaze of Their Majesties as they view the performance from the Royal Box the show must have been a brilliant affair.

Mysteries Of the Sea

Report On Scientific Round Cruise Just In the Pacific

More has been done in the last few years in oceanography than in all time, pronounced Dr. T. Wayland Vaughan, director of the Scripps Institution of Oceanography, La Jolla, Calif., returning on the special train of prominent men of the Pacific at the 20th Pacific Science Congress in Victoria, B.C.

Dr. Vaughan declared that prior to 1925 very little was known about the surface waters of the Pacific ocean. Since then a comprehensive research conducted by the Pacific, showing that for the first 200 feet down from the surface there is a rapid fall in temperature, and below that the temperature rest nearly constant the rest of the way.

Water of the Atlantic ocean has been found to be of greater depth of the Pacific with a greater proportion of its water evaporating from the surface, thus the

Coming Events

The St. George Tennis and Badminton Club will hold a Tennis Dance on Friday, June 20. Refreshments. Good Music. Dancing 9 to 1 Admission 50c each. Everybody Welcome.

Ramsay Thom of Edvington, Sask., is spending his vacation at his home here.

Edmonton reported as having a total of three cases of diphtheria and measles last week. So far no fresh reports have come to our attention

Out of the nine events played over the past week-end in the inter-mediate Tennis League, the Fort Community Club won only one event, this being the first ladies singles. Miss Mary Oxley taking this event for the Club very easily

Four events were played at the Highlands courts and five at the Community courts.

The next league games will be held on Tuesday evening, June 27th, so keep this date open.

According to the latest reports, we can look forward for another increase in tax within the next two months up to 5-cents per lb.

Alberta's Wrigley Swim

The Wrigley Swim for the province of Alberta will take place this summer, July 23rd, at Sylvan Lake, one of the largest lake resorts in Alberta, just west of Red Deer city, on a graveled highway. In conjunction with this event, a large regatta will be held.

DIED

Dr. Robert Graham Berry

The funeral of Dr. Robert Graham Berry of Elkhart, Alta., who passed away in the city on Thursday, June 6, at the age of 67 years and 11 months, was held Sunday afternoon at 2:00 o'clock from Andrews Bros.' funeral chapel, corner 112 st. and Jasper. Rev. Mr. Argue officiated and interment took place in the Fort Saskatchewan cemetery. He left to mourn his loss besides his wife, three sisters, Mrs. W. S. Armitage of Sherbrooke, Que., Mrs. M. Taylor of North Stafford, New Hampshire, England, and Mrs. A. S. Ryding of Lynn Haven, Florida. The late Dr. Berry had been a veterinary surgeon at Fort Saskatchewan from 1902 to 1917. Beautiful floral tributes were received from: Loving wife: the McDonald family; the Atkinsons; Mr. and Mrs. A. R. Carmichaels; Mr. and Mrs. W. G. Shera; Mr. and Mrs. Harry Carscadden.

LOCAL NEWS

Mrs. W. T. Lane, who recently moved to Wainwright from here, was hostess at a very charming "at home" on Thursday afternoon.

Mrs. Grace Carlisle received with the hostess and introduced the guests.

FORT SASKATCHEWAN RECORD
Published Every Wednesday G. Neale, Editor and Publisher
WEDNESDAY, JUNE 15th, 1932

IS YOUR NAME IN THE PAPER THIS WEEK?

Every business and every business man's name should be listed in the columns of the Record. If your business and name are not among these in the paper this week, see that you remedy the error before next week's edition. You cannot expect to do business if you keep the fact that you are in business a secret, if you do not advertise through the medium of your weekly paper, people take it for granted that your business is a "stand one" and trust it as such, with the result that you soon have a "white elephant" on your hands. Build up your own business, the town's great est asset—a weekly newspaper and the town itself, by advertising

BUSINESS MEN ARE THE HEROES.

Foster no jealousy against the various business men of today, says an exchange. Wage earners are the best off—even though their wage be small for Business men who are able to keep on with their head above the stream are heroes, even if velvet is missing and the head forged to play.—Stony Plain Sun.

Serious complaints have been made to the police that indiscriminate shooting has been frequent of late within the town limits. Two different persons narrowly escaped being hit by .22 rifle bullets recently. It is against the law to use catapults, sling shots or fire arms of any kind within the limits of the town.

The recent basketball series between the Durrant Ladies basketball team and the Commercial Grads seems to have stirred up quite a lot of fuss in Edmonton sport circles

On Saturday evening an informal investigation of certain charges made by Coach Bain of the visitors, before leaving the city were fully gone into, and found that the complaints were grossly exaggerated.

Personally we do not think that the basketball fans had anything against the girls, who were reported to be excellent sports and fine players. But if, the referee gave two decisions against the Grads, Edmonton fans were bound to be heard from.

Coal Production

The total coal production for the province for the month of April was 245,757 tons, a decrease of 7,875 tons from the same month of 1931

JUN 23 1933

Fort School Board Hold Special Business Meeting

Minutes of a special meeting of the Fort Saskatchewan School Board held in the Board Room on Monday the 19th. June 1933 at 7:30 p.m. to consider the matter of the engagement of teachers for the School year ending 30th. June 1934, and other business requiring attention.

Present Mr. F. Atkinson, Chairman; Trustees Mr. R. A. Brown and Dr. Grauert.

The minutes of the last meeting held were read and adopted on the motion of Mr. Brown.

After due consideration it was moved by Dr. Grauert and adopted: That this Board agrees to engage the present teaching staff for the School term ending June 30th., 1934, at the following monthly salaries:—

Mr. E. H. Anderson $160.00.
Miss F. M. Fleming $120.00.
Mr. S. Hambly $100.00.
Miss A. Dirkson $95.00.
Miss A. West $95.00.
Miss E. M. White $85.00.

The Secretary to have the necessary contracts prepared and signed.

The Board also agrees to engage Mr. C. A. Brown as caretaker from 1st. Sept. 1933 to June 30th. 1934 at $85.00 per month.

It was moved by Dr. Grauert and adopted; To exempt from attendance after the 30th. of June of this term, those pupils in the Public School grades who have obtained, during the year, a standing sufficiently high to obviate the necessity of them writing final examinations. This procedure would:—

1. Serve as a reward and incentive for better work during the year, and

2. Enable the teacher to give undivided time to the grading of the other pupils.

Provision to be made, however, for any pupils whatsoever to be admitted to the final examinations, on the written request of their parents or guardians.

The meeting adjourned on the motion of Mr. Brown.

OLD-TIMERS TO HOLD PICNIC

Members of the Northern Alberta Pioneers and Old Timers Association are planning on a gigantic basket Picnic to be held at Lakeview, South Cooking Lake on Thursday afternoon and evening, June 22nd, according to a decision arrived at by the Executive recently.

This Picnic will be attended by Association Members' families and friends and will include all kinds of sports, ball games for men and women, horse-shoe pitching, etc. The feature of the afternoon will be a Grandmother's ball game.

It is planned that everyone bring a full basket and tea and coffee will be supplied on the grounds.

The Lions Pavilion will take care of the anticipated large crowd if the weather is not fit to stay outside.

The Sports start at 2 o'clock and the Picnic supper at 5.

The day will be brought to a close with a Grand old time dance free to all. See the largest dance floor in Western Canada.

GRASSHOPPER SITUATION

The grasshopper situation has developed rather seriously in certain parts of Southern Alberta, and the Provincial Department of Agriculture is intensifying its poisoning campaign in these areas. The campaign is well organized under the direction of the departmental officials in cooperation with the Federal Government and its University, and nearly sixty poison-mixing stations are now in operation. The most serious outbreak is in the district north and northwest Lethbridge, and it is also fairly serious in the district extending eastward and northeastward toward Medicine Hat and Empress, with scattered out breaks in the region north of the C. P. R. main line. It is estimated that some million and half acres in the areas in the extreme south are seriously menaced.

St. Eugene News

Our district was well represented at the Redwater picnic by the ball team and others.

Miss Doris Trotter left last week to fill her position at Waterhole.

An Edmonton Grain Co's., representative was in our district this week canvassing for grain. October delivery, so evidently we're all looking for business.

Mr. Max Bedard of Edmonton is a guest of Mr. Leo LeClerc at present.

Mr. Steve Lamoureux is heading lumber from Edmonton.

The St. Eugene girls soft ball team played an interesting game with the Cloverdale juniors Thursday evening and came out the winners.

Mr. and Mrs. Warren Brick, Mr. R. LaPage and Mr. and Mrs. Hinchey of Edmonton were guests at the M. LeClerc home Sunday. Mr. Brick played some interesting tunnis on the slide' courts during the afternoon.

Mr. and Mrs. J. Belrose and family attended church at Fort Saskatchewan Sunday.

Mrs. D. Hood spent the week with her mother Mrs. Tetzaroff of Edmonton.

Mr. and Mrs. J. Trotter were dinner guests at E. Neale' on Wednesday.

SECOND LEAGUE TENNIS GAME HERE TUESDAY

In the Inter-mediate Tennis league Glenora meets the Fort Community Club here next Tuesday evening. The games will start promptly at 8 p.m. Glenora Club is rated as the best club in Edmonton, and local players will greatly benefit in seeing members of this club perform here.

Rural Finances in Good Shape

Rural municipal finances in Alberta all conditions and depressions to the contrary notwithstanding, are in a gratifyingly healthy state, according to Hon. R. G. Reid, Minister of Municipal Affairs, who has been looking into the financial record of the rural municipalities for the last calendar year and the first half of the present year. A reduction of fully 50 per cent. in the liabilities of the municipal districts is shown. Collections have been maintained to a surprising if marked degree. Less than $18,000 sparts, ball games for men and women, horse-shoe pitching, etc. The feature of the afternoon will be a Grandmother's ball game.

It is planned that everyone bring a full basket and tea and coffee will be supplied on the grounds.

The Lions Pavilion will take care of the anticipated large crowd if the weather is not fit to stay outside.

The Sports start at 2 o'clock and the Picnic supper at 5.

The day will be brought to a close with a Grand old time dance free to all. See the largest dance floor in Western Canada.

MOISTURE IS NEEDED IN THIS DISTRICT

We notice in a news item of 19 years ago, where they had 11 inches of rain and it was declared the wettest year in 30 years.

At the present time this district could use some of that moisture to a good advantage. Crops and gardens around the Fort are beginning to feel the need of moisture and unless rain comes this week we're afraid considerable damage will be done, especially to crops on high spots. For the past three days, light showers have occurred in the district, but they only laid the dust. It seems though every year just about this time we have a dry period, but after this paste, crops and gardens usually turn out first class. We should consider ourselves fortunate in living in a district where grasshoppers are practically unknown.

Josephburg News

The Josephburg Ladies Aid will hold a picnic on Thursday, July 6th, on Johnny Mohr Jr's. farm, (5 miles east of the Fort). There will be two baseball games, races and sports.

Chicken supper from 6:30 to 8 p.m. Admission 25c and 15c.

Everybody welcome.

Rev. A. Wiembrecht and Mr. A. Umbrechtsite attended the Classes of the Reformed Church at Stony Plain last week.

Mrs. Korn of Vegreville has been the guest of Mrs. A. Wiembrecht for several days.

Mr. and Mrs. Albert Mohr and daughter Melva visited for several days with relatives and friends at Calliston, Clyde and Westerdale.

Mr. and Mrs. Henry Mohr, Mr. Valentine Gaul, and Mr. S. E. Mohr motored to Stony Plain last Sunday.

Miss Elsie Umbrechtsite returned home last week from the Lamont hospital after having undergone an operation for appendicitus.

Mr. and Mrs. Emil Krahe and family spent Sunday with their parents at Stony Plain.

Taken from the Files
19 Years Ago Today
Wednesday, June 18th, 1914

The heavy rains lately have caused all creeks to swell and old time lakes to reappear. The bridge near Andrassen on Point in Pie creek was swept away and visitors to the town had to go far around to reach their destination.

The game between the Bankers and the Conservator baseball teams was played last Friday and, notwithstanding our confident predictions, the guardians of the public's "dough" trimmed us 9 to 7.

The present month has so far proved the wettest month of record, over a period of 30 years, when a 11 inches of rain fell. So far this month 7½ inches of rain has fallen in this district.

L. D. von Iffland, with others, is assisting Inspector Pitz, presiding examiner at Edmonton this week.

A local shoot was indulged in on Monday last when Lieutenant Hamilton and Manager Beckman of the Dominion Cartridge Co., were entertained by local riflemen.

ANNUAL 49th BATTALION CHURCH PARADE

The annual church parade of the 49th Battalion (Edmonton Regiment) Association will be held in Edmonton on Sunday, July 23rd next. The association will assemble on the market square at 10 a.m. to march to the Parliament Hill grounds where the service will be held.

The service battalion will supply the regimental colours, an escort brass and pipe bands. A luncheon will be held at the close of the parade. A cordial invitation is extended to all men who at any time were in the 49th battalion, to attend this parade.

Good Hope

Mrs. Wm. Magee and daughter from Ontario are visiting friends and relatives in Good Hope.

A large crowd of Good Hope people, visited Elk Island Park last Sunday. Many indulged in boat riding and bathing.

Seeding is finished in this part of the district.

Mr. Bill Peaverey left last Thursday for his home in Port St. John B. C. We all hope that he will be able to visit us again soon.

UNITED CHURCH OF CANADA

11 a.m. Rev. Sunday in the Church School—Special open session next Sunday. Address by Mr. W. H. Sharpe of Wesley Church, Edmonton.

World's Future At Stake

The World Economic Conference now meeting in London constitutes what is probably the greatest assemblage of nations ever convened in the history of the world. In its opening address, Premier Ramsay MacDonald declared "There is greater authority gathered in this hall than has perhaps ever been brought under one roof in the world's history."

Sixty-seven nations are represented in this momentous conference, or a larger number of separate national units than ever met people had knowledge existed. But it is not alone the size of the gathering that makes it outstanding in importance among all great world economic conferences; rather it is the fact that, for the first time since the Great War, it is composed of Government plenipotentiaries with the power to act.

As we have known economic conferences in the past ten years, but they were composed of experts who were called upon merely to advise, but without authority to commit their Governments. The present conference is quite different; it is made up of representatives of the Governments of all nations, clothed with authority to reach definite agreements, thereby committing those Governments to exert their power and authority to secure ratification of such agreements by their various legislative bodies. There is, therefore, hope that definite action will result.

Whether such action does result depends, says the economic authority already quoted, upon the answer to a fundamental question. Will the Governments really turn their backs on the blind of national self-sufficiency, and try to rebuild prosperity on a basis of interdependence and mutual benefit in international trade, even though that may involve a modification of their present national policies? If so, then there is no reason why the Conference should not be a great success. But, if not, there is little hope of preventing a drift into even greater depression, the ultimate outcome of which no man can foretell.

This is the crux of the whole matter, and discussing it in his opening address, Premier Ramsay MacDonald declared that: "Have we come to the point where we can do anything else but ask ourselves in all truth and seriousness whether the present system of economic nationalism, with its tariffs, quotas and embargoes, is not leading us to the destruction of civilization?"

Surely it is inconceivable that the leading statesmen of the world, men clothed with all the responsibilities of government and whom very positions have made them fully cognizant of the underlying and fundamental causes of the world's present economic distress, will be so nationalistically selfish, so neglectful of their own and their countries' responsibilities to the world at large, as to take such irreconcilable attitudes that the success of the conference will be wrecked.

President Roosevelt in his stirring pre-conference appeal to the sovereign heads of all nations stressed the terrible responsibility that would rest on any nation, or group of nations, which should refuse to co-operate with the world in their bankruptcy upon mere nationalistic and purely selfish policies. He realizes, as Premier Ramsay MacDonald realizes, and as all sane and sensible people must realize, that a purely nationalistic economic policy in this modern world is one which by increasing other nations impoverishes those who pursue it. No nation can permanently enrich itself at the expense of others. Mutual enrichment is a condition of individual prosperity.

To quote Premier Ramsay MacDonald once again: "Nationalism in the sphere of politics may be essential to human freedom. Self-sufficient nationalism in economics is the death knell of advancing prosperity. The answer we can make the world as economic unit has been written with iron. In any event, international co-operation is our best way to national recovery, and the nation which looks after itself in an international frame of mind will not only lend the world in enlightened but it will belong."

Never in all human history has the world been in greater need of co-operation. Never has there been a greater opportunity for such co-operation than that presented by the World Economic Conference now meeting in London. Never has there been a greater responsibility resting upon the heads of the world's statesmen than that which rests upon the heads of those who are now assembled in the British capital. Never has there been a greater challenge to the statesmanship of the world than that which is now presented to the statesmen of the world. Never has there been a greater opportunity for statesmen to write their names high on the scroll of fame than that which is now presented to the statesmen of the world. Never has there been a greater responsibility resting upon the heads of the world's statesmen than that which rests upon the heads of those who are now assembled in the British capital.

Would Only Benefit Few

Many People Would Suffer If Prices Unduly Increased

The United States and Europe are trying to combine so as to raise prices all round. If wheat were $10 per bushel and everything else up in proportion, would the world be in any better position than if wheat were $1 per bushel and everything else priced in proportion. If a man should die at seventy years of age and leave a wife fifty years of age with an income of $300 a year how could she get along on the enhanced prices for necessities came upon her?

The widows, and men who have retired because of age, because of sickness, women who have saved enough to live modestly, the great army of children who are unfit for work, etc. The rise in price of lumber might help the woodsmen, the increase in the price of steel and their products, but in going all around the social course it would crush perhaps the great bulk of the people, and especially true of country villages and towns, where there are more people living on small incomes in proportion to populations than in larger places. If we talk of a national fund to help those people with small incomes, and encircle the circle and arrive at th very place from which we started. We might just as well have things as they are and let old supply and demand do the regulating of prices.—Fort Rowan News.

Freight Rate On Butter

Move Made By Western Provinces For Fifth Consecutive Year

Joint action on the part of the Provincial dairy associations of Manitoba, Saskatchewan and Alberta, will likely be taken shortly to obtain a reduction in the freight rate on butter shipments from the prairie to Vancouver and Lake Coast.

The move follows upon the rejection by the board of railway commissioners of an application for a reduction in the freight rate on butter shipments from the prairies to Vancouver and to eastern Canada. Freight rates on butter are the same now as they were when the product was selling for 40 cents per pound.

Saskatchewan dairy representatives have already communicated with officials of the two sister provinces with a view to holding a meeting to consider a joint appeal to the board of railway commissioners for a rehearing of the case.

Dick Turpin's Cost

Money and Jewels Found Recently In Lining Of Old Garments

Money and jewelry have been found in the lining of a piano-colored velvet coat which belonged to Dick Turpin, the famous highwayman.

The coat was recently bought by Mr. Arthur, of Cambridge, along with the mask, pistols and spurs which Dick Turpin left at the Three Tuns Inn, Cambridge, on Jan. 13, 1739, when he escaped from the local constabulary.

He never claimed them before he was hanged at York on April 10 of the same year, and they have since remained in safe hands, from whose great-grandfathers at Castell Mr. Rutter bought them for £50.

While Mr. Arthur was carrying the coat, a George I. half-crown, dated 1717, fell from the lining. Then the other articles were found, comprising: Six silver coins, two copper coins, a gold ring, two silver rings, and a pair of silver-gilt ear-rings.

French Hat Loses Favor

Revolutionary Symbol of the French is steadily declining, says Edmond Chaix, president of the Touring Club of France. Once the world's greatest hat consumer, with a daily per capita consumption of two pounds, the modern Frenchman wears a cap, a beret or goes bareheaded. M. Chaix blames the decline on the war, during which, he says, his countrymen became tired of poor quality hats.

Grass Longer In Canada

A new record for Lash Lowen trout in Canada was established recently with the hooking of one weighing 16 pounds 12 ounces in the Ogopogo lake area, Saskatchewan, a weight several times that of the largest trout ever taken in Scotland, by an angler from home.

Wild Cattle In England

Unique Herd Maintained On One Of Chillingham Estates

It may surprise many people to know that there are wild cattle in England, yet there is an authentic herd, not running wild, but living on the estate of one of England's oldest peers, the Earl of Tankerville in Northumberland.

For centuries these animals have had their habitat on the Earl's woodedomains of 700 acres, which is an stoutly enclosed by a stone wall that the breed has remained pure for upwards of five hundred years. There are just 44 of them, but as it costs quite a sum to feed and care for them without producing any return the Earl has been obliged to ask for some assistance in their maintenance. The Zoological Society has come forward, and the preservation of this unique herd is assured.

These cattle are pure white with red muzzles, and black tips to their upward tilted horns. They are smaller than ordinary cows, extremely shy despite the fact that nobody ever seems to touch them, and are dangerous to strangers.

It is said they are descendants of the aurochs, primitive cattle from which were hunted in England by Roman soldiers when the Caesars held sway.—Mr. Thomas Times-Journal.

Wager Was Easily Won

New York Times Outwitted By Young Club Man

In the course of an argument among some of the younger members of the University Club, one of the group made an generalization that writing poetry was easy and that he, although God knows, he port, could write a poem and get it printed. Moreover, he could get it printed in the New York Times. He had said that said he could. Money to cover his wager bobbed up at once. Then, with a little effort he wrote a poem. Anyway, he wrote eight lines that had some rhymes. The incorruptible Times came next. On that matter, he showed himself a good sport in his execution, First, he wrote a letter signed X.Y.Z. to the question-and-answer department of the paper's Sunday issue, asking if some reader could give the last four lines of the poem which began—and he quoted the first four lines of his poem. The Times said that. He immediately replied, signing A.B.C., giving X.Y.Z. the last four lines of the poem. The Times, ever supporting, ran that. Then, after some mild grumbling about instalment publication, he drew down his bet. — New Yorker.

Prize For Essay

Fellowship Amounting To $1,000 Offered For Best Essay On Economic Problems

A graduate fellowship, amounting to $1,000, is offered by the Royal Bank of Canada to the students of a Canadian university who writes the best essay on a Canadian economic problem.

The subjects for the papers to be submitted by March 1, 1934, are as follows:

An analysis of Canadian industry.

The restoration of international movement of capital as a basis for an increased volume of trade.

The circulation and results of the world economic conference.

The future of the export trade in Canadian agriculture.

Possible development of power-using industries in eastern Canada.

Dress Helped Cruelty

Many newspapers have drawn the contrast and commented on the talk about there being a depression while at the same time picture shows are crowded. Picture shows have been one of the valuable things of the depression era, giving the people a chance to divert their minds and struggles to something other than themselves and their own troubles.

May Not Affect Heath

Dr. Charles Abbot, the American astronomer, predicts that the sun will be colder for the next five years. This does not necessarily mean that the earth will have two cold years, as the temperature of the earth is affected by many influences besides solar radiation.

FAT MAN LOSES 63 lbs.

Kruschen and Walking

Overweight men who want to lose a few pounds can have the benefit of this man's experience. He gives them to us for publication:

"In a little over fourteen months I have reduced my weight from 327 lbs. to 164 lbs. by taking a dose of Kruschen Salts every morning for six months, and taking walking exercise every day. This remarkable achievement is all the more interesting when one considers that I did not resort to any form of dieting."—G. L. B.

You can take off fat with Kruschen Salts if you will take one-half teaspoon in hot water every morning before breakfast, modify your diet, and exercise regularly.

While you are losing fat you will be getting energy—in endocrinesin addition. The old arm chair won't hold you any more—you'll want to be up and doing—you'll enjoy work and active recreation and you'll sleep like a top. You'll look fat, and probably five years longer

Ten Thousand-Foot Tows

French Engineer Proposes To Erect Towers In Paris

An amazing hollow concrete tower nearly half a mile high, with a spiral motor road leading to a vast superstructure consisting of a garage for 400 cars, a dancing pavilion, a Roman soldiers' arena, a restaurant, sun-parlor, weather office, and finally a tall alien metal lighthouse

This is the breath-taking project of a famous French constructional engineer, M. Eugene Freyssinet.

He proposes this skyscraper marvel, which would completely dwarf the mighty Eiffel Tower, as an attraction for the world exposition to be held in Paris in 1937.

Visitors would be able to drive their own cars to the clouds for lunch or dinner

The spiral road would be four miles long and make thirty turns around the tower. It would be the only means of ascent or descent, for no lifts would be installed.

And M. Freyssinet is ready to build the tower up to a height of 10,000 feet, or nearly two miles, if the world exposition of 1937 desires it.

He estimates the cost at about two million dollars.

"Don't you think it will be marvellous on a hot day to jump into a motor car and drive up into the clouds, from where you will have a magnificent panorama of the entire Paris region?" he said.

First Canadian Movie

Filmed Under Direction Of Canadian Social Hygiene Council

The first Canadian motion picture produced in Hollywood and the first Hollywood picture to have a premiere in Canada has been placed in circulation. It is "Damaged Lives," the problem play, filmed under direction of the Canadian Social Hygiene Council.

In its first week in Toronto it attracted 28,000 persons.

The picture soon will be shown throughout the British Empire. It has been banned for screening in England under sponsorship of the ministry of health. Its producers regard the film as probably the most extensive piece of public health education ever undertaken by means of talking motion picture.

Really Blackmail

A family in Paradise, Colorado, were awakened by a loud knocking when they noticed a grown-up African Bonaco looking in the window. The Associated Press news items said that the Bonaco had brought breakfast. Some people allow anything to distract their attention.

A memorial to Carl Benz, motor car inventor, was unveiled in Mannheim, Germany, recently.

Nerves—Could Not Sleep
Tired Out All The Time

Mrs. Gordon Mowbray, Moosejaw, Sask., writes:—"I was very nervous. I could not sleep at night, and felt tired out all the time.

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them all the time she gave me some to try. I found they were doing me so much good I purchased a box and they passed off completely from me."

Price 50 cents at all druggists, general stores or by mail direct from The T. Milburn Co., Ltd., Toronto, Ont.

Powers Of Imagination

"I'm short," yelped a burglar when police cornered him in a New York grocery store. Amazed, the policeman, who had not fired a shot, watched as he slunk to the floor with what looked like blood covering his face. Drawing nearer, they gathered. The doctor, approaching, lifted one the pelt of an egg which had fallen on his head from a shelf. "If I can take a bath now!"

Referred For Instruction

"You remember when you saved my life?" asked the patient, "and you told me that I should avoid doing it again?"

"Yes, that's right," replied the doctor, suspiciously.

"Well, I've come back to ask you how I should go about it."

Try one of these quick pound cakes and see how easy it is to be a Milburn Co., Ltd., Toronto, Ont.

Old Convict Ship "Success" Is Interesting Exhibit Shown At Century Of Progress Fair

A 143-year-old convict ship that once spent five years at the bottom of Sydney Harbor, Australia, and then sailed the Atlantic under her own canvas the year the "Titanic" went down rests on the lake-front at Chicago as an exhibit of the Century of Progr ss Exposition.

The vessel, the old "Success," a merchantman before she was fitted out with cells and instruments of torture, is believed to be the oldest ship afloat.

Aboard her are the utmost elbow dungeons, the condemned cells whipping posts, manacles, bending irons, punishment bells, the hooded-tipped rail—once nails and the coffin lash. The craft is practically unchanged after all these years, nothing being omitted but the human freight.

The "Success" was first launched as an armed East India merchantman, with beautiful brass guns bristling from her sides and filled handsomely for the reception aboard of princes, nabobs, and wealthy traders of the Orient, whose spices, teas, fabrics and jewels she carried over the seas to all parts of the earth. Broken only by an occasional conflict with a pirate craft the "Success" had an honored life of the ocean until 1800, when she was first chartered by the British Government to transport Australian convict colonies of offenders from the home jails, who, at that time, were sentenced for even trivial offenses to the term of natural life.

The former convict ship is massively built throughout of solid Burmese teak, a wood which for resistance to decay has no equal in the world. The craft is 128 feet long with a beam of 29 feet. Her mast sides are in places two and a half feet thick. Her square cut stern and quarter galleries stamp her at once as the bad-mark of antiquity. Although her high bluff bows above that she could never distinguish herself with speed, pains were taken to make her trim and smart. Remnants of great gilded scrolls on the sides of the vessel have been brought to light. Raised high aloft forward, the forecastle head bears at its extremity a symbol of supreme importance—a figurehead in an original figurehead of exquisite design.

The vessel, a queer looking craft, strongly reminiscent of bygone days, is fitted with cells throughout. The cells on the lower deck, strong and gloomy, were used for the worst type of criminals. The vessel consists of three decks in all, a top deck, 'tween deck, and a lower deck. Convicts given a transportation term, in excess of seven years, were placed in solitary confinement for two years in a cell on the lower deck. The cells had very little ventilation, an opening over the door allowing a sufficient amount of air through. Special cells were provided, known as the black cells, were located at the stern end of the lower deck. In the black holes the doors fit so tightly as valves and close with a "swish," excluding all air except what can filter through the perforated iron plate which was placed over the centre of the door, in order to make the hole as dark as possible. A stout iron ring was fastened about knee high in the sheathing back of the cell and through the ring the right hand of the prisoner was passed and then handcuffed to the left wrist. In this way prevented from standing upright or lying down, and was obliged to sleep or lean against the shelving side of the vessel as it rolled to and fro on the waters.

On the 'tween deck cells, barely large enough to accommodate two persons, boasted as many as six and seldom less than four at any time. The cells line the sides of the vessel, while along the centre of the deck various types of torture were carried out.

Oil production in Russia now averages about 130,000 barrels a month.

Occasionally one meets a man whose mind is so weak it can't even smoke.

W. N. U. 1980

U.S. Grain Crop Is Poor

Balloon Production Will Fall Short Of Early Needs

United States Government crop reports changing the severe damage production by bad weather conditions to wheat, indicated American production of the grain will fall short of domestic needs for the first time this century.

On the basis of the reports, total production of 482,000,000 bushels is estimated, while the United States uses from 620,000,000 bushels upwards each year without considering exports or adjustments in inventories and insures processions, long an important factor.

The crop reporting board, noting severe damage done since June 1 due to almost-continuous hot and dry weather, estimated production of winter wheat at 341,000,000 bushels, well below average annual production. The spring wheat also reported spring wheat crop as "below normal."

Old Games Still Popular

Parlor Pastimes Of Eighties Prominent In Chicago Toy Show

The fireside games of 1883 still are the parlor and basement games of 1933.

Hundreds of displays at the American Toy Fair recently held at Chicago showed that the modern family still plays at ring toss and checkers, anagrams and tiddledy-winks are still popular indoor sports of the early 80's. Manufacturers have added only, perhaps a little more chance-taking to the games.

Construction of gaming rooms in cellars has led to a revival of poppin and beer-bar guessing for adult players, exhibitors pointed out.

Jig-saw puzzles still hold sway and their makers claim the hundreds of new designs in the form-letters will keep fans fitting pieces together for the next decade.

A 1933 boom in roller skates for adults prompted a variety of new models in that division, exhibitors claiming genuine speed and balance.

Famous Tree Felled

Giant Of South Africa Was Destroyed By White Ants.

Durban has just lost its famous red milk-wood tree, which was centuries old, 110 feet high, and 20 feet in trunk diameter of 15½ feet. It was felled by axes and because it was in the grip of white ants. Just because it had been attacked by white ants, which had eaten into it until it was a danger to the neighborhood.

How old it was nobody knows, but, at least, it was in leaf when the earliest explorers reached Natal, and has been a landmark in South African annals since Durban came into being.—London Sunday Pictorial

Trading Business Brisk

One-Legged Man Gets Right Shoes For Left Ones

Accumulated shoes for the left feet of Otto Wilhemger Monroe, Ohio, who lost his left leg in an accident 10 years ago, has prompted him to start trading with finesse.

A Monroe newspaper recently printed a story that Wilhemger wished to trade left shoes for right ones. Newspapers throughout the country have reprinted the story and Wilhemger has received letters from many persons desiring to trade.

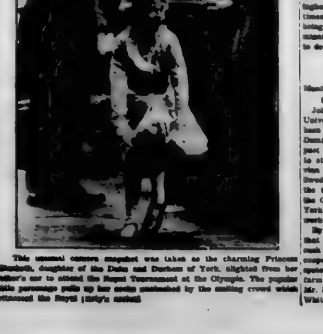
Wilhemger has sent left shoes to persons in Washington, Kansas, Missouri, Indiana, and Wyoming and in return has received right shoes

Phonograph Is Popular

Classic Recording Factory To Produce These Famous Records Annually

Enormous popularity for the phonograph, which in the past has been largely displaced by the radio is evident in Russia. A record factory at Apzelvina, now already the largest in the Soviet Union, is being further enlarged to make annual production of 2,000,000 disks it was announced only a little more than 1,000,000 last year

EVEN A PRINCESS SOMETIMES SLIP DOWN



This unusual camera snapshot was taken as the charming Princess Elizabeth, daughter of the Duke and Duchess of York, slipped from her father's car to attend the Royal Tournament at the Olympia. The popular little personage pulls up her socks unassisted by the smiling crowd which witnessed the Royal Family's arrival.

Trade Agreement With France Now In Effect Is Expected To Prove Of Considerable Benefit

Trading Blood Ties Lucy

Unknown As British Colonists, Orphans Prize Our Crest

British Columbia's latest tax levy, known as the canal tax, has caused more comment than any other provincial impost in a generation. Protests, restaurant keepers and representatives of the travelling public have been bitterly protesting against the tax chiefly on the grounds of inconvenience

The tax is five per cent on all meals served in public dining fifty cents or over. The immediate result of the tax was the marking down of all fifty-cent luncheon and dinners to thirty-five cents so that patrons of eating houses would be able to dodge the tax and the caterers would be spared the inconvenience of collecting the extra change and reporting to the government.

After several weeks' trynut, the general opinion is that the canal tax has not justified itself The attitude of the public from the first has been hostile. And several formal protests have been made In many instances diners have refused to pay the tax, in which event the restaurants have absorbed it

So far only one prosecution has been made for non-payment A diner was one of the Chief of Georgia hotels refused to pay the tax on his luncheon He was convicted and fined $8 and costs.

The revenue from the tax is said to be negligible so far in most restaurants where two or more people are dining together, the waiters make out more than one check for the party, thus evading the tax if the individual's meals did not cost more than 49 cents.

The reason for the tax is said to be negligible so far in most restaurants where two or more people are dining together, the waiters make out more than one check for the party, thus evading the tax if the individual's meals did not cost more than 49 cents.

Tax From Pedigree Seed

King George Tried Experiment On His Sandringham Farm

Linen made from flax grown on the royal estates at Sandringham is to be placed upon the market. W. H. Gibson director of the Linen Industry Research Association told the Royal Society of Arts that the association has long wanted to find a district where pedigree strains of flax to give high yields of fibre could be propagated to be best advantage.

Until 1931 no really suitable society or organization for this purpose has been found. In that year the King visited the annual show at South Kensington and on the suggestion that Norfolk might prove to be a suitable county for raising pedigree flax seed, he welcomed the idea of making an experiment in flax growing with pedigree seed on his Sandringham estate.

This was the first Sandringham experiment, and while it was most successful, more successful than the association anticipated the second Sandringham experiment of 120 acres, 40 times as large as the first is now being entered upon with the determination, if the season is favorable, to do much better.

Study Rural Life

Manitoban Goes To Europe To Lecture In Navigation Work

John Everett Robbins M.A. of University of Manitoba, who has been a member of the staff of the Dominion Bureau of Statistics for the past three years, has left for Europe to study rural life in the Scandinavian countries of Denmark, Norway, Sweden and Finland. He goes under the terms of a scholastic award by the Carnegie Corporation of New York and will engage in that special work for three months.

By "rural life" is meant co-operation in all its phases, including such work as the rural educational system, co-operative farmers' organizations, systems of marketing products and farm credits as these four countries.

Mr. Robbins is a son of Mrs. W. H. White, of Hemmingford, Que.

WORLD HAPPENINGS BRIEFLY TOLD

First air express to reach Winnipeg from New York arrived here June 13. A Northwestern Airways plane made the trip in 20 hours.

Public means instead of direct relief, will be the Quebec government's unemployment relief program this summer, Premier L. A. Taschereau has announced.

Canada will be represented at the fifth world's poultry congress, to be held in Rome, Italy, Sept. 5 to 16, next, by two official delegates, F. C. Elford, Dominion Poultry Husbandsman, and W. A. Brown, chief of the Poultry Division, Livestock Branch.

Sir Kingsley Wood, British Postmaster-General, who attended the the opening of the new Dagenham, Essex, land post office, said that in the mail bags were lost in transit last year, 48,000,000 having been carried by rail.

Increased preferences in the tariff on goods entering Trinidad and Tobago from Canada and other parts of the British empire have just been announced. The changes are regarded in Trinidad as small as a considerable extent.

More than 200,000 persons visited the Royal coach train and the London, Midland and Scottish Railway, between May 1, when she was placed on exhibition in Montreal and May 20, when she arrived in Chester for the Century of Progress Exhibition.

Increase of five per cent. in old age pension paid by the National Cofederation of Canada, Limited, will be put into effect this month it was announced. Applications during the past few months and complete confidence in the future were given as the reason for the raises.

In an emphatic denial that the Dominion government would be asked to call an interprovincial conference to discuss the question of unemployment, Premier L. A. Taschereau stated recently, that the question had not engaged the attention of the cabinet.

Have Not Inhabited

Much in the Canadian Standard By Scientists

Amateur astronomers and poetry writers received a shock when the former learned there was uninhabited, and the latter that it was necessary to abandon lunacy as a theme.

Proof that there is inhabitation, engaged in the heavy ground likely to be found on the moon, if there is any earth has been supplied through the medium of micro-rod photography, Dr. R. S. Adams of Mount Wilson Observatory, Pasadena, California, told delegates to the 16th Pacific Science Congress.

Dr. Adams said recent developments in photography showed clearly that the oxygen content of earth's moon is probably less than one-fourth of one per cent.

"A cloak to conceal moisture," comments Dr. J. B. Pollard, of the Dominion Rubber Laboratory at the national observatory at Victoria, B.C. "and the trouble is not to hide."

He added it doubtful if not even the idea of life on there or to have it on earth.

Addressing the annual meeting of the congress, Dr. J. H. Reisner, of the College of Agriculture, Guelph, Ont., said researchers will carry fowl from the Antarctic to healthy chickens. Vaccination against the infection was the practice on the Canadian farm, operations age to be from six to 10 days.

Summer following has reduced first-rod production in western Canada, Dr. A. M. Neely, University of Alberta, told the delegates. He added that the effect of overstocking in the spring country of first-rod varied with the season.

How Two Prospects

Air-Commander Sir Charles Kingsford-Smith has just succeeded in Wellington, N.Z., last to visit by his famous plane, "Southern Cross," made their homeward to England and Australia. Sir Charles left Wellington on May 31 for his return visit journey. Miss Thea Rasche, German flier, flew from Oakland to Honolulu Tuesday with hope of flying on.

Japanese Army Officer Confesses To China

Story For Lower Mainland In Fighting Around Peiping

The Japanese army exhibit journalists threatened to occupy Peiping as part of a campaign to clear the Chinese from the northern side of the great wall of China, offered their reasons for their confidence on the loss of Chinese lives in the hostilities.

Marching the normal time a Japanese 'plane over landed at this metropolis, a Japanese bomber—down the bombs—came down on the Chinese airport at the outskirts of the city. It carried a representative of the Japanese army making a responsible Chinese official to whom he could hand the ultimatum.

Flying an ace with authority at the airport, he took off again in the 'plane, flew over the Japanese legation and dropped a letter within a metal cylinder which responded the Japanese legation officials to convey the message to Chinese military leaders.

Search For Floating Gold

Many people Hope For Luck In Finding Ambergris

In two sections in the Journal of the American Museum of Natural History, Robert Cushman Murphy, Curator of Oceanic Birds, assembles the known facts concerning ambergris, which is a floating gold. The beaches of the Seven Seas have been searched for it. Dr. Murphy has assembled the facts from Pliny, Purchas, Reader, and the store of the adventurers for a lump of it, and still hopes that his quest will yet be rewarded. The impression that there is plenty of ambergris about, that any one may chance upon it sooner or later, is to be dismissed by the encyclopedia's assurance that the treasure may be picked up on the coasts of Brazil, Madagascar, Africa, the East Indies, China, Japan, the Moluccas, and of the West Indian Isles, particularly the Bahamas. The long Atlantic coast of the United States has been gone over mile by mile. At least forty enthusiasts have sailed at Dr. Murphy's offer to learn whether a peculiar substance they brought with them was the real thing. Only one of them had been healthy enough to find ambergris. He was a prospector who had come upon a welt in the act of devouring "a malo dainty of carrion" on the beach near Nema. During the animal away, he appropriated what was left of it. Struck by the number that the stuff was actually "floating gold," he exclaimed: "To think I'll had been ten minutes later that cool wouldn't have cost me a five-thousand dollar meal."

While ambergris is sometimes cut out of brother's whale by whaling men, it was known and used by makers of perfumery centuries before whales were made the discovery. A dealer in ambergris, asked to purchased from whaling ships and Captain D. C. Hunt of Provincetown, a friend of Dr. Murphy. The biggest sale known to them was that of a London merchant who obtained £18,200 for a lump of 181 pounds.

Holiday Lodge Advocate

Canned Meat Exports Slight Three Greater Than Previous Year

Canned meat in a Canadian export which has been coming large volume, particularly the past years, it was stated 13 months ending April the export volume total was 637,881 pounds, which was eight times greater than the 78,850 pounds exported in the previous twelve months. Last month's export shows 67,371 pounds, was more than double the 32,000 pounds total for the entire 12 months of the previous year.

Big Laundry Bill

The hospital laundry is a big item of expense in the Saskatchewan system, according to the London County Council in fifty-seven hospitals controlled by hospitals a staff of 1,100 washes more than 10,000,000 articles a year, at an annual cost of over $1,000,000.

SUNDAY SCHOOL LESSON

JUNE 25

JESUS OUR LORD AND SAVIOUR

Golden Text: "All authority hath been given unto Me in heaven and on earth. Go ye therefore, and make disciples of all the nations, baptizing them in the name of the Father, and of the Son, and of the Holy Spirit. . . teaching them to observe all things whatsoever I commanded you; and lo, I am with you always, even unto the end of the world."—Matthew 28 18-20.

A Review By Rhoda Of Allotment

Below are a number of quotations all alluding to some event or saying in the Book of the Four Quarter. Let pupils point out each allusion and tell the incident to which it refers.

O lead my blindness by the hand,
Lead me to Thy familiar feast,
Not here or now to understand,
Yet even here and now to taste
How the Eternal Word of Heaven
On earth in broken bread is given.
—Gladstone

Lord, grant us grace to love Thee so
That, glad of heart and glad of face,
At last we may all high or low,
Each in his place.
—Christina Rossetti

The rich are fairly jumping through the needle's eye—Burke of sheep at a gap.—C. E. Montague.

I have realized that in this world every mountain top of privilege is girdled by the valley of lowly duty.—Henry Van Dyke.

A photographer makes his sensitive plate, expose it to just the rays of light he chooses, dips it into the proper solutions, and holds it up to the light to see if the picture is there. What also did this Great Teacher do when they had held up these rays to the light to find if the reflection of the Son of God were fashioned in them?—J. M. Stifler.

Wrench knew about all the raw things of life. He'd had the spongeful of hymns against his legs, and yet—somehow—he was never beaten.—Warwick Deeping.

There is sighing in the pallid sprays
Of those old willows, as in days
Their pitying watch in Nature's faith-ful ways.
But when
Was on that night when the disciples slept.—Katherine Lee Bates.

What is a generation prefixed if it gains the whole world and loses by which to live and loses its soul, the spiritual ends of which to live?—Henry Emerson Fosdick.

Jesus looked upon His teaching as a revelation, upon His death as a revelation, and upon Himself as a revelation. These cannot be torn apart without violence. It would be like tearing the sunrises robe.—John Ruskin.

"Well, how did you like the sermon?" Asking that question has become a habit which it will probably continue to cultivate. It is a custom which can be cast out only by prayer and fasting."

And there he paused
Whereof the happy people strowing cried,
"Hosanna in the highest."
—Longfellow.

Wisdom Of Nature

Mangrove trees do not continue to send out small trees as they would be swept by the waves which covers the parts at high tide. The young plants are developed on the trees in shoot and then fall into the water like the seed below.

Must Protect Forests

Canada and U.S. Are Given Significant Warning

Although not named other than as "countries on the eastern side of the Pacific," Canada and the United States are given significant warning to check devastation of their forest area by fire in a resolution passed by the Forestry and Meteorology sections of the Fifth Pacific Science Congress.

Following a meeting, a select committee consisting of Dr. C. D. Howe, dean of the faculty of forestry, University of Toronto; E. H. Bowie, of the United States weather bureau, San Francisco; S. Fujiwhara, Japan, and Dr. D. Y Lin, China, prepared the following resolution:

"Whereas in many countries of the Pacific basin, especially in those on the eastern side of the ocean, forest fires are increasing in number and destructiveness:

"Be it resolved that the Pacific Science Congress invite attention of the countries concerned to the necessity of vigorous action in the suppression of forest fires in an effort to reduce the great depletion of standing timber, the destruction by uncontrolled floods and loss by soil erosion."

Britishers In China

Feel Currency Slump

Dollar Has Fallen To Half Of Its Former Value

With the silver dollar worth only fifty-three cents, half its former value, British residents in China, and in those Crown colonies where Chinese funds are used, are feeling themselves extremely hard hit, according to J. E. Barnes, electrical engineer of Hong Kong. "If trade in silver currency ever returns it where it was there will be a tremendous upturn in business," he said.

Mr. Barnes explained the enormous poverty of the Chinese pointing out that about 40 or 50 of them manage to live in what would here be considered an ordinary-sized room. In spite of this, they are usually appreciative of the benefits of electricity. Hong Kong has electric lights even in the poorest slums of the city, he stated.

Mr. Barnes was in Montreal on his way back to England for a holiday.

Station In Railway Station

The new railway station of Johannesburg, South Africa, is probably the only station in the British Empire, outside of India, equipped with a shrine for the "faithful." An inner room has a praying mat on the floor and a shower bath has been installed so that the "faithful" who enters may cleanse his ablutions before he comes to pray. As a result, "Land of Allah" ("God is Great") is now inscribed in the station before the place where Moslems go to a train journey.

Canada's Cattle

Canada's cow census, made in December, especially notice for permanent hay and pasture fields.

BRITAIN MAKES PAYMENT TO U.S. ON WAR DEBT

London, Eng. Payment of $95,000,000 in silver on Great Britain's war debt obligation of $75,500 000 due the United States was announced in the House of Commons by Neville Chamberlain, Chancellor of the Exchequer, in a statement which acknowledged the "debt pending final settlement."

Simultaneously the Chancellor stated formal debt negotiations between Great Britain and United States would be started at Washington as soon as possible in accordance with President Roosevelt's reply to the British remittance.

The United States accepted the partial payment, the Chancellor declared, "without prejudice to the question of either government in subsequent discussions."

News of the arrangement was hailed by the American delegation to the world economic conference and the Chancellor with high hopes that it might open the way for genuine progress toward economic rehabilitation.

The partial payment, Mr. Chamberlain told an enthusiastically cheering house, will be made in silver at 60 cents a fine ounce and constitutes Great Britain's acknowledgment of her obligation to America under the war debt account.

Labor and Liberal spokesmen, applauding the arrangement, joined Mr. Chamberlain in praising President Roosevelt for his acceptance of the scheme of payment.

"The difficult and delicate problem has been adjusted," the Chancellor announced in revealing the results of several days' nations negotiations between London and Washington.

"It is a good augury for the success of the world economic conference and may prove the first step toward complete and final settlement of the whole of the war debts."

The Chancellor revealed that the British Government had hoped it would be possible for United States to accede to a request that the payment of the first instalment be postponed pending discussion of the war debts as a whole.

"They (the British government) maintained that hope up to a very recent date," the Chancellor continued. "In the end it became clear that it would not be realized. They therefore had to decide upon their course of action in those circumstances as they found them."

The British premier stated was congratulated by Sir Stafford Cripps, Labor spokesman, for "the realism with which he has faced the situation."

Sir Herbert Samuel, Liberal leader, expressed "deep appreciation of President Roosevelt's action in according to the agreement, which was a profound relief to all."

It was hailed in the House of Commons that Great Britain's $95,000,000 debt instalment actually cost her $100,000,000, inasmuch as it was tendered in silver at the rate of 60 cents an ounce, under which debt remittances were permitted under recent Congress authorization up to $200,000,000.

Wm Recognize

Ottawa, Ont.—Word of their drawing about $30,000 in Canadian funds from a newspaper conducted as by the government of Liechtenstein, a principality in the mountains of central Europe, reached Harry Brunsell and his wife here. The sweepstake ticket, on the English Derby, cost Brunsell, who signed himself "Lucky," about $1.50. He purchased the ticket from a chance acquaintance.

Our Main Runaway

Toronto, Ont.—With his use of his instrument H. Oakley stopped a runaway team and prevented what threatened to be a serious accident. When the team bolted, Oakley raced after them, drew in front of them and slackened his speed until he felt the tongue of the wagon against his car He immersed in retard his pace until the wheels were moved to a walk.

Small European Nations Would Follow Mussolini

If Big Powers Do Not Find Solution To Economic Problem

London, Eng. The small nations of Europe have turned begging eyes toward Rome and a possible bloc under Benito Mussolini's dictatorship as the big powers, embroiled over war debts and monetary stabilization, threatened progress of the world economic conference.

"Should United States, Great Britain and France fail to point the way out of the economic morass at the world economic conference, Emile Francqui, the veteran Belgian diplomat, told the Associated Press the small nations of Europe will cluster around one statesman capable of leadership—Mussolini.

"If Rome is fostering sensible ideas for unified action while the great powers are talking about cooperation dropping over the abyss, but doing nothing. The small nations crying for leadership, will follow Mussolini."

Overland Rates For Ships

Apply For Half Insurance On Ships For Voyage From Vancouver To Regina

Vancouver, B.C. Marine insurance agents were perplexed when asked for rates on hull insurance on M.S. Vancouver City for a voyage from Vancouver to Regina. No marine insurance company has overland rates for ships.

However, the matter was simplified when it was learned the Vancouver Merchants' exchange wanted protection for the big model of M.S. Vancouver City, which was launched in the exchange by the ship's owner Sir William Reardon Smith

The vessel is to go on exhibition at the World's Grain Show at Regina and the exchange sought protection for it for the "voyage" This is a Liberty ship, and as such, while it was not a full-grown vessel that was going to cross the mountains.

Seeking Home In Canada

Baroness From Austria Wants To Settle In Dominion

Montreal, Que.—Eager to find a Canadian home for herself, her Austrian husband and their two children, the Baroness Von Ritschi will tour Canada within a week or so, she told newspapermen here as she boarded a Canadian National Railways train for New York. The baroness is well known as a distinguished painter of miniatures under her maiden name of Lewza Burgoyne.

At the Englehardt, Baroness Von Ritschi divides her time between her husband's Austrian estate and her Canadian interests. She and her husband have decided to settle in Canada and the tour of the Dominion is expected to find them a suitable home. The baroness hopes to found an association of Canadian miniature painters.

General Seeks Cheered

Given Rousing Reception By Soldiers On Recent Conference

London, Eng.—General Smuts, who is Premier and Minister of Native Affairs, was the only one of eight speakers to be cheered as he rose to his feet from the world economic conference assembly hall.

There was a roar of applause as the genteel old man was called upon by Premier Ramsay MacDonald and walked to the front of the meeting hall. He listened for a moment in silence, then approved.

Despite his 63 years, General Smuts appears fair-haired rather than grey, and is hale, hearty, vigorous figure. He first here, 6,000 miles, from South Africa.

Increased Revenue

Ottawa, Ont.—Considerable reductions in Dominion revenue during the first two months of the present fiscal year (April and May), are shown in the figures released by the Department of National Revenue. The customs and excise revenue in the two months has dropped $7,191,468, as compared with the corresponding months last year, and the income tax revenues has fallen $2,667,497.

ON TRADE MISSION

Hon. Thomas L. Kennedy, Minister of Agriculture for Ontario, who and Premier Hepburn are talking about the situation dropping over the abyss, but doing nothing. The small nations crying for leadership, will follow Mussolini

Canada's Foreign-Born Population

Saskatchewan Has Largest Number Whose Parents Are Not British

Ottawa, Ont.—Out of a total population of 921,785 at the last census, Saskatchewan had 396,419 persons whose parents were foreign-born. Those with Canadian-born parents numbered 219,889, while 170,384 had Empire-born fathers and mothers, a report from the Dominion Bureau of Statistics says.

Ontario had the next largest number of residents with foreign-born parents, these totalling 369,936.

The offspring of parents both foreign born in the other provinces was Alberta, 369,325; Manitoba, 230,781; British Columbia, 163,936; Quebec, 157,492; Nova Scotia, 13,087; New Brunswick, 7,313; Yukon and North West Territories, 1,281, and Prince Edward Island, 813.

May Meet At Rome

Important Meeting Being Considered By Four Governments

London, Eng.—An important meeting of Prime Minister Ramsay MacDonald, Premier Mussolini, Premier Daladier and Chancellor Hitler in Rome at the end of June, is being considered by the four government chiefs, it was revealed recently.

Premier Daladier's Radical quartette, in addition to initiating his four-power pact for European peace by sensational face-to-face interviews with the other statesmen.

Regardless of whether the "Big Four" succeeds in Rome's wishes, it is understood the first meeting under the four-power pact will be held in Rome before the Geneva disarmament debate resumes July 3rd.

Wage Increase

Flour Milling Company Announces Ten Per Cent. Increase

Montreal, Que Employees of Robin Hood Mills, Limited, in all plants across the Dominion, will receive a 10 per cent increase in wages effective July 1, it was announced here by Charles Fitz, general manager, upon his return from a trip to Western Canada.

"I found a spirit of optimism on the premises," Mr. Fitz said, "and meet any that it in several years since I have seen the crops looking as well as they do now. Moisture is plentiful and even southern Saskatchewan, which has suffered so much from drought these past few years, has had plenty of rain and crops are in good condition.

"Business generally during the past 60 days has shown some improvement with us both in domestic and export markets. This may be accounted for by the fact that stocks in buyers' hands were generally very light and the advance in the market influenced purchases for future shipment in greater quantities than has been the custom for the past year or two."

Party Includes Westerners

Number Going To England To Attend Oxford Group Home Party

Montreal. — Oxford-bound Canadians from Toronto, Winnipeg, Vancouver and Montreal in the Canadian Pacific liners, "Duchess of Richmond," and "Duchess of Athol," on route to take part in the first house party of the Oxford group since their return from North America, indicate the rapid growth of the group in Canada.

Sailing on the "Duchess of Athol" are a number of westerners who attended the Canadian house party held at Chateau Frontenac, Quebec, before the British visitors embarked on the "Empress of Australia," with a number from Toronto and Montreal.

Wheat Exports

Considerable Increase In Exports Shown Over Same Period Last Year

Ottawa, Ont. The export of wheat in May totalled 23,464,846 bushels valued at $18,004,791, according to a report issued by the Dominion Bureau of Statistics. This compares with 15,543,613 bushels valued at $9,-098,561 for the corresponding month last year, an increase in quantity of 5,921,235 bushels and an increase in value of $8,437,235.

The export to the United Kingdom last month was 13,666,321 bushels valued at $7,884,686, compared with 7,154,698 bushels at $4,378,962 in May a year ago, an increase in quantity of 92 per cent. and in value of 80 per cent.

13,000 FRENCH VETERANS "INVADE" LONDON

The British capital woke quite early one morning recently to find 13,000 French soldiers "invading" its city. Fortunately for the sleepy Londoners, it was a peaceful invasion and the Foreign Office knew all about it. Here we see some of the 13,000 French ex-service men of the "Comic de Feu" marching in procession to Whitehall and the Cenotaph.

MANY NATIONS ARE SUPPORTING TARIFF TRUCE

London, Eng.—The world economic conference is moving toward realization. More nations have joined the temporary tariff truce. Behind the scenes the pieces are shifting and the international chess board into new combinations; the gold countries of Europe are getting together.

Banking experts are grappling with currency stabilization, and the bobbies are full of gossip of bilateral trade agreements Great Britain and the United States jointly call for reduction in excessive tariffs, in a world of high protection Holland rumors a belated voice for wholesale tariff reductions.

The increase to 39 in the number of nations joining the temporary tariff truce was also a big factor Not long after Prime Minister Ramsay MacDonald had announced of adhesion of the Netherlands, Roumania, Denmark and Finland, he called—and the plan was echoed by Secretary of State Cordell Hull, of the United States, and amplified by Maxim Litvinoff, of Russia—for world-wide agreement in the truce.

War debts were temporarily settled by the United States' acceptance of a payment of $10,000,000 made by the United Kingdom in silver, and the atmosphere was lightened by President Roosevelt's invitation to Britain to send representatives for a conference on debts, although the president made it plain only congress has power to make any settlement.

War debts are barred from the agenda of the world conference but following emphatic declarations by British, Italy, Germany, Portugal, South Africa and other nations that final settlement of war debts is essential to world-wide recovery, the conference could not fail to have been affected by the pro-debt payment uncertainty.

The statement of policy given the conference by Neville Chamberlain, Chancellor of the Exchequer, and Secretary Hull, even in regard to a wide range of points, notably in an urgent demand for reduction of the excessive tariff barriers blocking world trade, and the United States delegation particularly welcomed the British program as brightening prospects for the conference success.

Furthermore, it was authoritatively learned the conference of British, United States and French treasury and Central Bank experts which has been at grips with the troubled question of currency stabilization, saw much improved prospects of reaching an agreement on de facto stabilization.

These figures dominated the conference scene as the nations, big and little, submitted plans, proposals and suggestions in the plenary session. They were Neville Chamberlain, in precise phrase advancing the British plan; Cordell Hull, in more general terms, pleading earnestly international co-operation, and stocky Maxim Litvinoff, careless of the fate of capitalistic nations, yet offering a billion dollars' worth of orders—always conditional on the provision of satisfactory credits.

The British spokesman was emphatic that action must be taken simultaneously in the financial, monetary and economic spheres alike. The United Kingdom "will spare neither goodwill nor determination in our efforts to secure success," he promised. Mr. Chamberlain saw three great pathways to a solution

1. Final settlement of reparations and war debts.

2. Abrogation of controls on exchange movements, and resumption of international trading.

3. Co-ordination of production and marketing, removal of prohibitions and similar trade barriers, and reduction of excessive tariffs in order to promote a normal flow of international trade.

Better To Perspire

Chatham, Ont.—If you are too hot to perspire—it's sunstroke, according to Dr. W. A. Hale here. No matter how hot the day, as long as humans perspire freely there is no danger of prostration from the heat.

Commodity Prices Increase

Largest Volume Of Sales Also Indicate Better Times

Continued rise in commodity prices, the increasing volume of sales in retail stores, increased exports of raw materials, automobiles, wheat and lumber, flour and increasing pulpwood and volume of transactions on the Canadian stock exchanges will indicate the favorable economic setting of a tide of commercial and industrial prosperity in Canada. This is the opinion expressed in statistical review issued by the department of trade and commerce.

Wholesale prices in May were over five per cent. higher than in February when the lowest peak since pre-war days was reached. The government index for wholesale prices for May was at its highest since the corresponding month last year and was the largest monthly increase to show an advance. Retail sales in April were nearly 20 per cent higher than in February, although, as the government points out, part of retail trade is not at the value at sales the increase in the cost of commodities would account for part of this increase.

Early export reports for the month of May show that shipment of wheat and wheat flour were higher by 35,000,000 than in May, 1936 in volume, exports of wheat were practically 6,000,000 bushels higher and exports of wheat flour 500,000 barrels greater. Export clearances of wheat from August 1 to the beginning of May amounted to 197,356,000 bushels, an increase of 57,000,000 bushels over the corresponding period of the previous year.

For the month commodities went both the value and the volume of transactions on the Canadian stock and mining exchanges have been on the up-grade

Three Forty Pole Feuin

Indian Sailor Is Competing Against Greek Daughter-in-Law

Sarmukh-Singh-Hindustan Ek Rajender Hari Maharajah Adhana Sawal Mandingh Bahadur have ... sorry, I mean a Sailor is leaving.

With him are his 40 pole poniez, valued at $1,000 apiece, and their 40 grooms, brought all the way from the court of Jodhpurpore, India, at tremendous expense to play against the crack English polo teams.

His team is the champion of India, and includes members of the famous Jodhpur warrior tribes.

When he is in India Sarmukh, etc., rules 4,000,000 people, and to come to London he has left a home which has 2,462 windows and is known as the "Palace of the Winds."

Flooring Polaces For Bishop

Vessel Will Carry Missionaries Aboard Southern Pacific Islands

Stretched shipwrights have promised to carry out one of the fastest contracts on record in building a $150,000 ocean-going yacht, to be used as a bishop's "floating palace."

The order for the vessel has just been placed with Messrs. Cammell, Laird and Company, and is understood the assurance has been given that it will ready on August 30.

The vessel, the "Southern Cross VII," is to be built for the Melanesian Mission, and will be used for carrying missionaries about the Southern Pacific Islands.

It will have a small chapel, and an altar will be built in the bishop's quarters.

No Mistake Whatever

If young subscribers in India get themself baited by a tiger, and his parents in England, learning of this sad matter, leave the dear boy here, left in their family vault, wired to the Colonel of his regiment:

"Please your James home to us, all expenses paid."

After many months, after an unreasonable length of time, a grateful cable arrived, on opening which they were horrified to discover a dear tiger. They wired to India:

"Some mistake here. Tiger is not in our James."

The Colonel replied:

"No mistake whatever. Tiger in cable. James in tiger."

W. N. U. 1000

Product is Well Known

Shepherds All Over Empire Use the Pyecombe Crook

Every shepherd worth his salt knows the Pyecombe crook. It has been known and used on British downs and pastures for more than 900 years, and there is now only one man in England who makes them, says an article in the London Daily Express.

His name is Charles Mitchell, and he was born in 1864. He is still working on the old forge where they have been made for hundreds of years.

When sheep were first introduced into Australia, these Pyecombe crooks went with them. They gained the name for they are supposed to have magic qualities in South Africa, New Zealand, Canada and in the most distant parts of the Empire.

Within a few miles of the coast off the Brighton road, says the writer, I found the man whom I sought, the maker of magic crooks.

He would be eighty-nine next birthday he told me, but his back was still scarcely bent, and the muscles of his arms stood out firm and hard like those of a young man.

"I well remember how first I came to finance," he told me. "It was on the top of one of the old siege coaches. The Bay was like.. it would have been 1 to. if I had been inside."

Ever since then he has been making Pyecombe crooks.

"They are made of old gun barrels," he said, "the old muzzle loaders were the best, they were not made of such highly brushed steel as the modern guns."

Pyecombe crooks are also used by shepherds of souls. The Bishop of Hereford has one, and so have three other bishops.

Mr. Mitchell does not only make crooks in his smithy. He does nearly all the regular blacksmith's work for the villages within a radius of six miles.

The Maker of Crooks has yet another call to fame. At the Pyecombe forge he built the first penny farthing bicycle ever built a century ago.

"What will happen to the forge when you retire?" I asked.

"That will not be for many years yet," he said. "I'm eighty-eight, its true, but I can still read and write without glasses, and am in as good health as ever I was."

He is training his son to follow in his footsteps.

Ink Of Use

Flinders Flourished Four Years Surgeon and Sailmaker Translator

The long suffering British taxpayer has turned his eyes of longing on the ink used by the Civil Service, and the Irish flax not only finished for financial year with a surplus but set an example to the rest of the world how to come tax rules. Financial experts for the year showed a surplus of 1,000 pounds sterling, more than expected.

Income tax returns show increased to 1,000 pounds over the estimate. The income tax rate, instead of ranging from one shilling to three and a sixpence on the pound, has dropped to 10 pence and will be two shillings and 11 pence on the highest incomes. The British standard rate of income tax is five shillings on the pound.

Grasshopper Menace

Large Quantities Of Poison Bait Used In Saskatchewan

Approximately 1,700 tons of grasshopper poison bait has been shipped out from the field crops branch of the Saskatchewan Department of Agriculture to fight the plague threatening growing crops.

More than 97 carloads of dry bait have been out to infested areas. Reports today are most encouraging in the extreme southeast of the province centring around Estevan, and in the southwest area to the south of Lake Diefenbaker.

Last year the total shipment of poison bearing the entire season totalled 1,200 tons of dry bait.

Thousand Dollar Meal Stolen

Globe Flower Was Only One Of Kind In World

A plant with a single flower stated to be worth $1,000 and the only one of its kind in the world, has been stolen from the rockery of the Rev Dr. Anderson, a horticulturist, of Great Glen, near Leicester, England.

The plant, a globe flower, was to have been exhibited at the Chelsea Flower Show. It is a natural hybrid and the globular flower is a brilliant orange instead of the usual yellow. "The plant was discovered by my gardener six years ago," Mr Anderson told a reporter "The loss is not a personal one but a loss to the whole world of horticulture."

After Nineteen Years

Nineteen years to a day after he had mailed a letter to a friend in Colorado, U.S.A., a man in College, Saskatchewan, received it back again. The friend in America had died in the World War and later bought and the capital of Montenegro has been moved from College. The letter had crossed the ocean many times. When it was returned to the sender the Montenegro stamps were valueless, and he again had to pay postage on his letter which never had been delivered.

Record Cab Saw Its Fullest Days In Gay Nineties

"Let's take a hansom."

The younger generation would be amused by that phrase common on premises. Not very many of them have ever heard the phrase except in books, and fewer still have seen one. Yet a hansom was the smart way to ride out as long ago. It was the conveyance of the "sport model" in cabs in its day, which was when the hansom came into being And that wasn't so long before the war

It is just one hundred years ago this month since J A Hansom, a Yorkshire architect, registered his design for the first vehicle to which his name was given. He called it a "safety cab," because it could neither fall forward or backward if the horse fell. It had two enormous wheels with sunk axle-trees, and the driver's seat was at the side. Subsequently it became a much smarter vehicle, the size of the wheels being reduced, the driver's seat being perched high up at the back, and there were sliding doors in front. A hansom looked like a cab cut in two, and with a nattily dressed driver, wearing silk hat and flower in his coat, it was the fashionable mode of transportation. When the driver wanted to speak to the passenger inside, or vice versa, communication was made through a little trap-door in the roof of the hansom.

The palmy days of the hansom, which became general all over the world, were the gay nineties, and indeed is it that the only place where one may now be seen is London's London Museum.—St. Thomas Times-Journal.

X-Ray Saves Fatal

A victim of his own experiments in the use of X-rays, Col. Hugoun G Northington, 52, of the United States army is dead of infection from X-ray burns. He died at a hospital in San Antonio, where he had been a patient for nine months, while surgeons operated 16 times in an effort to save his life.

Building Modern Mosque

Michigan City To Have First One in United States

Plans for the construction of the first Mohammedan mosque in the United States have been announced at Michigan City, Indiana, by Amir Ali Jaded, Arabian society. The mosque will be built in Michigan City, according to Nedjay Hasan, organizer of the society. London and Paris also have mosques. The one will be a one-story brick structure 30 by 80 feet, having two minarets with domes of the Mohammedan type. Approximately 250 Moslems live in Michigan City; Detroit has 12,000, New York City 10,000, and Chicago 2,000.

"Sport Model" Of Last Century

Hansom Cab Saw Its Fullest Days In Gay Nineties

"Let's take a hansom."

The younger generation would be amused by that phrase common on premises. Not very many of them have ever heard the phrase except in books, and fewer still have seen one. Yet a hansom was the smart way to ride out as long ago. Valuable Religious Relic

Holy Coat Of Christ To Be Exhibited In Germany

One of the most valuable religious relics in the world—the Holy Coat of Christ is to be brought into daylight again and exhibited to pilgrims at Trier Cathedral in Germany

This showing of the "coat without seams" will be the eighth. Seamless is said and for which they cast lots at the crucifixion, is part of the Holy Tunic now being exhibited by the Roman Catholic Church It is the first showing for 42 years

The showing of the coat is an historical event for in the last four hundred years the relic has been shown only seven times.

The public exhibition of the Holy Coat will open on July 18 and continue to September 2, and in those six weeks over two million people are expected to travel to Trier from all over the world.

Pilgrims from Ireland, England, America will make the journey, and the German railways have already arranged special trains and tours.

Hotelkeepers and the townspeople of Trier are making preparations to receive the influx of visitors, which happens about once in every 50 years.

The seamless robe of Christ is about five feet long and from 38 to 40 inches wide It has been treasured locks, and fewer still have seen one. Yet a hansom was the smart way to ride out as long ago. It was the conveyance of the "sport model" in cabs in its day, which was when the hansom came into being And that wasn't so long before the war

It is just one hundred years ago this month since J A Hansom, a Yorkshire architect, registered his design for the first vehicle to which his name was given. A Fast Train

New Streamlined Train Reported To Attain Speed Of 130 Miles Per Hour

Much has been heard as to the competition railways are meeting in the form of airplane traffic, but lines and freight lines, and in the competition it is interesting to note the steps taken by the Union Pacific Railway in the United States. This company has placed an order for a trial three-unit train. The train embodies the latest devices in streamlining to reduce air resistance It takes advantage of all little aspect lines observed to increase tensile strength and to reduce weight, and it profits from the slightest to learn how best to maintain speed.

This new train will weigh only 10 tons, practically the weight of one ton behind Pullman cars, but its build and streamlining permit it to attain an estimated maximum speed of 120 miles an hour and on the run it is expected to maintain an average of 90 miles an hour. It thus attains airplane speed with advantages of comfort for which airplanes are noted.

Such an experiment seems to be a logical way to meet the competition railroads must face in the future. It means, it is true, the expenditure of large sums of money, but capital is never timid about investing in a chance for profit and if the railroads can make good they can once might be on great capacity in finding the necessary funds.—Winnipeg Free Press.

SYNOPSIS

CHAPTER XII—Continued

In a vague way he realized that the triumph was his now, if his hands had strength to seize it. If only he could rise up, he could stance the Browning behind this neat and splitter every square inch of the bandit's covert. As he lay there, nearly helpless, fighting for one last flicker of strength to rise and use the machine gun, he heard Dunnard shouting at him across those seven hundred yards. He could not distinguish the frantic words; he thought Dunnard must be trying to hearten him to one more effort. But then he heard Joyce's voice, crying to him. Closer, vibrant with fear, the warning came to him clearly

"Alan! Alan! He's coming for you! Alan! Stop him. . . . . Shoot him!"

The panic and terror of her voice roused Alan. He understood that some peril was looming upon him from those bandits. With a great effort he rose to an elbow, drunk with pain, giddy from loss of blood. A few seconds later, he crept on elbows and knees to the water edge and laved his face and managed to tie a handkief around his forehead wound.

The bandage stopped the blood from running down and blinding him, the cold shock of water drove the nausea away for a little time. Again he heard Joyce crying out to him, but now it was a cry inarticulate, despair-stricken.

He cautiously raised his head, and saw the peril that his two friends had tried to arouse him to meet. The huge red-bearded leader had seen him collapse helplessly, and was coming across to put a bullet through his brain and claim the machine gun. Behind him crawled Alan drew his heavy automatic, slipped the trigger safety, and waited. A few moments later, with the enemy within a dozen paces, he suddenly reared up, up above the shelter, shooting as he rose. The seven heavy bullets caught the bandit leader in the breast, knocked him over, killed him instantly.

Crouching down again behind that pile of willow sticks and reeds, Alan turned to the Browning. Method.cally he spread the tripod and planted it firmly and clicked it into its mount. Very carefully he fed in a web of cartridges till it was caught Rising to one knee then, clasping the spade grip, he cautiously raised his eyes [illegible]

The breed with the deadly Savage, who had sent three bullets into his body and had drilled Jimmy Montgomery through the heart, was trying to make it back to the flags Shouting hoarsely, he kept jerking his head around to see what his enemy was doing Alan swerved the Browning a few degrees, looked down the sights, and his trigger finger tightened

The breed stumbled as that hail of death caught him,—stumbled and flung up his arms and pitched forward down in the sable-deep water.

Motionless for a moment, Alan trained the Browning on that cluster of flags where two rifles were still screaming at him, and when he had determined his accommodation, the Browning went into play again. Methodically, the gun drumming out its message of death, he swept the clump from end to end, spraying it with bullets, moving down the flags, spilling the bandits' lurking with a raking, slow-weaving fire

There in the flags a figure leaped up and blindly tried to escape. Alan swung upon it, the figure vanished, there was a thrashing for a moment among the reeds. To the right a single rifle still held out, shooting at him. He located the spot and poured a storm of bullets into it. With a shrill yell a small wiry man sprang up, flung his arms above his head, high in the air, doubled up limply and sank down in the flags and reeds.

Alan stood up then. He thought to swim across and get one of those canoes and go after Joyce. But he had not the strength. The nausea was overpowering him again. The wounds had bled him weak, and the pain of them sickened him. Staggering, the fearful reaction setting in, he sat down on the moss near the water, with his world swimming in front of him and all his senses reeling.

* * * * *

It was four days later that those who waited at Fort Endurance learned what had happened northeast in the heart of Many Islands.

One evening at sunset an airplane came swinging around the timbered headland above the Athabasca Flying low, just over the water, it veered inward the steamer landing, touched lightly, skimmed the wavelets, and taxied to the dock.

As an excited group began gathering at the wharf, the scarlet-and-gold ship's pilot leaped to the dock, made it headland and here on toward the post. The first craft manifestly had timed itself to come in together.

Three Indians came running out to see the plane to to the landing to help. Father Chevarty had come down the steps of the mission house and stood by watching with observant eyes. Haskell and Williamson had come from the general store. Ignoring the group through, the crowd, was trying to edge up near the pier-heads, to be the first to greet Alan Baker.

But the pilot never came, the crowd saw it carried four men. When it neared alongside, they recognized Alan Baker and Sam Hardcock. One, dead, unshaven; and Alan Baker, a bandage around his head, his left hand wrapped in surgical dressing, his left arm in a splint. The fourth man was none outlandish individual of yellowish complexion and almond eyes, with the right arm carefully splintered and bandaged.

The freightage that the launch carried—a machine gun and clutter of rifles, a half dozen bales of furs worth a small fortune each bale, skeins and curled pelts, and five heavy leather pouches even richer than in the prospector fashion—the mere sight of that cargo drew a gasp from the crowd and brought them surging on.

Joyce had come with Dunnard in the plane. As she scrambled her ankle-by ball and stood up, she was remembering her last time here at Endurance, when her father was still alive. It seemed a heartless irony of fate that he had died just when his innocence had been proved. Small comfort to know that his name and memory were cleared of guilt. As she thought of him lying dead at Resolution and of the tragic duty calling her there, she was glad that tonight a steamer was coming past and she would leave this North.

By the time she and Dunnard had climbed ashore, Alan had stepped out upon the planking. In another moment she saw Elizabeth silver her way through the group pressing toward Alan. A gust of emotion — jealousy, scorn, anger against Joyce's pretty face to she watched Elizabeth's greeting. It was eloquent, it was all artistical Elizabeth's gladness at his return and her sympathy over his wounds were effusive and contemptible. Joyce could not help thinking of herself swimming across to Alan at the swan nest, and of the compassion that tore at her when she found him there, wounded, bleeding, half unconscious. She felt she had known more real sympathy in those moments than Elizabeth would feel in her whole life. A fierce jealousy, a jealous proprietorship surged through her. Alan had got those wounds fighting for her; she had dressed them and taken him to her home, and she had nursed him through those long hours of fevered pain.

Haskell came shoving his way out to the wharf edge. Hardcock, you and Pedmenott are under arrest!"

But he never glanced up at him. Muddied and haggard from two days of shovel work cutting a channel to float the big logs he and his two remnant continued heaving the poachers and for false cut upon the planking

"Did you understand, Hardcock?" Haskell repeated. "You're under arrest."

"Bill looked up. "I heard you," he said in his usual manner. "But hereafter time to be arrested just now. Put it off a few minutes. can't you? Here's a hundred and fifty thousand in furs and glad that'd better get under lock and key before part of it walks off. And a prisoner to take up."

Williamson came down to the wharf edge. Joyce saw him hesitate a moment, then hold out his hand to Alan. It was only a momentary pause, but she saw it distinctly, and understood the reason: and it roused a hot anger in her.

She was proud of Alan for the way he reacted. He, too, had noticed the hesitation, and he remarked curtly, indicating Haskell:

"Don't bother, superintendent. You might lose cash. I've heard I'm a thief."

The Civilian commander was visibly hurt by Alan's words. His eyes were taking in the recovered loot, the dead men, Alan's wounds.

"I see you won out against them man. The prisoner, I suppose, is one of them. Where are the others?"

"Over in the Thel-Assuh. We did not take the trouble to give them a decent burial."

"Um, dead. It was a fair fight, if you care to take my word for it."

Williamson was silent a few moments. Into his eyes came a flare of expression, as though he was thinking of renewed patrols in the history of his force, and of the glory of Baker's victory over them she attainder was one of them and one of the best of them. Finally he responded:

"Won't you come up to the cabin, Baker? I'd like to hear your report on this."

"I'll come up." Alan sent an exclamation glance at Haskell. "I've got several things to say to you, superintendent, also."

Joyce felt some one touching her arm. Turning, she saw it was Father Chevarty.

As he shook hands he noted her

TAKE your trip to MECCA ON HOLIDAYS

Don't let Rashers, Whatbore Palace Pet, Mercedes and Aunt Rose spoil your holiday. Throw Claremont a dinner supper in sparkling and thrilling ship formation. The Claremont group of outdoor dances for outdoor people. Dancing on the sun-deck.

When you are beset on edge ... when you can't sleep ... when everything is a burden ... when you are bothered with dizzy spells, headaches and blues ... try this medicine!

It will give you just the calming, soothing effect that has made it famous the world over.

Great Skeleton with MANDI-ROLL

25 feet of white or coloured paper for kitchen use—covering shelves, lining drawers, etc.

Goodyear PAPER PRODUCTS

"Joyce, if you have time tonight, step over to my study and visit me, won't you?"

"Why yes, Father Chevarty, if you wish. I'd better come before tea; the steamer may be here any time after that."

"You're leaving tonight?"

"Yes. There'll be no other for two weeks. Bill told you I'm going back to Ottawa?"

Father Chevarty nodded, and a little afterwards he left her.

Joyce was deadly serious in her last words to Alan.

"You'll not forget what we talked over—the Insomnia trap?"

"I'll not forget. But he may not walk into it, Joyce. He's shrewd, he's crafty."

"You can be shrewder, Alan! You can make him walk into it. Let him think he's got you beaten and hogtied. Hide what you feel. And don't underestimate Superintendent William-son."

(To Be Continued.)

Days Edison's Home

Henry Ford Moving Home From Ontario To Michigan

The childhood home of the world-famous inventor, Thomas Alva Edison, at the village of Vienna, near St. Thomas, Ont., has been purchased by Henry Ford and will be removed and re-erected in the Ford historical settlement at Dearborn, Mich., it was reported. Mr. Ford, a friend of Edison's, has expressed the preposition. The house in which the late Mr. Edison spent his boyhood summers is owned by his grandfather, Hugh Samuel Dixon.

While in Vienna, Mr. Henry Ford and party had supper at the Vienna hotel, part of which is said to be one hundred years old The outside walls of this part are made of one-inch thick boards, laid inches wide, piled one upon the other

Many stories are told by old residents of times in the old hotel in long-ago days and open bars, when Mr. Ford found freely and arguments were often settled by a fight, one of which, it is said, ended in the death of a man.

The hotel is now owned and operated by W. C. McDonald, who, while working in the ground floor of the house, has dug up a number of interesting old coins.

Under Baldwin's Rule

Bankers Prosperous Without Beer and Liquor, Says Mayor Of Nassau

Malcolm Muggeridge, writing in the Fortnightly Review, says, the struggle for bread in Nassau has now begun in earnest. Of the 12,000 questions are superfluous. It is war between the Government and the possessing and this year's spring sowing will be a—perhaps the—crucial test. As after fifteen years of Bolshevik rule, large areas, once the most fertile, of South the North Caucasus, the Ukraine, and the Volga districts, are quite without bread; the population in the most fruitful areas, starving; even in the large towns the foodshortage is acute, and every day grows more acute. More serious, the seed has been eaten, and there is no seed for next year's crop.

Nassau, at least 70 per cent. of livestock and horses have been killed to eat or have died of starvation.

Palestine's Early Farmers

Old Canaanites Were Sharpened Flints Plowed To Shed

Palestine had its busy farmers 10,000 years ago, Drs. George McCurdy of Yale University asserts this declaration to the annual Philosophical society at Philadelphia. They were tillers of the soil, farming man twice as far back as did the Neolithic man. Dr. Grant exhibits skeletons of these long-headed, strapping Palestinian peasants. The university's expedition brings back the most primitive sickle ever seen in Palestine, and their grain was sharpened flints fitted to a crooked stick.—Christian Science Monitor.

Paris Needs Super Cats

To cope with the plague of rats which has been causing great damage in Paris, the municipal council has just voted to establish a cat farm for breeding and training cats of special strength and cleverness. City officials hope that these ordinary cats would be found by the rats.

Use ST. CHARLES MILK and your cake, puddings and custards will be richer, creamier, of finer texture. Delicious in coffee, too! Try evaporated cream and for vegetables, 2 parts milk, 1 part cream. Get ST. CHARLES MILK today.

ST CHARLES MILK

Little Helps For This Week

"Let us not therefore judge one another any more; but judge this rather, that no man put a stumbling-block or any occasion to fall, in his brother's way."—Romans 14.13.

My mind was rolled with small cares And I said pettish words, and did not pray

Long-suffering patience well, and now I pray

My trouble for this sin; in vain I pray

For foolish words I never can unsay.

—H. S. Sutton.

A vacation arises, and our experiences of vacations in the past dates from taking it patiently. We may as unkind thing and another is hindered in learning the holy lesson of charity that thinketh no evil. How sadly has we may hinder without word or act. For wrong feeling is more infectious than wrong doing, especially the vertues please of ill-temper, gloomiess, touchiness, discontent or irritability, do we not know how catching these are?—F. R. Havergal.

Preserving Old Homes

Historical Associations Lightly Regarded By Modern World

Without the veneration for the old names of streets, cities and counties, some of the members of the House of Commons sought to change the names of the electoral ridings during the debates of the querying committee. In times, Rocky Mount received more to be called "Brampton," a name more associated by the past Lengthen. At one time there was in Victoria, British Columbia, a street called "Tiny Cage Walk," perhaps the most charming thoroughfare in the Capital. Along came the improved brigade and it became "Fort Street" into Simcoe Street. We may doubt if things look to Adam, but there are many who would show a descent rather than an ascent in culture. Preservation of old names is also a means regard for the historical and the memorial.—Hartebeeks Record.

One Big Advantage

The one crop farmer, who buys all his food at the village grocery and meat market has a head of factory production. The farmer who produces his own food to at least sure that he will never go hungry. And that, in times like these through which we have passed, is an important worth saving.

Reserve Producers

A traveler is operated in the southern waters of France on which fish are frozen alive after being caught. The fish are then kept at a uniform temperature of over 20 degrees below zero, so that they can be transported without losing their freshness.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel

You are "feeling good" simply because your liver is working right and pouring enough bile into your digestive tract to digest your food and eliminate the waste. When bile is not flowing freely, food spoils in the bowels, and you feel sour, sunk, sick and miserable.

Don't you need to a liver stimulant. Nature's own way? Then get from your druggist a 75c package of Carter's Little Liver Pills. Purely vegetable. Gentle, but thorough. Make you feel like a new person. Ask for Carter's Little Liver Pills by name. Refuse substitutes. Only 25c at all druggists.

SPECIAL

One used 30 foot Gold Medal Grain Cutter with Power Lift. Two sets of Discards. This is a real busy and is priced low for quick sale.

The St. George Tennis and Badminton Club will hold a Tennis Dance on Friday, June 23, in the Memorial Hall. Refreshments. Good Music. Dancing 9 till 2 a.m. Admission 50c each. Everybody welcome.

LOCAL NEWS

Sunday being a fine day, a large number of Fort people spent an enjoyable time at the Sturgeon river.

The farm of this popular pair is reaching far and wide, people from Edmonton are bringing their lunch and making a day of it.

* * * * *

Mr. E. D. Crump, formerly of Lamont, has opened an office in the Williamson Block, Fort Saskatchewan. Mr. Crump is well known throughout Northern Alberta, having come to this Province in 1910 as a partner of the late Judge Morrison at Vegreville. In 1914 he removed to Lamont and carried on business there until 1920, when he discontinued the general practice of the Law for the purpose of specializing in Patent work. Mr. Crump has an extensive connection with manufacturers and buyers of Eastern Canada and the United States, and will continue his work as a Patent Attorney and Agent for the commercialization and marketing of meritorious inventions. He will also undertake a general office for the transaction of all forms of financial and commercial business, with special attention to legal conveyancing and matters relative thereto.

Caragana used for hedges should never be pruned in a pot hole or low spot where water may lie for a few days in the spring. The plants are sure to die under such conditions.

Here and There

Gasoline sold in Canada during 1922, according to figures compiled by the Dominion Bureau of Statistics, amounted to 343,452,000 gallons. Nearly half the total was consumed in the Province of Ontario.

The recent Canadian census reveals that of the population of Canada fifty-two per cent. are of British origin; twenty-eight per cent. French origin; seventeen point five per cent. all other European races, and about four-fifths of one per cent. Asiatic.

The Saskatchewan Department of Natural Resources will liberate about 2,000 nine-week-old pheasants throughout the province of Saskatchewan during the months summer. The birds are those held in captivity at Moose Jaw prior to liberation.

Despite a somewhat late season this year, crop conditions throughout the Prairie Provinces promise cause for optimism in the opinion of J. M. McKay, general agricultural agent, Canadian Pacific Railway. He based his view on improved moisture conditions and generally growth reports which at some points are the best since 1918.

Despite a considerably increased crop in Canada and the United States, barring several months, the Imperial Grocer advises recently issued the 21st year of Australia by Sherbrook Sidney Sharpe, Commissioner of New S. Allen Treasurer, Canadian visit terminated with a brown party at the Chateau Frontenac at which 250 members were present.

FORT SASKATCHEWAN RECORD

Published Every Wednesday G. Neale, Editor and Publisher
WEDNESDAY, JUNE 21st, 1923

Subscription to the School Board report the teachers of the Fort School will remain intact for next year. The teachers are signing up their contracts for next term at a slight reduction in salary.

HOW IS YOUR SUBSCRIPTION

We have a number of subscriptions due to the Record at this time, which we would be pleased to see paid up, especially at this time when advertising revenue has dropped almost to the vanishing point and subscriptions become a vital factor in whether the paper will continue to circulate or not.

We have a number of subscribers who have renewed their lease on the local paper, to them we appreciate it very much. A phone call to the office, your paper will tell when your subscription expires.

From now on we will be armed with subscription blanks and will be prepared to accept your offering with thoughtfulness.

SCOUTS CAMP AT STURGEON

A number of Scouts from 2nd Troop Edmonton, spent a very enjoyable time last week-end at the Sturgeon River.

Camped at the "Dam" in tents of all sizes and colors and under the supervision of the scoutmaster, the boys had a whole of a time at swimming and cooking out.

West Street, New York, is said to be the busiest water-front street in the world.

A Famous Advertiser

One of the most prominent advertisers in the annals of success was Robinson Crusoe. He knew what he wanted—a ship—and he put up an ad. for one. He flung a shirt on a pole at the top of his island; that, in the language of the sea, was plain to every sea-faring man.

The circulation was small—there was no other medium—but Crusoe kept at it despite the fact that he got no enquiries for a long time. He changed his copy—no one guessed after another frayed out—and in the end he got what he wanted.

Suppose Crusoe had taken down that signal after a month or two and declared "advertising doesn't pay" when would he end his story he now?

Put up your signal and keep it there. Crusoe advertised under very discouraging circumstances. You've got a more thing—it is only necessary to have the patience, persistence and pluck of Robinson Crusoe—and the good ship "Better Business" will hear down upon you with flying colors.

VOL. 13 No. 13 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JUNE 20th, 1923 $1.50 PER YEAR IN ADVANCE

Town Council Holds Business Session

A regular meeting of the Council of the Town of Fort Saskatchewan was held in he Secretary's office on Wednesday the 21st. June at 8.00 p.m.

Present Mayor G. T. Montgomery, Councillors Fillmore, Magor, Graham and Neale.

The minutes of the last meeting held were read and adopted.

The program of the 29th. Annual Convention Union of Alberta Municipalities being held at Calgary on June 28 and 29 was considered. Mayor Montgomery will represent the Town of Fort Saskatchewan at the Convention.

The provisions of the local tax arrears consolidation Act was discussed at length by the Council. With regard to the tax sale advertised to take place on the 22nd. June, a motion was passed that the sale be postponed for 15 days; to take place on July 7th.

A resolution was adopted; That, in future, any article or supplies bought from any of the Town stores be obtained only with an order signed by the Secretary-Treasurer.

The following accounts were passed for payment:—Alberta Government Telephones $7.80; Calgary Power Co. $117.00 for streets, $8.50 for Town Hall, and $1.40 Memorial Hall; The Record $15.15; Royal Alex. hospital $74.80; J. A. McPherson $5.55.

Taken from the Files

19 Years Ago Today

July 1st., 1914

A gang of twenty-five men are pushing work ahead on the Alberta Farmers Co-Operative Society elevator her.

The annual Gorman picnic held in Hennig's Grove on Wednesday July 1st., was as usual a most successful affair.

At the Catholic Children's Sunday School picnic held in the Exhibition grounds on July 1st, Mrs. Majeau, Mrs. A. Lamoureux, Miss L. Moret Miss A. Moret, H. Brennan, and J. Fisher served out a good supply of sandwiches, cakes, and ice cream at different intervals.

Coming Events

The Fort Community Club will hold a very important meeting at the courts to-night (Thursday) at 7:30 p.m. All members are requested to attend as this meeting is urgent.

His Grace Archbishop O'Leary of Edmonton will administer the Sacrament of Confirmation to a class of candidates at the Catholic Church on Wednesday, July 5th at 10 a.m.

BEAVER LUMBER (NORTHERN) LIMITED

have the following specials to offer you:—
Tamarac Fence Posts, each 10c
½x8" Number one Spruce Shiplap ..... $18.00 per M.
Rough Native Lumber $12.00 per M.
No. 2 Spruce D.&S. .... $18.00 per M.
Spruce Culls ..... $10.00 per M.

TENNIS NEWS

Playing in the inter-mediate tennis league on Tuesday evening at Glenora and Community Club, the former Club won 7 out of the 9 events.

Miss Mary Oxley playing in the 2nd. ladies singles was in Edmonton, while Mrs. T. W. E. Henry and Two Henry won in the mixed doubles here.

All events were hotly contested throughout, and some very fine rallies were recorded.

A fine crowd of enthusiasts were present and enjoyed the matches.

After the games, a dainty lunch was served to the visitors.

Fire & Gas Alarms To Be Demonstrated Thursday

On Thursday afternoon at 2 o'clock sharp the Gas2 will blow the Fort Fire Siren, and the Gas1 alarm will also be given. These demonstrations are to familiarize the people of the town with the Siren and the Gas1 Alarm, the former is a long shrill blast and the latter more of a toot, so when you hear them on Thursday don't get panicky and look for a fire.

There is a very distinct difference between the two and Mr. Warden McLean suggests that every one living in on Thursday so that they can tell which is which when either of the calls are sounded in earnest.

Edmonton Exhibition

JULY 17 to 22

With the cheapest railway rates ever in effect for the Edmonton Exhibition, and tickets selling in advance at the cut rate of five cents per mile, it is anticipated that the Edmonton Exhibition will again request its success of 1922, when it had the honor of being one of the three Class A exhibitions on the American continent to reverse the history of the previous year and show a goodly increase. Not only are financial indications in the way of cut rates offered to patrons, but this year's program is very attractive, including seven days of horse racing, and the one this year for the first time of starting choice for the race horses, thus ensuring quick and snappy starts for the races.

The grand stand program is one of the finest ever secured for Fair patrons, featuring the gorgeous and spectacular "Bird of Paradise" Revue which was purchased in France to fill American and Canadian engagements. In addition, a number of outstanding vaudeville acts have been secured. The Castle, Ehrlich & Hirsch shows will furnish a midway that will please the most exacting tastes, and only a party will this year be made up to "do" the route of mystery, magic and entertainment, and the rides; formerly this sort of entertainment was left for the young, but now staid dignitaries of officialdom, and tired business men with their wives and families, find renewed youth and relaxation from business cares in a trip of fun around the midway.

Basketball and Horseless Pitching tournaments, daily Old Timers' Reunions, and a full and well rounded program awaits the visitor to the Edmonton Exhibition this year, as well as a complete showing of all kinds of live stock and agricultural products.

Cut rate tickets must be bought before midnight of July 18th; these tickets are on sale at many points throughout Alberta, or from the Edmonton Exhibition Office.

Who Owns Canada?

The question which appears as the heading of this article was included in examination papers recently submitted to pupils in Montreal schools coming under the jurisdiction of the Catholic School Commission of that city. Answers to the question revealed much vague and amazing knowledge regarding the status of the Dominion that the Commission appealed to the Secretary of State at Ottawa for an authoritative definition of Canada's relations within the British Commonwealth of Nations, and among the world of nations.

The answer, given over the signature of Hon. C. H. Cahan, Secretary of State, defines Canada as a self-governing state of the British Commonwealth of Nations. It sets forth that Great Britain does not own Canada any more than Canada owns Great Britain; that Canada and Great Britain are each independent members of the British Commonwealth, and that the Dominion belongs to the people of the Dominion.

This answer should set at rest a large amount of uncertainty among Canadians regarding the official status of the land of their birth. It was evident from the answers submitted in the school examinations at Montreal that the subject had not been sufficiently emphasized by the teachers, and the secretary of the Catholic School Commission has stated that in future more attention will be paid to it. It would be well if this was done, not only in the Catholic schools of Montreal, but in all schools throughout the Dominion.

Canada is today an absolutely free and independent nation,—just as much so as any other nation in the world. The King of Canada is George V. He is also King of Great Britain, King of Australia, Emperor of India. In Canada the King is represented by the Governor-General, who is appointed by the King on the advice of the Government of Canada. At one time the Governor-General was appointed on the advice of the Government of Great Britain, and he represented that Government, as well as the King, in Canada. He did not, however, represent the Crown only, while the British Government is represented in Canada by a Commissioner in the same manner as the United States, France and Japan are represented by Ministers, and Canada is represented in Great Britain by a Commissioner just as other countries are represented there by Ambassadors and Ministers.

The term and status of "Commissioner" is employed between two Dominions of the British Commonwealth because each have a common sovereign and such a sovereign does not send an Ambassador or Minister to represent him to himself as he does to represent him to other sovereign nations. The Crown being represented in the person of the Governor-General, the King's several governments are represented the one to the other by Commissioners.

The question may be asked: If Canada is an independent, fully self-governing Dominion of the British Commonwealth of Nations, why does it not enjoy the power to amend its own constitution, and why are appeals taken from decisions of the Supreme Court of Canada to the Privy Council in Great Britain? Other nations, it may be urged, have power to amend their own constitutions, and their Supreme Courts are final courts of appeal.

The answer is, that Canada can exercise both these powers whenever the people of Canada desire to do so, and probably the time will come when they will so decide. Up to the present, however, Canada has preferred to retain to itself the right of carrying judicial appeals to the Imperial tribunal of the Privy Council, especially in all matters in dispute between the Federal and Provincial Governments. There is no compulsion that it should do so, and it can refrain from so doing, or can segregate that right should it deem it wise to do so.

So, too, in regard to amendments to the Canadian constitution. The B.N.A. Act created a confederation of Provinces, reserving to the Dominion certain exclusive powers on the one hand and certain other exclusive powers to the Provinces on the other hand, while in regard to some matters jurisdiction was divided between the two authorities. The Provinces, therefore, have as much right as the Dominion itself to say when and how the constitution shall be amended, and up to the present these certain of the Provinces have refused to leave the matter as it was at the time of Confederation, with the British Parliament making such amendments from time to time as the Parliament of Canada, with the consent of the Provinces, may request. But Canada can secure full and final control over its own constitution if and when the people so decide.

So, the complete and final answer to the question: "Who Owns Canada?" brings us back to the definition given by the Secretary of State at Ottawa—the Dominion belongs to the people of the Dominion. They are masters of their own national destiny. Nobody can tax them but themselves; they pay tribute to no other nation. Canada can make its own treaties with other nations irrespective of the effect such treaties may have upon other Dominions of the British Commonwealth.

But, because the Dominion belongs solely to the people of the Dominion, the great responsibility rests upon them as citizens of a sovereign nation among the nations, with absolute equality in the League of Nations, to govern themselves, and to so conduct their national and international relationships, as to command the respect of and wield a great influence for good in the world. There should be no spirit of a narrow nationalism in Canada; quite the reverse.

An interesting announcement that women need cosmetics in the Middle Ages. Women still use cosmetics in the middle ages.

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months.

You cannot tell when it comes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Joy-Riding By Air

New York People Have Money For Extravagant Notions

Late one night the staff of St. Hubert Airport, near Montreal, had word that an airplane was coming in, and they turned on the beacon and lights.

At 12:30 midnight the plane arrived from Roosevelt Field, New York. There alighted two men and a woman, in evening clothes. A taxi-cab was waiting, and it hurried them away to Montreal.

Just before four o'clock the party returned, boarded the plane, and were back in New York for an early breakfast.

Those between sunset and morning these people travelled to Montreal, had three hours in that city, flew home in time for work. The cost of the outing was about $500. If the incident has a moral perhaps it is that New York still has money for extravagant notions, and that the new beer has not destroyed the strong attraction of Montreal for its wealthy neighbors.—Ottawa Journal.

HAD RHEUMATISM FOR 20 YEARS

But None Since 1920

This man must have something like a record for suffering. He says:—"Since 1918 up to 1920 that is 20 years—I have been a great sufferer with rheumatism. I am pleased to say that since 1920 up to date, I have been free from that dreadful pain, simply by taking Kruschen Salts—and nothing else. I may say that 20 years is a long time to have that awful rheumatic pain about one."—W. P.

Your rheumatism is just like his and everyone else's. It is caused by uric acid—acid crystals getting into your joints. Kruschen will dissolve those crystals away. Remember—if you keep up the "little daily dose" afterwards, it will never be possible for them to form again. Rheumatism will be gone for good.

Use Of Anti-Toxin

New Method Of Diseases Of Children Is Reported

New developments in treatment of two diseases of children, scarlet fever and whooping cough, were reported to the American Medical Association.

There is hope that it will be possible to immunize infants against whooping cough just as they are protected from diphtheria, by treating them with a vaccine, said Dr. Louis Sauer, of Evanston, Ill.

Tests showed, he said, that not one of the children he vaccinated contracted the disease.

Use of anti-toxin in cases of scarlet fever has been definitely shown to reduce severity of the disease, and to avoid complications, Dr. Lake W. Hunt, of McCormick Institute for infectious diseases, Chicago, reported, summarizing study of more than 1,000 cases.

The anti-toxin should be given within the first day or two after the patient becomes ill with scarlet fever, he said.

Smashing the Atom

Powerful Missile Devised By Scientists Atomic Power Peril

The most powerful bombard yet devised for smashing the centres, or cores, of atoms, which are believed to hold the secret of the new power to be built, was described before the American Association for the Advancement of Science.

The bombard is a heavy hammer in the device, the intensity small but enormously powerful core of the heavier atoms. The atom of hydrogen which is first like a bullet into the cores of atoms that are to be smashed. Lawful result of its use were reported by Drs. Gerald H. Lewis, Stanley Livingston and Brand O. Lawrence of the University of California.

Renewed Hail Of Bombs

Renewed at almost all of the night hail of a thousand bombs with an incredible effect on her mentality and only partial paralysis on the left side was reported to the American Medical Association. Twenty minutes after the operation, Dr. Gardner said, "consciousness declared to change is intellect."

Permanent Exhibition Planned For London

Alexandra Palace May Be Turned Into Amusement Place

There is a prospect of London being endowed with a permanent "Wembley Exhibition." The Alexandra Palace, on the northern heights of London, Eng., which has long been the despair of all concerned with it, has been taken in hand by no fewer than 16 local authorities, who have recommended grants for its modernization which will amount to $1,000,000 it is proposed the Palace shall be so renovated as to convert it into a first-rate place of exhibition and general amusement.

The history of the Alexandra Palace is a dreary one. It was opened exactly 60 years ago as a northern rival of the Crystal Palace, which stands on the southern hills bordering London. A fortnight after its opening it was burned out. Shortly after it had been rebuilt it was compelled to close owing to lack of funds, and remained closed for nine years.

For 20 years following it had fitful bursts of activity. At length money was subscribed to save the park from falling to the speculative house builder. The park, which extends to almost 200 acres, is a valuable acquisition, but nobody ever has been able to do anything effective with the great sprawling palace itself. During the war it made itself useful, first as a barborage for Belgian refugees, and later for German prisoners.

The only good thing in the Palace is the great organ. This was the masterpiece of "Father" Henry Willis. Music-lovers of North London a few years back contrives to find the money to make the organ as good as new, and week-end concerts at the palace have been popular.

Social Progress

Must Keep Pace With Scientific Advances, Says Hon. R. J. Manion

Social progress must keep pace with scientific advance in order to bring about an equitable distribution of the world's products, Hon. R. J. Manion, Minister of Railways and Canals, told the Canadian Electrical Association at their annual banquet at Lacorne-in-Quebec.

Dr. Manion urged that not only public men but business men and scientists give serious thought to bring about social reforms that would enable a greater number of the people to share the benefits of what they produce.

The minister made electrical development the basis of his address and touched also on the problems of the day and the world economic conference. It was inconceivable, he said, that the conference would fail to achieve its end. If there should be difficulties between the European nations and United States, Canada would be in an excellent position to act as an intermediary, Dr. Manion said, but he did not anticipate any such difficulties would arise.

He expressed the belief that the vast majority of people in Canada were opposed to the export of electrical power, not only because it was a direct loss to industrial possibilities in the Dominion, but because of the great difficulty in shutting off power from a friendly country once connection had been built up in the power exporting area.

Cypress Hills Park

Highest Elevation Of Any Part Of Saskatchewan

Cypress Hills Park, known as the Highlands of Saskatchewan, will be officially opened this year. This park is 30 miles south of Maple Creek and has the highest elevation of any part of the Province of Saskatchewan. Some of the streams in the park flow south to find the Missouri River and some flow north to join the Saskatchewan River and then on to Hudson Bay. The main park is 4,500 feet above sea level and part of it is even higher than that. The famous mountain resort in Alberta. New buildings in the park include cabin lodges with 18 large rooms and a number of log cabins.

Flax was grown on 34,000 acres in England in 1870; averages prettty the only flax produced in on the King's bodyguard estate.

Ingenious Excuse For Speeding

Thought Plea Regime Was Coming Had Ben Franken Died

The excuses proffered by our young men motorists when caught speeding are often curiously lame and hackneyed complaints a correspondent of the Manchester Guardian.

Why not emulate a girl friend over in San Francisco, who declared, truth positively radiating from her big blue eyes, that she thought a fire engine was behind her, and that it was up to her to hurry to get out of the way. She was cleared by motorcycle policemen, and did stop until two shots had been fired by them. Why are not our own traffic police encouraged by the "Yard" to tackle their job in this modern and virile way? At least a machine-gun might be stationed at many spots along bypass roads during summer week-ends to increase respect for the law, even if it were to fire only blank.

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last few years—a quantity sufficient for a year's world supply. He points to this as an answer to the people who say there is no over-production and that the problem is only one of underconsumption.

The viewpoint thus set out is the viewpoint of a large element in the West which favors agreement for curtailment of production and control of distribution.

Used Discretion

When a herd of 36 elephants paid an attention to the furious blowing of a locomotive whistle as they leisurely crossed a railway track between Bulawayo and Gwelo, Africa, the engineer had to stop his train until they were out of the way.

Sees World Wheat Surplus And Believes Curtailment Of Production Is Only Solution

In the April issue of Canadian Business, written under the pen-name of John Marquis, an authority on the wheat situation had an article in which, after analysing the situation as he saw it, he reached the conclusion that no real evidence exists of a world surplus of wheat. In the current issue of this organ of the Canadian Chamber of Commerce, John J. McFarland, general manager of the Canadian Co-Operative Producers Limited, makes a spirited reply, in which he questions the basis of this conclusion, puts forth figures to indicate that there is a surplus and argues the need of acreage reduction.

Mr. McFarland states that statistics show that the visible supplies of wheat had commenced to accumulate before the unusually good crop of 1928 and since its deposal they have continued to accumulate. He quotes the International Institute at Rome to the effect that wheat stocks will experience a further appreciable increase during the present season, that exportable stocks will have risen from 365 millions on August 1 last year, to 650 millions by next August. Total international trade for the year, he states, is estimated to be somewhere between 630 and 664 million bushels, so that the carry-over plus surplus really represents 100 per cent. of the total international trade for a year. The surplus, he says, is therefore a quantity of paramount importance—a price making factor." Based on the present world's acreage and with average crops to be taken, the world's surplus will continue to increase.

As regards the position of Canada, Mr. McFarland sets forth that before the war this country supplied about 18 per cent. of the world's international trade in wheat. Since then Canada has increased her acreage greatly. If this country continues its recent acreage and reaps average yields per acre, it will appear necessary, says this authority, that Canada should export very close to 18 per cent. of the world's trade to dispose of its crops. Does anyone believe, he inquires, that other countries are going to leave to Canada the privileges of supplying this proportion.

What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advance in prices is by a world-wide reduction in acreage. In such a movement, he thinks, Canada should be a leader because in the past twenty years she has increased her acreage by a much greater percentage than any other exporting country. He goes on:

"The Laws of Nature of the Acts of Providence might conceivably reduce production on the river-existed and acreage, but such reduction can only be of a temporary nature, because after all these Laws, over a period of years, will make their averages. Therefore, it appears that there is only one way of permanently correcting the abnormal condition and that is by the actual reduction in acreage."

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last few years—a quantity sufficient for a year's world supply. He points to this as an answer to the people who say there is no over-production and that the problem is only one of underconsumption.

The viewpoint thus set out is the viewpoint of a large element in the West which favors agreement for curtailment of production and control of distribution.

Used Discretion

When a herd of 36 elephants paid an attention to the furious blowing of a locomotive whistle as they leisurely crossed a railway track between Bulawayo and Gwelo, Africa, the engineer had to stop his train until they were out of the way.

West African Colony

Germany Seeks Room For Expansion And Means To Pay Debts

Germany is asking the world for an African colonial empire.

A memorandum prepared by Dr. Alfred Hugenberg German minister of economics for the economic committee of the world conference said there were two possible ways of increasing Germany's capacity to meet her international debts first, by giving her an African empire where large public works schemes could be carried through or, second by operating other new territories "in the people which has not enough space in which to live."

$10

GOOD LOOKING HOME WEAR DRESS INEXPENSIVE—MAKES KITCHEN CHORES EASY

Every housewife knows she won't have too many home ensembles that will tub and tub and always come out smiling.

And today's model is just lovely. It has the suitable air for the house, garden, porch, marketing, etc. And incidentally, it's delightfully slimming to the heavier build. The diagonal hip opening reduces.

The dress is dark blue and white dainty. The apron is white dainty which is used for the dress trim.

And isn't the one-piece apron attractive? And it won't slip off the shoulders either, for the suspender straps are sewed beneath being hidden.

Design No. 910 includes the dress and the apron in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 16 requires 3¼ yards of 39-inch material for dress with 1½ yards of 39-inch material for apron and dress collar.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canadian Mosquitoes

Almost Sixty Species Of This Pest Found In Canada

There are about sixty species of mosquitoes in Canada, many of which feed on the blood of man Although the majority of them, particularly the kind known as Aedes are most troublesome in field and woodland, in certain seasons, as at present as the result mainly of heavy rainfall, they often cause considerable annoyance indoors as well Their attacks are most noticeable at dusk and in warm, dull, humid weather In autumn and winter also complaints are frequently received of the presence of members of mosquitoes in clothes and basements These complaints are for hibernating females of the genera Culex and Aëdes which pass the winter as winged adults in protected situations Attacks from them are rare However in many parts of Eastern Canada, the cosmopolitan house mosquito, known scientifically as Culex pipens is now well established especially in towns and cities, and in one large city has become a public nuisance This species is found not far from dwellings which it enters being particulary at night Boy housekeepers and others can combat the mosquito nuisance is fully explained in Mosquito Control in Canada, a pamphlet issued on request by the Dominion Department of Agriculture

No More Constantinople

City Now Called Istanbul and Is Not Turkish Capital

The first two things to remember about Constantinople nowadays is one that it is not the capital of Turkey and that it is not called Constantinople The capital is Angora where the President Mustapha Kemal resides and lives on his estate "Cinechiff" and Constantinople is called Istanbul It is a city with a million inhabitants and about fifty thousand starving dogs, but some time ago they were taken off to a deserted island with no food or water, and they are now all dead of thirst.

One Great Advantage

School days being once more over there will be many boys and girls with nothing to do and no place to go. Here is where the farm presents advantages over city life The farm boy or girl can be given some responsibility or some task that will be useful to them and not disadvantageous or costly to the parent's farm youth of this kind enjoy their vacation days in idleness.—Farmer's Advocate.

Tube Of Sugar

To utilize surplus sugar, Czechoslovakia is converting it, mixed with lime and other ingredients, into fodder for horses, cattle and pigs.

Present Year Marks The Diamond Jubilee Of The Royal Canadian Mounted Police

Coal Not a Rock

Every Inch Is Made By Vast Pressure

Coal is not a rock it is made of vegetable matter. It is really an amorphous thing like a wax-ammonite jelly-like and soft and of olive brown color It has many constituents round its mouth and when it has caught its food it floats it through its body on a stream of water, which it at continuously sucking in The sea-water contains lime and somehow the coral animal draws the lime from the water and uses it to build a tiny platform for it to rest on Gradually it makes a home for itself out of lime, and in that it lives till it dies Then the next coral animal comes along and builds its home on top of the old one, and so on After thousands of years billions of these creatures will have made a huge mass of lime, which come above the surface of the sea and make a coral island The Great Barrier Reef, off Australia, is hundreds of miles long, yet every inch of it was made by these tiny creatures

Leaves Nothing To Chance

Electricity Keeps Tab On Crowds At Chicago Fair

Electricity keeps Century of Progress officials at Chicago informed as to just what the number of persons inside the grounds is at any time Turnstiles at the various entrances are equipped with counting and recording devices with a central dial in the comptroller's office. A glance at the dials tells how many persons have entered the grounds, how many left and what entrances and exits were used. The information is used in distribution of guards and regulation of entrances, to notify transportation companies when there is a rush from the grounds and at what exits, and to keep communication informed of the size of the crowds so they will not run out of supplies.

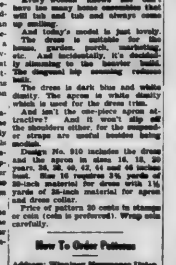
Wrapper and All

The general practice in wrap things in colophane has its disadvantages Take the case of the near-sighted man who ordered a ham sandwich at a lunch counter for enjoyment.

"Was that sandwich quite fresh that you sold me?" he asked.

Quite so," replied the lunch counter attendant. "Each one is wrapped in transparent, airtight paper."

"Gosh!" said the customer "I wish I'd known that."



Showing little efforts of the strain of their hazardous flight, Captain Mariano Barberan (left) and Lieut. Joaquin Collar, Spanish Army flier, are shown at Camarguy, Cuba, on the completion of their record flight from Seville, Spain, to the plane, "Cuatro Vientos" rings. Their route took them over 4,000 miles of ocean.

AFTER THE RECORD HOP FROM SPAIN

Historical Garden Roses

Origin Of Broad But Hybrid Perpetual Roses In Canada

At the end of the eighteenth century the China rose with its habit of continuous bloom was brought to Europe says the Dominion Horticulturist, Dr. Marcus in discussing the probable origin of beautiful hybrid perpetual roses in Canada Before very long hybrids of the China rose with French and Provence roses were raised They were called Hybrid Chinese, but took after their European parents in that they flowered only once in the season Three hybrids and the damask rose were then crossed, and Rose du Roi a damask perpetual, was introduced about 1819 This rose was called perpetual because it had a second blooming season in autumn In 1837 Gloire de Rosanier appeared filled out by rapid improvement of the shape and in the fifties such garden favorites as General Jacqueminot and Jules Margottin were introduced In Canada many of the hybrid perpetuals bloom once only in the season

Money From Trees

Australia, strange as it may seem is teaching its young people that money grows on trees. Under school guidance state school children of Victoria have set out 4,000 acres of saplings that will be worth $1,000,000 on maturity Profits from the sale of bark and timber will be used to provide scholarships, library and radio and sports materials.—Christian Science Monitor.

WORLD HAPPENINGS BRIEFLY TOLD

The 50,000 employees of the General Electric Company in the United States in various parts of the United States will receive a five per cent. increase in wages effective July 1.

After serving as organist of Christ Church, Aughnacloy, for 53 years, and breaking all records for length of service as organist in England, Miss M. Cranley aged 88, has retired.

He Ishii has been appointed Japanese consul for western Canada with headquarters in Vancouver and will arrive this month. He succeeds T. Hachiya, who returned to Tokyo, Japan, seven months ago.

Capt. Hubbard, noted Ottawa Feminist and clubwoman, died unexpectedly at a sanitarium at Anchorage-berg, near Hanover in Germany last month after would have been 76 years old.

Revision of the intercommunity income-tax agency will be used by the Toronto library board to recover books loaned and not returned. The agency will receive 25 cents for each book it retrieves.

The British Government has announced that the King has approved the appointment of Lieut.-Col. F. B. Lentz to be assistant commissioner of the Metropolitan Police, succeeding Major Sir Percy Fraser, who has been retired on pension.

Princess and Florence Collection of the Nova Scotia Steel and Coal Company, Sunday bowling said for the first time since the miners refused two months ago to work under wage conditions. They accepted a compromise wage rate.

Vancouver officers of the United States Department of Commerce have been closed. Casualty reductions in appropriations for the commerce department are responsible. The only commerce office now left open is in Montreal.

Agricultural department officials foresee a re-opening of the market in Canada's cattle in New York state, practically closed since Oct. 1, 1925, when an order went into effect requiring cattle imported into that state to be certified free from Bang's disease.

The death of Senator Perrelle brings the list of ministerial vacancies to nine, the largest number of unfilled seats in the red chamber for many consecutive time; Saskatchewan, Ontario, New Brunswick and Quebec are each short two members, while Nova Scotia has one appointment to be made.

Adventure in Bank

Boy From Manitoba on Schooner Quest In Alaska

Ten boys from Manitoba, ranging in ages from 14 years to 17 years, have sailed from Vancouver for a summer of scientific research and adventure in northern Canada and Alaska.

They will proceed to Skagway and go into Whitehorse where they will build boats for a run down the Yukon River to Dawson, Fort Yukon and Nenana. They will rough it in the Arctic country on educational quest, full of 1,200 miles. They will collect botanical specimens for the University of California and do some prospecting.

Hugo Boisclumay is in charge of the expedition.

Auto Production

May Production in United States Higher Than Ever Before

May production of motor vehicles by member companies of the United States Automobile Chamber of Commerce was the highest in 30 months, according to a preliminary report.

Output totalled 371,688 units, a gain of 33 per cent over April and of 52 per cent over May, 1926. Production for the first five months of this year, on the basis of these figures, totalled 1,630,139 units as compared with 1,201,000 in the same 1926 period.

The association includes all motor automobile except the Ford Company.

Many of London's 22,000 Swiss are now receiving quotations.

A Strange Assignment

Dr. Alfred Reisner, Finds Affairs Where He Studied For the Clergy Fair

Returning from what is perhaps one of the strangest assignments ever given to a man, Dr. Owen D. O'Neil, of Chicago, arrived in Montreal on the Canadian liner "Aurania." Dr. O'Neil has been acting on behalf of the Chicago World Fair Ambassador Association. He just completed a tour of Africa from Algeciras to Cape Town, and successfully negotiated the sale of various instruments throughout the Dark Continent.

He has also collected a large number of specimens of native art and primitive art and workmanship. After some months' residence in Chicago Dr. O'Neil has set out collected to interesting an assortment of natives and their characteristic work as has probably ever been put together for exhibition purposes. The collection of twenty-two thousand articles with the exhibition material to go on the Canadian liner "Aborigine" will possess a number of specialties in special items of ethnic accumulation and are expected to attract the attention of the public. They will probably create something of a sensation.

Dr. O'Neil is a medical practitioner, but in view of his experience in Africa he was engaged by the Chicago World Fair Ambassador Association to collect an African exhibit. The effort was made successfully. Dr. O'Neil, on his return to Montreal, said he did not have any difficulty in securing the exhibits he required. He found that the British Government and the Belgian Government whose rule extends over many portions of Central Africa, were located the most interesting tribes, refused permission to the collection of any kind for exhibition purposes. There was no such objection from the French colonial department, and Dr. O'Neil was able to secure a large variety of specimens of various types in the Cameroons, Portuguese Africa, and other portions of Central Africa.

Dr. O'Neil's original trip was to have started thence in Cape Town by steamer after which he took the Imperial Airways trip direct to Paris to join the customary stops at places like Bulwayne and Nairobi. Afterwards proceeding from Paris to Addis Ababa, capital of Abyssinia. Every facility was given him to obtain native works of art and primitive handicraft such as he desired.

The typical passenger on the "Aurania," was certainly R. Greene, who is making a round trip in 14 days. He is one of the first eight inches high and claims that he is the shortest passenger of a big family. The youth in his cabin, made for passengers of his height, has had to be altered to accommodate his Hercules figure. The youth's father and mother family of tall men and claims he can trace his ancestry back two or three generations. The family lives in Brazil, he arrived in Montreal, Dominion Express Co. Toronto, and is now in the service of a people in England.

British Post Office

Receives Odd Requests

People Write About All Sorts Of Queer Things

All sorts of people write to the British post office on all sorts of topics.

The weekly letter to a boy says: "I have had some fun with a dog and a cat."

From a correspondent: "My wife and I want those funny stories with a rhyme. I write to know if you have any more. I had found trouble," the postmaster had not filled in the dotted line next to the word "character."

One correspondent says: "My wife has to increase her allowance, and cannot do it. So replied that it was 'no go.' Now she has gone off to her mother's. The first news she'll hear of me is when I am moved my goods from here."

"My yearly tooth have also dogged at long chain."

"I've still got with Shakespeare's language and fancy in all record I am."

Fur Canadian Cattle Trade

At the request of the Department of Trade and Commerce the Dominion Steamship Line has agreed to extend the present Montreal-Newfoundland service to include Canada. The vessel, first of her line to engage in the Canadian trade for over eight years, will sail from Montreal on July 7 and will call at Canadian ports only for Cardiff together with Manchester and Liverpool. Canadian goods shall be consigned.

Millions Of U. S. Tourists

Over Thirty-Two Million Dollars Passed Through International Boundary In 1926

A total of 32,863,819 persons crossed the international boundary between Canada and the United States in 1926, of whom 28,148,782 travelled by bridge, ferry and tunnel. 7,532,000 were motorists crossing on highways and 2,585,037 were railway passengers. The horse-drawn vehicle has practically passed out of the picture, so far as international traffic is concerned, for last year only 94 were reported as crossing from Canada in the United States and vice versa.

Included in the total of 32,863,819 persons who crossed the international boundary were 14,000,000 tourists from the United States who visited Canada for periods ranging from one day to six months.

The heaviest traffic between the two countries is between Windsor, Ontario, and Detroit, Michigan, and Walkerville, Ontario, and Detroit, where ferry services are operated across the Detroit River in addition to one bridge and a tunnel for pedestrians and motor traffic. Railway lines and three systems of railway ferries also cross at this point. Traffic is thickest by all means of the year across the Peace Bridge at the Niagara River at Fort Erie, Ontario, and at Niagara Falls and Queenston. Ont.

The boundary between Canada and the United States extends over 3,000 miles of which 3,100 miles are land boundary and 2,000 miles are water boundary.

Deaf Children Hear

Microphone That Makes Use Of Light and Sound Waves

A classroom in the School for the Deaf at Manhattan, is fitted with equipment enabling children to hear the voice of their teacher, and even their own voices, previously beyond their hearing. It is a microphone hook-up, making use of light and sound waves, designed by Sigurd Sonde, a Norwegian engineer, who began his experiments and for research in this direction.

The microphone is fitted with an amplifier and pupils wear headphones.

Every year British milk suppliers need 60,000,000 new milk bottles to replace losses due to breakages and theft.

Trail Blazers

Bank Of Montreal Opens Branch At Port Of Churchill

"Standing on Franklin's trail of 1819, and looking out over Hudson Bay, where the great explorer of that name died, we ask all our friends to raise their glasses and toast with us, the hardy trail blazers who first visioned Churchill harbor as a world port, and all those who followed to boost for the Hudson Bay Railway.

This was the tribute made by four present-day trail blazers of pioneering spirits, who made a pilgrimage to historic Churchill, and who met in the far north a new land of great wealth and opportunity for Canadians and for the world.

They were John Callaghan, general manager of the Northern Alberta Railways W A Brown, regional general superintendent of the Canadian National Railways, now of Edmonton, and who in 1920 was subdirector of Canadian Pacific Railway construction; Winnipeg; John Hunter, author of "History of Alberta" and other works, and at present secretary and manager of the board of trade, and chamber of commerce Edmonton, Frank Pike, manager of the Bank of Montreal, Edmonton.

Among those who travelled the northbound "Muskeg" train of the summer schedule were Major J G Inkster, district engineer of the Hudson Bay Railway, and T W Tod, who will be manager of the Bank of Montreal at Churchill this summer. He was accompanied by H. L. McKay, who will work with him.

The party were present at the formal opening of the bank on June 19th.

Shingle Industry Revives

All Big Plants in Fraser River Valley Working Full Time

The shingle industry on the Fraser River is booming with virtually all the big plants working double shifts, and employing approximately 1,200 men in the New Westminster district. Some plants have orders sufficient to keep them busy most of the summer Prices have advanced sharply.

Shingle production in the lower Fraser Valley this year is expected to reach 1,200,000,000 pieces of a value of $2,000,000 against 770,000,000 pieces in 1926.

The greatest shingle production means more activity in the woods.

Buying Color Fountain

Unique Attraction At Chicago World's Fair Assembled By Flemish Factory

One of the most unique attractions at the World's Fair at Chicago is the Flemish Fountain of Color Prophesis, in the garden surrounding the Flemish factory and exhibition building.

This gorgeous spectacle is the only one of its kind in the world. It presents in movement harmonies of color, with ever-changing colors, ever-changing color combinations and variations in the size and fall of the beautiful sparkling waters. The whole is accompanied by orchestral by the sounds of the world's most celebrated engineers and architects.

The magnificent Singing Color Fountain is situated in the front of the Flemish factory and exhibition building in the center of the spacious garden, surrounded by trees, shrubs and beautiful flowers. The great pool is 300 feet long and 15 feet wide, out of which rise the graceful lines of the gigantic fountains, the powerful light rays of varying hues penetrating the misty water. This diamond-like spray is constantly bent in the air—all in time with the music. The ever-changing effect of colors and the changing velocity of the water give a complete tune with the music that fills the air from immense radio loud speakers hidden within the walls of the building.

The Flemish factory and exhibition building is one of the main attractions of the World's Fair. The building contains a complete tire factory, showing every step in the construction of tires, and many amusing and interesting dynamic displays of an educational nature.

In addition to that, Firestone has established in the ground "Hall of Science" where one of the features will be a group of rubber trees from the jungles of Liberia, from which Firestone Rubber plantations in Liberia.

SUNDAY SCHOOL LESSON

JULY 3

SOME EARLY LEADERS OF ISRAEL—JOSHUA

Golden Text "Be strong and of good courage, . . . for Jehovah thy God is with thee whithersoever thou goest" Joshua 1 9

Lesson Joshua, Chapters 1 6, 23, 24

Devotional Reading Psalm 119: 1-8

Explanations and Comments

The Charge To Joshua, 1 1 7 — Moses was dead, but the attendant of Moses We hear about him in Ex. 17 9-16 24 13, 32 17, 33 11, Numbers 11 28, 13 16, 14 6-9, 27 18, 31 7, 8, 34 17. Deuteronomy 1 38, 3 28 34 9 As he was one of the spies sent into Canaan from Kadesh some thirty eight years before this, he must have been at least sixty years old when Moses died He was a trained military leader and the right man to lead the Israelites in their conquest of Canaan When Moses was about to lay down his command he laid it upon Joshua as his successor

Moses, my servant, is dead, now therefore arise, go over this Jordan, thou and all this people, into the land which I do give to them, even to the children of Israel. This Joshua heard the voice of God in his soul It was a time not for grief, but for action The marble tablet in Westminster Abbey which bears the portraits of John and Charles Wesley has these words inscribed "God buries the workers, but carries on the work."

He best honors his dead who arises and lays up his tasks with resolute heart strong in the faith that God will not forsake him "What we do in our best moments is the real life," says declared Dr J H. Jowett, "The rest are but days and sleeps in ever deepening meancholy or we can take up our appointed work I like this great, deep, loyal word of Ezekiel: 'At even my wife died, and I did in the morning as I was commanded.'"

The Help Promised, 1 5, 6, 9 — There shall not any man be able to stand before thee all the days of thy life as I was with Moses, so I will be with thee, I will not fail thee nor forsake thee These words must have come to Joshua in assurance in the hour of his need would not fail him.

Be strong and of good courage God blesses had exhorted Joshua, Deuteronomy, 31 7, and the reiteration of the words in this chapter has given rise to the supposition that he be praising Joshua's heart failed him. He was a brave soldier, but he needed more than physical courage for the task confronting him. God met Moses, the greater leader, said, 'Who am I, that I should bring forth the children of Israel out of Egypt?' Hence the Jewish legend that as Jeshurun was bearing his last illness for the magnitude of his task, and was reading his clothes and weeping, God comforted him with the assurance that God had foreseen and provided for everything. 'Be strong and of good courage,' are the assuring words he now receives. Even Christ came this people to inherit the land which I swore unto the fathers to give them."

"The how of his God is in his heart: None of his steps shall slide."—Psalm 37.31.

Machine Hands Get Dole

Ultimate Victory Denied At London Labor Exchange

Workers at factories which automatically pay out wages in packets and machines convert a long coal into permanently at last. London trade exchanges, food firms and dockyards have been warned that machine hands may be next out the scenes to seek men, a button is pressed and the correct amount comes tumbling into a receptacle, and the man in the queue takes it himself.

A ministry of labor official said: "The machine is still in a very experimental state. We are waiting a few weeks to see how well it works out before deciding if we will extend its use to other exchanges."

An Amazing Machine

An amazing machine was demonstrated in Aberdeen, for filleting fish of any size. During the demonstration the machine took charge of a number of small haddocks, stripped off their heads, stripped off their fins, cleaned them, slapped them, and threw them into a basket, all in one crushing or damaging them. It delivered them ready for smoking or packing at the rate of thirty fish per minute.

A shooting contest in July, 1921, on Saturna, a North San Island off Canada, has just been found in Ireland.

PROPOSAL IS MADE TO REDUCE WHEAT ACREAGE

London, Eng.—The four-power wheat conference adjourned discussions to await statistical information on production from Australia, Argentina, and Soviet Russia after formulating a tentative plan calling for reduced acreage and export quotas.

News of extensive crop damage in Canada and a short crop in the United States caused delegates to believe the final position may be changed materially.

Stanley Bruce, Australian minister to the United Kingdom, asked that the conference produce some concrete proposal which he might transmit to the Canberra for consideration of his government.

It was learned the limitation proposal as now constituted contains a plan reduction of acreage by 15 per cent. for one year only and that the program for the second year would be decided after the effects of the one-year reduction are seen.

Canada, the United States and Argentina were reported agreed with the Polish stand that small producers must be brought into any scheme of disaster is to be avoided.

The Soviet line not been brought into debate yet but some quarters were inclined to the view no embargo scheme for the vital problem would be possible without participation of Russia despite that country's short crop this year.

Limitation of production by way of reduced acreage and the curtailment of exports by a quota system among the nations are the main lines on which the conference is working, while at the same time urgently pleading for more agreement by importing nations on methods whereby they might raise consumption.

The Daily Telegraph said it was informed the world economic conference will begin four-nation discussion of a plan for reducing the world's wheat output by 15 per cent. and absorbing the total carryover in two years.

Review Tariff

British Asks Canada To Discuss Duties On Long List Of Goods

London, Eng.—Taking further advantage of the terms of the Canada-United Kingdom trade agreement signed at Ottawa, the United Kingdom asked Canada to review the Canadian duties on a long list of articles with a view to revision. The Canadian tariff board is already preparing to review the duties on cotton and textile goods imported from Britain.

The trade pact signed at the Imperial Conference gives each country the right to seek revision in the case of duties levied by the other on its goods.

Trouble Over Taxes

Two People Reported Killed in Riots in Poland

Warsaw, Poland.—Polish persons and gas policemen were officially reported killed when bodies of Communists in Lodz, Bialystok and Pabianice in the Galician districts of Rzepnye, Rzeszow and Lancut. Six more persons were seriously wounded. Many arrests were made and numerous peasants escaped to the forests.

Gulls Save Crops

Wolfville, N.S.—Farmers who till the soil of the Grand Pre Meadows formed thankful eyes to fields white with the gulls of Fundy—gulls following on millions of grasshoppers which had threatened to ruin the crops.

Job For Hoover

Stanford University, Cal.—Former President Herbert Hoover is to become a librarian. The Stanford University library building is being remodeled to provide an office for Mr. Hoover, from which he will direct the unique Hoover war library.

Aids To Navigation

To Install Direction Finding Station In Hudson Bay Area

Ottawa, Ont. Paving the way for renewed efforts to reduce insurance rates on the Hudson Bay route the federal marine department will shortly commence construction of a short wave direction finding station at Chesterfield on the east shore of the bay, a considerable distance west of Churchill.

Installation of additional navigation lights in the strait will not be undertaken this year The department has no funds for this purpose and, in addition, further survey work is necessary to determine the precise location of the points at which lights would be erected.

It is necessary to be able to mark all lights on navigation charts with absolute accuracy so that navigators when they see a light may fix their position. Hitherto a detailed hydrographic survey of the north shore has not been made and until carried out and if lights were built this year only approximate position could be given.

The direction finding station at Chesterfield is deemed the most important contribution to the safety of navigation to be made at this time. This station will give cross bearings on the line from Nottingham Island to Churchill, and at the present time there are stations at Nottingham and Churchill but bearings are difficult to obtain.

This is the official reaction of the marine department to the annual report of the Imperial Economic committee on the Hudson Bay route.

German Jews Need Help

Question Of Man Who Investigated Conditions Created By Nazis

New York—Michael Williams, who investigated conditions in Germany for the American Committee for Rights of religious minorities, said in an address that Nazi opposition to Jews "far exceeds any other persecution known in modern times."

"If the Jews are to be rescued, if their position is to be ameliorated in any important degree, it is vital that an international body be set up qualified to speak and act for the Jews of the world.

Taking Part In Gold Rush

Many Indians Using Sluicing Cannon To Wash Gold From Gravel

The Pas, Man.—Fleets of sailing canoes, loaded to the gunwales with freight, and manned by Cress, are now actively driving ahead of the breakup of the northern lakes, heralding the new summer's gold rush in God's lake.

The purr of the outboard motor is heard right across the hinterland. Even Indians, without the cash to secure inboards, have jumped into the "rush" with canoes, and are swinging paddles, oars and sweeps, as they freight their way into the mineralized zone.

Has Increased Staff

Welland, Ont. With prospects of a bumper wheat crop in western Canada which would necessitate an increased demand for lumber twine, the Plymouth Cordage Company's plant here has taken on an additional 150 men.

Default On Payments Bars New Borrowing

Now Ruling In United States To Protect Bond Issues

Washington, D.C.—Foreign borrowers, including governments, who default on their obligations to the United States, can borrow no more money within this country by bond issues or other securities, according to the specific terms of the new Federal Securities Act, known as the "blue sky" law.

A clause in the new act, passed by congress, stipulates that if the securities offered by the United States "in order to make a public authority," such public authority must have "continued the full service of its obligations to the United States" in order to make a public offering of its securities within the republic.

Some other facts interesting to foreign governments or corporations wishing to sell securities in the republic are set forth in the new law follow:

Truthfulness and adequacy of the information furnished to purchasers of foreign securities under the act are made the direct responsibility of the investment houses floating them.

All data relative to the financial status of the government or foreign corporation for which funds are intended to be raised must be furnished by the agents in the United States to the federal trade commission.

Just as domestic securities, foreign securities must be registered with the federal trade commission.

Theft From Mint

Ottawa, Ont.—John R. Wallace, a member of the Royal Canadian Mounted Police, pleaded guilty in police court here to stealing $65 in gold coins from the Canadian mint. He was remanded for sentence.

Honors For Einstein

Brussels, Belgium.—The University of Brussels recently conferred upon Prof. Albert Einstein the title Doctor Honoris Causa of the faculty of sciences.

Aeroplane Tragedy

Capt. Brostich and Two Mechanics Lose Lives In Air Crash

Prince Albert, Sask.—The first aeroplane tragedy of the year in northern Saskatchewan claimed the lives of three men near the Brooks Air base at Emma Lake, 90 miles north of here.

The dead are Capt. R W "Bill" Brostich, pilot, 43, Hiram C Brooks, pilot-mechanic, 24 T. D Forsyth, mechanic, 35.

Brostich, well known western commercial flyer, who served with the Royal Navy Air service in France and later with the famous Dover patrol, was testing a reconditioned Bahi plane at an altitude of 1,000 feet With him were Brooks and Forsyth, mechanics of the Brooks Airways, Prince Albert.

In the middle of their tests the plane dropped in a spin for some unknown reason and plunged into a tree on the lake bank north of the air base, at 4 o'clock in the afternoon. After the machine had been taken away rescuers found the body of the pilot. The plane falling into about 10 feet of water, was smashed and no pieces but the engine buried in the bottom of the lake.

The bodies of Brostich and Forsyth were recovered shortly after the crash, while Brooks' body had not been recovered. The lake bottom was being dragged for the third body.

Brostich, merchantile, was actively responsible, while Brostich's band was badly smashed Brooks was the son of R. D. Brooks, Prince Albert, president of Brooks Airways.

Snow Slide Victim

Find Bodies Of Two Men Lost Since Last February

Field, B.C.—One band jutting above rock and melting snow had revealed the secrets of the fate of Sidney Hunt and his brother Joe, 23, lost in Duchesney Pass since last February.

The young men, both residents of Banff, Alberta, were trapped in snowslides in the pass as they attempted a ski journey from Canal Hector to Field, 35 miles through winding passes. Work parties will leave here to dig the bodies out of the snow.

Discovery of the bodies was made by two Swiss guides, Rudolph Ammer and C Hessler, who were conducting a search of the pass. Searches have been made intermittently since the young men disappeared, a party of 20 men, Mounties, digging through the area at every opportunity.

Parents of the young men reside at Banff.

Lord Montagu is Fined

Found Guilty Of Common Assault On Celia Forbes

Victoria, B.C.—Lord Edward Montagu, the second son of the Duke of Manchester, was found guilty of common assault on the person of John Forbes on June 15 and was fined $20 and $7 costs, or, in default, ten days in jail, by Magistrate George Jay in provincial police court here. C. W. Brooks, co-defendant, was found guilty of assault causing grievous bodily harm, and was fined $50 and $7 costs, or, in default, one month in jail. Montagu's fine was paid and he was freed.

STABILIZATION OF CURRENCY BONE OF CONTENTION

London, Eng.—Prime Minister J Ramsay MacDonald, chairman of the World Economic Conference, was said to be seeking elimination of the monetary stabilization question which constitutes the bone of bitter contention at the parley.

The French delegation failed to carry out threats of demanding adjournment of the conference until the United States dollar should be stabilized, but the French of mastery over the problem continued intense in conference quarters.

Quarters were clearly disturbed by the solid lining up of many countries opposed to dollar instability and it was unofficially pointed out in comment that one of the chief points of the Washington program was stabilization as soon as practicable along the lines of the plan in the resolution submitted by Senator Key Pittman.

A succession of speakers pleaded the cause of stabilization as essential to restoration of confidence, including representatives of Italy, Switzerland, Poland, Norway, Germany, Rumania and Yugoslavia.

The discussion arose during consideration of a British resolution calling for easy money and cheap credit policies.

The conservative gold standard countries doubted the feasibility of the program and warned of its possible dangers.

Marine Insurance Rates

Expect Lower Rates May Be Obtained This Year By Senate

Ottawa, Ont.—The report of the imperial shipping committee in which it found that the insurance rates on hulls and machinery on ships trading into Canadian ports could not be reduced this year, but the minimum rate was extended to apply to ships leaving Churchill as late as Oct. 7 instead of the previous limit of Sept. 30 was made public today by the department of marine.

The report appeared to be optimistic that lower rates might prevail in subsequent years if safety of the Hudson Bay route were demonstrated.

The report considered at length the ocean traffic into Churchill during the 1927 season when 16 cargo vessels made the passage through Hudson Straits and into Churchill. Minor mishaps occurred voyages and one, the "Bright Fan," was a total loss after striking an iceberg.

Reference was made to the forming of report in which the committee explained that "as long as there are only a few voyages in the season, a single casualty may quite likely absorb the whole or more than the whole of the money received by way of premiums."

Strengthen Air Force

Australian Government Said To Be Planning Enlargement

New York.—A special despatch to the New York Times from Canberra says it is understood the Australian government is prepared to spend an additional £1,000,000 next year in strengthening the air force and mechanized transport equipment.

Sir George Pearce, Minister of Defence, says Australian defence has been starved for years past and that the government will administer nourishment as soon as possible.

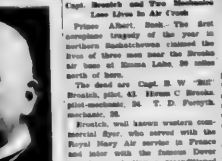
Grasshopper Invasion

Winnipeg, Man.—Thirty thousand acres of green crops in Winchester municipality, southwest of Manitoba, were threatened with destruction by an invading horde of grasshoppers as western Canada's wheat lands, raked by a searing sun during last week's heat wave, failed to receive the much-needed moisture promised.

Was Friend To Animals

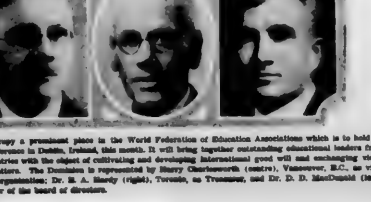
New York.—The animals would be sad if they could understand, Harry Daniel Moran, head of the Humane Society of New York, who spent 16 years helping suffering beasts, is dead.

REPRESENTS CANADA



Dr. Frank D Adams, Emeritus Vice-Principal of the Faculty of Applied Science and Logan Professor of Geology and Paleontology at McGill University, who has been appointed to represent the National Research Council at the International Geological Congress which is to meet in Washington from July 22 to 29.

DISTINGUISHED FIGURES IN WORLD CONFERENCE



Canadians occupy a prominent place in the World Federation of Education Associations which is to hold its fifth Biennial Conference in Dublin, Ireland, this month. It will bring together outstanding educational leaders from all parts of the world, particularly at more countries with the object of cultivating and developing international good will and exchanging views on educational matters. The Dominion is represented by Harry Charlesworth (centre), Vancouver, B.C., as vice-president of the organization; Dr. S. A. Beaty (right), Toronto, as Treasurer, and Dr. D. D. MacDonald (left), Ottawa, as member of the board of directors.

Tragedy Follows Buddha Idols

Unsigned Letter With Images Says They Possess "Evil Influence"

Two wooden images of Buddha and a stone reproduction of the god have left a trail of disaster in the homes of three London business men who in turn became their owners.

None of the three men believes in superstition. Yet in each case they have been the victim of strange ill-fortune.

Within three days of the idols being placed in the sitting room of his home in south London," said a friend to a London newspaper representative, "the third man was struck down by a severe and little-known illness.

"He is engaged in the insurance business, and is noted for his hard-headedness. He had been warned of the evil influences exerted by the idols, but had laughed at the idea.

"The fact that two men who owned the idols for a while had ample evidence of their uncanny power to bring trouble in their train

"Within another one in a city man with office in Bishopsgate One day, the parcel containing the images of the god arrived at his office from an unknown source He was on an Atlantic holiday cruise at the time

"Yet on that day he was struck down with pneumonia When he finally reached home his office was burgled—but the still unopened parcel was not touched

"In the parcel was an unsigned letter, which stated that the images possessed an evil influence," but no explanation was given why they had been sent to him

"He consulted a famous medium who said that the idols were Chinese, and belonged to the king perore Buddha He begged him to rid himself of them "by throwing them in deep water."

"A few weeks later he gave them to a friend, having previously told him their history His friend laughed, but three days later he was taken to hospital, losing but his memory and relinquished in the street.

"Now a third man has paid the penalty of possessing the idols. He was taken to a nursing home—and his wife is terrified lest further disaster should come to the house, where the idols now are."

Mysterious Oil Rig

Outside Motorists Telling Stories Of Some Experiences

Here's another story of the superhuman to man idea, when a plane up on the road, conveyance for a while and then disappears mysteriously from the face and to the car policy doing at 50 and 55 miles an hour.

A Waterloo, Ont. motorist swore it happened. Another at Galt became angry when friends doubted the story. A Kitchener lawyer now tells the tale.

He was driving along when he met the old man with the patriarchal beard. The car stopped. The old man got in the back seat.

"Well," the driver said, "times are pretty tough on you, eh?"

"They are," the old man replied. "But the driver's over, aren't my words. It ended on June 7."

The driver chuckled. "You seem to know."

No answer from the rear seat.

"I say," repeated the driver in a louder tone, "You seem to know."

Still no reply. The driver looked around. The rear seat was empty.

Convicted On Stipulation

Charged with Speeding, Aubrey D. Smith carried several tiny toy automobiles into court, placed them on the barrister's table and showed Magistrate J. L. Bennett just how it happened. Smithmand a situation in point where it was necessary for him to open up protection for himself and other drivers, and was acquitted.

Noted Architect Dead

Frank Worthington Darling, architect who designed Manitoba's Legislative Buildings, and Father of the Royal Institute of British Architects died at his home, Preston, May 15, 1939, aged 77 years. Among other famous buildings designed by Mr. Darling include the Edinburgh International Exhibition and the Liverpool Cotton Exchange.

BRITAIN'S FLYING BAREDEVILS EXECUTE DIFFICULT STUNT

Our crack photographer was fortunate to catch this trio of Royal Air Force planes as they shot into the air tied together with cords to perform a series of breath-taking stunts The daring pilots were putting on their show as part of the Royal Air Force Pageant at London England.

Strange Tribe Discovered

Unknown Aboriginal Village Found On Island Of New Britain

Two hitherto unknown aboriginal villages, where visitors insist on being strangled to death, have been discovered on the island of New Britain.

Patrol Officer H. R. Miall, of the New Guinea police came upon the villages while on an expedition across the island which lies to the east of New Guinea.

When a villager dies his widow demands death by strangulation in order that her spirit may be freed to join his. Officer Miall says, in a report to the Australian government.

"On some occasions the man, being afraid of consequences, leaves requested to strangle a woman," the report continues.

"Then it sometimes happens that the widow takes off her grass skirt and hands it to the man, telling them to put it on and saying that they are only women and not real men. This on many occasions they reluctantly kill her according to custom."

Consummation of the weird ritual is the duty of the widow's brother or her nephews who wind a native fiber cloth around her neck and tighten it until she is choked.

Germany's New Rail Bus

Is To Be Tried Out By Some Railroad

The Long Island Railroad, one of the world's largest carriers of commuters, plans to try out a new type of railbus brought for the Chicago Century of Progress Exposition from Germany The bus, made by the Austro-Daimler-Puch Works, is 85.6 feet long, seven feet eight inches wide and eight feet eight inches high. It is propelled by two 80 horsepower motors and develops a top speed of 90 miles an hour.

The car has double control and may be operated from either end It has a double set of wheels, one of rubber and one of steel, the former being on the inside It was explained that the rubber wheels carry the weight of the car while the machine itself is directed by the steel wheels just as a locomotive is guided automatically by the rails The rubber and steel wheels are on distinct axles.

With the car when it arrived was Dr. Richard Hecker, chief engineer of the company which built it, and Josef Hesselsberger chief mechanic. Herr Hecker said six of the buses were now in use in Austria, two in Poland and several are now being shipped to Hungary. They weigh 30,500 pounds and accommodate 43 passengers.

Senator Capper Is Optimistic

Predicts Better Wheat For U.S. By End Of Year

Senator Arthur Capper, of Kansas City, looks for dollar wheat by the end of 1939.

Cheerfulness about the future was the keynote of an interview given by the United States Republican senator, a veteran in the fight for remedial farm legislation.

He said commodity prices should continue to rise, thus increasing employment and wages. He said, by the end of the year wheat will yield the farmer $1

Most is made up of small Stems about 1,750 to 1,600 of an inch in diameter, and up to about 1¼ inches long.

The French West Indies report that 1933 was a prosperous year there.

International Gang Of Spies Operating

Industrial Espionage As Well As Naval and Military

Espionage is no longer merely a matter of one country creating an organization for ferreting out the military and other secrets of its neighbors. French secret service authorities declare

It is now, in fact, rapidly passing into the hands of a sinister international body with branches in every important centre This syndicate has no national prejudice

It is organized entirely on commercial lines and makes its business the collection of all information regarding the naval, military and aerial defences and preparations of the different countries

Its information is at the disposal of any nation willing to pay for it. and it is known that in many cases the most secret service agents of different countries have found it easier to buy their information from this syndicate.

According to the French authorities the head of the organization is an Englishman, but his lieutenants are men of all nationalities, and a number of women are employed as directors, whilst hundreds of "correspondents" are retained in different countries.

A branch concerns itself with industrial espionage, collecting and distributing information about new industrial processes in order to be able to trade rivals of the firm concerned.

It has been proved conclusively that several suspected spies dealt with by the French courts recently on the assumption that they were employed by this syndicate, and the information they gleaned was passed on to at least three other European powers interested in French defence problems.

"What would you do if you got a rich wife?"

"Absolutely nothing."

Kiltegin Still Holds Annual Goat Festival

According To Tradition Annual Sacred Town From Transvaal Invasion

The rolling heather clad hills surrounding Kiltegrin are being combined for the largest of myriad goats which ramble freely and quantitatively in this corner of Ireland For that little town, probably the only place in the world which pays tribute to the scraggy animal is preparing for its annual enshrouement of Mr Goat, alias Puck "

Tradition has it that Cromwell's ironsides once marched across these lofty summits intending to attack Kiltegrin town But they glittering shields reflecting the sunlight sent a pack of wandering goats stampeding through the streets and warned the townsfolk of approaching danger The defence prepared surprised the attackers and frustrated their plans

Since then "Puck," as the goat is called there, has been venerated by an annual fair in his honor. Early on the largest and most prosperable is enthroned on the public square upon a platform gay with evergreens and bunting Emerald ribbons flutter from his horns and surrounded by the food meat to his taste, he reigns for three days

For miles around all roads lead to Kiltegrin. Kilkenny, near by sends its quota of tourists from many lands Money is freely spent, every house becomes a hotel

Each night "Puck's" throne is illuminated with colored lights and the people join in merry dancing Late on the evening of the third day "Puck" is taken from his platform by a group of stalwart young fellows, headed by the town bell man and is carried from door to door while tribute is demanded from each inhabitant. The goat is then auctioned off by the bell man All expenses involved by "his majesty's reign are paid for out of the fund thus collected and the remainder given to the town bell man.

Council Chased On Surf Boat

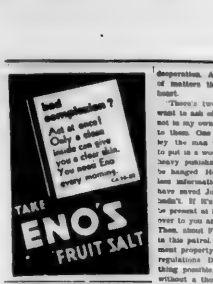
Local Man Tossed Across From Beer To Cabin

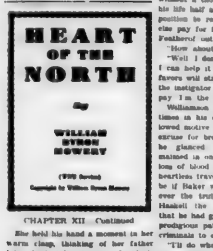
Captain D'Arcy Rutherford, of London, who has crossed the Hogkish Channel from Dover to Calais on a surf boat towed by a speed boat, says he held a tow-rope which was fastened to a speed boat driven about 12 miles an hour. He remained on deck in an hour and a half.

The time would have been less, but they hit the wash of a big steamer, and were tossed and spun. Captain Rutherford had to lie flat to avoid being thrown over The cold was intense, as he was wet through and wore only shorts and a sweater.

Rhodes For Others

Youth Rentals are rapidly being opened in Scotland for the benefit of young others. They can stay over night for a nominal sum and prepare breakfast in the morning. In 1931 there were nine hostels. Last year there were ten more and already in 1933 the total has reached thirty-two. In the first year 3,130 "hostellers" were recorded and last year the total had risen to 22,000, which figure is expected to be far exceeded in the present and in the succeeding





CHAPTER XII—Continued

She held his hand a moment in her warm clasp, thinking of her father lying dead at Revolution. of Alan's noble struggle to save him, of Hasbrouck breaking her father's will to live It was some solace to know that she had helped Alan plan a trap for the guilty inspector, a deadly trap if Haskell only walked into it.

As she quietly wished him good luck, in her heart she was fervently saying to him, "God go with you, Alan." And because she had passionately resolved to see him again before she left, she meant her words not only for the stormy hour ahead of him, but for all the years of his life.

* * * * * * * *

Alan strode into the cabin in a savage fighting mood. He had risen from a sick bed to come to Edmonton before Williamson left, and he had sworn he was going to crush Haskell. The important had forced him out of the Mounted, had caused Larry Lo to be crippled for life; had refused protection to Joyce in her desperate need. He had made a scapegoat of Dave MacMillan to save his face; and more than anyone on earth he was responsible for that sorry tragedy at Resolution.

Almost the only hope Alan had was that trap which he and Joyce had planned an idea born in Joyce's quick brain and developed between them during the three days she had nursed him.

When he went in, he found Williamson and Haskell sitting at the desk awaiting. Haskell did not rise, but Williamson, considerate of his wounds, drew up a chair and invited him to sit down.

"Won't you give us the story of your patrol, Baker?" he requested kindly.

Alan countered: "My story doesn't begin with this patrol. It begins last fall, when this gentleman here came down North. I want to tell it clean, from then till now."

"That's your right," Williamson assented.

Alan hoped that his story, by the sheer blunt truth of it, would carry conviction. But when he finished, the old officer did not comment. The silence was foreboding. Almost in desperation, Alan took up a couple of matters that lay very near his heart.

"There's two or three favors I want to ask of you, sir. Since they're not in my own behalf you may agree to them. One is about Chink Wong by the man we brought in I want to put in a word for him. He deserves heavy punishment but he shouldn't be hanged He gave us some precious information. We might never have saved Joyce MacMillan if he hadn't. If it's impossible for me to be present at his trial I want to turn over to you an affidavit in his behalf Then, about Pusthevel, my partner in this patrol. He stole some government property and broke some flying regulations But he made the whole thing possible, he threw in with me without a thought of pay, he risked his life half a dozen times. We're in position to restore that property or else pay for it in full Will you get Pusthevel out of this pen?"

"How about yourself, Baker?"

"Well I don't want to be jailed, if I can help it But I suppose your favors will stretch just so far I was the instigator and if anybody has to pay I'm the one

Williamson said thoughtful Few times in his career had he ever allowed motive however worthy, to be stirred for breaking the law But as he glanced at Baker, wounded, maimed in one hand, still pale from loss of blood he thought what a heartless travesty of justice it would be if Baker were imprisoned. Whatever the truth of his trouble with Haskell it was great Fact remained that he had gone on a thankless and prodigious patrol and had run those criminals to earth.

"I'll do what I can for you both," he promised, with no reluctance whatever. Already outside I'll talk to the Edmonton officials and try to get those charges not-pressed. But you and Pusthevel are to restoring that property."

Alan promised "We won't fail you on that It's mighty fine and square of you, sir." At that moment, he felt on "Considering all you've agreed to, I hate to ask still another favor But I've got to speak up for Harebrain and Pusthevel They have charges against them, serious and true charges But there's this to be said for Neither man deserted They both intended to return here the moment our patrol ended. They were doing a tremendous service to the Force They were true to duty in the highest sense of the word. Are you going to hold that good they did, or do nothing but the bad?"

Williamson did not answer. He felt the human justice of Alan's appeal, he perceived in him clear and transparent deeper than a question of insubordination. Those men had been inspired by something far above the ordinary. What a powerful influence Baker had over his men.

Thinking deeply, he gazed through the cabin door down upon the dark river. In this tangled affair, it was a sore task to judge wisely, to do the right thing Baker's long patrol, his indomitable courage in going after these men, his relentless drive in bringing them in, were plain enough to success the whole thing was a splendid feat. In his forty years the old officer had never seen a more magnificent piece of work. It was like Baker, like the brilliant sergeant who he once had trained and fought for.

But the rest of that story, his trouble with Haskell—Williamson did not accept that as true. From start to Baker's account was in direct conflict with Haskell's; and to the stern old officer, judging with impartial mind, Haskell's story seemed more credible. Quite plainly Baker harbored a personal hostility against Haskell and warped and twisted his story out of all commonsense to the truth.

One thing Williamson did know beyond any doubting: Baker's account clashed with Haskell's all along the line. One of those two men was on out-and-out liar

In the tightening silence, waiting for Williamson to start probing, Haskell looked out along the terraced and saw a thing which struck him with chill premonition. The doorway of the mission hospital opened; Pusthevel and Bill Hardsock came out, bringing Larry Youngs with them. Bill on one side, Pusthevel on the other, half-leading, half-carrying their crippled partner, they were making straight for the cabin.

When they trod into the room and Williamson heard them, he turned, frowning and demanded:

"What do you men want?"

"Sir, we came here to put our case to," Bill stated bluntly "We know you were threading out this trouble between Alan and the inspector"

Your counsel wasn't asked This matter is between Baker and Inspector Haskell

Bill, don't try to run a bank," Alan interposed, fearful that this unexpected move of his three men might but why chance to bring Haskell. "If the superintendent doesn't want you here, obey him and go."

Bill stubbornly refused He said to Williamson "You've got a name, sir, for giving every bush cop and mountain in your division a square cut and seeing all sides of an argument. I don't think you'll kick us out without hearing what we've got to say This is as much our fight as Alan's We've had to pay, too, for the inspector's acts Here's one of us crippled for life because the inspector hog-tied us on that pair—with some fool orders After a thing like that, do we have to shut up and take it and not even be allowed to—"

Sit down" Williamson bade them. I'm going to get to the bottom of this When your time comes I'll hear what you've got to say Now Baker I want you to answer some questions What made you split your detail on that first patrol?"

Haskell ordered me to, sir. He ordered me to follow both branches. Haskell is, in general, a bit threatened to bust me and keep me here at the post."

"That's a lie" Haskell challenged "I allowed him to do as he thought best. He purposely made a failure of that patrol I don't ask you to take my word Corporal Whipple was here in the cabin, and heard our talk. And Baker, over his signed statement, admitted to responsibility"

"What proof have you got, Baker?" Williamson demanded.

Alan kept silent, deliberately allowing his silence to damn him. Williamson's probe was leading in the right direction, leading toward that deciding point.

To Alan's consternation Bill Hardsock burst out: "Proof? Hi—it's him blame! Alan was half sick all the way up the Liard, because of them orders. He felt he was being forced to take us men into a terrible danger. We all knew it was crazy to split up—"

Williamson silenced him. "You're merely making my position more complex. You have no proof. Baker, do you admit responsibility for that patrol?"

Alan shook his head. "No, I—I don't, in a sense—"

Haskell smiled. He had Baker on the run.

Williamson reminded: "Baker, you signed a statement of responsibility. Whipple was a witness."

Alan pleaded. "Sir, that statement—"

"You've been back—yes, I signed it. But I—I had to."

"You had to?"

"Yes, to get out of the Mounted. He wouldn't let me buy out unless I did sign."

"Why under heaven did you want to buy out all that fast and furious?"

"I wanted to be free," Alan let on, step by cautious step. "I wanted to go after those men."

"Baker, look here," Williamson said sternly "You infer you wanted to go after those men so badly that you were willing to buy out, cut off your record and sign a lie. Why then wouldn't you co-operate with Haskell to get them?"

"Well, sir, he—he wouldn't co-operate."

"I can't believe that. He tried to help you ever afterward—after you bought out and were on a private venture"

"When was that?" Alan queried. "At Ex Traverse Lake."

TIRED AND IRRITABLE?

Take Lydia E. Pinkham's Vegetable Compound

It soothes the nerves and helps to build you up. You will eat better . . . sleep better . . . look better. Life will seem worth living again. Remember that 98 out of 100 women say, "It helps me." Let it help you too. Liquid or tablet form, in you prefer.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Calomel needed

When your bad bile, constipated, your on the blue, that's your first warning that you're getting the little less pounds of bowel bile into your bowels.

Digestion and elimination are being slowed up, food is spoiling and decaying instead of digesting, gas bloats you, you feel sour, bilious sour-nervous like nothing will relieve you, or whatever pain, or headache. Don't let it go on.

Just get a box of Dr. Caldwell's Syrup Pepsin. This pure vegetable laxative will relieve constipation and help your liver pour out two pints of bile juice into your bowels daily. Then you'll feel like a million dollars. Even finicky children love its pleasant taste. Ask your druggist for Dr. Caldwell's Syrup Pepsin today.

ONLY FIRESTONE gives you all these EXTRA VALUES

NEVER before have so many people been changing over to Firestone Tires. They know that they can buy Firestones with full confidence of getting the most mileage for the least amount of money, for only in Firestone tires can you get all these extra values—that give 23 to 40% longer tire life—at no extra cost.

1 Two Extra Cord Plies under the Tread

2 Gum-Dipped Cords

3 Balanced Construction

4 Non-skid Tread with 25% more tread

Firestone tires are fully guaranteed for 12 months but made to last much longer.

In these days when you have to make one dollar do the work of two, be sure you get the most out of your money. Buy the newest Firestone Standard today. Let him help you with the strongest, safest and most economical tire.

FANCIFUL FABLES

"So he was trying to help us. I didn't—ah—have that impression at the time, sir."

"He even shot signals for you to come."

Bill Hardsock swore lustily. "Oh!" all the fork-tongued lies, that's the kind of you all!"

Alan allowed the lie to go unchallenged. If Haskell got by with that one, he would be bold and unwary.

(To e Continued.)

Little Helps For This Week

"If ye then being evil know how to give good gifts unto your children, how much more then shall your Father which is in heaven give good gifts to those who ask him."—Matthew 7 2.

How His great love has compassed our nature, and our need!
We know not; but He knoweth, and His will bows indeed.
Therefore O Heavenly Father Give what is best to me,
And take the wants unanswered, As offerings unto Thee.—Anon.

Whatsoever we ask which is not for our good He will keep back from us. And surely in this there is no less of love than in granting what we desire Will not the same love which prompts you to give a good thing prompt you to keep back that which is evil. If in our blindness, not knowing what to ask, we pray for things which would turn to our hurt or to sorrow, will not our Father out of His love deny us? How much suffering we would have if our wishes could pass at once into realities, if we were endowed with a power to bring about all that we desire, and all that our longings were always granted. One day we shall understand more for what He has denied than for what He has granted.—H. H. Bleasdale.

Not Controlled By Brains

"The human brain is wonderful," remarks The Ottawa Journal. "The instant it is informed of a grave danger it sends a message down to the feet to step on the accelerator" Where The Journal goes wrong, according to the Buenos Aires Star, is in presuming that feet which step on accelerators at grade crossings are ever in any way controlled, or directed by brains.

"Hon. Vincent Massey invites patriotic parties to bury the hatchet" read a headline. In whom?

LOCAL NEWS

Mr. and Mrs. Krause and Mr. and Mrs. Adolph Becker motored to Puyallup, Wash., where they will visited relatives and friends.

Mr. Geo. Becker will leave Friday morning for a three weeks visit at Portland, Ore., where he will visit his son and daughter, Mr. Geo Becker, and Mrs. W. H. Brady and families.

Councillor Fillmore suffered a accident last week while working on the Memorial Hall roof. A pot of tar boiled over and in trying to save a serious fire both hands were severely burned.

Mr. Fillmore was attended to at once by Dr. Henry and his wounds are healing up nicely.

Mayor Montgomery left by train Tuesday night for Calgary where he will attend the Alberta Municipalities Union Convention held their Thursday and Friday of this week.

Don't forget the big U. F. A. picnic at Partridge Hill on the 4th of July.

Boys are warned about riding their wheels on the sidewalks about town.

Mr. R. S. Sutton of South Edmonton is providing relief during Mr. A. H. Rogers illness.

Mr. A. H. Rogers has been home during the past week due to a slight illness.

Mrs. L. M. Taylor, Muriel and Glover left on Tuesday morning for a two months motor trip to Banff and the coast.

We are sorry to hear that Mr. T. R. McClellan is confined to his home due to illness.

Miss E. Magor of Sheldon, Alta., is visiting Mr. and Mrs. C. Magor

Mrs. Ray Wolfen spent a few days last week with Mr. and Mrs. W. H. Wolfen.

All the business houses in the Fort will observe Dominion Day, July 1st, and will close all day. However the stores will remain open until 11 p. m. on Friday, June 30th, to enable people to stock up for the long week end.

Alfalfa and sweet clover, as well as ordinary clovers, are most resistant to white grub attack. Sunflowers are almost immune.

Evening Service withdrawn for July and August.

Construction of the large new sugar storage facilities at the plant of the Canadian Refineries at Raymond, near Lethbridge, is proceeding. The new bins will provide storage for four million lbs. of sugar.

During the past week the grasshopper situation in southern districts has grown more acute, and on a more widespread scale. Nearly 500 tons of poison bait per day are being sent out, and the area of infestation has now reached as far north as the C. P. R. Coronation branch and west of Lethbridge to Pincher Creek.

Fowl paralysis is considered to be disease of young birds, generally between the ages of 3 and 16 months.

Fort Saskatchewan Board Holds Meeting at School

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the School on Monday the 3rd of July, 1933, at 7:30 p.m.

Present Mr. F. Atkinson, Chairman and Mr. E. A. Bowen and Dr. Turner.

The minutes of the last meeting section of Dr. Turner.

held were read and adopted on the

The Board inspected the various rooms and the school building generally, and the outbuildings and grounds, and advised the caretaker as to the work and repairs to be done during the vacation. The Secretary was instructed to obtain prices for repairs to furnace, and also for glass, paint kalsomine etc., required.

The meeting adjourned on the motion of Mr. Bowen.

CASTLE SCHOOL TAKEN ON ON FINE SIGHT SEEING TRIP

The scholars and Mrs. Clink, the teacher, of Castle School spent a very enjoyable day in Edmonton on Thursday, June 22th.

A visit was paid to the Woodland Dairy where an insight was gained into the working of that very efficient plant. A royal entertainment was provided at the close of the visit in the form of ice cream, popsicles and Eskimoe pies.

Borden Park was next visited. Here a picnic dinner was served, the zoo was visited and most of the children took a swim in the up-to-date swimming pool.

From there the Legislative Buildings, Museum and University were visited.

Last of all the party was conducted through MacGavin's Bakery. Everybaskets and raisers were distributed to the school children.

We wish to thank very sincerely, Mr. Adolph Krebs, Mr. Emil Krebs and Mr. H. Foster who so kindly helped with their cars to provide transportation for the children.

Taken from the Files

19 Years Ago Today

Wednesday, July 9th., 1914

W. A. Dewar went through on Tuesday night enroute for Winnipeg, where he will probably reside in future.

Ed. Kolterborn plucked what he believes to be the largest Watermelon this season, it weighed fourteen ounces.

Allan Brow, who were camped half mile from town, skinned their rail-road builders outfit to Camrose last Monday.

Harry Ayers brought to the Conservator office a sample of Maple Leaf potatoes grown this year, measuring 6¼ inches in diameter.

By recent business change the Fort loses one of its most popular citizens in person of Mr. Frank H. Keiser, manager of the Queens Hotel for the owing company.

Miss Norman Dickson arrived last week from Seaforth, Ont. on a visit to her sister, Mrs. E. O. Jones.

Laugh, and the World Laughs With You

Pat had seen nearly every cloak in the place, but had discarded all of them as not being good enough for his purpose. The weary shopman had exhausted his whole stock except a few cuckoo clocks, so he brought one forward as a last resource.

"I'll show you what they do," said the salesman, and he set the hands at twelve o'clock, when the door flew open and the cuckoo thrust its head out and cackoned. Pat was impressed.

"Well, how do you like that?" asked the salesman. "That's a stopper for you, isn't it?"

"Faith and I should think it is! It's trouble enough to remember to wind it, without having to think of feeding the bird."

Josephburg News

The Josephburg Junior U. F. A. held their meeting at the school on June 29. The President, Rudolph Rippel, called the meeting to order and the Roll Call was answered by a Pet Aversion.

The seven members who attended the Conference, Lorna Krebs, Dorothy Willie, Carl Unterschelbe, Ernest A. Mohr, Walter Frey, Rudolph Rippel and Fred Remmle, gave their reports.

The visitors then went into the other room and the business part of the meeting followed.

It was decided to hold a dance at the school on July 14.

A vote of thanks was given to the retiring president, Rudolph Rippel, and congratulations were extended to the new president, Wilfred Maxx

The next meeting will be held at the home of Mr. and Mrs. Monaghan on July 28th, 1933

Mr. and Mrs. William Thomas and family, Mr. Alfred Thomas and Miss Nelly Frey of Lamont motored to Stettler, Alberta to visit Mrs. Thomas' sister, Mrs. Arthur Bolton and Mr. Bolton.

We are glad to hear that Mrs. Loss Frey is as well as can be expected after having undergone an operation for appendicitis in the Royal Alex.

Mr. Wilfred Becker left Monday on a trip to Puyallup, Wash., and other points.

Mr. Dan Krebs is a patient in the Misericordia hospital. He has been sick for sometime.

Rev. and Mrs. A. Wienbrauch and family are holidaying with Rev. and Mrs. Korn of Vegreville.

On Sunday, July 2nd. the church service at 11 a.m. will be held by the "British and Foreign Bible Society".

An interesting baseball game was played between Ypres Valley and Josephburg last Tuesday evening at Good Hope. Ypres Valley won by a score of 9 to 4.

The girls Soft-Ball team played Ypres Valley girls the same evening with Josephburg winning by the score of 26 to 6.

LOW RAILWAY RATES FOR EDMONTON EXHIBITION PATRONS

Visitors to the Edmonton Exhibition this year will be enabled to do so at a minimum of cost, as compared with former years. Tickets of admission may be bought at 5 for $1, if bought not later than July 15th, and railway rates are the cheapest ever in effect for the Edmonton Exhibition. During the entire week a general rate of fare-and-a-quarter will be in effect in Saskatchewan, Alberta, and the whole of British Columbia with the exception of Vancouver Island and the B. C. coast steamship service. Tickets will be on sale July 15th to 21st and the return limit is July 25th.

In addition two excursions will be run, the tickets for which will be sold at a cent-and-a-half a mile each way. The territory is the same as above outlined, and the tickets sold on July 19th will be good until July 22, and tickets sold July 21st will be good to return up to July 25th.

With seven days of horse racing this year, horseshoe pitching and basketball tournaments, and the usual excellent Exhibition features, it is expected that the week of July 17 to 22nd will see big crowds in attendance at the Edmonton Exhibition.

Unemployed Family Settlement

The full quota of 500 applications for family settlement under the present joint federal-provincial-municipal scheme has been passed upon by the provincial land settlement committee, and nearly 200 of the families have already been placed on the land.

St. Eugene News

Born to Mr. and Mrs. Mip LaClore on June 24th., a son. Congratulations.

Warren Brink, our new member has been getting in some good tennis games the past week.

The children's picnic was a hugh success on June 30th. Thanks to our members and trustees, for cream and candy enjoyed by all.

George Holmes left last week, with about fifty head of stock taking north to pasture.

Mrs. J. Hood has gone to spend a months holidays with her daughter at Slave Lake.

Mr. and Mrs. E. Lamoureux, Mr. and Mrs. W. Lamoureux and Mrs. A. Vanch are visiting friends and relatives near Peace River at present.

Our girls soft ball team won an interesting game from the Gibbons girls last week.

PONOKA MAN PULLS FAST ONE ON CROWS

You can believe it or not but George (Ripley) Gordon had it in his Ponoka Herald that Ben Dickson has been bothered with crows for some time, but has fallen upon a novel plan of taking the eggs out of the nests and placing hen's eggs therein with 50 crow's eggs, and the crows in turn have hatched 24 chickens out of 29 eggs set.—Market Examiner.

Canada And Its Foreign Born

Because of the many misinformed and therefore inaccurate statements frequently heard to the effect that the population of the three prairie provinces of Canada are largely of foreign birth, a recent census bulletin issued from Ottawa, and based on the last census (1921), is of interest and value.

It is revealed that out of a total population of 2,353,529 in the three provinces, 1,360,574 are of British birth, and 544,385 of foreign birth, and of these born under the British flag no less than 1,467,667 were born in Canada.

But, it is frequently argued, these figures do not give a true picture of the racial division of our Western population inasmuch as many of those born in Canada were born of parents who themselves were foreign born and their children, although born in Canada are, to all intents and purposes, the same as if born in foreign lands. While in many cases, probably most cases, this assumption is not a sound one, the census bulletin recently issued is of particular value in that it classifies the parentage of the entire population.

It is shown that the population of the three Western provinces having both parents born in Canada numbers 350,056; having both parents British born outside of Canada 317,662; having one parent Canadian born and the other British born 168,178. That is, 1,235,895 or more than one-half of the total population are at least second generation Canadian or British born. To these may be added another 184,869 where one parent is either Canadian born or British born, while the other is from a foreign country.

Combined with this is the population born of parents both of whom were foreign born. Their number for the three provinces is 946,726. Subtracting, therefore, the total foreign born of 544,385 from this figure, we find that the number born under the British flag, and mainly in Canada, of foreign born parents is only 460,779. These are first generation Canadians.

The figures are not only interesting but reassuring to those who are anxious that Canadian and British ideals, customs and traditions shall predominate in this land. Another reassuring and gratifying fact is indicated by the figures that 191,589 of the population in these three provinces are the offspring of marriages contracted between Canadian born or British born men and women on the one hand with foreign born on the other hand. This inter-marriage between the races is bringing about the development of a distinctly Western type of Canadian, and one that gives promise of being a very type, physically strong, mentally alert, patriotic in their love of country, passionately devoted to liberty, respect for law and authority, capable as self-governors, with the love of music, poetry, art, and handicrafts which characterize the peoples of continental Europe.

Coincident with the publication of this recent census bulletin, Hon. C. H. Cahan, Secretary of State at Ottawa, issued a warning to judges within the jurisdiction fully the duty of naturalization of aliens to exercise care in the performance of such duties. He drew attention to the danger of certain malcontents applying for naturalization solely in order to protect themselves from the danger of deportation, or, in other words, obtaining Canadian citizenship not out of love for Canada, or to advance Canadian interests, but in order to secure for themselves greater freedom in undermining Canadian laws and institutions.

And a Montreal even judge, commenting on the same subject, is reported in the daily press as urging the Federal Government to see to it that applicants for naturalization are supplied with literature which will enable them to memorize such facts as the Canadian constitution, he said, should be given to those who wish to become Canadian citizens.

Canada has probably been somewhat careless in the freedom with which citizenship has been conferred upon aliens resident in this land, the assignment of duty to these people. All too frequently naturalization has been obtained solely in order that patent to homestead lands could be secured. Other thousands have taken out citizenship papers in order that they may vote, but possibly without any very intelligent idea of what the duties of true Canadian citizenship really involve.

Five years residence in Canada will not in itself make a Canadian citizen. Ability to read and to write does not in itself constitute intelligent citizenship. The mere possession of naturalization papers, while it does make a man or woman a citizen in the eyes of the law, does not necessarily make such person a citizen of Canada in the true meaning of the word "citizen."

It should be a matter of national policy to inculcate right ideas and high ideals in the minds of all newly created citizens. To that end it would seem that something more is required than so many years residence and the taking out of oath of allegiance on the one hand, and the granting over to a piece of official paper by the Government on the other hand. There should be some formal ceremony at which the vital significance of becoming a citizen of Canada would be emphasized.

We believe these new citizens would themselves welcome some such procedure. The vast majority of them have acquired a real love for Canada. They adopted it as home, and desire to make it that not only for themselves but for their descendants. They are anxious, therefore, to make it better and greater. They would like advice, inspiration and guidance. The State should provide it.*

The Niagara Gorge, which in centuries called the "geological clock," is about 30,000 years old.

National industries in Bolivia are opening up production.

Japan's Pearl Crop

Planting Of 60,000 Acres Of Waters Largest In Years

The pearl plantings in Japan this year, in contrast to most crops, will be the largest in years. More than 60,000 acres of quiet waters have been sown with more than 3,000,000 pearl oysters, and thousands of people are employed. The pearl crop being planted now will not be harvested for four years.

Millions of small pearls or tiny bits of mother of pearl, are skillfully inserted into living members of the pearl oyster. The pearls nearly succeed in cover these irritants with a secretion which transforms them into pearls. The oysters are placed in steel cages and suspended a few feet above the floor of the sea from great rafts. Taken a year they are brought to the surface, cleaned and treated, to prevent disease. Some 60 per cent. of the oysters bear fruit, but only about five per cent. yield pearls.

The annual crop is valued at several million dollars.

STARRS MADE HER GASP FOR BREATH

Penalty Of Excess Fat

Although she has lost but 7 lbs. of her overweight, the woman finds that she has made a remarkable improvement to her. There can certainly be no question about a reducing treatment that brings such increased energy and vigor.

Her letter reads:—"I am 53 years old and my height is 5 ft. Last year I weighed 154 lbs. For six months I have been taking a half-teaspoonful of Kruschen Salts every day in a cup of hot water before breakfast. I have lost 7 lbs. of my fat. Now I am less round the hips, and only weigh 147 lbs. dressed. My 2 feel pounds cut over run upstairs, which before used to make me gasp for breath. Everyone says how well and fit I look as I am in a hurry and get no rushing exercise at all. The results may not be startling, but the fact remains that I feel much better than for years and I'm not heavy.—and I now enjoy dancing."—(Mrs.) J. J.

Kruschen is based on scientific principle—It's an ideal blend of 6 separate mineral salts which help glands, nerves, blood and body organs to function properly and maintain a splendid degree of health—it builds up energy and strength all the while you're training yourself down to a point of normal weight.

Why Be Hereditary

Doctor Finds Some Boldness Are Getting Back Existing Hair

The make of the species, according to Hadacol at least, seems at last to be getting back that extra rib that Adam is said to have lost when Eve was created. Dr. T. D. Stewart, Smithsonian Institution anatomist, has found that the "rest rib" is coming back among Indians. They have 25 rib instead of the customary 24. Return of the 25th rib apparently indicates that evolution is still at work in the human species, Dr. Stewart has found. The 25th rib is giving more chest and abdominal space to individuals in which it appears. The extra rib may be hereditary. Some reduction of rib is seen in the fact that practically all of the 25th rib is found in females, while the 24th rib often grow among Eskimos living north of the Yukon River. Dr. Stewart has found that extra rib in about 13 per cent of 300 Eskimo skeletons from Alaska, that he has examined.

Used To Thunderstorms

No Concern In Area People Do Not Notice Them

In Java thunderstorms are so common no one takes any notice of them, many hundreds of thunderstorms, often severe ones, are experienced in the course of a year, and natives pay small attention to the sound of more or less distant thunder normally over towards, and it is only when there is a flash of lightning overhead that alike are conscious of the sound. In fact, the people of Java are so used to the phase by period, that for a good part of the year that only when the storms come do they realize that they have been living in a perpetual uproar.

Finland will push its large public works program this year.

Russia with observation services over the river which have just up passed in London.

Any Looseness of the Bowels is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the diarrhoea checked before they become serious.

To check these bowel disorders there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 60 years. It is rapid, reliable and effective in its action. It can be relied upon to check and relieve in the most severe cases.

Declares War On Slums

Great Britain Starts Five-Year Drive Against Methods Of Disease

Great Britain has declared a five-year war to the finish on her slums.

Tumbledown slimy dwellings, basement caves and insanitary "backto-back"—hotbeds of tuberculosis, rickets, rheumatism and other diseases—are slated to be wiped out.

The government's move against the plague spots are motivated by the prevailing low building costs and low rates of interest on money, together with a desire to ease the pitch of unemployment.

To insure immediate action the minister of health has called upon all housing authorities in England and Wales to submit by Sept. 30 a series of programs drawn on the basis of clearing all slums by 1938.

Each program is to include a list of the areas in each locality, the number of houses to be demolished, the number of inhabitants affected in that of areas where improvement by reconditioning is necessary and measures taken for compulsory observation, improvement and rehousing of the displaced dwellers.

"The time limit is the very essence of this program," says Sir Edward Hilton Young, Minister of Health. "The time limit must, of course, give reasonable time for the work, but it must be fixed, and fixed absolutely."

No one knows the complete extent of the slum problem in the land, though the estimate generally given is that 1,000,000 dwellings must go before the programs from every area.

An up-to-date picture, however, will be available by Sept. 30, the deadline for the programs from every area.

The great mass of the slum dwellings is more than a century old, lacking back to the era of quick industrialization of the country when houses sprung up like mushrooms around the factories.

But the problem is not limited to the cities, unhealthful conditions existed in many villages and towns, too, are on the basis for destruction.

Among cities, the slum evil is found widely and is regarded as being its worst in the industrial and shipping areas. Liverpool, Manchester, Birmingham, Leeds, Bristol, Sheffield and scores of other cities have awful, insanitary sections.

London, because of the great population crammed into it within a relatively small area, presents a problem of its own and it is believed that the five-year grand period may have to be lengthened for abolition of the worst spots.

In the words of the government's declaration on action, a lively campaign is being pursued by the press to keep the spirit for wholesome and speedy action at high pitch. The Archbishops of Canterbury and York have penned vigorous appeals and the Prince of Wales who knows the slums at first hand of the phase by period, visits, has voiced the support of the royal family.

He (at 11 p.m.)—"Did you hear I could imitate any bird you can name?"

She—"No, I didn't. Can you imitate a homing pigeon?"

The forest lands of Tasmania is [illegible]

Combatting Disease

Death Rate From Diphtheria Is Lowered In Manitoba

Ten years ago the diphtheria death rate in Manitoba was 21.8 per 100,000, which meant that 120 children lost their lives in this province every year from this preventible disease. In 1923 immunization was started in Winnipeg, with the result that by 1929 the death rate for the whole province had been brought down to 10.3. In that year immunization was extended to parts of rural Manitoba, resulting in a further reduction of death rate to 3.2. In rural Manitoba since 1930 there have been 63 deaths in unimmunized territory and only 15 deaths in the much larger population of the immunized territory. There have been no deaths among immunized persons.—Winnipeg Tribune.

Wages Being Increased

New Westminster Lumbermen Will Also Be Employing More Men

An increase of 10 per cent. in wages, affecting 750 men, has gone into effect at the Fraser Mills plant of the Western Lumber Co., Ltd., New Westminster, B.C.

The increase follows a better demand for lumber and an increase in price. The Fraser Mills plant is turning out a quarter of a million feet of lumber daily and the cookie mill is working double shift. Employment at the plant has increased from about 450 men to 750 since last winter.

While the bulk of lumber shipments are still going by ship cargo, the demand for rail shipments is increasing.

A Comfortable Margin

Population Of New York Nearly Million Behind London

The population of New York City according to a census by the New York Merchants' Association is now 7,710,000. This still leaves London the world's greatest city by a comfortable margin, its 1931 census showing a population of 8,205,631. Next in New York comes Berlin, with over 4,000,000, then Chicago with 3,376,000. There are eight cities in the world with a population of more than 2,000,000, and thirty-two with more than 1,000,000.

The Queen of Norway recently purchased three English hunting horses.

Scientists Assert That Extremes Of High Temperatures Will Mark The Summer Of 1933

If vagaries of summer weather to date have not been sufficient to bring conviction that extremes of high temperature will mark the season, it may be added that science—by this agency that it ventures opinions upon such subjects agrees with the popular view that this summer is to be extraordinarily hot.

The reason given by the supposed experts, if accepted without the much critical examination, is fairly simple We may expect a good number of hot spells, they declare, because less coal air is going in more in this direction than has arrived in other recent seasons. The full explanation is a trifle more involved.

Heat in any region is produced by three causes: the direct effect of sunlight, drift of hot air from places to that have been very air masses are warmed through the increase of pressure when descending from higher atmospheric levels. This third variety of heat is the most to that produced when air is compressed inside an automobile tire. The first extreme heat wave here this year, the meteorologists report, was caused by movement of air northward after it had become over-heated through much a process of descent and compression in the area about the Gulf of Mexico.

If we are to guess about future weather, though, we must return to consideration of the sun. for it, after all, not only generates heat but is also the force in compressing air and moving it, whether cold or in a heated state An interesting factor this year is that the sun is expected to generate an increased amount of heat, because the number of sunspots is on the increase and, contradictory though it may seem, the more there are there are on the sun the more heat it emits.

But the best, to continue with the meteorologists' tale of contradictions, ordinarily brings cool weather to this area, for the warmth becomes transformed into air energy, stirs the atmosphere and brings large gusts of cold southern air to this direction. There is, however, the settlement of time lag connected with this outer energy, since it works largely through heat storage in the ocean. Immediate weather conditions show a tendency to correspond with solar conditions of six or eight years ago. In the solar period which will control our weather this year, according to the scientists, sun energy was on the decrease from 1926 to 1931, we are now in a time of decreasing atmospheric circulation. That means, if they are right, what was cold in the first place; has cold air is coming his way.

All of which, it is to be feared, leaves guessing about the weather almost as satisfactory a game as in the past, even though the scientists, like the earlier weather prophets, who spoke in simpler terms, seem confident that the secret of nature are growing less and less secret to them. But if it is a hot summer, don't forget we told you so. Or the scientists did. Toronto Evening Telegram.

Saskatchewan Butter

Creamery Butter Output During May Shows Increase

Creamery butter output in Saskatchewan during May shows an increase of 54,782 pounds over April according to figures released by the dairy branch of the department of agriculture for Saskatchewan. This is an increase of 2.9 per cent. As an indication of the return of the creamery section of the province to its former position, May figures showed an increase over the production figures for the same month last year.

For the first five months of the year the creameries report a total butter make of 6,161,783 pounds, which is practically the same as the figures for the same period of 1932.

The upturn was inevitable. When people got their backs to the wall they begin to face things.

The latest definition of a go-getter is a fellow who makes out of gin three cans from a cervine skeleton.

Radio Station Moved By Plane

All Northland Is Now Linked With Outside World

An entire radio station and all its delicate equipment has been moved by air from Lindsley Bay to Canceau Bay by Royal Canadian Corps of Signals, with the co-operation of the Canadian Airways.

The station, equipped with both short and long-wave apparatus, is functioning satisfactorily, it is stated. It is the first time on record such a feat has been accomplished.

Captain Stuart Harding, commanding officer Royal Canadian Corps of Signals, announced every strategic commercial center in the northland is now in touch with the outside world. Two standard radio stations, erected by the Dominion government at Port Nelson and Port Chippewyan, have commenced operations

1946

SIMPLE, SMART, THOROUGHLY WEARABLE

It's slenderizing too.

So many materials are suitable for this model. It only rests with your own particular needs.

For instance, if you want it for town or office, then a novelty checked suit crepe silk in brown and beige and white is a very smart medium.

For a little later for warm summer days, printed sheer linen in red and white with white organdie trim is lovely and cool.

Another lovely suggestion is a navy blue sponge cotton that is piqued, or a big part in fashion for summer. A diagonal stripe effect could be worked out attractively.

Pattern also provides for long sleeves.

Style No. 746 is designed for sizes 14, 16, 18 years, 36, 38, 40 and 42 inches bust.

For 16 requires 3½ yards 39-inch with ½ yard contrasting and ½ yard 54-inch.

Price of pattern 10 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Publisher Picked Good Man

Cyrus H. K. Curtis Gave Employer Credit For His Success

Cyrus H K Curtis Philadelphia publisher who when he died was the publisher of prosperous newspapers and even more prosperous magazines having nation-wide sales running into the millions, ascribed his success to the men who worked for him. He once said:

"The main point with me always has been in getting somebody to do a job better than I could do it myself. I knew what I wanted, but I could not always accomplish it. The success of our organization has been due entirely to the people I have found."

The late Edward K. Bok, editor of the Ladies' Home Journal, was probably as well known, if not more so, than his employer. It was he and not Cyrus H. K. Curtis who conceived that magazine The personality of the man at the head of the editorial staffs is important on the pages of the Curtis publications.

Unquestionably Mr Curtis was a man of wonderful business instinct. He started in the newspaper line with a capital of three cents when he purchased the last three papers from a newsboy and sold them at the full price With his six or nine cents he bought a few more papers next day an pyramided his earnings day by day until at length he decided he would make newspapers and magazines his life work Probably he was more a business man than a journalist. If his first business deal had been bananas he might have become a great fruit importer.

The salient fact in his career, however, as he said himself, is that he picked men who would do certain jobs better than himself

That is how lots of successful men succeed. Sometimes they recognize that fact in a friendly way—and sometimes they don't. St. Thomas Times-Journal.

Left-Handed Children

Should Not Be Forced To Use Right Hand

Kettering, Ohio, convention has forbidden its teachers to stop left-handed children from using the left hand for writing and other manual work. This has been done in consequence of a report by Dr C B. Hegg, the medical officer, whose attention has been directed to certain cases of stammering. The inquiries revealed that a number of these cases were left-handed children who had been converted to writing with their right hands.

Dr. Hegg cited facts showing that of 40 left-handed children who were compelled to use the right hand 24 became stammerers. In a further case 15 right-handed children were trained to write left hand. All but within five months all developed stammer.

London Conference Delegates Meet On Ground At World Garden Party

Women Stand Adversity Well

In Many Cases Depression Has Been Of Benefit To Them

Although depression has driven a great many men to insanity and nervous disorders, its effect on women has been largely beneficial, according to Dr Karl M. Bowman, assistant professor of psychiatry at Harvard medical school.

The effect, so far as nervous disorders are concerned," Dr. Bowman said, "has been much like the effect on many women during the war time. They were used to sitting around idle and worrying about themselves, but since the war got under way they occupied themselves with Red Cross work and other activities and forgot their imaginary troubles

"The depression has given those women something to do, and its efforts have been a blessing to the rich rich type, who had too much money for their own good and nothing to occupy themselves.

"Men, on the other hand, have probably increased nervous disorders. Many have broken under the strain, but strange to say, the wives of men who have lost their jobs, on the whole, not nearly so badly affected.

"A study of hospitals throughout the state revealed no increase in the number of women admitted for mental disease since the depression, the greater number, in almost every hospital, being men."

Theory Often Falls Down

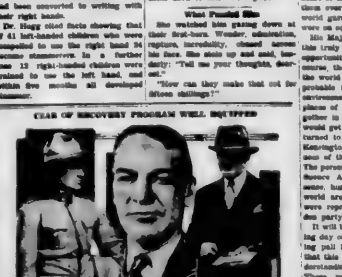
Burglar Gives Keys On Leaving Prizes Was Down Back

Modern psychologist theory believes that criminals should be treated. Last tonight some useful occupation, and on their release be given back any money they have left. Well, here's a case where the theory fell down.

Frank Marvel was given back a hundred of victims—and boys' clothes—and loaned from prison after being convicted of robbing apartment hotel rooms. This has been done in many instances of a report by Dr C B. Hegg, the medical officer, whose attention has been directed to certain cases of stammering. The inquiries revealed that a number of these cases were left-handed children who had been converted to writing with their right hands.

Dr. Hegg cited facts showing that of 40 left-handed children who were compelled to use the right hand 24 became stammerers. In a further case 15 right-handed children were trained to write left hand. All but within five months all developed stammer.

CHAIR OF RECOVERY PROGRAM WELL EQUIPPED



AS A SOLDIER. AS HE IS TO-DAY

Here are three views of the man whose job it is to put the United States workers back on the job. He is General Hugh S. Johnson, of Chicago, soldier, lawyer, and industrialist, to whom President Roosevelt has entrusted the gigantic task of directing government efforts under the Industrial Recovery Act. This includes supervision over the $3,300,000,000 public works program.

All the world represented at a garden party! Setting The spacious ground of historic Windsor Castle Hosts His Britannic Majesty King George, his gracious Queen and members of the Royal family Among those present Delegates from sixty-six countries, in attendance at the Economic Conference. More than 5,000 guests, many men of many minds in formal attire, their ladies radiant in the bright raiment of outdoor. A babel of tongues

Never before has there been a social function of this unique nature Never before was it possible. Long recent years lasting statesmen of the civil'ed world have been converging on old London, "the heart of all civilization, where the veins of commerce meet." They gathered on serious business to seek relief for a misery afflicted world. They were greeted and welcomed by His Majesty the King and after fanfare of trumpets and getting down to work. His Majesty the King invited them to a week-end garden party.

That is the way they do things in hospitable England. Business is business, but there must be the week-end relaxation. "All work and no play makes Jack a dull boy But more things are accomplished during the week-ends, at dinner parties and garden parties, than are dreamed of in the philosophy of people who do not know England and the English. And of this garden party in Windsor Castle grounds leads and contacts may have been established that will mean much later on in the conference deliberations

Consider the nature of this assemblage of people. Each delegation was well represented There were "men of the Northern mists," and dark-skinned guests from the Orient. Most men of the Latin race, Scandinavians of North and South America; from Africa; from the Dominions of the British Empire, and from "regions Caesar never knew." On the ground were men of many minds in formal attire, their ladies radiant in the bright raiment of outdoor. A babel of tongues

WORLD HAPPENINGS BRIEFLY TOLD

The Imperial home of Col. and Mrs. Charles A. Lindbergh, from which their first born son was kidnapped in March, 1932, will become a children's welfare centre

Lent began at midnight last Wednesday, Quebec, be disturbed some night, the statesmen, meeting in council, decided to spend £70 to provide mufflers for their fire engines.

Recently completed at a cost of more than $1,000,000, arts and science building of University of Manitoba may be abandoned on a temporary economy measure. It is stated.

Passage reimbursement, including a number of Americans, in northeast Manitoba province, western China, have been lured to remain under protection as the result of intervention of Chinese Communists and Soviet.

Miss Jean Pearson, a cowgirl at Shelby, Mont., took 40 days to ride a horse 1,700 miles to the county's fair. She has arranged to train the horse for an automobile ride home. It will take about 15½ hours.

In a statement urging recognition of Russia, Senator Norris (R., Neb.) said he was reliably informed by the Soviet wanted to buy from America, $10,000,000 of most products, 1,000,000 bales of cotton and $400,000,000 worth of machinery

Great Britain has agreed to take 50,000 bags a week from Brazil for the next six months, the agreement to produce the right kind of bags, Hon. D. C. McKenzie told delegates to the annual convention in Brandon of the Western Manitoba Board of Trade.

Sir Sam W. L. Machonie King, Leader of the Liberal Party in the House of Commons, will visit Aberdeen during August, according to announcement at Calgary by E. H. Lambert, Ottawa, secretary of the Liberal National Association.

President Roscoe de Valera told thousands at his countrymen that Irish Free State would not wait for agreement from the world armament conference, but would proceed with its own plans for national improvement.

Making the trip in the shortest time on record, Constable Murray Nolan, of the Royal Canadian Mounted Police, "mushed" the 625 miles between Chesterfield Inlet and Baker Lake in seven days on one of his trips "out" by mail.

Incurable Patients

Old Question Of Euthanasia Discussed By American Physicians

Delegates attending the American Medical Association's annual banquet here discuss debate the question:

"Should physicians be given the legal right to dispose of incurable patients?"

Speaking in favor of euthanasia or mercy-killing death, Dr. W. A. Guild of Chicago cited the case of a child mercifully saved from death at birth after six weeks of cry.

He suggested a special issue of immunizations to bear and grant pleas of persons who wish to die from pain was opposed by Dr. Alonzo C. Tenney, also of Chicago, who said legalized euthanasia would be misused.

Ebey Shoisions Took Part

Longest Military Band Played At Aldershot Tattoo

The largest military band in the world took part in the tattoo held recently at Aldershot. It was part of the great annual pageant, played by 8,000 soldier actors in the Aldershot Valley before an audience of 30,000 children who came to Aldershot from London and all parts of the home counties. An army officer who knows all the behind-the-scenes secrets of the tattoo remarked: "There is nothing to touch that living pageant of military bands. There are 41 bands, 17 bandmasters, 14 drum-majors, including the tallest in the British army, who stands six feet two inches in his busbet—altogether 505 musicians."

During the recent strike of seamen in New Zealand letter-bags could was delivered by aeroplane.

Pioneer Steamship Company

Cunard Line Celebrates 93rd Anniversary Of Its Inception

This year the Cunard Line will celebrate its 93rd anniversary by sending the "Aquitania" to Halifax, Nova Scotia, the first port touched by a Cunard ship in America in the first year of its trans-Atlantic life, in 1840. The occasion will feature a week-end cruise to the Nova Scotian port.

The Cunard Line's birthday, like that of the United States, falls on the Fourth of July, the first ship of the Line, the "Britannia," leaving Liverpool England, on that date in 1840, and calling at Halifax and Boston 50 years ago.

The Cunard Line is the oldest trans-Atlantic steamship company—in fact, the first to operate across the Atlantic on a regular schedule. Previous to the regular sailings of the "Britannia," other steamships had crossed the ocean, but their voyages were entirely in the line of experiment. The Cunard Line started to run on a weekly schedule in 1840.

The first ship to cross the ocean was the "Savannah," built in New York City. She sailed from that port in June of 1819, when the "Savannah" left London, England, for New York with six passengers aboard. She was delayed from Britain for four days later by the "Great Western," the first steam vessel regularly built for the Atlantic passage.

The "Great Western" made the trip in 15 days, two days less than the "Sirius," and arrived with her engines in good last in the harbor. The result was regarded as wonderful.

Samuel Cunard was a close observer of all these happenings. Living in Halifax, he had acquired several sailing vessels, in which he carried mail between Newfoundland, Boston and Halifax.

During the year 1838 the British government had sent out circulars inviting bids for a faster and more reliable mail service. The bids were for ocean steam vessels. One of these circulars found its way into the hands of Mr. Cunard (their Sir Samuel) and he concluded that here was a great opportunity.

Unable to raise necessary capital in Halifax, Mr. Cunard sailed for England. He was now 50 years old. He was a man of little physique, but of keen mind, as he had a letter of introduction to Robert Napier, a shipbuilder of Glasgow, he went to that city. Mr. Napier welcomed Mr. Cunard and showed him his plans. Then called shipping men to a conference. Among them were George Burns of Glasgow, Scotland, and David MacIver, of Liverpool, England. Between these three men $776,000 capital was subscribed and left Cunard was in a position to submit a tender for the conveyance of mails once every two weeks between Liverpool, Halifax, and Boston.

This tender was lower than that made by the owners of the "Great Western," Mr. Cunard's tender, therefore, was accepted and a contract for seven years was let to the North American Royal Mail Steam Packet Co., the original name of the Cunard Line.

To carry on this trade, plans for four steamers, the "Britannia," "Acadia," "Caledonia," were drawn up and accepted during 1839, and the ships were launched early the next year, 1840.

The "Britannia," with 24 passengers, left the London docks early from Liverpool to Boston on July 4th, 1840, and arrived in Boston 14 days and 3 hours later, including a stop of 12 hours, considered as the time a rapid passage.

The mail service grew to such an extent that the "Hibernia" was added in 1843, and the "Cambria" in 1845.

In 1847, when the company's first mail contract had expired it was contract time ordered into being the Cunard Steamship Co., registered in New York with its passengers and freight business handled by Edward Cunard, a son.

More ships followed, all being built of wood, but with no regular passenger service for the "Scotia," until the year 1862, when the two screw steamer "Australia" and three other ships were built.

The company's first steel liner was the "Servia," built in 1881, and was the first Cunarder to be fitted with electricity. She was supplied with power for these days and provided accommodation for 600 cabin and 750 third class.

The "Campania" and "Lucania," the largest ships ever built for the Cunard Line, registering 12,000 tons, were built in 1893, and were among the westward crossing from Queenstown in five days, seven hours, and had already established a reputation for speed.

It was on this ship that Marconi experimented with and first introduced wireless telegraphy.

Many passenger liners have graced the Cunard Line's big fleet—the "Campania," "Aquitania," "Berengaria," "Mauretania," and others.

When the history of the Cunard

ASSASSIN'S TARGET

Mme. Venizelos, wife of the ex-Premier of Greece, smiles bravely for th camera from the hospital bed in Athens, where she is recovering from four bullet wounds received when an assassin attempted the life of her husband. The ex-Premier escaped unhurt.

Elba has in a great extent been the history of shipping, beginning with Adam and Eve. Following Cain, the iron ship, the eagle screw, the steel ship, then twin, triple and quadruple screws, and all built and propelled in the interest of the speedy transportation of the mail between Great Britain and America.

Third Most Expensive Tastes

Week Only Valuable Articles From New Find Among Ruins

A skimmer fitted with an expensive basin in smokers' equipment basket has way through two tenements and into the rooms of Mrs. Sarah Ann Dunhill, of London, Inc., 514 Fifth Avenue, New York, where he looted thirty show-cases and carried off jewelry, cigar lighters, clocks and pipes valued at nearly $25,000. There were two noteworthy things about the intruder. He was small and agile enough to pass through a pair of apertures no more than twelve inches in height; he was discerning enough to ignore articles of silver. Nearly all the cigarette and vanity cases he selected were gold, and he took pains only from the Grada A rack, where they range from $90 to $60.

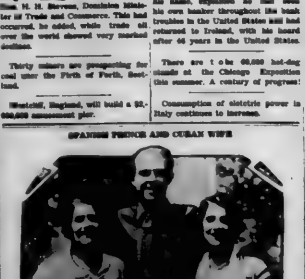
Diamond Merged Trade

Ottawa Imperial Conference trade agreements have resulted in an increase of many times $10,000,000 in Canada's exports to the United Kingdom during 1937, according to Hon. H. H. Stevens, Dominion Minister of Trade and Commerce. This had occurred, he added, while trade all over the world showed very marked

Thirty miners are prospecting for coal near the Firth of Forth, Scotland.

Westfield, England, will build a $2,000,000 amusement pier.

SPANISH PRINCE AND CUBAN WIFE



Alfonso, Prince of the Asturias, eldest son of the ex-King of Spain, pictured with his commoner wife, Senorita Edelmira Sampedro (left), of Cuba, and her sister, Maria, outside the Prince's hotel in Lausanne, Switzerland. He renounced his royal rights to wed her.

SUNDAY SCHOOL LESSON

JULY 9

CALEB

Golden Text: [illegible] But my God shall maketh Jehovah his trust — Psalm 40 4

Lesson: Numbers 13. Joshua 14. Read also Morning Psalm 121.

Explanations and Comments

The Division Of Canaan, verses 1-5 The land of Canaan was divided among the twelve tribes by whom God drew were the two sons of Joseph (Ephraim and Manasseh) and the other sons of Jacob. Levi excepted The tribe of Levi was set apart for the service of the priesthood This is Judah's, this is Simeon's, and this is Benjamin's," they said, even while the Amorites, the Jebusites and the Hittites were in open possession. Jehovah made use of the common sense in faith of certain high minds which under God's guidance they proposed to realize by the long and patient struggle which followed.

Also for the dull-eyed, humdrum people whose aspirations never get a rod in advance of their present achievements! Unless we purchase visions and dream dreams, we shall never have the moral vigor the emotional insight for winning a land of promise. It is what we see by the eye of faith and confidently wish for that kindles our hearts to undertake the high tasks of life.

Caleb's Claim, verses 6-12 Caleb came to Joshua with a claim in which he was supported by the rest of the tribe of Judah. Caleb is called here the Kenezite, a name given the Edomite tribe in Genesis 15:19, but Caleb's younger brother Othniel was after Joshua became the first of the Judges, is called "the son of Kenaz," though it may have been from the name of Kenaz, a member of the tribe of Judah, that the word Kenezite was derived. Caleb reminded Joshua of the promise that him when he sent him to Kadesh-Barnea with the other spies, whom he had had the courage of his convictions, and had brought back a sincere report urging the immediate conquest of Canaan. To that record of courageous faithfulness he could now add that he had wholly followed Jehovah his God

You wish to have pleasant memories of the past, are you sowing pleasant memories now? Just as surely as we sow in old age depends in part on the reserve strength laid by in youth, and the wisdom in old age depends on the knowledge and experience stored up in the past, so does peace of mind in old age depend on the records engraved on the memory during youth and manhood. Paul looked back over his life and said: "I have fought a good fight, I have finished my course, I have kept the faith." And then he looked forward and said, "Henceforth there is laid up for me a crown of righteousness."

Not Looking For Charity

Apparent Poor But Not Destitute In Bale

An old man scrambling half a load, his clothes in tatters, enabled Hardy Interest of civil charity at Dunkirk, France, and they are now looking for a barrowful to treat him to a square meal.

To the astonishment of all he extracted from his pocket $50,000 in bills.

The old man, who refused to give his name, explained that he had kept his own banker throughout the bank troubles in the United States and had moved to France. He had lived there for 46 years in the United States.

There are t o be 60,000 hot-dog stands at the Chicago Exposition this summer. A century of progress!

Consumption of cisterite power in Italy continues to increase.

Coal Subsidy

One-Seventh Of a Cent a Mile On Coal Shipped From Saskatchewan Lignite Fields

Subsidy of one-seventh of a cent a mile on coal shipped from Saskatchewan lignite fields to points in Manitoba and as far east as Beaux Lookout, has been made effective by [illegible]

Word of the passage of the order-in-council providing for a subsidy of one-seventh of a cent a mile, but not to exceed in any case a total of 60 cents a ton was received recently by officials of the Saskatchewan department of railways, labor and industries.

The freight concession will apply only on lignite coal shipped out of [illegible] Manitoba and western Ontario points for consumption [illegible] only, and will not apply to anything under carload lots.

The concession will be accorded only to mines established before December, 1931.

The rate concession will place Saskatchewan mines in a favored position in competition with coal from American mining fields for distribution [illegible]

The order-in-council provides for the freight concession being actually paid to the railways by the government, the adjustment to be made direct to the mine operators.

Ban On Swastika

Germany's Social Democratic party [illegible] banned by Reichstag [illegible] the revolution, has ceased to exist as a political organization.

Chancellor Hitler's heavy hand, which first fell upon the Communists, has now descended upon the party which long was the leading one and was regarded as an impregnable bulwark of the post-war republic.

Within a few days to be known as "Red Sunday" inflicts the Hitler movement intends to chase 100 per cent. out of Germany.

A serious blow was dealt to department and chain stores in an order issued in Berlin by Hitler's chief of staff and said: "I have fought a good fight, I have finished my course, I have kept the faith." And then he looked forward and said, "Henceforth there is laid up for me a crown of righteousness."

Not Looking For Charity

Apparent Poor But Not Destitute In Bale

An old man scrambling half a load, his clothes in tatters, enabled Hardy Interest of civil charity at Dunkirk, France, and they are now looking for a barrowful to treat him to a square meal.

To the astonishment of all he extracted from his pocket $50,000 in bills.

The old man, who refused to give his name, explained that he had kept his own banker throughout the bank troubles in the United States and had moved to France. He had lived there for 46 years in the United States.

There are t o be 60,000 hot-dog stands at the Chicago Exposition this summer. A century of progress!

Consumption of cisterite power in Italy continues to increase.

RAPID RISE IN PRICE OF WHEAT SAVES SITUATION

London, Eng. - A combination of blunt words and what Prime Minister R. B. Bennett of Canada, called "an act of God" - a boon in the short market saved the efforts to obtain an international agreement for wheat acreage restriction from a [illegible]

The wheat situation seemed to be taking care of itself nicely for the time being and it was agreed the conference of the four biggest wheat exporters - Canada, United States, Australia and Argentine - could well afford to wait for a brief space until the Australian situation is cleared up.

The blunt words were spoken early in the day, which teemed with dramatic developments, after Stanley Bruce of Australia had told the other delegates the three principal Australian states were firmly opposed to restriction of acreage unless Australian adherence appear hopeless.

Other delegates countered with words to the effect Australia must fall into line sooner or later, and the sooner the better. The nearly 500,000,000 bushel surplus of Canada and United States was considered. It was intimated it has got to be disposed of somehow and if no agreement was reached there would be no other alternative than to put it on the market for what it will bring. The actual word "dump" was used by one of the Americans but it was said to have created a deep impression.

What Prime Minister Bennett called an "act of God" developed or may [illegible] to Roosevelt," made its force felt when Prime Minister Ramsay MacDonald, chairman of the world economic conference took a hand. Perturbed over the near breakdown, he called Premier Bennett, Henry Morgenthau, Jr., of the U.S., Earl Bruce and Senator A. L. Bruton, of the Argentine, into conference.

In Canada it was indeed the view to [illegible] to be cast for [illegible] unity. While the abnormal carryover remained one of the great problems for action, crop reports coupled with the extraordinary rise in wheat prices, have introduced new factors which should be borne in mind.

When he received information concerning the rise in the price of wheat on world markets, presumably by reason of adverse crop reports, Mr. MacDonald professed satisfaction with the progress of the negotiations.

"Progress has shown that a year's crop cannot be estimated accurately until July 1 to July 15," one of those who attended the MacDonald meeting said. "Then it may not be necessary to take such drast c steps as originally contemplated, and it is hardly likely that a move will be made in that direction until about that time.

"Threat of chaos and price debacles which will follow if the Canadian and United States wheat surplus of 960,000,000 bushels is "dumped" on the world market acted to save from breakdown the wheat acreage restrictions negotiations of the four principal wheat producing nations.

Victim Of Short Illness

Toronto, Ont.—Major General W. B. Lindsay, who commanded the Royal Canadian Engineers at the battle of Vimy Ridge in the Great War, was found dead at the Toronto Hunt Club, apparently a victim of heart disease.

On Welcome Committee

Ottawa, Ont.—The Dominion Government will be represented at the informal welcome to President Franklin D. Roosevelt, at Campo-Bello Island, N.B., by Hon. Murray MacLaren, Minister of Pensions and National Health.

Decides Not To Resign

Winnipeg, Man. - Hon. Albert Prefontaine, former minister of agriculture in the Manitoba Government and at present minister without portfolio, has decided not to resign his seat in the legislature or his position in the government.

Lucky Like Prosperity

What is this? Prosperity turning the corner? A new Broadway cafe-teria in New York announces that the theory in its windows will be served with silver dollars. Light-fingered gentry need not come around. The coins will be cemented hard and fast.

On the average wheat contains 60 per cent. starch.

Relief From Drouth

Rains Over Wide Areas Greatly Benefit Situation

Ottawa, Ont. - At least temporary relief from drouth was provided over wide areas in the prairie provinces by rains during the past week This was received more effective by moderate temperatures, according to the weekly telegraph crop report issued by the Dominion Bureau of Statistics. The serious dangers from grasshoppers or cutworms

Drouth has had a damaging effect on crop growth across the southern part of Canada from eastern Quebec to the Rockies Heavy rainfall has greatly improved conditions in the Maritime provinces Drouth prevails throughout Quebec, with growth of all crops retarded Rain is urgently needed Similar conditions prevail in Ontario, where the dry weather has adversely affected nearly all crops.

Crop prospects in the prairie provinces are encountering many trials particularly drouth, heat, hail, insects and disease Grasshoppers are becoming voluntary pests, and threaten the crops over large southern areas of the three provinces

Rains have necessitated the damage from drouth in Saskatchewan. During the past week, there was a good rain in northern and central districts of the province which either maintained or improved prospects, but further general precipitation is necessary.

British Columbia reports are much more optimistic as a result of the week, warm weather of the past fortnight.

Renewed Confidence

Advances In Commodity Prices Is Augury Of Better Times

Calgary, Alberta. - Recent advances in commodity prices, stated so by Premier J. E. Brownlee of Alberta to the renewed confidence of salaried men and women in the security of their jobs.

In Calgary attending the annual convention of the Union of Alberta Municipalities, Premier Brownlee continued to express confidence in the early return of better economic conditions to the province and Dominion.

"Thousands of our Canadian people are on salaries. When they lose confidence they do not spend freely. When they are spending freely, they generally think the reserves which have been held back in recent years by the salaried men will be released. Industry is open and that this influence will be felt throughout the Dominion for the better part of the year.

Explaining a reference to a construction program, Mr. Brownlee said the government was now conducting a survey of useful public works which might be done in the provinces.

"The whole question of work which is the government's responsibility will be to increase accommodation in various provincial institutions," he said. "If we can find the money, such work may just as well be important needed to open up business again in the west."

Will Protect Farmers From Crop Seizures

Saskatchewan Debt Adjustment Commission Completes Plans

Regina, Sask. - Plans for the protection of farmers against undue pressure from creditors have been completed by the Saskatchewan Debt Adjustment commission.

After farmers who adopt the plan laid down by the board have filled in the necessary form provided the board will arrange:

(1) That no seizure of the crop will be made by sheriffs to pay off judgments, etc.

(2) That creditors will not be allowed to seize.

(3) That farm implements will not be seized.

(4) That title to land will not pass to the tax sale purchaser.

Another duty laid upon the board forwarded to farmers in Saskatchewan by the debt adjustment board in the form of a circular letter.

Resigned

Rumor, Man.—Theodore Hilfmyer, 38-year-old farmhand, was fatally injured when attached by an infuriated bull on his employer's farm near here.

Mr. Justice Aikins

Mr Justice Aikins is the new Judge of the King's Bench Division who succeeds the late Mr Justice Middleton. Aikins is famous bachelor Judge who committed suicide recently

Resigns From Cabinet

Hon. E. W. Evans Steps Out Of B.C. Government

Victoria, B.C. - Hon. E. W. Evans, Minister of Public Works, stepped out of the British Columbia Government, the fifth minister to resign from Premier T. D. Pattullo's cabinet since May 31. Three ministers, M. S. Loughead, W. C. Shelly and William Atkinson, retired in connection with the cabinet reduction on that date while W. A. McKenzie left in protest against the government's irrigation policy.

In a letter to the premier, Mr. Evans recounted his stand in favor of union government more than a year ago, his gratification when Dr. Tolmie announced his intention of forming such an administration, and his present belief that "no real union has been formed, nor do I see any prospect of your being able to form it." He sent expressions of highest personal esteem.

The life of the legislature ends on August 31. No election date has been set. Some 65 candidates have been nominated under the various banners of Pattullo Liberal, former Non-Partisan Liberal, Canadian Co-Operative Commonwealth Federation and various other parties Many others have declared their intention to run and the election are presented long ballots with a wide range of political opinion from which to choose on election day.

Canada's War Memorial

Ottawa, Ont - Canada's national war memorial is being altered in accordance with suggestions of the Prince of Wales The memorial stands in Hyde Park, London, England, a great a year but has been taken to the March Brothers' studio for changing. When completed the memorial will be brought to Ottawa, although a site has yet to be definitely selected.

Gold Standard Debate

Rise In Commodity Prices Is More Encouraging Factor

London, Eng. - While the forces are gathering behind the scenes of the world economic conference for a renewed struggle over the gold standard, a new spirit is entering world trade.

Continued rise in commodity prices gives confidence to the belief the tide has turned at last. Dollar wheat at Chicago with reports of small crops, both in Canada and United States, caused the situation which a setback in negotiations to limit production had made increasingly difficult.

For some days increasing pressure has been brought to bear on the United Kingdom's delegation to link sterling with the gold countries and stabilize at the present level, which the United States flatly refuses to stabilize at this time for fear of the effects on their internal price raising program.

The British have stoutly resisted the proposal on the double ground that it would be unwise to do so until the U.S. was ready to stabilize, and until they know what is going to happen to the un-pegged American dollar.

Recently it was made known in high quarters that the British had absolutely refused to commit themselves to the new European gold bloc headed by France, Holland, Switzerland and Belgium, which is considered in some quarters as an effort to split Great Britain and the United States, as they would be unable to deal independently of the gold countries on stabilization.

Great Britain therefore is sitting tight, the cards in her hands free as she can deal directly with the United States on stabilization.

Alberta Grasshopper Menace

Province Said To Be Facing a Serious Situation

Edmonton, Alberta.—As the result of a very serious situation which has arisen in the southern areas of the province in the vicinity of Lake Newell, a strike-ballot in various ways. Immediate steps were taken at the breakup of the conference to secure this information, and the conference said there would be no difficulty.

The engineers were represented at the conference by R. J. Cobb, Toronto; the firemen by H. H. Lynch, Ottawa; the trainmen by Senator James Murdock, Ottawa; conductors by Charles Mountain, Montreal, and the telegraphers by W. H. Phillips, Winnipeg In addition, E. J. Gerard, chairmen from the Atlantic to the Pacific were present.

The Canadian Pacific was represented by Grant Hall, vice-president, and George Hall, manager of the department of personnel. Representing the Canadian National were President S. J. Hungerford and Vice-President A. J. Hills.

Army Of Workers

Two Thousand Men Now Employed In Government Camps

Ottawa, Ont. The number of single men now employed in government camps throughout Canada has reached 18,000, according to figures of the Department of National Defence. The number is steadily increasing as the various projects develop. The work of the national defence includes improvements of various militia camps, highway construction and landing fields for aeroplanes.

On Rotary Directorate

Boston.—Dr. J. J. Allen, mayor of Ottawa, was nominated by the Canada-Newfoundland delegation to Rotary International as a candidate to fill one of the five vacancies on the Rotary directorate. The annual report of Chesley R. Perry, secretary, showed a membership of slightly more than 167,000 distributed among 3,6.9

Term Of Office Extended

London, Eng. — Announcement is made that Sir William Clark's term of office as high commissioner in Canada for the United Kingdom had been extended until September, 1934. Sir William was appointed to the post in 1928.

GENERAL STRIKE THREATENED BY RAILWAY MEN

Ottawa, Ont.—A general strike of Canadian railway running trades seemed as a possibility following a deadlock reached by railway and union officials over the proposed 30 per cent. wage reduction.

A meeting here with Hon. W. A. Gordon, Minister of Labor, as chairman, at which the proposed wage reduction was discussed by company officials and representatives of the men, ended in a deadlock. Union officers then took under advisement asking their 24,000 members whether to call a general strike

Five groups of railway workers were involved in the dispute—engineers, firemen, conductors, trainmen and telegraphers. In the background was the possibility of a strike by all organized railwaymen in Canada. On June 15, the Canadian National and Canadian Pacific railways placed notice on all employees other than the five groups mentioned, they too must accept a 30 per cent. reduction in basic rates. It was believed likely that any strike engineered by the five main groups would be joined by the others, including shopmen and trackmen.

The running trades were asked by the railway managements to accept a 30 per cent. reduction from basic rates. The men already have told the railways they will agree to continue the 10 per cent. reduction has been in operation some months.

One of the arguments used by the men was that a 30 per cent. reduction would mean Canadian railwaymen would be working at rates 17½ per cent. lower than those prevailing in the United States.

Members of the different committees of the five unions represented at the conference, it was necessary to return to the country to take a strike-ballot in various ways. Immediate steps were taken at the breakup of the conference to secure this information, and the conference said there would be no difficulty.

The engineers were represented at the conference by D. E. Cobb, Toronto; the firemen by H. H. Lynch, Ottawa; the trainmen by Senator James Murdock, Ottawa; conductors by Charles Mountain, Montreal, and the telegraphers by W. H. Phillips, Winnipeg In addition, E. J. Gerard chairmen from the Atlantic to the Pacific were present.

The Canadian Pacific was represented by Grant Hall, vice-president, and George Hall, manager of the department of personnel. Representing the Canadian National were President S. J. Hungerford and Vice-President A. J. Hills.

PUTTING THEIR HEADS TOGETHER

The camera caught Premier Ramsay MacDonald (left) and Cordell Hull, United States Secretary of State (right) in this unusual tete-a-tete pose during a dinner for the delegates at Grosvenor House recently. Apparently the statesmen are exchanging views "off the record." Premier MacDonald is Chairman of the World Economic Conference and Mr. Hull is the chief delegate from the United States.

Science Invades The Laundry

National Research Council Solves Sanity Problems

Science has invaded the laundry. No more holes in the guest room sheets, no more raggedy towels, no more sour-edged collars, no washed-out colors. The national research council has harnessed science to the laundry.

The Eastern Canadian Laundry Men's Association are to hold a convention in Toronto and will be informed that by the application of science to their business they can cut $100,000 a year from the nation's laundry bill.

Leaders in the industry some time ago told the national research council their troubles. Here a tablecloth came out a fthe laundry full of holes. Where a bunch of colored towels came out with that washed-out complexion. stained shirt collars and cuffs refused to come clean except under drastic methods that would damage the bolts.

What could be done about it?

The research council established a testtube and laundry branch. In it was found, not a modern Mrs. Gamp or even a laundry manager, but a scientist, Dr. C. H. McIntosh.

In a miniature drying cabinet small squares of linen were being surreptitiously by instruments and gadgets.

In all manufacturing cities subplier materials from the washing factory ascertain the air is absorbed by wet fabrics, that gum is converted into colloidal acid, and the housewife wonders how on earth those holes came in to her good linen tablecloths and sheets.

Dr. Mcintosh's interest in giving the subject close treatment is the fact that he's married, and that he'll have just what does really happen.

The laundering of fabrics wears them out far more quickly than actual wear and tear, and the laundries of Canada have for years been outlying this loss as a subsidy.

One laundry refuses to believe the evidence. It has been washing clothes for years and years and these are the customers that seldom complained. They did not feel called on to accept the plausible theory agreed to unanimously by the committee of laundry men.

The only other put into effect all the other recommendations, but said their own experts to Ottawa to learn more about clothes.

Do they bring their practical problems to you?" Dr. Mcintosh, the young Scots-born scientist who is trying these troubles, was asked.

"Yes," he replied, "A well-known club claimed that a laundry had damaged a huge quantity of table linen. Our tests showed the damage due to faulty weaving, and the linen manufacturer made a handsome adjustment to the club and the laundry's reputation was cleared."

Doctor Has New Idea

Suggests Skin Irritants Or Foods May Cause Crimes

Hay Crime Crimes

An experiment to discover whether "constitution" of the nervous system to dust, medical drugs, or even the various kinds of food plays any part in producing psychopathic conditions that lead to crimes is being made on 50 inmates of Hong Hay prison. Dr. V. C. Branham, deputy commissioner of corrections, relies on skin tests to show whether the individual is affected by certain kinds of dust, pollen, drugs, or foods in the content that he may become "criminalic." In this case he is a reaction, and in some cases may commit impulsive acts. Dr. Branham has found.

Prize For Canadian

Shot Off Stronghold After Night Opinion Of People's Courage

"I have only seen Canada in a time of depression. His Excellency the Earl of Bessborough told an audience of the closing exercises of the Boy's Farm and Training School at Shawbridge, Que. "Having seen the Dominion during this period," the Governor-General continued, I think I have learned to appreciate Canadians far more than I would have been able to do in a time of general prosperity. There is nothing more encouraging, hopeful, or cheering than the calm, steady way Canadians have pursued their daily tasks during this difficult period with a supreme faith in the destiny of their country."

Control Use Essential

Statesmen Used In Explosives and Open Stakes For People This

Disintegrament a substance used in making explosives and dyes, also will make fat persons thin. Dr. M. L. Crossley, chief chemist, Ottawa from Standard University, told the Pacific Division of the American Association for the Advancement of Science here.

But he warned women not to storm the drug stores, for improperly administered disintegrant in a short time will kill them with a fever of 110 to 115 degrees. In proper doses, however, he said, it melts fat as fast as it forms.

Life On Board Old Ship

Slightly Man From Crew of Old Ship Tragedy, Recently Rescued

No stranger crew ever made the Seven Seas than that of the U.S.S. Constitution. Eighty men went aboard the restored frigate in June, 1797, a motley crowd of fifteen nationalities to them. Everything about "Old Ironsides" is the same today as in 1812, historic Navy Yard in Washington. The work is all done by hand, even the decks are scrubbed with water pumped from the sea. The only concession to modern life is the electric lights. Yet the Constitution, after nearly two years, is reported ahead intact. Quite a record, in view of the pleasant duty to be had on the up-to-date men-of-war.—Boston Post.

Should Have Objected

Mr. Richards was persuaded to buy a parrot that could jabber in several languages. He ordered it sent home.

The same day his wife ordered a chicken for dinner. On learning the bird was dead, she refused to have it sent coming for dinner. Here's it cooked for Mr. Richards when he gets home."

The parrot arrived first, and Mary followed instructions. Dinner was served.

"What's this?" exclaimed Mr. Richards.

Mary told him.

"This, for goodness sake, Mary," he said, "this is awful! That bird could speak in three languages."

"Then why the chicken didn't he speak in everything?" asked Mary.

Proxy Digest Plan

The Canadian Institute of Chartered Accountants and Canadian Bar, says F. S. Revell, Canada representative of the British International Institute, who declares further that improved photography, the English accent, and the Canadian accent are identical, and is creating a Canadian performer for English film.

World's Largest Libraries

The seven largest libraries in the world, according to members of visiting party of librarians, are: Library of Congress, Washington; British Museum, London; Bibliotheque Nationale, Paris; New York Public Library; British Museum; Berlin; and the Bodleian Library, Oxford.

Not Daughter

Refusing to acknowledge John Cudahy, former employer, as daughter of Dorothy Arnold, 17, wife of the son of the millionaire, the wife of Mrs. Arnold has rejected the proposed legislation on a document to be signed by the mother before delivery of the only will present to Richard.

Advertise it, or you may have to keep it.

Spirit Of British People

Remains Further Along the Road To Normalcy Than Any Other Country

Of all the nations that participated in the Great War, none had a greater load to carry both during and after the conflict than Great Britain. Then came the economic collapse to further test the frame-work and make enormous demands on people and Government, before sailing for England on the Home Calgaric.

Professor Collingwood was invited to occupy the newly created chair of music at the University of Saskatchewan a few years ago after he had acted as adjudicator at musical festivals in western Canada.

"Today, I am an ultra Canadian," he continued. "I am intensely proud of the wonderful development in music in western Canada. We have fully equipped orchestras in Saskatoon, Regina, Calgary, Edmonton and, of course, in Vancouver. The general standard of music in the west is comparable with that produced anywhere. And now that great group of painted dwellings, together with the furniture and rugs just as Lord Strathcona left them, has been conserved by Lord Aldenham into a magnificent sanctuary.

Lucky Parachute Jumper

James Horning, professional parachute jumper, of Islip, New York state, narrowly escaped death, three times in one week. In two jumps only an hour apart, he was rescued from the waters of Great South Bay by a passing boat, and escaped serious injuries when his chute collapsed a hundred feet above the ground. Then after the jump the young man threw away the chute and was saved by firemen.

Books For Yourself

A surgeon, an architect, and a politician disputed which belonged to the oldest profession.

The surgeon claimed the distinction because Eve was made from Adam's rib. The M.D. contended, was surgery.

"But," said the architect, "before the advent of Adam order was made out of chaos. That was architecture."

"Admitted," said the politician, "but who created the chaos?"

Shackleton Expedition

Capt. Bob Bartlett, explorer, has a secret rendezvous with adventure in the land where the north wind comes from. Leaving for the Arctic in his famous schooner "Effie M. Morrissey," he refused to say exactly where his party will go. "We hope to penetrate an area about which virtually nothing is known," he said mysteriously.

Norway's whalers produced 1,300,000 barrels of whale oil in the season just closed.

Scotch girl of England are wearing Japanese socks this season.

Here We See Peter and "Punch," the two famous P.A.C. gray horses,

as they appeared at Ogunquit, Lonely, when two heroes took part in the retreat from Mons and were awarded the three medals of the Great War. Now, too old to work, they are semi-retired members of the Royal Army Service Corps at Aldershot, and are kept by officers and men out of their own pockets.

The Foreign Born

Making a Great Contribution To Artistic Development Of the West

While there is sometimes a tendency to criticize the central European in Canada, there can be no doubt that they are making a great contribution to the artistic development of the west, declared Prof. A. Collingwood, of the University of Saskatchewan, before sailing for England on the Home Calgaric.

Professor Collingwood was invited to occupy the newly created chair of music at the University of Saskatchewan a few years ago after he had acted as adjudicator at musical festivals in western Canada.

"Today, I am an ultra Canadian," he continued. "I am intensely proud of the wonderful development in music in western Canada. We have fully equipped orchestras in Saskatoon, Regina, Calgary, Edmonton and, of course, in Vancouver. The general standard of music in the west is comparable with that produced anywhere. And now that great group of painted dwellings, together with the furniture and rugs just as Lord Strathcona left them, has been conserved by Lord Aldenham into a magnificent sanctuary.

Bandit Against Government

The Newfoundland government has decided against participating in strenuously for reverse-raising purposes. Several proposals submitted in the last few months have been rejected, according to a government announcement. The stand of the government is that provision of funds, unless most deal directly with the Lotteries Licensing Board.

Trade Follows Flag

The flourishing trade under King-Bush mandate considers to Hollywood are and gangster films, says F. S. Revell, Canada representative of the British International Institute, who declares further that improved photography, the English accent, and the Canadian accent are identical, and is creating a Canadian performer for English film.

Wedding Ring Custom

The custom of wearing the wedding ring on the third finger of the left hand originated in Egypt, where it was worn as a symbol of eternity. The Egyptians believed that a vein ran from this finger to the heart.

Vigor Preferred

The big game hunter was telling his stay-at-home wife all about his encounter with the Bengal tiger and how he had finally shot it. "Then he wound up. "It was a case of the tiger or me."

"I'm so glad it was the tiger, dear," she said sweetly, "otherwise we wouldn't have this lovely rug."

◆ FANCIFUL FABLES ◆

Lord Strathcona's Home

Is Now Haven For Aged Ladies in Bedford Crewenshaven

On the door of one of the most stately mansions in Montreal there is a simple brass plate which bears the inscription "My Mother's Home." It is a tribute to a Canadian mother, who has long since passed away by a son who has attained riches and power from the humblest begin nings. There are few more picturesque figures in Canadian history than the man who had this house built. Donald Alexander Smith, who came to this country as a junior clerk in the Hudson Bay Company from Forres, in Scotland and rose to become governor and chief commissioner of that rich and powerful organization with numerous powers over a vaster territory than many kings have enjoyed. Later he wielded a strong influence in the Canadian Parliament and crowned a great career as High Commissioner in London for Canada. Honors were showered upon him by universities both in Canada and in Britain and institutions with which he was associated conferred upon him the highest posts in their gift. Queen Victoria created him to the peerage as Baron Strathcona and Mount Royal of Glencoe in the County of Argyll and of Montreal, Canada. The guest book of his home reads almost like the roll of the British peerage, as well as being a record of the names of the hundreds of guests of eminence in all activities of life who came to Canada. The present King and Queen Mary spent some months there Eight dukes and seven marquises enjoyed his hospitality, while the names of twenty-one earls and countesses appear on the visitors list. Yet these members of the British peerage form only a small proportion of the distinguished coterie of visitors. Six governor-generals of Canada and twenty-six lieutenant-governors of Canada's Grand Old Man, as well as archbishops, and bishops, generals and admirals, judges and men of science have been given after the death of Lord Strathcona the mansion and the grounds and buildings were included in the old-world setting of which A chance remark, regarding the need of a building in which parliamentary in reduced circumstances might find room, led to their undoing years, was the seed sown in the fertile soil of the kind heart of its founder. And now this great group of painted dwellings, together with the furniture and rugs just as Lord Strathcona left them, has been conserved by Lord Aldenham into a magnificent sanctuary.

CHAPTER XII Continued

"But Alec," he led on, "when I came back from the Alcocks patrol, he wouldn t co-operate with me then. He didn't seem much interested. I don't think he is getting those bonds."

"Not much interested?" Haskell echoed, with a great show of astonishment. "Sir, I wanted him to make a patrol to the Incenau River But he was in a temper. He wouldn't even listen to my suggestion."

A wild elation surged through Alan. One more step and Haskell was doomed! He fought down his elation and feigned casualty in his chair.

Williamson bore down on him hard. "Baker, answer that charge! Haskell suggested a patrol to the Incenau. In my opinion that was a splendid suggestion. It was almost the only hope of capturing those criminals. You wouldn't listen to him. How, then, can you assert you were forced to buy out?"

"He didn't . . . It wasn't him that made that suggestion myself. But he wouldn't let me go."

"That's a lie!" Haskell pounced upon him. "I suggested it. I begged him to make that patrol."

Alan looked at Haskell. "You suggested that Incenau patrol? It was your idea?"

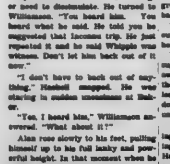
Haskell nodded. "I did. Whipple can witness it." He was smiling openly in triumph.

All Alan's hesitation dropped away from him. There was no longer need to dissimulate. He turned to Williamson. "You heard him. You heard what he said. He told you he suggested that Incenau trip. He just repeated it and he said Whipple was witness. Don't let him back out of it now."

"I don't have to back out of anything," Haskell snapped. He was staring in sudden uneasiness at Baker.

"Yes, I heard him," Williamson answered. "What about it?"

Alan rose slowly to his feet, pulling himself up to his full lanky and powerful height. In that moment when he realized Haskell was caught in the deadly trap, his whole bearing took on to Joyce's home on the Alcocks, to



Joyce's room where he had lain through weary hours of doubt and pain, and where he and she had carefully plotted this trap. He felt a wordless tender gratitude to Joyce this stratagem was here more than has her quick brain had been the first to see its crushing possibilities

Inspector, you say you asked me to bind that Incenau detail You say you suggested it. You say it occurred to you that the bandits would escape by that river I say you are a liar! I propose to prove you're a liar

He paused a moment then raised his right hand and pointed at the wall chart behind Haskell's desk.

"The Incenau River is not shown on that map of yours, inspector You tried to find out from that Indian, Little Otter, where the river is You didn't know You don't know now How could you suggest sending a patrol to a river when you haven't the slightest knowledge of its location? Stop up there to that chart, you, and show us the Incenau"

Haskell sprang to his feet, snarling at Alan. "I don't take orders from you" He was fighting like a trapped wolf His panic is evident in his frayed him

"Then consider it an order from me" Williamson commanded. "Show me where the Incenau is!"

Haskell did not stir His unpregnable defense had crumbled in one spot, the one he was rushing in upon him

He heard Williamson thundering. "I say, answer Baker's question! How could you suggest a patrol to a river that you know nothing about?"

Haskell did not answer. Caught, trapped He had gone too far, and Queen Mary spoke. His friends there Eight dukes and seven marquises enjoyed his hospitality, while the names of twenty-one earls and countesses appear on the visitors list. Yet these members of the British peerage form only a small proportion of the distinguished coterie of visitors. Six governor-generals of Canada and twenty-six lieutenant-governors of Canada's Grand Old Man, as well as archbishops, and bishops, generals and admirals, judges and men of science have been given after the death of Lord Strathcona the mansion and the grounds and buildings were included in the old-world setting of which A chance remark, regarding the need of a building in which parliamentary in reduced circumstances might find room, led to their undoing years, was the seed sown in the fertile soil of the kind heart of its founder. And now this great group of painted dwellings, together with the furniture and rugs just as Lord Strathcona left them, has been conserved by Lord Aldenham into a magnificent sanctuary.

Lucky Parachute Jumper

James Horning, professional parachute jumper, of Islip, New York state, narrowly escaped death, three times in one week. In two jumps only an hour apart, he was rescued from the waters of Great South Bay by a passing boat, and escaped serious injuries when his chute collapsed a hundred feet above the ground. Then after the jump the young man threw away the chute and was saved by firemen.

Books For Yourself

A surgeon, an architect, and a politician disputed which belonged to the oldest profession.

The surgeon claimed the distinction because Eve was made from Adam's rib. The M.D. contended, was surgery.

"But," said the architect, "before the advent of Adam order was made out of chaos. That was architecture."

"Admitted," said the politician, "but who created the chaos?"

Shackleton Expedition

Capt. Bob Bartlett, explorer, has a secret rendezvous with adventure in the land where the north wind comes from. Leaving for the Arctic in his famous schooner "Effie M. Morrissey," he refused to say exactly where his party will go. "We hope to penetrate an area about which virtually nothing is known," he said mysteriously.

Norway's whalers produced 1,300,000 barrels of whale oil in the season just closed.

Scotch girl of England are wearing Japanese socks this season.

CHAPTER XIII

By the Lightning Flash

At Alan's cabin late that evening, Bill was sitting on the edge of the cot, head in hands, plunged into despairing thoughts. He was in such a blue funk that he neither heard nor cared what Alan and Bunsaad were talking about.

An hour ago, by sheer accident, he had discovered that he himself was now officially in charge here at Rocky Waldings past Haskell's cabin in the twilight he had caught a few angry sentences from Williamson

"If I had the entire say-so, Haskell, you'd go out of the Mounted faster than you came in. You're suspended, Hardnut will be given command here till I see what Baker is going to do. You don't deserve a chance to walk straight, but I'll give you one rather than kick up a row over you There's a rook detachment down on the Border that's about your fit I'm going to transfer you there, and I'll say not a laugh when I see men saluting you."

To be in command of the detachment would mean to Bill, in the supply meant more work, more responsibility without Alan's judgment and leadership to lean on.

In the cabin, light streaming from the cabin door a girl's figure appeared Bill straightened up sudden ly, recognizing Elizabeth. Joyce's maid of the mysterious girl, Bill had no desire to linger and find out her trouble Nudging Bunsaad, he whispered:

"She wants to talk with Alan. We'd better get out."

As Elizabeth came across to the library nook in the full candle glow, Alan saw she was angry, and instantly guessed the cause of it. He had not known she was going to bring reproaches at him, perhaps threw an ultimatum into his face.

With no word about his long patrol or the wounds he had brought away from it, Elizabeth demanded:

"Is it true what I've heard—about your reward money? You've not gone to accept any of it?"

Alan was shocked that in her first breath she should speak of money He had rather lovely hair.

"That's not altogether true. I'm taking enough to buy the Maskinac trading post for Larry; and I have to pay for those things Bunsaad and I stole in Edmonton But I'm not keeping any of it otherwise."

"Are you crazy—to throw away more than you've made in all the years you've been stationed here in the backwoods? Why did you go on that patrol and waste all those weeks?"

"Good Lord, have you been thinking I did it for the money? I did it for the only thing in the world you ever think about." He tried to curb his anger and speak coldly. "Elizabeth, your brother Curt went on a patrol, he gave his very life, became—because . . . You may not understand why, but God knows it wasn't for money."

"Then you intend to throw away your reward money?"

"If you want to put it like that, yes. I couldn't associate with myself if I'd accept one red cent of it."

In silence they looked at one another, Elizabeth angry and accusing, Alan firm, unyielding. After a moment, realizing she had run up against granite in Alan Baker on this question, she turned to another

"There's something else I want an understanding about. Mrs. Drummond told me you intend to take care of Jim Montgomery's girl. What makes you feel you're responsible? Why on earth Just because you were acquainted with that child's father—"

Alan sharply interrupted her. "Elizabeth, we must point out something to you It may be cruel and ungenerous of me, but it's got to be said When Curt was taken, it fell to me to look out for you You were a green woman; you had chances of employment; you had other advantages. But I assumed responsibility. Please, now, I'm not throwing it up to you; I did it freely and would've done more if I'd been able.

(To Be Continued)

Food From Many Countries

Delegates To World Economic Conference Have Special Restaurant

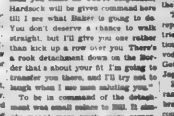
Between the plenary session speeches and the committee meetings the delegates to the Economic Conference foregather in a special restaurant stocked with nearly all foods and drinks consumed in any part of the world.

There is much fraternizing by representatives of the various countries as they sample each other's favorite national foods—caviar, sandwiches and vodka, Chinese chicken, five kinds of sausage, sauerkraut, meat sauce from Japan and so on.

Beverages available run the entire range of wines, beers, whiskies, gins, and liqueurs from a dozen countries, including Arack from Palestine, which bar attendants describe as being "popular among those persons who try anything once."

One waitress boasts of an ability to "what's your order?" in three languages.

The delegates ride from their hotels to the Conference hall in big buses decorated with small national flags.



To crown your threshold is to gain a land that waits not only there. For in that chamber I attain To peace like that which follows prayer.

How sweet to know that where you dwell No evil thing can find its way; That in your presence all is well, Serene and beautiful as day.

To crown your threshold is to find That little are temptations traps; Your look, companionate and kind, Can touch with light life's darkest days.

To crown your threshold is to leave Outside all bitterness and envy; The sacred ground how can one grieve? What troubles can assail one there?

Your faith and trust God's own threads are, As lovingly shining as the sun; With no dropped stitch of doubt to mar The fabric which your years have spun.

Cave Rat Cotton

Cotton Patches In Southern States Have Turned Complacise

The old description of "fields of snowy white" does not hold good any longer for cotton patches of south Mississippi have gone red and changed the complexion of the land.

Planters are growing red cotton now because some experts say the red variety has a longer staple and can resist wevril better than its green cousin.

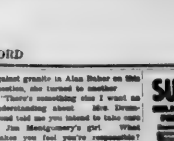
The stalks and leaves are a deep red and the fields look like lakes of blood. Even the leaves are pink and the cotton itself, of course, is white. The contrast is startling.

Poisoned Instructions

The ruralmaster, riding along on the train, sent a telegram to the section foreman which read as follows: "Cross road weed recommended several bridge 300-M. Burn."

In a short time the ruralmaster received a telegram from the section foreman: "Bridge 300-M burned."

SUNBURN
USE SUNBURN ON
CONVENTION OF "SUNBURN"



Little Helps For This Week

"There shall rejoice before the Lord thy God in all that thou puttest thy hands to do."—Deuteronomy 12: 18.

"Be ye thankful in all things."—Colossians 3:15.

Then who best given so much to me Give one thing more, a grateful heart; Not thankful when it pleases me, As if the blessing had spare desert, But such a heart whose patience sees Thy praise.—G. Herbert.

If any one would tell you the shortest and surest way to all happiness and all perfection, he must tell you to make it a rule to yourself to thank and praise God for everything that happens to you. For it is certain that whatever seeming calamity happens to you, if you thank God for it you may turn it into a blessing. Could you therefore work miracles you could not do more for yourself than by this thankful spirit, for it heals with a word and turns all it touches into happiness.—William Law.

Four Couples Is Bad

Thousand Sleeps When People Are Allowed To Spoon

With one-fifth of our working population unemployed, it is no longer possible to believe that jobs are part of the natural order of things. The result is that four has become the dominant number of contemporary America—four of being one's job. Employers today are entirely to keep what they have, three grudged for very little. This complex is bad for everyone. It degrades the employee and makes him an insensitive automaton. It kills his ambition and vision. It debases standards of living. And from the employer's point of view it is equally disastrous. Where there is no desire, there is no demand. People who desire nothing buy nothing.—Atlantic Monthly.

Gossiper Business Activity

Bank Debits In May Reach Highest Point in Two Years

Reflecting greater speculative and business activity, financial transfers in the form of bank debits in May reached the highest point since November, 1931.

The May figures stood at $3,640,000,000 compared with $1,876,000,000 in the preceding month, a gain of 35 per cent after seasonal adjustment. Debits were recorded in Regina, Calgary and Medicine Hat, in addition to the marked increases in Winnipeg and Edmonton. The per capita provinces was a gain of 63.2 per cent. The gain in British Columbia was 0.7 per cent. Vancouver showing an increase of 4.8 per cent.

A Triple Tragedy

"Goodness gracious!" exclaimed his wife when she saw him, "and pheut have ye been at now, Pat?"

Pat groaned dismally. "Oi've had the toothache in three places," he replied unhappily.

"Well," said his wife fiercely, "perhaps that'll larn ye to keep out o' them places!"

GET A HOBBY

Most of us wish to do one or more things outside of the work which is our daily task. These are the things of which we should make a hobby, because of the pleasure we derive in doing what we want to do, releasing us from the routine to which we are more or less committed for various reasons.

A hobby gives pleasure and satisfaction without any consideration of financial gain. It should be widely different from our regular occupation, and it should entail no compulsion, as it should be a perfectly free expression of a personal desire.

VOL 2 No. 19 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JULY 12th, 1933 $1.50 PER YEAR IN ADVANCE

Meeting of Provincial District Held Regular Meeting

The regular monthly meeting of the Council of the Municipal District of Clover Bar, No. 917, was held on the 11th instant with all members in attendance.

Further consideration was given to the hospital on the proposed of the Council, which was passed at the special meeting of the Council held for the purpose of arriving at a settlement of this matter, was not acceptable to the hospital authorities. A compromise offer was made which will take care of the District's liability of all indigent patients' accounts incurred prior to the 1st July, 1932.

The mill rate for municipal purposes was set at five mills on the dollar with a discount of five per centum if paid before the 15th December, 1933.

One application for old age pension received and approved.

The usual amount of correspondence was read and discussed, dealt with the passing of paysheets and accounts the meeting adjourned.

U. F. A. PICNIC

BREMNER, July 11.—A large crowd attended the annual U.F.A. picnic on the recreation grounds here. N. F. Priestley, vice-president, and Rudolph Hennig, M.L.A., were present during the afternoon.

The wide stretch of green was alive with gaily-colored frocks and children's happy faces where races and novelty events provided fun. The ball diamond was in use all day, six softball games and one baseball match being played. Ypres Valley defeating the home team 11-4 in the latter.

The U.F.W.A. served supper and a dance in the hall ended the day.

NEW PHONE DIRECTORY SOON

The July issue of the telephone directory for Edmonton and all parts north of Red Deer, will be off the press Friday, and will be distributed shortly.

There are about 82,000 copies and something like 19 tons of paper were consumed in the production.

Taken from the Files

19 Years Ago Today

Wednesday, July 16th, 1914

Some of the Partridge Hill citizens are painting up. This week it is R. Smith and C. Flintoff, Charlie slinging the paint at his own job and is sure some artist.

Spring wheat was cut in head the last week in June at Beaver Hills.

Earl Dewar spent Tuesday in the Fort on his way to Edmonton, where he will be located in future. The baseball boys will miss Earl's trusty stick.

Johnston Carmendale, government bridge and ferry builder, came in with his outfit Monday. Mr. Carmendale has just put in a ferry over the Saskatchewan in section 18, township 54, range 5, west of 4th.

On todays' local market No. 1 northern wheat was selling at 76c.

Northern Breeders' Day at Lacombe

The Dominion Experimental Station at Lacombe is centrally located in the Province. The large grounds provide excellent facilities for the holding of "Field Days" and with a very wide range of experiments under way, covering live stock, poultry, bees, horticulture and field crops, there are always many object lessons to interest and benefit farmers. During the summer a number of field days will be held at the Experimental Station, but one of the most interesting should be the Northern Breeders' Day on Monday, July 17th.

Come early and inspect the hedges, trees, shrubs and flowers before lunch. Bring your own baskets.

PIONEER MAYOR DIES

W. F. Longworthy, who was mayor of the town 27 years ago and before that time operated the Knechtel ranch near here, died at Vancouver where the family removed. He is survived by his widow and two daughters. In the days of the Klondike gold rush he was interested in a party dispatched via the overland route to the Yukon.

Josephburg News

The ladies aid will be held at the home of Mrs. Leon Krebs on July 13th at 2:30 p.m.

******

Mrs. Marvin Westover and family of Clyde, are visiting at the home of Mrs. Albert Mohr and other relatives and friends in the district.

******

Charley Thomas and Fred Thomas and families motored to Jasper Park last week.

*****

Josephburg picnic ball game results are as follows:- Good Hope vs. Josephburg 15-6 in favor of the latter. Lamont vs. Josephburg 18-10 Partridge Hill vs. Josephburg with the former winning by a narrow margin.

FINE SAMPLES OF GRAIN SHOWN

Several samples of grain grown on Fertilized ground are on display at the Fort HardwareCo. These samples along with others taken from non-fertilized ground clearly shows the advantage in using fertilizer. Mr. Wm. Gillison of Partridge Hill district tried fertilizer this year for the first time, and on Garnett grain, the stalks averaged in height without the aid of fertilizer was about 14 inches, on the fertilized ground the stalks were 20 inches tall and headed.

These samples will gladly be shown at anytime at the Fort Hardware Co., who are the agents for Elephant Brand Fertilizer.

A large number of people need fertilizer on vegetable gardens and flower beds this year, so far we have not heard what results they obtained.

St. George Tennis Club Wins From Excelsior Club by Low Margin

The Excelsior Tennis Club, Bon Accord, came to the Fort last Wednesday to play a friendly match with St. George's Club.

Some really well contested games were played and the tennis were well watched.

Playing 11 game matches throughout the Fort just managed to nose out in front by one point. Score 73 games to 74.

Really good catering made the match a perfect success, and of course the men want another!

UNITED CHURCH SERVICE

Next Sunday, July 16th, at Partridge Hill United Church services will be held with Sunday School at 10 o'clock to 10:45 followed by preaching at 11 o'clock.

A party of eight speakers will be from Edmonton to assist on the United Group Movement.

The service will be a union one for the three appointments on the Fort Saskatchewan Rural field.

A union service is being held on three successive Sundays in the morning, no other services being held for the day.

Edmonton street price on wheat today stayed up the four cents raise of Tuesday. It was 64 Monday. This is the highest price recorded in Edmonton in about three years.

Rye seems to forging ahead, and at one time Monday was eight cents ahead, no doubt the U.S.A., processing ton of 50 cents a bushel on wheat has something to do with the high price paid for rye.

With prospects for a good crop in this district, and if the growers can get a fair price, we'll just about be around the corner of this depression.

St. Eugene News

E. Neal is suffering with a broken wrist he received when his horses ran away with a road grader

*****

Mr. D. Hood just returned from a trip to Shaw Lake

FORT LOSES TENNIS MATCH

In the Inter-mediate Tennis league games played between Civil Service of Edmonton and Fort Community on Tuesday evening, the former took all of the nine events.

Five events were played at Civil Service courts and four down here at the Community courts.

Although the local players lost, improvement is beginning to show as a result of playing in the league with first-class Edmonton teams.

After the events, a light refresh ment was served to the local players in the Civil Service club rooms, while at the Fort the visitors were served refreshments in the Badminton hall.

The next league tennis match will be held on Tuesday evening, July 17, between Varsity and Community club

NOTICE

TOWN OF FORT SASKATCHEWAN

At the request of the business men, the by-laws, re Town Hours, passed by declare Wednesday, July 19th, to be a civic holiday.

G. T. Montgomery, Mayor.

DAUGHTER OF FORMER BANK MANAGER DROWNED IN GULL LAKE

Phyllis Clark, aged eight years daughter of Mr. and Mrs. W. D. Clark, manager of the Royal Bank at Alix, was drowned in Gull Lake late Saturday afternoon.

Missed after she had gone wading with friends, the girl's body was found in 14 inches of water and attempts at artificial respiration were unsuccessful.

Mr. Clark was manager at the Royal Bank in Fort Saskatchewan a few years ago, and will be remembered by the people of the town and district.

Good Hope

The Elk Point baseball boys visited Good Hope boys Tuesday evening, July 4th. The local boys won by a score of 8-3.

*****

Mr. A. E. Meyer, Miss Eva Meyer and Miss Velma Meyer, motored to Vegreville last Monday.

*****

Mr. and Mrs. H. J. Bruton were Edmonton visitors last Friday.

*****

The Good Hope people certainly enjoyed themselves at the picnic held around here last week.

*****

Mr. and Mrs. Chas. Thomas and family left for Banff last Saturday.

During the past week plenty of rain has visited the district and crops are looking better.

As the leading paper in the Victoria Constituency the Record is a necessity in every home. It contains all the local and district news written by our own correspondents and the reports of all Fort activities.

The farmer's wife will save money by paying attention to the bargains advertised by the local merchants, who like the local newspaper deserves your support.

"I understand you've got your divorce, Mandy. Did you get alimony from your husband?"

"No, Mrs. Jones, but he done give me a first-class reference."

*****

We Believe It.—It certainly does pay to co-operate. Just consider the business—every time it leaves the bunch it gets skinned.

SALADA

The World's Grain Show.

From the beginning of time man's chief concern has been the question of food to sustain life, and particularly that item of food which we have come to term the staff of life, bread. All down through the ages man has grown grains which, at first, by means of the crudest of methods he crushed and converted in a kind of flour. In the early years of the world's history wheat was recognized as the most acceptable of all grains for flour making purposes, the most highly prized of all grains. For thousands of years wheat has been a vitally important factor in the life of the human race. If there was a lack of it famine faced the people in the days of Joseph the first storage elevators were built in order, in years of plenty, to provide for the lean years which always have come and always will come.

The growing, storage, transportation of wheat was a problem in those days, and it is one of the world's greatest problems today other the passage of thousands of years. It is engaging the attention of the statesmen of the world assembled at the World Economic Conference in London, England; it is the reason for the World's Grain Exhibition and Conference which opens at Regina on July 20, close and full in the world supply and world prices of wheat is one of the great trade interests of the world. Prices of other commodities fluctuate but the price of wheat fluctuates.

Therefore, the World's Grain Exhibition and Conference at Regina is an event of outstanding importance, and of particular importance to Canada as one of the great wheat producing and exporting nations. It is not a Regina exhibition, nor a Saskatchewan exhibition, nor a Canadian exhibition, and a world exhibition in every sense. But of all sections of the globe none is more vitally interested in its success than the prairie provinces of Canada, for in the very heart of which it is being held, and which of itself may be regarded as a crisis in the history of the world's oldest and most important industry.

Years of planning and organization effort have been devoted to making this World's Grain Exhibition and Conference a notable event. As a result, it will undoubtedly prove to be one of the greatest world exhibitions devoted to a single phase of human endeavour ever held. Which wheat will occupy the premier place becomes, as wheat always has, a matter of keen interest to the commercial life of the world, every known variety of grain will be on exhibition and in competition. Many tons of exhibits from a score or more countries from all continents, the most extensive and most representative national exhibits as well as the competitive exhibits, will be attractively displayed in the largest grain exhibition building in the world, built especially for this great show. The exhibition embraces several acres of floor space, and actually miles of frontage of exhibits.

This building in itself alone will repay a visit to the world exhibition. The scheme of decoration in connection with the interior of the structure is completely devoted to grains and grasses and seeds of every kind, description and color. It will be a veritable bloom of light and color, with huge colored transparencies,—the largest in the world, specially constructed in England,—and lighting devices too numerous to enumerate.

Apart from the exhibition proper, the conferences to be held on every important subject related to grain growing, financing, storage and transportation, and participated in by the leading experts and authorities of countries throughout the world over, will be of such a high educative value that people so deeply interested as Western Canada farmers can, cannot afford to miss them. Such subjects as Prevention of Smut, Rust and Weevil, Wheat Breeding, Selecting and Controlling Production, Farming World's Wheat Surpluses, World's Export Cereal Requirements, World's Wheat Import Standards, Merchandise Methods in Grain Marketing,—Can Improvements Be Effected? Grading Economy in Transportation and Storage of World Export Grains, Livestock—Its Place in Marketing Grain, and many others, will be discussed by men who are familiar with their problems and who can speak authoritatively on them.

Meeting members of the great world conference will be held in the Armories, located in the exhibition grounds, a beautiful building capable of seating 4,000 people comfortably. Afternoon and evening meetings of joint meetings of various technical societies and groups, and will be held in Regina College and adjoining buildings.

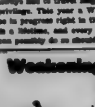
As an exhibition city, the capital of Saskatchewan will be looking its best as the citizens are vying one with another, as well as working unitedly through various civic bodies, to beautify and decorate the city for this memorable occasion.

And there will be ample accommodation for all who may come. In addition to a "tent city" of 2,000 tents, with all sanitary conveniences, erected adjacent to the exhibition grounds, thousands of city homes are being thrown open to exhibition guests, and the citizens, every one of them, are imperatively, almost, if not indeed, commanded to make the Regina World's Grain Exhibition a success.

Everyone in this World's Grain Exhibition is being held in conjunction with the annual Provincial Provincial Fair, which has been greatly enlarged this year, and all within the same grounds, visitors will enjoy the advantages not only of the World Show but of the Provincial Fair as well, with all the varied attractions and amusements it will have to offer.

Saskatchewan Canadians wishing to see a World's Exhibition have in the past always had to travel long distances and go to great expense to enjoy such a privilege. This year a World's Exhibition, and one in a class by itself will be in progress right in their midst. It is an opportunity that comes but once in a lifetime, and every person resident in the three prairie provinces who can possibly do so should take full advantage of it.

Weakening Diarrhoea Dangerous Dysentery



Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Don't delay. Get a bottle of Dr. Fowler's Extract of Wild Strawberry, which will check the disease, but at the same time it strengthens, stimulates and tones up the system.

Many testimonials in favor of Dr. Fowler's Always be sure to get the genuine. Refuse substitutes. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

What is True Conditions

United States May Have To Import From Canada This Year

If the crop experts are correct in their predictions the United States will have to import wheat before the 1934 crop is harvested—and Canada is the wheat for sale.

United States Government reports estimate total production for the present year at 603,000,000 bushels. Normal consumption is 620,000,000 bushels, and usually there are heavy exports, shipments to territories and insular possessions. Winter wheat is down 316,000,000 bushels from the average and spring wheat is "below normal."

At the same time, Canadian Government officials reported that in Saskatchewan and Manitoba crop prospects were "definitely better" than a year ago, and in Alberta only very slightly below the corresponding date of '32.

On the basis, then, of present expectation, the United States will be cut off the export market for the next year, and in addition, will have to import a considerable quantity of wheat. This situation would reset to the disadvantage of Canada, as it would open into the new crop year with a very heavy carry-over and the best outlook in a decade for a heavy and profitable production. Dollar wheat may not be so far away as it has seemed.—Ottawa Journal.

Council Favours Like Courses

Believe He Is Friend and Pays For His Keep

Uncle Sam's experts and states of Massachusetts and Maryland may be interested, but Prince Edward Island's Provincial Council has evolved a theory of its own. It is that a cow is one of the greatest conservationists of soil fertility. Hence, the Council has established several cases of cows on farms, at the rate of $60 per month.

Each cow is supposed to produce 10,000 pounds of milk per year, and actually values of fractions of exhibition.

Andrew L. Fisher believes it is.

"Generally speaking, New Hampshire farmers don't spend much over cows," he said. "We'll have 'em saving for many a generation to come. Then we'll have to have 'em pay for their keep. Can be found all pasturing, we'll stuff them with straw, put a sugar bag band on top an have us a manorure for old Prince Edward."

They say the best way to help the insects they eat."

Influence Of Women

Thinks Confidence Would Be Much Better If World Was Guided

By Women

"There is one thing of which I am absolutely positive," said C. F. Hoover, Indianapolis, in addressing the annual banquet of the Ontario real estate association at the Royal York hotel, Toronto, at Toronto. "If women controlled the nations and politics of the world we would not have had the unpleasantness of the past few years. If the world were guided by women there would be no wars. Men talk about the part women have played in the world war, was the greatest disaster the world had ever seen. "You may take Queen Victoria, Empress of Germany or Mussolini of Italy—none of these hits the power of the president of the United States."

T.B. Infection

New Substance Reported Being Made To Eliminate Presence Of Germs

Toronto

Research workers of the National Tuberculosis Association are perfecting and will shortly give the world a new substance to determine accurately the presence of tuberculosis bacilli that is sure, the Toronto Telegram said it has learned.

"This substance, it is understood, will contain no foreign elements other than the one the purpose of which is to indicate diagnostically the presence of infection," the newspaper said. "It has as yet been given no name and is not ready for public distribution."

New Clock Very Accurate

Master Timepiece Will Not Vary Second In Five Years

A master clock that will not gain or lose one second in five or six years was described before the 219th meeting of the Physics Club of New York by G. M. Caldwell, former Federal Radio Commissioner. The clock was completed recently in Washington by engineers of the United States Government and will be installed at the Naval Observatory there to regulate all official clocks and correlate over government radio stations. In short, the new timepiece will set the pace for all activities ashore and afloat.

The clock operates on a unique principle. A slender bar of crystal quartz a few inches long is suspended in an air chamber, in which the temperature is kept constant to within a few hundredths of a degree. The arrangements of the quartz bar in the chamber is such that air vibrations react on it to produce what is called "accurate feedback." The bar of quartz is delicately suspended by slender threads. An accuracy of one part in 100,000,000 is claimed.

Checks upon its other means are not nearly so high accuracy," said Mr. Caldwell. "Even the best pendulum timepieces have a daily error of a second, more or less fast and slow, in accordance with the attraction of the moon's mass. But the electronic clock, employing crystal, gives accuracy on beating time, unperturbed by the effect of moon on earth. A clock employing such a principle is the most accurate known."

Foresight Of British Soldier

Made Possible Rapid Mobilization Of Army For Great War

A hundred years ago was born near Dublin, Ireland, Colonel Wolseley, a British soldier, whose chief title to fame was that he recognized the army, understood how it should be operating, prepared it for the emergency of war and made rapid mobilization possible. But for his persistency there would have been no such preliminary force—incomparable for efficiency, it has been called—to rush to France in August, 1914. The small but well-trained British Army rendered a great service by its fighting retreat from Mons; and at the first battle of the Marne it was the rock of the advance into the gap between the First and Second German Armies created by the battle of the Marne. It has been believed that the British ranks had been broken and could not be reformed.—New York Times.

Prepare For Immigration

London

Lack Per Restriction Of Immigration From United Kingdom

Satisfied the provincial governments of Canada will shortly desire the resumption of immigration from the United Kingdom to Canada, Sir George M. L. Hornby, of Lethbridge, Alberta, announced on his return after calling in England to by proposed immigration plans before United Kingdom authorities.

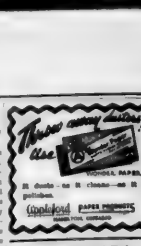
"I wish to make it quite clear that I am not advocating increased immigration before the provincial governments have come to consider this advisable," said General Hornby in an interview in Montreal. "What I am advocating at the present time is that we should formulate a definite plan of action without any loss of time. For instance, there should be the selection of requested and the preparation of suitable farm homes."

Evolution Of Electric Lamps

New Type In Very Different From Old Style Tungsten

Edison's tungsten electric lamp was one of the marvels of the 1893 Chicago World's Fair. A new type of electric lamp, in the opinion of many, promises to be the most significant scientific device on exhibit at the Century of Progress Fair, 40 years later. A Dutch scientist-expert built exhibited at a New York scientific meeting the other night has 10 times the visibility of ordinary tungsten lamps and is provided from three to four times as much light for the same amount of electricity. The new lamp provides no unusual yellow light, itself to be helpful to vision.

Motor roads in the world now total 4,000,000 miles.



It looks—as it closes—as it pitches.

Planning Unusual Flight

Children May Attempt Great Round-Trip To Australia

Famous Sir Alan Cobham and Squadron Leader Helmore are pencilling methodically with the flying trials of a new single-engined monoplane in which later this year they may attempt to fly 10,000 miles nonstop. Probably to Australia. They plan to have the plane refuelled in flight from "tanker" aircraft which will ascend to meet it from five or six aeroplanes along the way. Thus the need to carry an enormous load of fuel at the start is avoided.

For urinary commercial use the machine is intended to carry pilot, four or five passengers and baggage. Equipped for the proposed long distance flight it will have seats for the two pilots only, the remainder of the disposable load being represented by approximately 320 gallons of fuel, sufficient for about 36 hours' cruising at 120 to 140 miles per hour. Power is derived from a single 245 horsepower Armstrong Siddeley "Lynx" air-cooled engine. A Townsend ring-cowl around the engine is responsible for a gain of 15 miles per hour over the speed attained with an uncowled engine.

If Cobham and Helmore make for Australia and have good luck, they should reach the Australian mainland from England in less than four days.

Increase In Exports

Chairman Of United Kingdom Show Heavy Increase During First Year

An increase of nearly $20,000,000 in the exports of Canada to the United Kingdom for the 15-month period ending May 31, 1933, is shown in the trading returns of the countries prepared with the same period of 1931, according to a statement issue by Hon. H. H. Stevens, Minister of Trade and Commerce, recently. For the year ended a month ago total exports of leading commodities to Great Britain had a value of $103,979,788, while for the corresponding period a year ago the value of these was $73,981,344.

The largest increases in value were wheat, which, at $60,744,288 this year, was more than $20,000,000 greater than last year.

Other items in Canada's exports increased from $2,613,000 to $3,663,000; of barley from $1,407,000 to $2,030,000; of bacon from $1,976,814 to $3,072,852.

An increase of nearly $1,000,000 was shown in butter exports.

Great Boon To Outdoors

Need Known In Colony Of Man Is Necessary

Brown is all the rage today in Germany for everything from suits to caps.

The triumph of the Hun "brown debris" has given men's outfitters an unbounded opportunity. Every garment they are displaying dull and leather goods of the color of the navy, cropped with printed calfskin-ties to all good Germans to fall in line.

"Browns are trumps!" advertises one enterprising shoe store on Berlin's busy Friedrichstrasse. Even the show display does not contain even one pair of blank footwear.

IN UP-TO-DATE STABLES

—Old Reliable Mineral's—

When horses come in to stable with wheezes, coughs, colds, heaves, or indigestion, or colic, the thing to do is get the Mineral's Tablets at once. Only 25 cents per dozen. Sample, 5 cents. Be wise!

"I like your Mineral's Liniment. Like to have it in the house. I have found your liniment a household necessity and have turned what cuts or bruises."

A family doctor prescribed Mineral's Liniment over 30 years ago. Still invaluable in every stable and every home.

Light For Plant Growth

Various Varieties Affected Differently To Time Of Exposure

It did not require any "Blue paper" from scientists for farmers to know that plant growth depended on daylight but what they did not know was that different species and varieties responded differently to the length of time they are exposed to light. It is only in recent investigations that scientists have recognized this fact which is of particular importance to those who are growing flowers and vegetables under glass.

According to J. K. Shaffer, of the Dominion laboratory of Plant pathology at Saanichton, B.C., plants that have naturally in the long day period will come more rapidly and flower or mature grains by increasing the length of day by artificial illumination. On the other hand, plants that naturally bloom during short period or that when days are short may often be induced to bloom under glare of the lengthy day or not be adversely shortened by shocking.

Apparently the plants respond to what they recognize as their natural conditions and did the hens which went to roost when the sun was in eclipse last summer.

In addition to these plants which are affected by long or short day periods, there is a third group, which cares little or nothing whether the sun shines much or less.

Another effect of artificial light in the greenhouse is to check certain greenhouse diseases such as mildew and leaf mould, which otherwise are apt to develop during dull days. Also the artificial light in the days tends to harden the tissue and develop the root system of the plants.

Technical agriculturists are taking advantage of electrical lighting and shading to synchronize the the blossoming time of varieties they wish to cross. For instance it might be difficult to cross early and late varieties of peas if it were not possible to advance or retard the bloom by this artificial means. In all plant breeding and disease work, artificial illumination has been of the greatest practical importance, cutting down the length of experiments by years.

To get their position to move on last night, a number of varieties of plants have been tested out together with its cost per kilowatt hour at the Saanichton experimental station. This maturing period has been speeded up as much as ninety days and in some cases retarded by the extra light.

As there are many acres of plants under glass in Canada today, the result of this investigation is of much importance to the growers, as well as to the scientists who are developing new species, or studying diseases.

Strong north light has long been considered essential for grading grain. Now according to tests that have been made by the National Research Council, artificial lighting units have been perfected which are as good as daylight, and more uniform for even at the best daylight changes from hour to hour.

Electricity has extended the hours which humans work and it may be that human beings would work more effectively if the hours of daylight, natural and artificial, were restricted as has been found to be the case with plants.

Selling Wheat Abroad

Almost Sixty Countries Purchased From Canada Last Year

Canadian wheat last year was sold to almost 60 countries, made up of 30 within the empire and the balance beyond empire boundaries. Of the total of 180,000,000 bushels to export ports as less than 135,000,000 bushels went to the United Kingdom.

France and Belgium purchased each about 14,000,000 bushels. Italy and the Netherlands together accounted for 21,000,000 bushels; China and Japan, 13,000,000 bushels; Germany, 6,000,000 bushels; and Greece, 5,000,000; Norway, Sweden and Portugal about 1,000,000 bushels each.

A wise man would rather be ignored than bored.

Mexico has enacted a law to prevent speculation in exchange.

ENGLAND DEVELOPS NEW TRANSPORT PLANE

Our picture shows a new transport plane which has been built for the British Air Ministry, undergoing trial flights at Hanworth Aerodrome, Norwich. This giant machine has been designed to carry 1,000 pounds of mail for at least 1,000 miles and has a cruising speed of more than 150 miles per hour. Its top speed is more than 200 miles per hour.

An Interesting Race

Old Horses On Thames, Take Part In Contest For Championship

The sport of rowing old grave ugly and of showing a bustling world that the claims of sport are not the monopoly of youth was demonstrated on the Thames when rooster bow-sprit and staysail barges took part in the race for the championship of the Thames. The course is from Lower Hope Point to the Mouse Lightship and back to Gravesend, a distance of approximately 30 miles. Most of the representatives of an industry whose genealogy goes back to the 14th century, are in the prime of barge life, which records show, in one case at least, to 130 years.

Of those who earn their living on the river, the bargemen are particularly able for the small number of casualties they suffer compared with the great risks they run. Whether they are taking their ease among the miscellaneous craft in the pool or tackling the tide in the open reaches, the bargemasters appear to have nerves of steel to overcome the hazards they take on to the short time almost steer before turning their craft about to about diagonally across, their massive rudders scarcely felt, with the wheel resting the engagers on the leeward side.

For the best fortnight or more before the race the barges go through a severe preparation, and their crews work hard to achieve the degree of fitness required thereafter for the contest There is no lying start as in yacht racing. All the barges are anchored in a line, and at the signal to go, they must scramble aboard, haul the anchors break the surface and are safely stowed. Then the master's task begins; and he should be carefully observed, the massive mainsail amidst from the great spit like the dragon of a Chinese curtain as he guides his barge into the wind. Arms shoot up and down before the moment as more canvas is heaved above.

A beautiful scene meets the eye as this miniature fleet of river and coastal craft, the latter carrying a greater area of canvas, sweeps to windward, the blackleaded bulls giving relief to the muddy waters which are whipped into a foam of dirty white as the barges cut their way through the broadening line of the river past Erith Ferry and towards to the Mouse Lightship. There they wheel around almost in their own length and the most exciting part of the race begins on the return for home

All the arts of legitimate sailing are brought into use, the tacking and slackening as one competitor after another seen and seizes an opportunity for advantage Round the tortuous bends of the river they glide, until at length the final lap marked by the Crown buoy brings them into Gravesend Reach. A few minutes more and victory is won amid the shrieking sirens of the tugs and ships

Fine and Costly

Magistrate (in traffic court)—"I'll let you off with a fine this time, but another day I'll send you to jail."

Driver—"Sort of a weather forecast."

Magistrate—"What do you mean?"

Driver—"Fine today—cooler tomorrow."

Suffer From Trachoma

Serious Eye Disease Breaks Out Among Ki' Indians

Forty-three cases of trachoma, a chronic affecting the eyes are reported at an Indian Chapman mainly among Indians on reserves in vital statistics released at Victoria B.C.

Dr. J. J. Wall, eye specialist of the Dominion Department has been making a survey of health conditions among Indians for the past year and discovered trachoma is prevalent among nearly all tribes he has inspected.

Steps are being taken to deal with the situation which, while not considered alarming, is serious enough the annual rigid inspection of all reserves

Only One Reigning Queen

95 Sketches Of Medieval Men Collected and Given Archives

Wilhelmina, Queen of Holland has the distinction of being the only reigning woman monarch in the world Her Majesty, who is 53 years of age, has already celebrated her silver jubilee being crowned when 18 years old She spends most of her time at her residence near Amsterdam, where she paints water colors and goes long rides daily Her court is very simple Wilhelmina speaks several languages and is also a brilliant and golf enthusiast Visiting statesmen present at the openings of her parliaments all remark on the charity of her speech.

A Lucky Request

If you want anything ask for it. When he was Miss Althea, Lord Beaverbrook was staying at a Yorkshire hotel. The butler who carried his egg up to his room asked him for a job. The request was granted there and then Today, that bell-boy, E. J. Robertson, is one of Lord Beaverbrook's "right hand men" and, as manager of the Canadian Press newspaper the London Daily Express, is in receipt of an income of £10,000.

A recipe is either too good to keep or not worth keeping.

Learning To Work

Man; Opportunities On Farm To Learn Use Of Hand and Hands

During the long summer holidays boys on the farm can find plenty to do learning to work, and it is very important that opportunities should be found for them boys need to be able to use their hands expertly as well as their minds. If not they will find the row rough and steep at the outset of life Girls have the chance to learn to work in their homes under the direction of their mothers. the best of all teachers. Of course a boy should have some time to play, but idleness is a great stumbling block in the way of life, and is a nerve read to death than work

Something Worth While

Investment In Youth Is Most Excellent Speculation Known

In times like these invest in boys and girls Men talk about buying stock at the bottom When you invest in a boy or girl you are always buying at the bottom. You are sure that the newspaper is going up, and there is no telling how far I invite every man and woman in America to take a flyer in Childhood Preferred. I predict it a great future for this security. It has investment merit combined with the most exciting speculative possibilities. You are sure to get a man or a woman you may get a great man or a great woman

Trusted Their Chief

In the first use of the new radio equipment for policemen, the chief constables of Nottingham England broadcast the description of a man wanted, the cruiser cars jumped on the trail, and when they stopped the "fugitive" driver they found he was the chief constable himself.

Caught Albino Robin

An albino robin white feathers, pink eyes and all was caught by Mrs Owego Gibbard in the yard of her home at Niagara Falls New York She was attracted to it when a score of other robins gathered about it in her yard chirping excitedly

Simplified English

Ordinary Conversation Can Be Carried on With 850 Words

Foreigners state that they find learning the English language very difficult Possibly that is not be one of the number of words. words are plenty enough on all occasions For the new Oxford dictionary is said to contain over half a million, but its variations in spelling and pronunciation are exceedingly trying Words ending in "ough" can be pronounced in various ways, "cough" and "dough" hard or soft, and pears are terribly thing As a Frenchman once said "If the plural of mouse is mice" it isn't the plural of house is hice We give it up.

An Anglo-American C. K Ogden, of the Orthological Institute Cambridge has been working for ten years on the production of a simplified English language He calls it "Basic English," and it consists of only 850 words He can put them all on one sheet of paper and he claims that ordinary conversation can be carried on by these words

His 850 words include 600 names of things One hundred and fifty words supply all the necessary adjectives Eighty-two words cover all the prepositions pronouns, articles and adverbs There are only 18 verbs which Ogden calls "operators."

The whole of the grammar could be summarized on a postcard as follows.

1 Plurals in s"

2 Derivatives in "er," "ing," and ed from 300 nouns

3 Adverbs in "ly" from the adjectives

4 Degrees with "more" and most"

5 Questions by inversion or "do"

6 Conjugation of auxiliary and the 18 verb forms. Measurements, numerals, currency calendar, and international terms are same in English

It is claimed for basic English that the normal intelligent foreigner between 16 and 21 can master it in 240 days For the English-speaking person who has to learn to eliminate and not add new words the Lone is slightly longer

Of course, this does not allow for the needs of the great scientific, engineering or other writer but for the ordinary man-in-the-street As a matter of fact a large percentage of people do not use more than this number of words or a great many more Even well educated people seldom go beyond 2,000 If the most versatile of speakers wrote his own every word he knows his list would not extend beyond 10,000.

It would be a glaring if education limited our knowledge of the language to 5,000 words Then perhaps some of our Parliamentary and platform conglomerations would not talk such a long time to say what is in their minds. St. Thomas Times-Journal.

Anxious To Help Canada

London Post Advocates Policy To Aid Dominion In Every Way

The Morning Post, Conservative London daily, said it would like to see a publicity campaign of government policy to take nothing from Russia which can be taken from Canada, and give nothing to Russia which can be given to Canada

In a long Dominion Day editorial the newspaper said there is little advertised wheat from Russia which is not the claim of the depression to be followed from an illimitable supply of wheat from Russia. The Canadian people and the Dominion Government banking organization

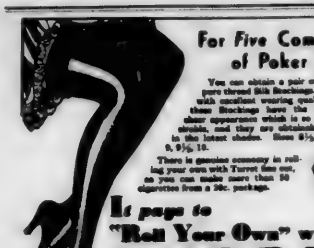
Agricultural Progress

Agricultural progress in Canada typified and measured by the expansion of crop acreages by the increase of livestock improvements in the product higher quality commodities as the careful supervision of grades toward the standards and requirements of both domestic and export

Edison's Life Dramatized

Edmund Kostral, a Canadian author, has written a play on Edison, dealing with the life Thomas A. Edison beginning with the life of the inventor when he was 16, and of his later experiments. The Edison play will be given this fall at the Czech National theatre of Prague

FANCIFUL FABLES



For Five Complete Sets of Poker Hands

You can obtain a pair of first quality Ladies' pure thread Silk Stockings, 45 gauge. Combined with excellent wearing qualities, these Stockings have the fault, sheer appearance which is so desirable except they are obtainable in the latest shades. Sizes 8½, 9, 9½, 10.

There is genuine economy in roll-ing your own with Turret fine cut, as you can make more than 50 cigarettes from a 25c. package.

It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO

Canadian Authors Tour Britain

Party Of Fifty Will Visit Literary Centres of the British Isles

Following the annual convention of the Canadian Authors' Association which this year was held in Quebec City, a party of about 50 Canadian authors and their friends sailed (Aug 1st) on the "Empress of Britain" for a tour of the literary centres in the United Isles. They will be met by some of the most distinguished members of Great Britain and will experience the advantages of personal contact with the scenes depicted in English literature including the country of Hardy's "Tess" the spot where Tennyson wrote "Ode to the Flanders-gale," Westminster Abbey, Dr. Johnson's house, the inn made famous by Sam Weller, Stratford-on-Avon, Kenilworth Castle, Wordsworth's home, the Robert Burns' country, and other centres of literary interest.

Among those who, it is expected, will extend courtesies and greetings to the visiting Canadians will be Sir James Barrie, Rudyard Kipling, John Buchan, John Masefield, Sir Henry Newbolt, J. B Priestley, John Drinkwater and George Bernard Shaw. There will also be recognition by the leading public bodies and parliamentarians.

The Canadian Authors' Association was organized in 1921 with a view to promoting the interests and encouraging the literature of Canada. It has members from coast to coast and a membership of about 800 The associa-tion has helped to disclose the very substantial amount of talent that Can-adian writers are making to current literature—a contribution worth just as much as any other form of endeav-ors to the fact that a large part of Canada's literary production finds its way in book form through the chan-nels afforded by publishing houses in the British Isles and the United States, with the result that members of well-known Canadian writers are commonly regarded as being English-men or Americans. During the 13 years since the association was or-ganized great advances have been made in the Canadian publishing in-dustry, particularly by the field of magazines and literary periodicals.

Great Mosaic Enlarging

Dome Of Cenotaph Square Now Headquarters In London

At one of the greatest Masonic gatherings which has been held in the Dominion, Canada has been honored by the Duke of Connaught, Grand Mas-ter, opened the new Masonic head-quarters adjoining the old Masonic tem-ple in Great Queen Street. The lofty tower of the new building rises above the most memorable buildings of the neighboring Kingsway. There is a great inner temple surrounded by 18 lodge rooms, a large museum and library and extensive administrative offices. The cost which rose to well over £1,000,000, was raised on the personal appeal of the Duke of Connaught just after the close of the war. The building will be a memorial both to the dead of the war and to many Freemasons who fell in action.

DEBORAH

Golden Text "God is our refuge and strength. A very present help in trouble." Psalm 46:1

Lesson Judges Chapters 4, 5

Devotional Reading Psalm 46 1-3, 8-11.

Explanations and Comments

Israel Oppressed By Sisera, Captain Of Jabin, King Of Canaan, Chap 4 1-3.—"It is easy to fail to discover a great crate between the verses of an old narrative, but this was a great crisis. Here was a weak and strug-gling people, whose future was at in-stance consequence to the whole his-tory of religion, charged with a mighty spiritual destiny, and in dan-ger of just ceasing to be anything at all before they had even begun to be what they were meant to be Their spirits were broken. Those chariots drove across their very soul. If ever their leaders came together they said 'It's no use. Sisera is too much for us: we have only foot soldiers, poorly armed. If we should rise against Sisera, he would only ride in-doors the more fiercely.' And then, when the most were of no use at all, a woman turned the tide of history.

"Something very much like that happened in France five hundred years ago. England had France in the hollow of her hand, the spirit of the French was broken; the State was divided, the king was a weak-ling with no thought but of his own pleasures Then a peasant girl heard voices, and her soul kindled within her. She hoarded the misunder-ing spirit of her race with her own kindling fire, she saw her King crowned in grey old Rheims Cathe-dral, and, though sh herself died a martyr to the stupidity and cruelty of her time, all the world remembers Joan of Arc There is no limit to what a kindled soul can do when the time is ripe." Glenn Glenn Atkins

Sisera's Challenge To Barak, Chap. 4 6-7. Deborah was a prophet-ess and the judge of Israel at the time She was accustomed to sit under a palm tree (therefore known as the palm tree of Deborah) and declared what was the judgment of God in national affairs, and also set-tled disputes among men On a coin of the Roman Empire, which repre-sents the capture of Jerusalem, Judea is pictured as a woman seated under a palm tree, captive and mourn-ing "It is the contrast of that inson-ation which will best place before us the character and calling of Deborah," Dean Stanley writes. "It is the image of Judaea palm under whose shadow she sits, but not with downcast eyes and clasped hands and extinguished spirit, but with all the fire of faith and energy, eager for the battle, confident of the victory."

Barak Sent By God's directing hand such as empowered Joan of Arc for her task. Deborah summoned Barak and ordered him to raise a force of ten thousand men from the tribes of Naphtali and Zebulun and attack Sisera with his chariots and his mul-titude at the River Kishon. Since these two tribes were called because they were the most interested in de-fending the approaches to the fertile valley bordered the Plain of Esdraelon. Barak I will deliver him into thine hand"—Deborah is speaking in the name of Jehovah.

Peak Popular in Canada

Consumption Of Apples, Oranges and Bananas Is Heavy

Notwithstanding the fact that the people of Canada eat more eggs and butter than the people of any other country and register high in meat consumption they also enjoy fruit. The statisticians of the Canadian Govern-ment have just released the figures of fruit consumption in Canada for the fiscal year ended March 31, 1933, which show that the domestic con-sumption of apples was 2,272,169 bar-rels of oranges 2,663,471 boxes, and 5,825,900 stems of bananas. On the basis of the population of 10,508,000 the average per capita consumption was about one-fifth of a barrel of ap-ples, more than one-quarter of a box of oranges, and less than one-third of a stem of bananas.

The total domestic consumption of the commercial apple crop grown in Canada has been fairly consistent during the past ten years, varying in a somewhat the same manner as commercial production, whereas im-ports show a gradual decrease where has been more rapid during the last two years. Bananas show a steady increase in imports, but while these during the 1932-33 season to about the 1927-31 level, although the popu-lation has increased at a greater rate and during the last three years con-sumption per capita has declined. Im-ports of oranges vary from year to year and show no decided trend to decrease or increase, which trend is also lacking in the consumption per capita.

To Measure Wind Resistance

Seven Hundred Miles An-Hour Tunnel Built At English Laboratory

Important improvements in the range and accuracy of shell and rifle fire will result, it is hoped, from a new 700 miles-an hour wind tunnel, which is to be constructed at the Na-tional Physical Laboratory Teddington England.

The tunnel will provide the fastest stream of air which has yet been pro-duced with a velocity nearly equal to that at which sound travels through air This will render it pos-sible for the first time for wind re-sistance to be measured at speeds close-ly approximating to the highest muzz-le velocities attainable

As a result research workers will be able to obtain exact data on the relative merits of projectiles con-structed with various modifications to existing standard shapes. Instead of elaborate and costly gunfire trials such as projectiles the whole work will be performed in the laboratory The air will rush past the shell instead of the shell rushing through the air

The chief directions in which im-provement may be expected are in in-creased range in the case of shell fire, and greater resistance to "drift" due to a sideways wind, in the case of rifle fire In the latter case it will be possible to reproduce the full effect of the wind of any desired strength by placing the bullet to be tested at a small angle to the 700-miles-an-hour stream.

The importance of such practical tests lies in the fact that hitherto it has proved impossible to make pro-gress in certain of the disturbance caused on theory alone. With both ships and aircraft it has been found that improvements can be obtained by apparently insignificant changes in design.

In the method which will be adopt-ed in the projectile will be suspended in the wind tunnel by an apparatus which will automatically record the various forces exerted on the projectile This record can be transmitted by elec-trical means to an observer outside the wind tunnel, and a knowledge of every-thing that is happening to the projec-tile as if he were in the tunnel.

The new tunnel is to be construct-ed, in order to make use of the enor-mous air pressure developed in the laboratory's compressed air tunnel for aircraft testing, which is ready to be-gin work.

When testing in this tunnel is com-pleted, the air it contains, which en-orts a flow of 5,000 tons, will be released through the new projectile tunnel. It is estimated that the loss of air will last for about twenty min-utes at the full speed. In addition to projectile tests the tunnel will be used to measure the forces on the tops of aeroplane propellers, from which other improvements are expected.

The cost of the compressed air tunnel, which alone makes the project-tile tunnel a possibility, is a minor triumph for the British steel industry, its components are so large that it was necessary to build the containing building round it. The whole has been tested up to the record pressure of 500 pounds a square inch—more than forty-five times the normal pressure of the atmosphere.

Taking Wonderful Trip

Party Of Ten Manobrai Boys On Way To Yukon

When R.H.S. Manobrai docked in Vancouver, it was just the end of an-other journey for most of the passen-gers, but for 10 boys from Hawaiian Islands, it was arrival at the step-ping-off place for magnificent ad-ventures.

They are members of a party from Honolulu, under direction of Mr Dayne Beauchamp, and their des-tination is Yukon and Alaska, where they will do nothing at all except:

Travel 1,600 miles on the Yukon River in small boats; prospect for gold; hotanize; take samples of plankton (minute fish food); take moving pictures. They have arranged for canoe boats at Whitehorse, and will build others.

The boys, ranging in age from 14 to 17, were picked for their physical and mental ability. They will visit Dawson, Fort Yukon and Tanana on their trip down the Yukon.

POWERS AGREE TO SUSPEND WORLD PARLEY

Plan New Processing Tax

U.S. Farm Officials Expe t Large Returns From Levy On Hogs

Washington United States farm administrators have drafted tentative plans calling for a processing tax on hogs by Oct 1 to provide up to $100,000,000 to finance a general of the Farm Act to curn and restrict

The plans will not take final form until after a meeting of corn and hog producers and their representa-tives which secretary of agriculture Henry Wallace has suggested be called in mid-July to obtain a crys-tection of sentiment regarding the relation of the act to the two re-lated products of the corn belt that have suffered from low prices in recent years.

If the levy is approved in connec-tion with a corn-hog program to be worked out by August 1, it would be the fourth processing tax to go into effect before winter sets in

The 3-cent a bushel wheat tax became effective at midnight July 8, a manufacturers' processing tax on cotton probably four cents a to-be come effective on August 1 if the re-sign production campaign now under way in the cotton belt suc-ceeds, and a processing tax of about six cents a pound is to be levied on cigar leaf tobaccos by October 1

Death Toll Was Heavy

Accidents Take 164 Lives In U.S. On Independence Day

New York. Lives of 164 men wo-men and children paid for the cele-bration in United States, of July 4th, 157th anniversary of the republic.

Automobiles accounted for 62 deaths, 66 persons drowned, six died as a result of burns and 30 were killed from other accidental causes

Thousands of other celebrants suffered injuries, many severe, and ally hurt and property damage was heavy Shootings, fights and aeroplane accidents contributed to the horrified spectators at the world's fair.

Peculiarly, Chicago, the play cen-tre of the nation as the result of the Century of Progress, escaped with but three automobile fatal-ities despite traffic-clogged streets that jammed nearby crowds into the world's fair ground.

Electrify Grain Elevators

Big Program Of Work Is Started In Alberta

Calgary, Alberta.—All electrifica-tion programs for 173 Alberta grain elevators, involving $125,000, has been started, according to the Calgary "Albertan." All switching and con-veying machinery will be motor-driven in Canada. Eastern manufacturers will turn out about 600 electrical motors, the paper adds, the co-opera-tion of elevator companies, equip-ment manufacturers, contractors and officials of the Calgary Power Com-pany, power supply source, making the program possible. The work will bring jobs to men at present unem-ployed, the paper concludes.

May Take Vacation

Health Of Sir John Simon Is Causing Anxiety

London, Eng. The health of Sir John Simon, British Secretary for Foreign Affairs, is causing increasing anxiety to his friends and it is un-derstood he may take a long vaca-tion, probably at sea.

A prevalent fear has been men-tioned if the low blood pressure, from which he is suffering, makes his con-tinuation in office inadvisable.

He was reported to have sold his country estate, Fritwell Manor, in Oxford

King Opening Big Dock

Southampton, Eng. The greatest dry dock in the world, built at Southampton for the Southern rail-way at a cost of $10,000,000, will be opened by the King July 26. During The construction of the dock 2,000,-000 tons of earth and mud were excavated from the site and 750,000 tons of concrete were used.

Fisheries Executive Retired

Niagara Falls, Ont. Five dental offices in Hamilton and Niagara Falls were broken into and ransacked for gold leaf, gold, scrap and false teeth by thieves. At Hamilton loss to three dentists through theft amounted to close to $400.

BRAINS ROTARY

John Nelson, native of Paisley Ontario, and at one time editor or publisher of several leading Cana-dian newspapers, who was elected recently elected president of Rotary International at the meeting in Bos-ton.

Whales From Churchill

To Be Placed On Exhibition At Chicago Fair

Saskatoon, Sask. Saskatoon im-ported its first fish from Churchill—thirty salmonier herring for bait at its fish hatchery. Each and 20 were eclipsed by three white whales, des-tined not for dinner tables but the world's fair at Chicag.

Procured for the Chicago show the whales were caught off Churchill on June 29 and it is expected that they will make their first public ap-pearance here during the next few days B H Stebbings Saskatoon is endeavoring to make arrangements for showing them in a local cold stor-age plant

The snowy whales are in fer for the train journey south

Mr Stebbings also expects to com-plete arrangements for a showing this summer at the close "A" west-ern farm circuit.

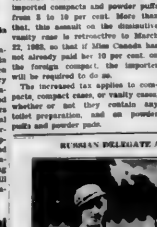
Tax Compacts

Duty Boosted On Imported Powder Puff.

Ottawa. Cut Muddy's odds to beauty are going to cost her more Recently the Minister of National Revenue boosted the excise tax on imported compacts and powder puffs from 3 to 10 per cent. More than that, this assault on the diminutive vanity case is retroactive to March 22, 1933, so that if Miss Canada has already paid her 10 per cent on the foreign compact, the importer will be required to do so.

The increased tax applies to com-pacts, compact cases, or vanity cases, whether or not they contain any toilet preparation, and on powder puffs and powder puffs.

RUSSIAN DELEGATE AND HIS EVELESS WIFE



Here we see V. Litvinoff, leader of the Soviet Union delegation to the World Economic Conference, leaving the Geological Museum, where the conference is in session, with his wife, who is an Englishwoman.

Receive Warm Welcome

Thornton and MacDonald Reach Home After Release From Soviet Prison

London, Eng Cheers, flowers and kisses awaited L. C Thornton and William MacDonald as they arrived here, released by the Soviet au-thorities, from prison where they were serving sentences imposed on convic-tion of bribery and espionage

Thousands thronged the station's platform to welcome back the men whose freedom was obtained by the British exchange on Russian trade

Thornton's little daughter somehow was passed through the crowd to her daddy's ear almost before the train stopped and was immediately in her father's embrace

Thornton declared he and MacDon-ald were full of gratitude to the British government and the British people for so staunchly taking action which resulted in their release

He also expressed gratitude to Sir Edmund Orey, former British ambas-sador in Moscow and gratification at the confidence their own company had shown in the accused

Would Become Citizen

Foreign To Apply For Naturalization Papers

Kamsack Sask. Making his first appearance in public since he was re-leased by order of Mr Justice R. A Robson at Winnipeg from custody of immigration officials who had twice attempted to deport him as an alien Peter Vereyin Doukhobor leader and 2 000 of his followers from all parts of Saskatchewan and Manitoba be-had completed his five years' resi-dence in Canada and he intends to ap-ply for naturalization papers.

In the course of an address which dealt largely with religious matters, the spiritual as well as temporal head of the Christian Community of Uni-versal Brotherhood, appealed to his audience to donate money to help suf-fering members of the community in Russia.

Independent Doukhobors at the meeting expressed the opinion the first duty of the community lay to-ward those of Canada's 16,000 Doukhobors who are suffering.

To Brave Niagara

Plans To Go Over the Falls In a Barrel

Niagara Falls, Ont. Planning to venture over the foaming cataracts of Niagara Falls, Alfred Rixon, of this city, is scheduled this month to make the daring plunge, encased in an iron torpedo-shaped barrel

The barrel Rixon intends to use, is of steel construction with a port-hole locking from the inside.

Rixon intends to plunge over the Horseshoe Falls and through the lower rapids to Queenston.

BUYING POWER OF WHEAT IS UP FIFTY PER CENT.

Winnipeg, Man.- Purchasing pow-er of wheat in western Canada over things that farmers buy" today stands at 70 per cent of the 1913-14 price compared with 40 per cent in mid-April and only 32 per cent on December 16, last year, when wheat fell to 34 cents per bushel in Winnipeg market and touched the lowest point in the history of the grain trade

These figures are shown in the farmers index chart compiled by the Searle Grain Company Limited Index figures on livestock show cattle with purchasing power of 39 per cent of the pre-war price, hogs 53 per cent, and lambs 72 per cent.

Price of wheat used in the com-pilation is that paid to farmers at elevators in western Canada for No. 1 Northern on the basis of 35 cents per 100 pounds freight which is the present rate.

In the things farmers buy are listed 146 items essential to an average grower in the west to carry on production.

There are 16 items of groceries, 37 items of clothing 20 items of household equipment, 51 items of farm equipment, 11 items of farm machinery, and two items of munici-pal taxes in the list

The compilation notes that the index of things farmers buy is still 127 per cent. of the 1913-14 level

Women Will Supervise Refueling Of Monoplane

Minneapolis Girl To Aid Post At Two Wheeling Points

New York Miss Fay Gillis, 23, of Minneapolis, will direct the refueling of Wiley Post's monoplane, "Winnie Mae," at Chamberlain, S. D., Siberian points on his projected world solo flight.

Lee Trenholm, Post's representa-tive, said Miss Gillis had left Moscow on June 25 for Novo-Sibirsk, where the aviator plans to stop after leav-ing Berlin. While Post eats and takes a short nap, she will supervise re-plenishment of the gas tanks and any adjustments the plane needs.

Princess Royal Must Rest

Only Daughter Of King George Cancels All Engagements

London. A bulletin was announced today that the princess royal has cancelled all her engagements.

"There is no cause for alarm" than that her royal highness has to rest." it was stated at her London home.

The Countess of Harewood, the princess royal, is Mary, the only daughter of King George and Queen Mary of England.

Chinese Food Institute

Chicago The Chinese Consolidated Benevolent Association protested to the Century of Progress Exposition officials against the inclusion of the southern Manchukuo exhibit in the Japanese concession at the exposi-tion A letter signed by Chow Low, president of the association, called the exhibit "a direct insult" by the Japanese.

R.C.M.P. Promotions

Ottawa, Ont. Two promotions to the rank of acting superintendent were announced from headquarters of the Royal Canadian Mounted Police here Inspector V. A. M. Kemp, adjutant of the force here and Inspector Herbert Darling, assistant to the director of criminal investigation in Ottawa, re-ceive these appointments as from July 1

Historical Page 84

Prince Albert, Sask Four hundred performers will take part in the his-torical pageant being prepared for the golden jubilee Prince Albert an-nual exhibition July 31 to August 3 inclusive One hundred and eight small girls, 64 young men and 212 young women will be required for the production being prepared for pre-sentation before the grand stand.

Says Capitalist Nations Should Pool All Scientific Knowledge To Meet Soviet Trade Challenge

Warning that capitalistic nations must pool all scientific knowledge and trade secrets to meet the "challenge of Soviet Russia's planned industrial system and end unemployment," was voiced before the American Association for the Advancement of Science.

Only by this means could the nations that now are in the lead industrially maintain this lead, said Dr. A. P. M. Fleming, engineer of the Metropolitan-Vickers Electrical Company of England, one of the 20 foreign scientists invited to speak before the summer meeting of the organization.

"They in the U.S.S.R.," he said, "a larger body of organized research workers under unified control than exists in any other individual country in the world. The Soviet government looks to science to play a most important part in its industrial and economic activities.

"Whether the Soviet plans succeed or fail, already enough has been accomplished to show the possibilities of this combined scientific effort. Even partial success may have far reaching effects on the rest of the industrial world.

"The situation is developing at a time when there is little material distinction between the other countries and there is no doubt that this change of a communal to a competitive plan justifies a careful consideration of the advantages of forced or co-operation especially in the matter of pooling of scientific resources and experience.

"With the load that the foreign manufacturing countries jointly pursue and with the fullest use being made of their joint scientific resources, it should be possible to meet the challenge successfully."

Navigates Her Own Craft

Twenty-One Year-Old Miss Seeks Land Into Mother's Paper.

Nova Scotia has almost no many sea captains as Kentucky has colonels, with the difference that the Bluenose claims have a better right to their titles because of experience, ability and valor. But one captain among them seems unique—unique because she is a woman.

Captain Mildred I. Wamboldt, 21-year-old native of Lahave is probably the only female in Nova Scotia who not only owns, but handles, her master's papers and actually navigates her vessel. And the craft is no toy yacht. It is the 431 gross tonn schooner E. F. Theriault.

"Why, I don't think I could live if I had to stay ashore," the pretty young sailor declared.

Born of a long line of sea-faring forefathers, it hands that she wasn't born six months ashore in the past nine years. Head to the sea she made many trips with her father-Skipper Eulgence Publicover, Station Island, N.Y., formerly of LaHave. Then she made a special study of navigation.

Now her schooner is registered in her name. As master, she signs the necessary papers, presumably not the least of the work, and runs to the farm head her crew of nine Nova Scotian and eight natives of Barbados. Most ports entered are familiar to her voyages, but only as such. She trusts the schooner to navigate but herself.

Captain Mildred is an inveterate saver. Last February she retired from Turks' Island with salt for Nova York, but when Sir Alden Dixon, master, the craft was caught in a terrific gale. The vessel was forced to turn and run before the wind. Her sails were stripped from her and her gear damaged, by the time the hurricane had blown itself out, the E. F. Theriault had been blown within 150 miles of Barbados. The young captain put into the islands, and said her cargo there.

She makes Barbados from Shelburne in 16 days, and from Bridgewater in 17 and 12 days, on different voyages. She made a trip from Bridgewater to Turks Island in 12 days, all considered very good time.

The E. F. Theriault, built on the Family shore, is now registered at Bridgewater, Shelburne.

Where Men Excel

Better Than Women At Guessing What Children Like

Men are more adept at selecting accessories for children than are women, says Florence Sansberger, one of the two women professors at Johns Hopkins University. Men know better what children like, women know better what is good for them, she contends.

Miss Sansberger bases her belief on an experiment she conducted in compiling information for a volume on the art of decorating children's books. In this, she discovered men were able to select subjects that appealed more to children than were women. The reason for men's ability along this line, she thinks, comes from the fact that they have more contact with the children to largely to play. Women are occupied with the technical aspects of sewing clothes.

Chemical Changes In Liquids

Scientists Find Slight Physical Results Will Kill Bacteria.

If the baby could cry at a higher pitch he might help make his cows milk more digestible.

A study of the effect of sounds in causing chemical changes in milk was reported to the American association for the Advancement of Science by Dr R. W. Fessford and L. A. Chambers of the University of Pennsylvania Medical School.

Scientists have recently learned that bacteria in milk, water, fruit juices and other liquids can be killed by "super sounds" of very high pitch.

Not In His Line

Paddy, who was eager to obtain work went to the employment exchange.

"Anything this morning?" he was asked.

"Yes," said the clerk, after consulting his books, "there's a job at the Eagle Laundry. Do you want it?"

Paddy chirked uneasily from one foot to another.

"Well," he said, "it's like this, I really want work mighty bad, but the fact is I ain't never washed an eagle."

Never Longer Here

Chief citizenship of the state museum in Missouri's state house at Jefferson City are a pair of skeins, one 31, some worn by Miss Ella Ewing, the other by native Missourian, who died several years ago, and was 8 foot 4 inches tall. She was supposed to be the "tallest woman in the world" during her life.

712

TAKE OFF YOUR SCARF! JUST AS YOU PLEASE!

It's smart as can be either way. An everyone knows Diane Fenton is very fond of capes for spring.

And here's a darling model that is very versatile. Take off the cape and you have another dress.

Down blue crinkly crepe silk carried out this fascinating model.

A crepe silk print would be charming.

Style No. 712 is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 4 yards 39-inch with ¾ yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Prince Of Wales Expresses Confidence In Canada's Ability To Emerge From Depression

Very Easy To Obtain

Newspaper Claims Unfavorable Publicity Is Paid Freely In England

Two drugs capable of killing a man without trace are on sale in many chemists throughout the country, says a London newspaper.

They were supplied without question to any person who demands them. One of them leaves no "poison mark" on the bottle.

Neither of them can be detected after death.

Many poisonous substances are obtainable from all chemists, but these two are remarkable for the ease with which they are bought for the impossibility of tracing them once they have been administered, and for the fact that they produce symptoms similar to illness due to natural causes.

The pathologist of a famous London hospital questioned by a newspaper representative about one of these substances, said "If ever I wished to commit murder, this is what I should choose."

It is a protein-like compound, in daily use for the treatment of a common disease. It is supplied as a liquid in tubes which bear no poison mark. A child can buy it anywhere.

And yet the injection of the contents of a few ordinary tube into the veins followed by death in from four to six hours.

It is impossible to analyse, and it leaves no trace in the body after death.

A newspaper representative visited a chemist's shop near Oxford Street, and for two shillings he received a tube containing more than a fatal dose of the liquid.

The second deadly poison is a liquid made from the seeds of an Indian tree. The medical dose is one drop, and an overdose results in an exceedingly painful death.

Three grams are enough to produce fatal results.

It, too, is impossible to detect after death.

At the same shop, two grams of the poison were bought for 3s. 6d. For this it was necessary to sign a receipt, but no steps were taken to verify the name and address given, and it was not asked to what use the drug was to be put.

Little Things That Count

Things that help one to sweetness and light: Visit of the children next home to your garden; the inking in your favorite tulip bed or a bow by a vagrant dog; the early rising hour her who plays a lively tune on his piano mover just as you are getting off to your morning's sleep.

Selling Big Japanese Coin

Largest Gold One in World Weighs Almost Four Ounces

The Japanese Obun, the largest gold coin in the world, is to be sold at London, England.

Blessed either with the seals of the government mint, the Japanese Obun is a large oval plate of gold measuring five inches across, and weighs nearly four ounces.

The coin was signed in Japanese ink by the superintendent of the mint as a guarantee of its purity. The signature was considers the most important part of the coin, and if it was rubbed off the plate ceased to be current money.

U.S. Population Increases

The population of the United States has increased 1,515,000 since April 1, 1930, to a new high of 125,690,000, it declared the census bureau in announcing some complicated additions subtractions and divisions, termed it "estimating" because they used the 1930 census as the basis of their work, while data regarding births, deaths, immigration and emigration

Had Long Wait

When Peggy returned from the first day at school she was asked how she enjoyed it.

"I like it all right," said Peggy, "but I didn't get my turn."

"What made you think that you would get a prompt, dear?"

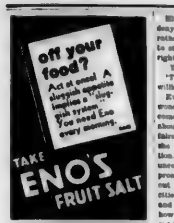
"Teacher said, 'All there for the present'; and I sat there all morning and never got one."

Scott's Surplus Coffee

Brazil this year will have the biggest crop of coffee in history, millions more bags than the whole world uses. It looks as if that country will have to continue its bonfires, having already burned more than 18,000,000 sacks.

KING FEISAL OF IRAK VISITS LONDON

Here we see His Majesty King George leaving Victoria Station with King Feisal of Irak on their way to Buckingham Palace where the Arabian monarch is to stay for a few days. King Feisal is acknowledging an enthusiastic reception by the people of London.



CHAPTER XIII – Continued.

"Now Jimmy was killed. I won't just an' acquaintance' of his; I was the nearest person in the world to him. He came from England, he had no relatives. That little lot of his Elizabeth, it's but four years old, it's helpless here in the North, it's dependent in a terrible sense."

With more harshness than he had ever shown her, he said sharply: "I'm going to look out for Jimmy's child. That's settled. If you don't like it, you don't have to, you know."

His coldness frightened her. It declared all her former assurance that she dominated him. She sensed he wanted to end their engagement and his love for her and now if she gave him sufficient cause. A whisper warned her:

"You may be right about that reward money and Jimmy's little tot. I didn't see your viewpoint, when I first came in here. I won't try to persuade you to do something you feel is wrong."

Watching him intently, she saw he was surprised, and deeply disappointed, at her yielding to him. He wanted to break with her! He wanted her to release him!

A little fearfully she brunched the main purpose of her coming here.

"I heard you're going back into the Mounted."

"Who told you that?"

"I just heard. Several people said so."

"They were a bit hasty."

"Then you're not going back?"

He answered her indirectly. "Williamson offered to step my buying-out papers at division headquarters or else re-enlist me as a constable and promote me to sergeant again. He said he'd write himself to Colonel Steele and explain, and ask Steele to release me, if I'd agree to come back into service."

In her heart Elizabeth was singing at him, contemptuously: "If you go back into that ninety-a-month rut, I'll never marry you! I'll never live here in this backwoods and be shunted from barracks to barracks!" But her lips said to him, with admirable self-control: "You haven't decided? You want time to think it over?"

"You want me to go down to Victoria?" he demanded sharply.

Elizabeth was entirely too wise to deny that. "Yes, I do, Alan. I would rather we lived there. But you would have to stay here, and I don't feel it's my right to dictate your life work."

You're willing to stay here, then?"

"I'm willing to let you decide. I'm willing to stay here, if you want to."

Even while she spoke, she was wondering . . . Why had Haskell come to her tonight with the news about Alan? Against his former "unfairness" and his untrustworthy nature, she weighed his passionate infatuation. The scales hung in the balance, uncertain. Presently, she would promise marriage, but once she was out in Edmonton or the big eastern cities, once she had broken with Alan and put herself in Haskell's power, how could she be sure he would carry out his promise?

She interpreted "I'm sorry I was so sharp about those other things, Alan. I'm dreadfully tired and worn out. This last week, not knowing where you were or if you were in danger it was a nightmare. I think I'll go, if you'd excuse me. We can talk about the tomorrow Alan, can't we?"

"Yes, tomorrow," he said dully. "We can talk about it then."

When she left the cabin and started down the terrace, a lightning flash revealed to her Constable Whipple still sitting forlorn and dismal at the edge of Mrs. Drummond's flower garden. By the window of his tiny study Father Caverly and Alan Joyce had gone There was a light in Inspector Haskell's cabin; he must still be awake.

A few miles down river she heard the distant, long-drawn lowl of the Mackenzie steamer heading up the Endurance and on south to Resolution. The sound awoke a tumult of memories, it seemed like a voice of Elizabeth's life, a voice of civilization that all her being clamored for. She glanced again at Haskell's cabin. He was going south, south to the land of action. It would be like a flight, an escape from this far North country, into the haven of that Ontario estate. His inheritance, his friends, their visitors in glittering Ottawa.

She thought of going over to his cabin to tell him that she had lost the coldness of those last weeks, such an act would be too much an overture, even though she had talked with him this evening Why couldn't she send Whipple to him? Haskell would surely come out to her. . . . . .

* * * * *

In dull uncaring mood, Alan had flung himself down on the bed for a few minutes. Elizabeth had put him almost entirely from her mind, but instead of relaxing, she had got on him no honest cause to brush the engagement himself, but had yielded to him on every point. He felt that Elizabeth was no longer sure of herself, would not greatly care whether she released him or not.

He could hear the voices of the men in the cabin where he had gone to report to his superiors able to those of any paid woman.

But as he contrasted the two of them, Alan checked the brutal thought. Haskell had moved a little in front of Elizabeth. There was something of protection, of sheltering, in the act. Something which all inner sense told Alan respect the man than any act he had ever seen from Haskell.

He did not speak to Elizabeth at all, but ignored her.

"Don't think I came down here to interfere, Haskell," he said, in harsh tones. "I've only patrol on you because I don't think you surprised me tonight. I haven't been blind. You need no sermon on those cowardly patrols on you could be alone with her. You went sneaking around to her while I was keeping her and she was engaged to me."

"You've worked hard enough to get her. You fought me with fists and guns, and the damage is history of this country more real and vivid to the children her. That's what you've got to do. You're not going to put it off; you won't spring something about taking her out to Edmonton or Ottawa; you won't be given any benefit of the doubt. You'll marry her here at Endurance! Before you leave! You'll either do that, or I'll come down there to your cabin and I'll settle with you the way you thought I was going to do tonight!"

He turned on his heel and left them.

(To Be Continued).

Display Of Drinking Cups

Many Of Great Age and Beauty Exhibited in London

The glory of good liquor through 35 centuries was celebrated at the end of this month. On June 21, Princess Alice, Countess of Athlone, opened an exhibition of drinking vessels at the historic hall of the Vintners' Company in the heart of London city.

Cups, tankards, mugs, bottles, and containers of every shape and size, filled by 75 generations of men, were displayed. They were in gold, silver, bronze, porter, wood, leather, and glass. No such assembly has ever before been arranged.

A fragile wineglass, dated a very good, contrasted with a giant "tankard bottle." The glass is 2,000 years old, and was found about 60 years ago at Salonda. It was used by the ancient Greeks, and so perfect is its design that glasses of the same form are still made.

The "Elizabethan bottell" belonged to King Henry VIII, and seems to be connected with his first matrimonial affairs. It was presented to him by Elizabeth Tudor rose and the pomegranate, the badge of Katherine of Aragon.

The bottles were also used by a number of famous men. One stood a foot high, with a capacity of 21 ordinary wine bottles. It was made in the eighteenth century for a society of rage party, and lapsed once that I was to be filled and emptied 21 times.

There were also a series of cups and mugs of the fifteenth, sixteenth and seventeenth centuries. They are beautifully carved and mounted in silver and gold. Some are ornamented with pineapples, a dolphin, and a mermaid. It was made in 1518. Coconuts are also regarded as rare curios.

The donnie savay of Henry VIII's dates from the sixteenth century onwards. The famous silkmaid cup of Queen Elizabeth is, perhaps, one of the most interesting pieces of this kind. It is in the shape of a girl whose skirt forms the cup, and a tap draws the bottle above her head forms a second.

THE RHYMING OPTIMIST
By Edmund Vance Cooke
Cleared, "I'm going to make a change in my life. I'm going to be an optimist. I'm going to look on the bright side of things. I'm going to be happy, healthy and prosperous. I'm going to be a success."

SOUVENIR

It is the same, each well-loved scene of old,
The ships at anchor and ships sailing forth,
The Silver Sight, with glimmer of red and gold
Against the twilight shadows, deepening fast.
No change I find in this remembered place,
Where every image in my heart is stored;
Save, now, my love in the absence of your face,
And I (who can say?) this may be wholly kind.
Better, perhaps, that I can keep you so,
Always quiet and young and proud and free;
Better, a benevolent, that you should grow old.
Only that other fairer, braver me!
Imagined, the sun, the wind, lights red and gold,
And those dear memories God into us hold!

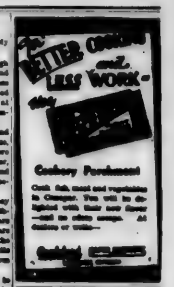
Extermination Of Weeds

Summer Plowing With Double Mould-Board Method Most Satisfactory

Summer plowing is an effective method of killing such weeds as sow thistle and twitch grass. Often, however, the strike-out leaves a strip of undisturbed weeds which again gets into the field. The double strike-out should be employed where possible, for the first make a shallow deep furrow, then turn two light furrows back and complete the strike-out with two beautiful furrows. This uproots all the soil and leaves no undisturbed strips on which the weeds may continue to thrive.—Farmer's Advocate.

Rainless For Fifteen Years

The San Quentin Bulletin turned to statistics long enough to report one prisoner had kept track of all the food he had eaten during 15 years as an inmate of a California prison. His record shows 2,157 hamburger bats, 32,850 slices of bread, 4,975 cups of tea, 8,500 cups of coffee and 370,000 cups of water.



Little Helps For This Week

"He that commands must think aloud if he would be little aided."—Richardson 1675.

Grass can linger beautiful all year A world of light in leaves also.
A name only means a glorious flow,
An eyelid hides the sky.

A single ash, however apparently trifling, however ridiculous it seems when in some corner of our rooms, is the witch we do not intend to remove, because it enough to render that proper impossible. A source of endless joy and interest, it is a constant companion, and its presence is associated with entirely kind and loving habits not inappropriate any of those which surround someone. If we do not intend to remove it we must not, of a sheet out which we might, but do not intend to produce, if we are aware that our most health purposes, our most cherished habits of mind, our most valuable friendships, are those which we do not intend to abandon, here is cause enough for the use of quotation marks.—F. P. Cobbe.

It is necessary to have seen the whole country in order to understand it. It is simple enough when one knows it, but to the casual observer a lake you could put your hand through.—Charles Haddon.

Building Super Locomotive

English Engineer Claims It Will Surpass Famous "Royal Scot"

A new super-locomotive, designed by W. Bowler, mechanical engineer of the London, Midland & Scottish Railway is nearing completion. It is stated that the new engine, constructed mainly of Crewe, will surpass the famous one and speeds of 100 miles per hour even on an English railway. It was originally intended that the locomotive should be built in time to appear at the world's fair at Chicago, but several difficulties arose, and the "Royal Scot" was sent to America instead.

The new locomotive does not feature in orthodox design, for the front part of the boiler gradually tapers off instead of finishing blunt and when finished it is claimed it will be far more imposing than the famous "Royal Scot." It will be approximately the same height but seven or eight feet longer, while its additional speed and pulling power will make it suitable for either fast passenger or heavy freight work.

Interested In Rabbits

The Spezial Canadian history exhibits held in the David Ross McCord Museum at McGill University attracted visitors 4,000 strong on Sunday during the past school year The exhibitions, the object of which was to illustrate in the history of the country more real and vivid to the children studying it, covered periods from the earliest explorations in Canada to the war.

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Watch her how to smile. Then you will know that Lydia E. Pinkham's Vegetable Compound has helped her go "over the hill" to Happyville.

Governor-General Visits Boys' Farm

The annual closing exercises of the Boys' Farm and Training School at Shaughnessy, Que., were held on Wednesday last, the 150 boys of the institution receiving their year's awards at the hands of the Governor-General, who addressed the assembly. Lieut.-Col. Ralph Widdrington, D.S.O., superintendent of the farm, introduced the Governor-General, and the Right Hon. Sir Lomer Gouin, Premier of Quebec, who delivered the address to the boys from the steps of the private residence occupied by R. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, who is now president of the boys' School and a member of directors and trustees of the institution. Mr. Beatty was the object of a great ovation by the boys on the arrival of the special train at the Farm. This is shown in the upper left-hand corner of the big-cut. Lower left is the Governor-General in church standard bearer's garb, while Ralph Widdrington, D.S.O., superintendent of the farm, is seen in the right-hand corner. Lower right is the Governor-General in church standard bearer's garb, while Ralph Widdrington, D.S.O., superintendent of the farm, is seen in the right-hand corner. Lower right is the Governor-General presenting the Little Chap with one of the awards.

SOUTH TRUE

An editorial in a leading paper says that after 10 years in business a newspaperman becomes recognized to the following facts: (1) He will always be regarded as some sort of a freak; (2) That the favors he does will usually go unnoticed, but his mistakes, never; (3) That when he gets in a crowd someone will say jocularly, "don't talk in front of the editor, he'll put it in the paper."

A few months ago we published a list regarding the cost of advertising notices by Clubs, Societies, and Lodges in the Record, lately we have had announcements where the advertisers were under the impression there was no charge for such announcements of that kind. So we decided to publish the list again.

The cost of advertising in the Coming Events, Local or District News Column for a Dance, Play, Concert, Garden Party or Picnic for one insertion is 50c; two insertions 75c. A Tea, Sale of Home Cooking, Flower Sale, Rummage Sale, Card Parties, one insertion 50c; two insertions 75c.

Other prices on application.

These charges are in force and will be therefore charged to the advertiser at the above rates.

When there is a charge of admission or money made or collected, it is only right that the announcement should be paid for when published in the Record.

Hailstorm Damages Crops in the District

What was described by old timers as the most terrific and devastating hailstorm in their experience, swept over the Fort district last Tuesday afternoon, laying waste many of the finest grain fields in the district and causing loss to farmers running into many hundreds of dollars.

The storm, which had been seen gathering in the north-west throughout the afternoon, broke with all its fury about 5:30 p.m. and lasted half an hour.

So far as can be ascertained the area most heavily damaged was in Lamoureux and Fort districts.

The hail extended about a mile east of the Fort and about five miles south, by which time the fury of the storm had been spent.

Most of the hail fell to the north of Town, and whole fields were completely covered by hail so though from a distance.

According to reports among well known farmers hailed out were, Henry Thomas, Reg. Hetmer, Mr. Devereux, Arthur Lamoureux, Joe Paradis and Ed. Gaumont.

Many chickens and ducks were killed by being struck by hailstones which were larger than good sized eggs.

The gardens in town were badly damaged by the hail and wind. Windows were broken in different residences, the United Church chimney and one on Simns as Hall were blown down, and one of the large windows in the Memorial Hall was blown in.

The rural telephone were put out of business, and the Calgary power line suffered severely.

Many poles between the highway and the river bank on Government Street were laid low.

A tree was snapped off and blown against the Community tennis club fence, knocking the fence down flat.

CANNING HINTS

(Experimental Farms Note)

Small Beets may be canned for vegetables by packing in sterilized jars after blanching fifteen minutes and skinning, then to 1 quart jar add 1 teaspoon salt, 1 teaspoon sugar, 1 tablespoon vinegar, then fill to overflowing with boiling water and process one hour.

Strawberries retain their color, and remain distributed in jars when canned by the overnight method. Simmer for five minutes in syrup (3 cups of sugar to 2 cups water) leaving uncovered overnight. In the morning pack in jars and process eight minutes.

Outstanding among the new jellies has been that made from Prunus Tomentosa, or Nanking Cherry, while the underripe Compass Cherry makes an excellent product, as also does rhubarb if used at the very first of the season. White Currants and Gooseberry rank high for dessert tart jellies, and Siberian Apple and Dolgo Crab for mild jelly, the latter being colorful.

The hulled plums are best canned in the same kettle until the skins are tender. The Rosilda Crab Apple, pushed and cooked in the jar is a high quality product of smooth texture, suggesting canned pears.

C.C.F. CONVENTION AT REGINA

All the convention of the C.C.F. in session at Regina it was suggested that the Co-operative Commonwealth Federation might soon come to Canada then the work of the world economic conference at Genoa was made today by J. S. Woodsworth, Winnipeg Labor leader, in his presidential address to the first national convention of the organization.

Gordon Forster, U.F.A. member of Sand Hills will place before the Provincial Government information on crop conditions in Berry Creek district where practically all fodder in the district has been dried up.

CARE OF THE STRAWBERRY PLANTATION AFTER FRUITING

What to do with a strawberry plantation after it has over fruited is a questioned frequently asked.

It is not possible to answer this question in any rule of thumb way, a great deal depends upon the condition of the plantation. If the plantation is full of weeds, Bin rough grass, or if it is very patchy it is better to plough it up. If, on the other hand, it is well rined plantation, reasonably free of weeds, it may pay to practice renovation.

Renovation is accomplished in different ways but it should be remembered that the strawberry plant is not really a true perennial and must be permitted to renew itself by the formation of new runners or the formation of a new crown with a new root system. In the old plantation is left without attention the plants are liable to be so crowded that such a renewal will be difficult.

It is generally advisable therefore to cut down the rows to a narrow width and in doing this the best way is to split the row in the centre leaving one outside edge to form new runners. The outside edges contain the youngest plants and these generally form new runners very rapidly. The renovating should be done as soon as the crop has been removed. After splitting the rows in two, remove the plants that have been dug up and cultivate between the rows thoroughly, hand weed the narrow strip of plants that are left and unless the land is in excellent tilth apply a dressing of about fifty pounds of nitrate of soda per acre between the rows.

If cultivation is continued throughout the balance of the season a full stand of plants should be obtained by autumn and a good crop of fruit the following season.

TENNIS CLUB ENTERTAINED

The Fort Community Tennis Club were the guests of the Eastwood Tennis Club of Edmonton last Wednesday evening.

A series of friendly games were played until dark, then the players adjourned to the Club House nearby, where dancing was enjoyed until a tasty luncheon served by the hostesses brought the delightful evening to a close.

A very good representative of the Fort Tennis Club attended this enjoyable affair.

ALBERTA CROP REPORT No. 8

The general crop situation in southern Alberta has not improved during the past two weeks. Scattered showers have occurred in the southern and south eastern part of the province but these have not been sufficient to overcome drought and forest damage previously reported. In some of this area, particularly in that lying between the Carmangay branch of the C.P.R. and the Red Deer River, crop conditions may be regarded as serious. In the irrigated districts fairly satisfactory conditions prevail but on the dry land especially on spring plowing there has been severe crop damage due to hot dry winds and soil blowing.

Reports indicate that the damage from grasshoppers and other pests has not been serious in a few instances where infestation has been most severe and where drought conditions have greatly retarded crop growth, grasshoppers have caused further deterioration. Hail has damaged crops in a few small areas but it is generally conceded that the attendant moisture has more than offset the damage due to this cause.

Haying is in progress in practically every part of the Province.

Unless rains relieve the situation within a very short time, there will be a distinct pasture and feed shortage in those districts where drought has been most severe.

The sugar beet crop on the irrigated lands of the south is making satisfactory progress and give indications of average yield.

ALBERTA WHEAT POOL

The Financial Post is of the opinion that the Alberta Wheat Pool's position is much stronger than that of the Saskatchewan and Manitoba pools. In an analysis of the Alberta Pool's financial position, the Post points out that the balance sheet indicates a members' equity of close to $4,000,000 and that there is a reasonable assumption that the provincial government appears safe from ultimate loss.

Congratulatory remarks are made regarding the method employed by the pool in pre-voting its statement, the summary being: "The very complete accounts which the pool has made public, and the manner of their presentation, makes examination of the situation easy." It is also mentioned that pool members in Alberta are in a much better position than pool members in other Saskatchewan or Manitoba.

Coming from such a source as the Financial Post, which has never been very friendly to the wheat pools, the Alberta pool members should feel encouraged over the situation surrounding their organization. It has generally been the feeling that the Alberta pool was somewhat more carefully operated than its sister concerns in Manitoba and Saskatchewan and the Post's survey bears this out.

The World's Grain Exhibition and Conference opens next week at Regina, Sask., for 14 days.

Samples of grain from all over the world will be shown and exhibits by the different provinces will be well worth seeing. This is a wonderful opportunity for grain growers to get new ideas on grain farming.
